

Reality Check: You Can't Camp on Mars or Thrive in Space

Right now, in 2020 and during this decade, we face enormous challenges, if not, outright catastrophic consequences to all life on this planet—including ourselves. I mean, we'll add 83 million more humans to the planet in 2020. And the next year, another 83 million.

Changing America's Culture to Everybody Else's Culture

The questions I ask you as an American citizen, do you want to see your country changed from law and order to open borders? Do you want criminal aliens to enjoy a return after deportation? Do you want to see ICE disemboweled? Do you want or will we survive our country changing from English to 100 different languages?

Acquitted: A Farcical Chapter in Liberal Baloney

Instead of impeaching and harassing our president, Congress needs to stop all immigration. Congress needs to enforce existing laws against hiring, transporting and housing border

violators. It needs to stop the 300,000 'anchor babies' becoming birthright citizens illegally, annually.

Your Responses From: Devolving Western Civilization

In the past ten years since that commentary, the borders remain as wide open as Maxine Waters' mouth, immigration added 35 million more people to the USA, net gain, and, not a single person in Congress has succeeded in stopping the endless flow of legal and illegal immigrants.

The Great Displacement of Americans: Devolving Western Civilization

In an interview with my longtime friend, top immigration specialist Fred Elbel, he gave a frightening look at America's future. He said, "In the United States, the culture war can loosely be defined as the battle between those who adhere to conservative, traditional, and constitutional views and leftists who espouse political correctness, diversity identity group politics, and belief in more than two biological sexes.

Let's Impeach the Entire U.S. House of Representatives

The majority of them need to be impeached because they betray us daily with their unfaithful disservice to our country. My own two senators and all my House member in Colorado should be impeached because they have done NOTHING in their long terms in Congress. I am willing to bet that your two senators and House member would qualify...

Ten Times A Month, I Interview On National Radio Shows

Do you think America and Americans will survive the next 140 million immigrants? Do you think America will remain viable, sustainable or intact as a culture, language and a quality of life country? Me? On the radio shows, I tell it like it is...I think our country is doomed if we continue importing immigrants until they outnumber us.

Blip: Humanity's 300 Year Self-Terminating Experiment With Industrialism

Finally, do you think humans will try to save themselves? Will we make any effort to change course? As for me having observed humanity around the world for the past 50 years, my bet? We will continue the Faustian Bargain with a grand finale of Hobson's Choice. Some call it the "Darwinian Solution", but it's coming.

Mockery of Impeachment, the Voters and of Trump by Nancy Pelosi

May the U.S. Senate get this stupid impeachment mockery of the Constitution finished and acquit Trump, and then, all those "asses" in the House and in the criminals in the Senate—get back to serving we, the people. Gees, I'm pissed!

At The Appointed Hour Of

2020: These Things Need Attention

In the end, hopefully, reason prevails. If not, we become another Communist China or Saudi Arabia or any other dictatorial construct. Prager and Corolla point it out that we must guard, treasure and fight for free speech. I stand with both men and every woman who stands for free speech in America.

Great Quotes by Our Leaders in the White House and Congress

Our national leaders tell us the truth, nothing but the truth, so help them God! As you look around America, you see U.S. Senators pontificating about our country—the one they serve with such integrity for decades of their careers in Congress. Of course, they prove themselves honorable and proper.

At The Appointed Hour 2020: What Is America Doing To

Itself?

First of all, we need to withdraw ALL our troops and bases out of Afghanistan, Iraq, Syria and all other places in Africa and the Middle East. They don't want us there. Iraq passed a resolution for us to vacate their country. We've wasted tens of thousands of our young men's and women's lives in the past 19 years.

Time's Person of the Year: 16 Year Old Greta Thunberg

As 2019 slips into the rear-view mirror faster than a firefly flashes its tail-lights, 2020 rolls into view like a wildfire across Australia. Or, like a forest fire in California. This new year faces jam-ups like Los Angeles, Denver or New York's gridlocked traffic.

Sobering Reflections on 2019: More Sobering Realities Coming in 2020

The past year saw the United States weather "Black Lives Matter"; "Antifa" riots; Muslim Sharia Law creeping up in city after city, La Raza competing more powerfully in the four

states along the border with Mexico. We saw 59,000 homeless in Los Angeles

Christmas Over: A Moment of Contemplation

As I sit here on Christmas day, I feel sad about what's happened to Christmas in America. I feel sad at the change our national ethos. It's devolving into a two-headed political dragon with no interest in solving our national problems.

