

2023 Year In Review

By Rob Pue

January 7, 2024

Let's take a look back at the last year, now behind us, and remember all we experienced as we press on into 2024. The year began with the Biden administration allowing the US Postal Service to ignore state abortion bans and send abortion drugs by mail to all fifty states. This followed the June '22 decision by the US Supreme Court overturning Roe v Wade, the 1973 decision that caused the deaths of more than 60 million babies in America.

The Minnesota legislature announced their first order of business would be to enshrine a "right" to completely unrestricted abortion up to the time of birth in that state. Governor Tim Walz signed the bill into law on January 31st, making Minnesota the first state to formally "legalize" such atrocities. In New York City, Mayor Eric Adams announced they'll be offering free abortion drugs at multiple facilities.

Al Gore admitted the Inflation Reduction Act is actually a "Global Climate Change Act." Biden admitted the the same— but not until August.

In February a high-altitude Chinese spy balloon was flying across America. It was finally shot down February 4th, over the Atlantic Ocean off the coast of South Carolina, but not until after it had traversed the entire country.

Hunter Biden finally admitted the infamous laptop, containing

evidence of collusion and bribery by foreign nations, as well as hundreds of videos and other images of Biden having sex with prostitutes and under-age girls, did, indeed, belong to him.

The IRS announced in February that it's investigating all transactions American citizens make of \$600 or more, starting with our 2022 tax returns. Nearly 90,000 new IRS agents, now armed with weapons and pledging their willingness to use deadly force against Americans, are helping with this new project.

On February 3rd, a Norfolk Southern train, carrying hazardous chemicals, including vinyl chloride, derailed in the small community of East Palestine, Ohio. Rather than drain the chemicals from the wrecked tanker cars into other containers, officials drained the deadly chemicals into a nearby ditch and then deliberately ignited them, causing a massive health and environmental catastrophe. Two hundred miles away, paint was peeling off cars and the plastic parts of cars were melting from the chemicals, but officials declared East Palestine citizens need not be concerned and declared the water there safe to drink; despite tens of thousands of dead fish in nearby rivers and lakes. There were more train derailments around the country shortly after this, including in Texas, South Carolina, Nebraska, Florida and West Virginia.

On February 6th, a 7.8 magnitude earthquake struck southern and central Turkey and western Syria, killing at least 59,000 people. Also in February, information was released, indicating the US may well have been responsible for the Russian Nordstream pipeline bombing in September of '22.

As our now-"woke" US military continued to suffer a lack of new recruits, National Guard members who were previously suspended for refusing the COVID jab were ordered back to work, with no back pay. The names – and the fingerprints – of un-jabbed teachers in New York City were sent to the FBI in

February. The concept of “abortion tourism” began in 2023, with multiple pro-death states welcoming those from places that limit the availability of abortion. The Pentagon led the way, announcing it will pay for employees to travel to other states to kill their babies.

Library books and school training courses were in the news last year, with teachers’ associations and Left-wing politicians and organizations pushing for an increased availability of pornographic, homosexual and “transgender” materials in schools and public libraries – with an increased emphasis on limiting parents’ rights to speak against, or even monitor, these materials. One high school teacher in Washington state stated that schools should hide information about children from their parents because kids “are not safe from their Christian-fascist parents.”

And in Spain, a new law decriminalized sexual relations with animals, stating “zoophiles” are just another spectrum on the trans flag.

In March, Tucker Carlson, of Fox News, was given access to more than 44,000 hours of video footage from the January 6, 2021 rally in DC. After airing parts of it, showing there was no “insurrection,” Carlson was essentially fired from Fox News. Hundreds of innocent American citizens remain imprisoned in J6 gulags.

On March 8th, Canada’s Justin Trudeau celebrated “International Womens Day” by proclaiming that “trans” women are women and his government will support them in every way.

On March 10, California’s Silicon Valley Bank collapsed after a bank run, marking the third-largest bank failure in US history. This was the first of five bank failures in 2023 across the nation.

The US Border Patrol once again alerted lawmakers that the agency does not have operational control of the border and

they're dealing with a crisis situation. Since Biden took the White House, the total number of illegals entering the US has exceeded the combined total population of 15 American states.

Attacks against hundreds of pro-life organizations and women's health centers advocating for life continued in 2023. CompassCare in Buffalo, New York, which had been fire-bombed in June of '22 was again attacked by "Jane's Revenge" on March 15th. The FBI has made no arrests in the CompassCare attacks, and their response to these real domestic terrorists has been one of indifference. Meanwhile, in Wisconsin, Republican Assembly Speaker Robin Vos introduced legislation to expand abortion in the state.

Also in March, Kathy Hochul, governor of New York, introduced legislation allowing the government to detain citizens of that state in quarantine camps without notice, without rights and for as long as the government chooses. In December, a New York state appeals court upheld a ruling allowing this to go forward, despite concerns about "due process" violations. Hochul was back in the news in December, with legislation creating a committee to consider reparations to black people for slavery. On the same subject, California decided in June to pay reparations to black residents with payments up to \$1.2 million per person.

Meanwhile, the World Economic Forum was celebrating the American and Global banking crises as the perfect opportunity to advance its goal of a cashless society.

In early April, Hamas militants began firing rockets into Israel as the nation's Jewish population began celebrating Passover. All-out war began in October.

The Communist regime in power in DC continued its witch hunt against Donald Trump in 2023, in an attempt to keep him from running for office again this year. Trump is now facing up to 91 felony charges and has been banned from the primary ballot

in Colorado, though he remains the Republican front-runner for the '24 election.

