

# Americans Not Aware of China's Onslaught of the USA

By Frosty Wooldridge

January 30, 2023

This year in 2023, China dominates every possible aspect of American commerce. If you visit Home Depot, Lowe's, Ace Hardware or any toy, trinket or clothing store—you will find the "Made in China" tag on 90 percent of the products.

If you start looking into the amount of land and agricultural businesses they own in our country, your shock-level would rival the latest California earthquake.

Foreign-owned land accounts for about 2.7% of all U.S. farmland and forest land, which, according to the Department of Agriculture, stands at 897 million acres. That data also shows that 190,000 acres of farmland are owned by Chinese interests.

How much United States property is owned by China?

In 2019, Chinese nationals purchased 6,300 properties in the United States, generating about \$4.5 billion in sales.

In other words, our own U.S. Congress allows American lands and properties to be owned, operated and profited to the benefit of the Chinese...and against our citizens.

## Four Reasons Why China is Becoming the Dominant World Power

1. They do not tolerance crime. The death sentence is swiftly and routinely used for terrorists, murderers and drug traffickers. They do not allow any immigration. When I visited China years ago, they suffered a crime wave. How did they stop it? They executed 50,000 petty criminals for stealing bikes or shoplifting. When Amnesty International protested, the CCP said, "We have 1.4 billion people. We need to make sure they are all honest in order to maintain a viable society. Those 50,000 taught 1.4 billion a lesson."

2. Very low tolerance for religion. No such thing as a God. Almost no religious killings and they are getting rid of the Indigenous Chinese Muslim population as fast as they can.

As an authoritarian society, they do not tolerate protest or religion of any kind.

3. They have not been involved in any expensive wars or invaded any country for the last seventy years. They will simply "acquire" Taiwan. We will be powerless to stop them.

Unlike the USA that has been embroiled in 10 and 20-year wars for most of the last 70 years since WWII, China simply buys up countries with its vast wealth. We spent over \$4 trillion in Vietnam for 10 years, \$6 trillion for 20 years in Afghanistan and Iraq Wars. We're \$31.5 trillion in debt and pay out over \$525 billion annually in interest rates.

4. Their primary weapon of choice to conquer the world is finance, and countries around the world are falling fast. Not just the USA, but all world is in trouble.

In the near future, China will employ millions of American workers and dominate thousands of small communities all over the US. Chinese acquisition of U.S. businesses set a new all-time record last year. It is on pace to shatter that record this year.

One writer who asked to remain anonymous said, "The Smithfield Foods acquisition is a good example. Smithfield Foods is the largest pork producer and processor in the world. It has facilities in 26 US states, and it employs tens of thousands of Americans. It directly owns 460 farms and has contracts with about 2,100 others. But now a Chinese company has bought it for \$ 47 billion, and that means that the Chinese will now be the most important employer in dozens of rural communities all over America.

"Last year a Chinese company spent \$2.6 billion to purchase AMC entertainment, one of the largest movie theater chains in the United States. Chinese companies control more movie ticket sales than anyone else in the world.

"Economic beachheads" are being established all over America. For example, Golden Dragon Precise Copper Tube Group, Inc. recently broke ground on a \$100 million plant in Thomasville, Alabama. Many of the residents of Thomasville, Alabama will be glad to have jobs, but it will also become yet another community that will now be heavily dependent on Communist China.

"And guess where else Chinese companies are putting down roots? Detroit! Chinese-owned companies are investing in American businesses and new vehicle technology, selling everything from seat belts to shock absorbers in retail stores, and hiring experienced engineers and designers in an

effort to soak up the expertise of domestic automakers and their suppliers.”

When you total up all imports and exports, China is now the number one trading nation on the entire planet. Overall, the US has run a trade deficit with China over the past decade that comes to trillions of dollars. China has more foreign currency reserves than anyone else on the planet.

China now produces more than twice as many automobiles as does the United States. After being bailed out by US taxpayers, GM is involved in 11 joint ventures with Chinese companies.

### China Dominating Every Product in the World

- ◆ The uniforms for the US Olympic team were made in China.
- ◆ China now consumes more energy than does the United States.
- ◆ China is now in the leading manufacturer of goods in the world.
- ◆ China uses more cement than the rest of the world combined.
- ◆ China is now the number one producer of wind and solar power on the entire globe.
- ◆ China produces 3 times as much coal and 11 times as much steel as the United States does.

China is now the number one supplier of components that are critical to the operation of our national defense system.

As you can see, the Chinese people are much smarter and more educated than the American people. They carry a significantly higher IQ collectively than American citizens. Average Chinese IQ: 106. Average American IQ: 97. They are a monoethnic society without racial, class, religious or ethnic conflict. They are buying up land in Africa and South America in order to feed their enormous and unsustainable population that expects to grow by 100 million, net gain, by 2050. They are singled-minded to dominate the world economy, social issues, land, food, water, energy and countries.

We, the American people, are pawns on their chessboard. Our president and Congress are facilitators for the Chinese.