A Christmas Story: A Single Thread In The Tapestry Of Life

Ancient Roman ruins dotted the landscape. At lower elevations, 1,000-year-old stone homes housed farmers who worked the land. At the bottom of the Alps, we entered Lago Como (Lake Region) for a ride south into the enchanting land known as Tuscany.

What It's Like To Be A Baby Boomer: Kent State, Man On The Moon

As I look back, all my buddies that married their gals right after college, over half of them suffered divorces, weekend fatherhood and alimony. We baby boomers created the largest wave of divorces in U.S. history. Lot of pain out there and the kids paid dearly. Once a couple divorces, the kids lose structure, security, peaceful existence, and get caught in the middle of two angry people.

The Irony of Political Correctness in America: Scoundrels Everywhere

Meanwhile, Hillary Clinton's daughter, Chelsea, looks exactly like her former lawyer colleague Webb Hubbell, not any resemblance to her purported father, Bill Clinton. The cartoon goes like this, "Ever notice how the media always asks Ivanka Trump about her fathers' treatment of women, but they never ask Chelsea that same question?"

What It's Like To Be A Baby Boomer: Racial Confrontation

What I saw since I lived in the South for the last three years of my high school career gave me pause. Integration, while it proved moral and ethical, resulted in some nasty results. Blacks in Albany, Georgia entered my old high school as my little brother arrived

What It's Like To Be A Baby Boomer: College And War Years

When I entered college in the fall of 1965, I didn't know anything about how our U.S. Congress worked. I didn't understand the ramifications of entrenched corruption, good old boy clubs and how corporations greased the palms of our elected officials to overlook our laws or pass what they wanted.

What It's Like To Be A Baby Boomer

In my senior year, my mother struggled to balance the check book and raise our family. She worked at a church where the priests sexually harassed her. She came home in tears at

times. I lack any clue as to how she survived all those years being single. In fact, she remained single the rest of her life.

What It's Like To Be A Baby Boomer

With all of that, my brother Rex and I found ourselves being picked on, beat up and hassled by the top four bullies of the school. As you can imagine, at 6'2 $\frac{1}{2}$ " and 180 pounds, I wasn't a pip-squeak anymore. I started lifting weights with Charles Atlas instruction.

What's It Like To Be A Baby Boomer?

In our 120-year-old farm house, I grew up with four siblings. My younger years saw me using an outhouse until age seven. We took baths in a tub until I turned seven when we finally installed a toilet and shower. Wow, hot water, a sink in the kitchen and a Maytag stove that still works today.

Old Age With Onset Dementia and Alzheimer's: Losing Your Memory

The last time I visited my mother before she passed away, I walked into her room with my wife, and sat for 30 minutes telling my mom how much I appreciated her being a super mother during my childhood. I thanked her for a litany of events that stood out in my mind. I covered everything from birthdays to sporting events to camping to helping take my first bicycle ride.

Defending Ourselves Against Poison Foods At Grocery Chains

What have my wife and I done to save and preserve our health? We eat all natural, non-GMO, certified organic fruits, vegetables and food products. We READ the contents of everything we buy. We shop at Natural Grocers. We used to shop at Whole Foods...

Confessions Of A Litter Picker-Upper: Trashing Our Planet Home

Since I've bicycled across America 15 times and across six continents in the past 44 years, I witnessed the land being trashed at 12 miles per hour. Farmers toss their tractors, combines and farm equipment into fields to rot and rust for the next 10 million years. I've seen motor homes and trailers abandoned all over the USA.

Immigration: Americans Are Losing This War At Our Borders

MS-13 gangs thrive with their drug distribution networks because your Senators and House member fail to do anything to secure the borders. Result: drug addiction deaths accelerate dramatically annually.

What Happens When We Lose Our

Core Identity in America

Once you lose your core identity as a country; your country cannot survive. And, you can't get your successful ethos back. A country like India lurches into each day as a mass of overpopulated, illiterate, unhealthy, conflicted citizens who don't know their identity, what culture or where they stand.

