

# 580,000 Homeless Americans Need Our Help: Not Illegal Immigrants

By Frosty Wooldridge

February 17, 2022

Two nights ago, February 15, 2022, on News Nation with Ashleigh Banfield, she reported that America features 580,000 homeless citizens. Not only that, but San Francisco boasts 35,000 homeless while Los Angeles simmers with 66,000 people living in tents, sleeping on cardboard boxes and deposit their daily constitutional on the streets of the city. On the West Coast, Seattle sports 6,000 homeless living near grade schools, under bridges, in the woods and right up to residential fence lines.

In 2019, I bicycled through San Francisco to see it for myself. The streets reeked with feces, rotten food, rat droppings, needles, trash everywhere and urine. When I pedaled through Los Angeles, it was almost beyond imagination how anyone could live in such human misery.

While traveling through Asia, I saw the same thing 20 years ago. India features 1.4 billion people living at the lowest end of the spectrum. An astounding 60 percent of Indians lack a toilet, shower and sink. Poverty remains the norm. Filth cannot be imagined. Trash stifles every street, river and lake. Illiteracy dominates.

In Denver, I see 10,000 homeless at every juncture in the

city. They've trashed City Park so much so; they have gated it off against anyone.

The glaring, if not totally insane aspect of all this homelessness stems from the fact that our U.S. Congress and this president continue pouring millions more homeless into our country every year. And yet, the mainstream media suppresses any mention of all of it.

One of the interviews on Banfield's show said that 60 percent of the homeless suffer from mental health/addiction problems. Individuals make up a full 70 percent of the homeless while families fill out the last 30 percent.

Banfield interviewed Christi Carpenter of SafeTime, who works to place homeless people in residential homes. She proved to be a wide-eyed idealist that possessed no idea of the dangers to homeowners to let deranged-drug-addicted, illiterate, drunken and totally insane individuals into average American homes. How do you get 35,000 in San Francisco and another 66,000 LA homeless into residential homes?

Having bicycled through their ranks, I witnessed third world misery here in the USA, which, by the way, the stench sickened me in India and Bangladesh, but to smell it here in America, it's nearly impossible to understand what those people in charge in all these cities are doing to solve the crisis. Here in Denver, they let them camp and crap all over the

streets off California Ave and 14<sup>th</sup>. I snapped dozens of pictures.

And yet, Biden wants another 2,000,000 third world migrants added again to our country in 2022. What kind of crazy people operate in Washington DC? We know AOC, the daffy dufus female out of New York is a whack job. We know that Maxine Waters from California can't add 2+2 to obtain 4. We know that Senator Diane Feinstein and Nancy Pelosi "insider trade" on defense contracts, but they won't solve the homeless problems in their own states.

(Over 66,000 homeless in Los Angeles live under bridges, on the streets, on the beaches, trash everywhere, drugs, human misery, and, the people in charge refuse to solve the problems.)

So, what do we do with 2,000,000 more illegal immigrants while we see 580,000 of our own homeless citizens languishing in some kind of slum-purgatory? Will any of those millions of immigrants solve America's homeless problems? Will any of the 38 million people subsisting on food stamps and EBT cards solve our homeless problems? Why aren't any solutions forthcoming?

And did you notice the homeless African-American Tuesday night follow an Asian-American girl back to her apartment in New York City, while he walked in behind her, and stabbed her 40 times. She died. He featured a criminal record as long as a football field and a brain the size of a pea...but he was let out every time until he killed that girl. Now, we get to feed him three squares and a cot for the next 60 years at an average of \$65,000.00 annually.

Who is running the cuckoo's nest? With all of this stupidity, Biden wants to solve the "Climate Change" crisis by adding 5.0 million more people to our highways annually, along with their homes burning fuels to keep warm...and then, what it takes in fossil fuels to feed 5.0 million more people within the USA annually, net gain.

Is there an "ounce of common sense" in Washington DC?

Is anyone in America thinking about these questions? Are we not galloping into America's twilight years?
