

A World On The Edge, Part 2

By Pastor Roger Anghis

February 12, 2023

One thing that the WEF has to do is destroy capitalism and make the people dependent on the government, i.e. the WEF. One thing to keep in mind about Klaus Schwab he is the son of a major Third Reich industrialist[1] which is where he gets his 'I'm better than you so do what I say' attitude. Schwab's righthand man is straight out of hell. ***Yuval Noah Harari, a top adviser to the World Economic Forum and close friend of the organization's founder Klaus Schwab, is making headlines once again after he made some seriously disturbing comments during a recent Ted Audio Collective podcast over the weekend.***

During an interview with Chris Anderson, head of Ted Talks media platform, Harari touted his ideal world, and it is nothing short of a dystopian society.

Apparently to Harari, a homosexual who has no children, human beings "are no longer part of the story of the future" because there is now artificial intelligence and other technologies to replace them with that are far more efficient.

Harari also noted that he believes that people have become disillusioned with politics and the social and economic climate, because they know that the future does not need them.

"Part of what might be going [on] is people realize – and they're correct in thinking that, 'The future doesn't need me. You have all these smart people in California, in New York and

in Beijing and they are planning this amazing future with artificial intelligence and bioengineering and global connectivity and whatnot and they don't need me. Maybe if they are nice, they will throw some crumbs my way, like universal basic income.' But it's much worse psychologically to feel that you are useless than to feel that you are exploited," Harari explained.

At least he admitted that a universal basic income would be throwing us all "crumbs" – this coming from a man sitting at a very, very wealthy table.

When Harari was describing what advanced technology will do for humankind, he said, "We just don't need the vast majority of the population because the future is about developing more and more sophisticated technology like artificial intelligence, bioengineering, most people don't contribute anything to that except perhaps for their data. And whatever people are doing that is useful, these technologies will increasingly make redundant and will make it possible to replace the people." [2] This lovely soul even says that Jesus Christ is 'fake news'. That gives you the information you need to know where they are going with this WEF lunacy.

Keep in mind also that Schwab is a private citizen that seems to have found a way to steal the free world, unopposed! He has great plans for everyone too. "The World Economic Forum (WEF) wants to end "wasteful" private vehicle ownership, instead it wants "communal sharing" of vehicles to reduce global demands for fossil fuels and precious metals.

"A WEF paper argues private vehicles are not good for the planet's health and most vehicles are barely used.

"A proposed universal model would take vehicle users "from owning to using" vehicles as the way to move forward to protect the planet." [3]

We are seeing food shortages, oil shortages, and a push to

literally destroy some industries altogether. Schwab demands that economic growth be stopped. All for the sake of the fake 'climate crisis'. ***"The World Economic Forum (WEF) wants to end "wasteful" private vehicle ownership, instead it wants "communal sharing" of vehicles to reduce global demands for fossil fuels and precious metals.***

"A WEF paper argues private vehicles are not good for the planet's health and most vehicles are barely used.

"A proposed universal model would take vehicle users "from owning to using" vehicles as the way to move forward to protect the planet."[4] I find it hard to listen to people that fly their private jets all over the world and vacation on their multi-million dollar yachts but tell me I have to get rid of my car and take public transportation and live in a 1200 square foot high-rise apartment. As a reminder, Schwab stated that by 2030, just eight years away, ***"You'll own nothing and you'll be happy about it."***[5]

They put a special emphasis on carbon emissions. You emit too much, according to them, and you'll be heavily taxed. What that tax is going to do about eliminating that carbon has never been explained by Al 'I invented the internet' Gore who has made millions off selling 'carbon credits'. Where did he get all these 'carbon credits' to sell? Besides he lives in a house that uses the same amount of energy of 10 average houses, is flown around on private jets, and is driven around in gas-guzzling SUVs. All of these elites have the attitude that they deserve these luxuries because they are so smart. Look at John Kerry running all over the world telling people that private cars are too polluting, big houses are energy wasters, and we need to stop that lifestyle but he has 12 cars, several houses, 2 yachts, and a private jet. Can you say hypocrisy?

Kerry even thinks that the Davos people are all divinely placed where they are because they have these special powers

to save the planet. *He began by first acknowledging his Davos colleagues as an exclusive group, made up of people who have been uniquely inspired to solve the climate crisis.*

“When you start to think about it, it’s pretty extraordinary that we – select group of human beings because of whatever touched us at some point in our lives – are able to sit in a room and come together and actually talk about saving the planet,” he said.

“I mean, it’s so [almost extraterrestrial](#) to think about saving the planet.” He added, “If you say that to most people, most people think you’re just a crazy, tree-hugging, lefty liberal, you know, do-gooder, or whatever, and there’s no relationship. But really, that’s where we are.”[6]

The arrogance of these people is sickening. Every time Gore tried to have a ‘global warming’ convention it would snow so much that it would have to be canceled. Tell me God doesn’t have a sense of humor. In 2014 scientists went to the arctic to measure the loss of ice and had to be rescued because they got caught in record ice buildup. Remember, Gore said all the ice on the caps would be gone by 2014. I can still hear God laughing.

The WEF is causing the food shortages by forcing farms to shut down around the world. *The World Economic Forum (WEF) wants to drastically reduce the world’s population via orchestrated food shortages across the globe, which they will blame on ‘global warming.’*

This coordinated attack on the world’s food supply was ramped up this week when the government of Germany ordered farmers to drastically reduce their use of fertilizers in an effort to comply with WEF’s agenda.

Last week the Dutch government, also acting under the orders of the WEF, shut down 3,000 farms to comply with the Klaus Schwab’s global warming goals.[7]

In case you didn't notice they are intending on starving people to death to achieve their goal of lower populations: ***to drastically reduce the world's population via orchestrated food shortages across the globe.*** [Stalin did that after WWII.](#) About ten million died because he destroyed their crops and would not let them buy any food. Not that they had the money to buy anything. We are not dealing with respectable people. We are dealing with pure evil straight from hell. They will stop at nothing to get their way. Right now, America is still armed and arms are the only way to remove this threat to not just America but the world.