Our Unethical, Duplicitous, Corrupt Congressional Critters

We, the American people, pay our House and Senate members huge salaries to make our country work. Starting pay runs \$174,000.00 for a bartender voted into the House of Representatives with virtually no qualifications, whatsoever. We pay an anti-American Somalian refugee voted into the House, with no qualifications, a whopping \$174,000.00 to disparage our country

Cell Phones and Texting at 70 Miles Per Hour: Killing

People

This summer, on my 40-state journey around the United States, I witnessed women, men and teens texting by the thousands. They texted racing down the highway, in gridlock traffic, and at stop lights. I saw a school bus driver texting driving down the road, I-70 in Denver, Colorado.

When Minorities Become Majorities: The Tyranny of Minorities

Dear Fellow American: our Congress remains on schedule to import another 110 million minorities from over 100 third world countries. If they succeed within the next 30 years, do you think our country, and/or your children stand a chance at survival?

Negative Impacts On Earth From Advanced Technology

So, as you can see, technology may have given us a washer-dryer, kitchen stove and air conditioning—but today, it's giving us more consequences than anything that ever popped out of Pandora's Box.

Support Our Troops: Bring Them Back Home To America

Every time I see a bumper sticker reading, "Support Our Troops", I want to puke. After 18 years fighting two wars in Iraq and Afghanistan, what do we have to show for it? Answer: nothing but human misery!

Do We Need or Want 110 Million More American Immigrant-Consumers?

We desperately need a national conversation on what kind of a civilization we expect to bequeath to our children. If we keep on this path, it will be an unbreathable nightmare of too many cars, smokestacks and carbon exhaust for anyone to breathe.

Presidential Candidate

Marianne Williamson: Enlightened Voice In The Crowd

If we keep electing the same old, entrenched and corrupt politicians, we face monumental continued malfeasance in a government that refuses to solve our country's myriad problems and move forward. We MUST change course.

Nancy Pelosi and Congress Promote the Immigration- Invasion of America

Let's publish this knowledge in every media center in America. Let's deal with our future before it becomes our ugly present. In fact, by reading this commentary, what kind of a world would you like to hand over to your kids? Because if you fail to act, fail to speak up—your kids face an extremely unpleasant “Tragedy of the Commons” in their future.

What's Bad In America Today:

Will Become Worse In the Years Ahead

During my 40-state bike journey around America this summer, I witnessed, up close and personal, exactly what's happening to our country. More than 90 percent of Americans don't possess a clue as to what's happening to them and the rest of us, and our major cities. Most of our big cities, welfare magnets, no longer can be called "American cities" because immigrants dominate them.

America's Melting Pot Becoming Parallel Societies With Too Much Immigration

America cannot continue to exist with endless and exponential immigration growth. Everything faces limits: Number of people in a pool. Number of people on a dance floor. Number of people in restaurant. Number of people on an airplane

Agonizing Death of American Citizenship

Judges do nothing to sustain the laws already on the books: US Code 8, Section 1324, makes it a crime to employ, house or

transport an illegal alien living within the USA. Fines: \$2,000.00 per illegal hired and up to 5 years in prison. The American Civil Liberties Union thwarts our laws at every juncture. They must be the most Un-American organization operating in the United States.

Devolving America Into Disparate, Un-American Immigrants Who Are Antagonistic

As you can see, Brenda Walker walks the walk and sees what she sees in California, which might be deemed our latest third world country with its 11,000 homeless. But that's combined with 60,000 homeless in Los Angeles, 6,000 homeless in Seattle and 10,000 homeless in my city of Denver, Colorado.

Devolving America Into Disparate, Un-American Immigrants

In Minneapolis, Minnesota, 55 percent of the Somali immigrants preferred Sharia Law over American law. In fact, they de facto practice it. Problem: Sharia Law runs counter to U.S.

Constitutional Law. No women's rights, animal rights, no free speech, no free choice of dress, no choice of religion, etc.

Cancer: Coming to You, a Family Member, or a Friend

I saw chemical-spewing airplanes spraying poisons across thousands of acres of crops. I saw tractors spraying poisons upon endless fields of the foods we eat. I saw signs on corn fields showing the Genetically Modified Organism filled with artificial DNA at the hands of blind, stupid and greedy crop scientists—from Monsanto and Bayer.

Assimilation or Disintegration of America: A Sobering Look at Our Country's Uncertain Future

As I traveled throughout 40 states of America this summer, and over 20 of her major cities, the American people lack any clue as to the rapid transformation of this country into a polyglot of cultures...