Michigan celebrated the repeal of a state law protecting unborn babies. That state joins multiple others that now allow unrestricted abortion up to the time of birth. In California, 7th graders are now being taught, in public schools, how to obtain an abortion, and unrestricted abortion up to the time of birth is now also the “law of the land” in Maine.

Violent crime, including murder, rape and felony assaults, intensified nationwide in 2023 in all our major cities, which now resemble third-world countries – unless, of course, the leader of China visits. In that case, we now know city governments are able to make everything sparkling clean in just 24 hours.

Investigations into Hunter Biden finally began last year, with bank records showing millions of dollars in transactions between Biden and Chinese-owned companies.

Meanwhile, acts of violence by transgender individuals began ramping up on March 27th, when Audrey Hale killed six people at a Christian school in Nashville. Parts of her “manifesto” were released later in the year, making it clear that the “transgender agenda” is violence – specifically against Christians. A planned “Trans Day of Vengeance,” scheduled for March 30th was subsequently cancelled. But on Easter Sunday, violence continued, this time in Portland, Oregon, as a man who identifies as a woman stabbed a cab driver in the neck. And in Florida, a transgender middle-school teacher allegedly threatened to shoot students, but was not prosecuted, and instead allowed to return to class.

Also in April, the United Nations sought to normalize adult sexual relations with children, calling pedophiles “Minor-Attracted Persons.” At the same time, it was learned that the

Bill & Melinda Gates Foundation funds a non-governmental agency to the tune of millions annually. This agency seeks to legalize commercial sex work with children under ten years of age. And not surprisingly, in this country of perverted public schools, a 59-year-old high school teacher was arrested in Idaho in April for raping a 16-year-old boy – just one of many sex crimes committed by public school teachers last year.

And as America reached the breaking point with the sheer number of illegals invading our nation, so-called Sanctuary Cities have declared states of emergency, after running out of funding and housing (including five-star hotel rooms) – while trying to appease angry American taxpayers who've been displaced and banned from their own public facilities to make room for the so-called "migrants."

As a good illustration of the so-called "unbiased" network news, on June 8th, Donald Trump was indicted by the Special Counsel in the classified documents case. That same day, it was reported that Joe Biden had allegedly received 5 million dollars from an executive of the Ukrainian gas company known as Burisma, the same company in which his son, Hunter, was involved with. Over 4 days, June 8th through the 12th, CBS, NBC and ABC gave 291 minutes of coverage to the Trump indictment, while the Biden story received not one second of coverage.

Articles of impeachment were filed against Joe Biden and Kamala Harris on June 12 for weaponization of the government against Americans, invasion of foreign nationals and criminals in unprecedented numbers on our northern and southern borders, slow-walking of any investigation into the Biden family's corruption and giving America's enemies aid and comfort, while enriching themselves in the process.

Also in June, World Economic Forum Senior Advisor Yuval Noah Harari, stated that artificial intelligence will create a "correct" one-world religion, with a new "Bible," written by

AI. Harari is Jewish, a homosexual and an atheist.

And we can forget about any financial responsibility or accountability for the current regime, intent on America's economic collapse, as Biden signed a bill into law that effectively turns off the debt ceiling until the year 2025. This is essentially a blank check for the cabal, until every American is well beyond bankruptcy. The Supreme Court struck down Biden's student loan forgiveness scheme, but the regime has ignored the ruling and has been moving forward with it anyway.

On August 8th, the state of Ohio solidified abortion into the state's constitution, when voters passed a measure titled "Issue 1." Also on August 8th, the Globalist cabal set fire to the historic town of Lahaina, on the island of Maui, Hawaii, pulverizing buildings into dust as they collapsed into their own footprints, killing more residents than anyone will ever know, while leaving natural features virtually untouched. All this as a massive land-grab by the globalists, effectively stealing the land in Lahaina from native residents there, to make way for the nation's first "SMART city" run by AI. This story remained in the mainstream news a total of three days.

Kevin McCarthy was booted from his position as Speaker of the House on October 3rd, eventually replaced by Mike Johnson of Louisiana. And on October 7, Hamas attacked Israel, killing hundreds, and seizing hostages. The Biden regime is now funding Israel as well as Hamas and Iran, along with Ukraine and the invaders on all our American borders.

The war in Israel has set off a firestorm of anti-Jewish protests, demonstrations, and acts of violence in America and around the world, led, in particular, by young college students calling for the destruction of Israel. China has since removed the nation of Israel from maps, and the China-owned social media site Tik-tok, wildly popular among young people, is promoting massive anti-Israel sentiments. There was

a genuine insurrection at DNC headquarters in Washington DC on November 15, as pro-Hamas rioters turned violent in their attack.

And as Christmas approached, the Satanic Temple began setting up statues of Baphomet in state capitol buildings around the country. Meanwhile, the communists continue to erase American history from public view and memory, as the Confederate monument at Arlington National Cemetery was removed December 18. The Department of Defense has directed the removal of all Confederate symbols from US military facilities as of October 2022.

Now we press on, in to 2024, into uncharted waters. It's an election year, so therefore, there must be widespread fear and chaos established. Only God knows what the devil and his minions have planned. But I urge you, whatever happens next, do not comply. Stand strong and firm on the truth, refuse to participate in any lies and deception, and devote yourself to fervent Bible study and prayer as you grow closer to Christ. In all your ways, acknowledge Him, and He shall direct your paths.
