

# America's Growing Nightmare: You Can't Believe It Until You See It

By Frosty Wooldridge

September 2, 2024

Part 1: You can't believe it until you see it. When you see it, you can't believe it. I've traveled through third world countries. I've been sickened at what I saw. I am now sickened at what I've seen in America's cities.

After a summer of 18,000 miles, 30 states, 20 major cities, West coast to East coast, Florida to Michigan, I learned a few things about the "State of America." When you see it with your own eyes, hear it with your own ears, touch it with your own hands and smell it with your own nostrils—all the flowery words of politicians come crashing down around a "reality check" by a regular citizen journalist. You can't make this stuff up as to what's happening to America in 2024.

Notwithstanding, California provides a disheartening if not sickening example of what's coming to many states and cities in America. Led by handsome Gavin Newsome, the state staggers under insanely gridlocked traffic with its 40,000,000 residents. Its air-polluted skies offer every resident of LA and San Francisco poison toxins with every breath 24/7. Close to 250,000 homeless Americans live on the streets, in parks, housing areas, underpasses and abandoned buildings. They defecate, urinate and toss trash anywhere and everywhere.

MS-13 gangs push drugs into grade schools, high schools and colleges.

Another 4,000,000 illegal aliens' children overwhelm California's schools, welfare systems and sanitary systems. Smash and grab Asian/Black gangs steal anything and everything in sight. You really don't want to visit Fisherman's Wharf or Pier 39 in downtown San Francisco for fear of losing your life with a stray bullet. Most certainly, your car will be smashed and robbed.

California has defunded its police and/or degraded them with such animosity that criminals enjoy a higher standard of respect and opportunity. No one goes to jail as long as they steal less than \$900.00 worth of goods. Whole Foods, Macy's, Walgreens and hotels have shuttered their doors in the big cities. They were shoplifted to death by vagrants, drug addicts, homeless and Venezuelan/Asian/Black and Chinese gangs brought into America by Biden-Harris. When Biden invited 12 to 15 million illegal aliens to cross our borders, he also invited all the criminals, gangs and drug syndicates to bring their goods to our kids. No less than 250,000 fentanyl-heroin-meth drug overdoses occurred in the past three years from Biden's open borders. It's a total criminal free-for-all with no penalties.

Everything in California is overwhelmed with too many people, too little enforced laws, degraded educational systems and incompetence from the governor's office all the way down to all the DEI mayors and city councils. They placed themselves into a "no-win" situation by negating laws, degrading police and simply allowing themselves to become third world cities.

California's elite like House members Nancy Pelosi, and Maxine Waters provide incredible incompetence beyond the Peter Principle. Both of them possess no clue as to what they have done to California and America. They provide a level of stupidity that sets the benchmark for uselessness in 21st

century America. They provide leadership that guarantees that California has become impossible to work in, impossible for functioning schools, totally impossible to work with fellow Americans because so few of the illegals speak English or care one iota for America. Illegal aliens constitute more than half of California's prisons at a cost of billions of dollars. That's the ones they caught. Millions of others continue to shoplift, rape, carjack and trash every city in that state.

There's nothing sane or rational as to what's happening in California. Nancy Pelosi wants to give illegals \$150,000.00 to buy homes. She wants to give them citizenship, cart blanche. At the age of 84, she lacks any comprehension of the long-term consequences of her actions. As to House member Maxine Waters, if brains were gasoline, Maxine would NOT have enough gasoline to fill ant's motorcycle and drive half-way around a BB.

With all that happening, [www.capsweb.org](http://www.capsweb.org) , of California, discovered that legal and illegal immigration adds 6,550 people, net gain, every day of the year. In other words, the leaders of California continue their quest to turn that state into another India, Mexico, Congo, Baghdad or Columbia. How's that you ask? Well, that's where those illegals originated. If we keep importing them, we too become a third world country.

Like India at 1.44 billion people, they've become SO ENORMOUS in population, that their citizens live in human misery at a level unknown heretofore in America. But if you add up that acceleration of population growth in California now at 40 million, because of immigration, that state expects to reach 60,000,000 (million) by 2050, give or take a few years. How do you water, feed, house, educate, transport, provide work and maintain a civil society with that many disparate cultures and people. How do you regain law and order? How do you stop massive drug cartels from killing our citizens? How do you

solve any problems? Answer: you don't. You drag America's citizens into a third world community.

On top of that, let's examine the quality of life in California. On one episode of "60 Minutes" with Leslie Stahl, she reported that water has become so scarce that they now provide "toilet to tap" water. In other words, you get to drink water that's been chemicalized out of the toilet water to drink as drinking water. What she didn't say in that report: with another 20,000,000 (million) people, there won't be enough "toilet water" to turn into "tap water." When I wrote her about that, and asked her to interview me with my book, **America's Overpopulation Predicament: Blindsiding Future Generations**, she didn't return the book or offer an interview. In other words, let's ignore the crisis until it becomes an unsolvable and irreversible nightmare. That's where America races, full steam ahead.

On top of that nightmare, Biden-Harris degrade California's and America's standard of living. They just imported 12-15 million third world illegals who have no connection to or love of America. They cost you and me, American taxpayers \$150,000,000,000.00 (billion) a year in welfare, food, housing, schools and prisons. (Source: [www.fairus.org](http://www.fairus.org))

The ongoing kicker, Biden-Harris continue importing Middle Eastern Muslims who chant, "Death to America" in Detroit, New York City, Miami, LA and San Francisco. In my own city of Denver, we've got Venezuelan gangs taking over, gunning down and terrorizing apartment building-dweller American citizens. Worse, our two U.S. senators, Governor Polis, and Denver's mayor support open borders. Also, Denver as a Sanctuary City and our state as a Sanctuary State. We already suffered 10,000 homeless in Denver, but now, we've got another 50,000 homeless illegal aliens. We taxpayers foot the bill into the billions of dollars.

Do the politicians in Washington DC or our state care?

Answer: they stand by while we citizens pay the price in getting our children killed, as in Laken Riley, our stores robbed, and drugs distributed to our children. What's happening to America, at some point, will not be solvable. We all become victims of this invasion.

As I said, "You can't believe it until you see it; and when you see it you can't believe it." But it's here and it's growing worse by the day.

Coming in Part 2: The heartland, Chicago, Illinois, Mississippi, Detroit, Michigan, onslaught into a degraded and declining America. We may not be able to pull ourselves out of this mess...much like India or any other third world country.