Anger (Hate), Gossip and Frustration: Forgive Them Anyhow

I once knew a friend who carried grudges against those who wronged him. He piled them into a potato sack that he slung over his shoulder everyday when he traveled to work. When I saw him for lunch one day, he carried on with new additions to his “potato sack full of grudges.”

No Ordinary Moments: Your Epic Life

Struggling author and single mom J.K. Rowling lived off welfare when she began writing the first “Harry Potter” book. She now commands the title of the richest working woman in the United Kingdom.

Are You Living a Life Worth

Remembering?

From that single event in my life, I have never complained once since 1984. I take each day as a gift. I love each second on my touring bike, road bike and mountain bike. I promised myself to live a life worth remembering.

Live life On Your Own Terms

You will find the tyranny of resistance fades as you walk or gallop toward your happiness in work, play and friends. You won't wish for what you see in the poster on your cubicle wall, you will live it for real.

Your life: One Step At A Time

The energy of life on this planet strives to organize into relationships. As with water, you watch it thrive in many forms such as snow, rain, ice and vapor. It gathers as clouds in the sky, which eventually, falls as rain or snow.

The Race of Life: The Happiness Factor

Thus, peace and harmony thrive among Bhutan's citizens. No murders, no headaches, no prescription drugs, no alcoholism, no gridlock, no air pollution, no slums and no social unrest.

How To Handle Discouragement

Thirdly, in all discouragements, you must release the "feelings" and embrace your heart. Whether you can do this by talking to a friend or loved one, in the end, you must come to terms with yourself and love yourself.

Planting A Garden In Your Mind

For parents willing to plant vibrant seeds in the gardens of their children's minds, they must leave the Smart phone on the kitchen table. Play with their children at the park. Laugh while pushing them ever higher on the swing or race them down the slides or spin on the merry-go-round.

Colossal Dreams Take Colossal Actions

Everyone smiled while you spoke your answer. In reality, most people don't possess an inkling about their life-purpose. Many lose any chance of pursuing their dreams because they get caught up in life by getting married, raising children and working a job.

Spirit Of Adventure: The High Drama Of Self-Discovery

It is your willingness to struggle through it, to present yourself at the doorstep of Nature or in front of a canvas or mountain peak. You might be a writer struggling with a plot or character. Adventure advances as you express it.

Tyranny Of Resistance: Cubicle Poster To Real Life

Exercise daily to blow off excess energy in the body to release your mind to express itself. Eat healthy foods to maintain a lean frame. That, in turn, allows you emotional balance that originates with your relationship with friends, families and co-workers.

The Creative Dynamo In You

The creative dynamo thrives in you by your receptivity. As a writer, I look for new ideas daily. Above my computer on the corkboard for the past 40 years, a small card reads: "The Idea Fairy may strike at any time—so be alert and write her idea down, so she will feel appreciated and come back often."

Invisible World Of Caring: Discover Your Destiny

Much of life in every civilization revolves around money, power and status. Some youngsters enjoy instant success from their parents while others begin in poverty. Everyone learns the ways of the world by the time they reach 18.

Change Your Life With P.A.C.E.

In order to become a person who relishes daily living, you enjoy the choice to create a "Positive" mindset. You may feed the "animal" in your mind with your highest and best thoughts. You may be an introvert or an extrovert. By

changing your thinking, you brighten and enliven every cell in your body. By changing your thoughts to positive energy, you create a positive outcome.

Bottled Lightning: Skin Your Knees On Eternity

Second, harness your youthful exuberance not only in your teen years, but choose to maintain your energies throughout your entire life. It's been said, "Life deals you high and low cards, but you play with the hand you're dealt. You can bluff your way through or you can play it straight. Either way, you win or lose on your chosen merits, talents, skills, education and actions.

Choosing High Self-Esteem: Carrying The Mental Equivalent For Success

First, change your view of yourself. Are you a victim or a product or a tragedy? You decide. You choose your relationship with any of your challenges or situations. In the end, the universe doesn't bequeath you a positive or negative thought pattern. You choose it and you live it. Either way, you evolve your life by your choices. If you run from something, it consumes you. When you face it, you devour

it.

Co-Create Your Life Journey

Most Americans enjoy two-week vacations with scant time to climb Mt. Everest or raft the Amazon. Others feel so locked into their jobs that nothing or no one can change their fate.

