

Attack Upon the Power Grid

by Dennis Cuddy, Ph.D.

December 13, 2022

At night, on December 3, 2022 terrorist fired rifle shots at the power station in Moore County, NC, knocking out power for 5 days. This is similar to what terrorists did to the Metcalf power station near San Jose, CA at night on April 16, 2013. No one was ever caught by the FBI for the San Jose attack, so we do not know whether the terrorists were domestic or among the many illegal aliens who have slipped across the border. In my book [CONSPIRACY](#), at the bottom of page 175, I wrote that “in the October 1, 2003 CENTRE DAILY TIMES (Pennsylvania), I indicated that terrorists might ‘try to...disrupt our supply of electricity.’ And on April 16, 2013, a terrorist attack occurred at about 1am when they cut the power cable around the Metcalf power substation southeast of San Jose, California, cut off some local 911 services, and fired 100 rounds from a high-powered rifle at several electrical transformers (the perpetrators have not been caught).

In my April 15, 2013 NewsWithViews column, I predicted that terrorists could set an apartment complex in the U.S. on fire at night, and on May 27, 2015, the LOS ANGELES TIMES reported that the L.A. Police Department’s anti-terrorism division arrested Dawud Abdulwali “on suspicion of arson in connection with a fire that destroyed a downtown Los Angeles apartment complex.” In my articles at [NewsWithViews.com/dennis258](#) and [NewsWithViews.com/dennis280](#), I predicted terrorists could do 4 more things, all 4 of which they did within just 2 weeks ! This is a better record at predicting terrorists activities

than the FBI, CIA and National Security Agency.

Read my book "[Conspiracy](#)" published in 2015
