

# America at Odds with Itself: Clashes Within Our Civilization

By Frosty Wooldridge

September 18, 2025

Part 4: Clash of tribes, clash of cultures, clash of languages, clash of religions.

Last week, in Muslim-dominated Dearborn, Michigan, a Christian resident stood up at the city council meeting, asking for his city council to stop supporting Hamas and Hezbollah.

Note that Washington DC bureaucrats imported 300,000 Muslims into Detroit. They practice Sharia Law, which is in total contradiction of our U.S. Constitution. Everything in Dearborn is Arabic writing on stores, streets, and books. They speak in Arabic. They teach students in Islam, and you'll see Burkas and Hijabs on the women. They are just as dominated by their men in America as back in Baghdad.

Historian Samuel Huntington, in his Clash of Civilizations, wrote, "In the New World of mass migration, the most pervasive, most socially dangerous and most dangerous conflicts will not be between the social classes. They will not be between rich and poor. The conflicts of the future will be between peoples belonging to different cultural entities, tribal wars, and ethnic conflicts...that will occur within civilizations."

Here is a 10-minute video spelling out exactly how Europe's countries are being destroyed by mass migration. This young lady spells out the stabbings, rapes and crime imported into each European country. She states how migrants are now the dominate populations in London, Stockholm, Melmo, Paris, Munich, Oslo, et al.

Dear fellow American, our Muslim immigrants are already telling us that they intend to displace us. They intend to install Sharia Law. They intend to take over America, Canada, Europe and Australia. Again, read Douglas Murray's book: The Strange Death of Europe.

When you look at the political clashes in Washington DC, you can see the vitriolic anger, and clashes among Blacks and Whites. You see it on TV on CNN where outright anti-white racism explodes on those panels. Talking mouth Joy Reid hates America and she's got many like her, i.e., Stacy Abrams, Ilhan Omar, Rashida Tlaib, Maxine Waters, AOC, and dozens more in power positions.

What most Americans don't understand: people from different ethnic groups do not possess any commonality to Western thinking. They know how to use our freedoms, but they will use those freedoms to undermine everyone's freedoms.

Case in point is Muslim refugee Ilhan Omar (D-MN) in the House of Representatives. She cheered the assassination of Charlie Kirk. She cheered October 7, 2023. She and her Islamic religion want to exterminate all Jews from the face of this planet.

"Islam's borders are bloody, and so are its innards. The fundamental problem for the West is not Islamic fundamentalism. It's is "Islam", a different civilization whose people are convinced of their superiority, of their culture and are obsessed with the inferiority of their power." S.H.

In the coming months, we're entertaining more political suicide by electing Ugandan refugee, Muslim-Communist Zohran Mamdani as Mayor of New York City. We're knowingly marching over a political cliff that guarantees destruction of the foundational laws and economic successes of New York City and America. Why? We know that communism doesn't work. We know socialism only works until you run out of everyone else's money. Communism and socialism only work out of the barrel of a gun by a dictator.

"Some Westerners have argued that the West does not have problems with Islam but only with violent Islamist extremists. Fourteen hundred years of history demonstrate otherwise." S.H.

Mass migration, at 1,000,000 annually into America from dozens of incompatible cultures, world views, religions and languages, portend the death of America. Huntington said it clearly. He also argued that "Multiculturalism is in its essence anti-European civilization."

Thus, if our leaders keep dumping those hordes of Middle Eastern, and African migrants onto our shores, in the end, their numbers will collapse our systems. They will create cultural chaos and division. Why doesn't anyone see the end result? Why are we thinking out of the past instead of the reality of the present and what we face in the future?

What are the negative impacts of immigration to the United States?

"Immigration increases poverty in two ways: a) by increasing labor market competition it lowers wages for native-born workers, forcing more of them into poverty; and b) the immigrants themselves are often poorly educated and poor."

In Part 5 of this series, we're going to talk about the numbers.

What would you say to an added 40 to 50 million more

immigrants added to America by mid-century? What would you say to such numbers doubling the populations of our 30 most populated cities?

This is one fact that will sober you: an immigrant from Africa uses three gallons of water daily. Once they reach America's shores, they use 80 gallons of water 24/7.

"The average American uses about 80 to 82 gallons of water per day directly at home, but this figure can vary significantly based on location, lifestyle, and the inclusion of indirect water use. When indirect water use for food, clothing, and other goods is considered, the total average can be over 2,000 gallons per person per day."

Now, multiply 80 gallons by 50 million added people, net gain, to the USA. Or, take those 50 million X's 2,000 gallons. That's on top of the 350 million of us using 80 gallons of water daily in 2025.

What blows this journalist's mind stems from the fact that our entire country, and our leaders--all live in denial of the future. Not only are we destroying our cultural base, our language, our basic religion, our water availability, our energy, and our resources--we're obliterating our quality of life.

Part 5: How do we sustain our present population of 350 million when immigration drives it up to 400 million and beyond? You will discover why all those millions of refugees are rushing into America. They want to escape the misery they created by overpopulating their own countries. Only to recreate that misery in America! What happens when those other ethnic groups we imported start their own enclaved cities (like Dearborn) and countries within our country? What happens when we run out of enough water, energy and resources to sustain ourselves? How do we save ourselves from Europe's fate? Answer: it's going to get ugly by mid-century.