Creating Solitude For Your Spiritual Bliss

In my own hiking times through the woods in acceptance of solitude, I feel the “sweet spot” of temperature playing upon my skin. I feel the essence of light shining through my eyes. I accept my quiet essence pulsing into the energies of life. Once I reconnect with every blood cell charging through my body, I churn with delight.

Safeguarding Friendships—A Way To Care For You And Your

Friend

Your friendships may revolve around a beer, wine or dancing. You might go for a walk, a bicycle ride or the movies. You might backpack, ski or raft a river. You share moments of danger, serenity or wonder at a sunset. During those times, you develop feelings through laughter, stories and shared opinions on an array of topics.

The Celestial Magic Of A Campfire And Friends

To sit around a campfire with a stick while you poke the glowing embers before you, may be one of the most tangible of all visible mysteries of the universe. You stare into pulsing energy that feeds your soul. Warmth comforts your sense of belonging to the wilderness.

How To Handle Anyone Who Drives You Nuts

If you work in a school, company, fast food joint, office or any other organization that forces you into contact with other people—you must deal with one or two characters that drive you nuts. They may be arrogant, rude, aggressive or impudent.

Three Profound Secrets To A Happy Life

I read aloud this second secret to happiness daily. I engage the energy of London's wisdom for squeezing every second out of every day. That may mean contemplative thought and grateful moments versus quickening intensity. I understand that each moment of living constitutes a marvelous endowment.

What Dream Has Your Name on It?

From 50, they face the last third of their lives with a sense of a downhill slide. Most never lived any "great" moments or vanquished any dragons let alone navigated a great sailing ship called the Black Pearl like Captain Jack Sparrow. None took off through space like the Next Generation on the Starship Enterprise.

Stop Signs, Cul de Sacs, Dead

Ends During Your Life Journey

“The path to your destiny has “forks in road” that require the imperfect ability to discern the difference between opportunity and pitfalls,” he said. “You will make mistakes in judgment. You will fail often. But remember to make those failures into stepping-stones toward your ultimate success. Never get down on yourself. None of it comes easy, but it gets easier as you travel the path with a good attitude, application by work and your ingenuity.

Legal Immigration Adding 50 Million Foreign-Born To U.S. By 2060

Do you want your children to face the ominous ecological, sociological and cultural clashes they will encounter with an added 50 million legal immigrants? Do you want your kids to face 100 different languages in your schools? In Denver, my city, we must contend with 173 different languages in our classrooms. Do you want to pay ever-increasing amounts of your taxes toward housing...

Cost To U.S. Taxpayers \$5.3 Billion: 429,000 Annual Immigrant Birth Costs

Hidden in every federal budget, and unknown to 99 percent of Americans, your two U.S. Senators and House member use your money to pay for millions of legal and illegal immigrants flooding into America annually. I interviewed executive director David Durham of www.Balance.org.

"Massive and increasing costs to taxpayers are incurred, now at \$330 billion per year NET of Taxes Immigrants Pay, as each Birth Cohort Matures. Mass Immigration proves costly," said David Durham.

"Of the Many Costs of mass Immigration borne by U.S. Taxpayers, the Costs of Immigrant Births alone (via Medicaid or the Uninsured) is remarkable. Specifically, 1 in 5 births in the U.S. are to Immigrant Mothers. U.S. Taxpayers pay for 67% of births to illegal immigrants, 47% of births to legal immigrants according to a new report by www.CIS.org, Dr. Steven Camarota, Director of Research, 10/9/18."

"Based on an analysis of Census Bureau data, the Center estimates that nationally one in 13 births is to an illegal immigrant, totaling 300,000 births a year. One in eight births is to a legal immigrant. We also find that more than half of the births to immigrants (legal and illegal) are paid for by taxpayers, including 67 percent of births to illegal immigrants."

"Steven Camarota, the Center's Director of Research and co-author of the report, said, 'The enormous number of births to legal and illegal immigrants may hinder assimilation as children from immigrant families will largely interact with only each other.'"

He also points out that “paying for so many births to immigrant mothers may be appropriate, but the large share who can’t provide for themselves without the help of American taxpayers raises serious questions about whether our current immigration system makes sense.”

Given that Demography is Destiny, consider that since the aforementioned facts are for one year only, what the costs and demographic consequences will be for each year projected into the future unless BALANCE’s Solution is implemented. Consider further that Taxpayer- and Immigrant-Funded Immigrant Births total 791,000 per year.

National Picture from CIS Report

- ◆ That legal immigrants accounted for 12.4 percent (494,000) of all births annually and illegal immigrants accounted for 7.5 percent (297,000) annually.
- ◆ The 297,000 births per year to illegal immigrants are more than the total number of births to all mothers in any state except California and Texas. They are also more than the total number of births in 16 states combined, plus the District of Columbia.
- ◆ The estimated 28,000 births to illegal immigrants in just the Los Angeles metro area are more than the total number of births in any of 14 states or the District of Columbia.
- ◆ More than half (54 percent) of births to immigrants (legal and illegal) are entirely or largely paid for by taxpayers because the mother is on Medicaid or uninsured.
- ◆ Illegal immigrants account for 11 percent (198,000) of all publicly funded births, and legal immigrants are another 13 percent (231,000).
- ◆ We roughly estimate that the annual cost to taxpayers for births to immigrants (legal and illegal) is \$5.3 billion; \$2.4 billion of which is for illegal immigrants.

States:

- ♦ In California, New Jersey, and New York, immigrants (legal and illegal) account for about one-third of all births. In Massachusetts, Nevada, Florida, Texas, Hawaii, Maryland, and Washington, immigrants account for one in four births. Immigrants account for one in five births in Virginia, Connecticut, Illinois, Arizona, Rhode Island, and Oregon.
- ♦ The states with the largest numbers of births to illegal immigrants are California with 65,000, Texas with 51,000, Florida with 16,000, Illinois with 14,000, Georgia with 13,000, New York with 12,000, and New Jersey and North Carolina with 11,000 each.
- ♦ In North Carolina, Texas, and Georgia, three-fourth of births to illegal immigrants were likely paid for by taxpayers. In California, Florida, and New York, two-thirds of these births were likely taxpayer-funded. In Illinois and New Jersey, more than half were likely funded by the public."

David Durham states the best solution: The U.S.A. needs a zero net (i.e., 150,000 per year arrivals and 150,000 per year leaving) Moratorium applying to all immigrant categories, a Wall at our Southern Border, mandating use of E-Verify in hiring decisions, elimination of anchor baby citizenship and an end to "Catch & Release."

"Enactment of all these would reduce the 1.6 Million Annual flow of Legal Immigrants (400,000 annually into California alone; U.S. Census) and thus greatly reduce the Annual NET (after subtracting Taxes Immigrants pay) Costs of Legal Immigration, now running at \$330 BILLION per year," said Durham. "Implementing the Trump Administration's Admirable Proposal that No Green Cards (reflecting permanent Resident Status) would be issued to those who had accepted, or were likely to accept in the future, any Taxpayer-funded Benefits, would reduce Immigrant Numbers significantly."

When you start adding up these financial figures over the years and then, over the decades, we, the American people face

enormous financial burdens created and supported by our two senators and House members. You really need to call them with your anger over their cheating, lying and stealing from your wallet.

After having talked extensively with David Durham, he makes the most sense of any of the top immigration websites such as FAIR.org and/or NumbersUSA.org. We need a total shutdown of all immigration into the USA for 10 to 20 years. We need to get our own house straightened out. If you want more information, contact www.balance.org

Cost Of Illegal Immigration Per Illegal Alien

Consider this summary of a study from the Center of Immigration Studies, www.cis.org:

“The findings of this analysis show that the average cost of a deportation is much smaller than the net fiscal drain created by the average illegal immigrant. Immigration and Customs Enforcement (ICE) reported the average deportation cost as \$10,854 in FY 2016. In FY 2012, ICE removed 71 percent more aliens with a similar budget, creating an average inflation-adjusted cost of \$5,915. This compares to an average lifetime net fiscal drain (taxes paid minus services used) of \$65,292 for each illegal immigrant, excluding their descendants. This net figure is based on fiscal estimates of immigrants by education level from the National Academies of Sciences,

Engineering, and Medicine (NAS). The total fiscal drain for the entire illegal population is estimated at \$746.3 billion. Of course, simply because deportation is much less costly than allowing illegal immigrants to stay does not settle the policy questions surrounding illegal immigration as there are many factors to consider. **Steven A. Camarota is the director of research at the Center for Immigration Studies, 8/3/17** (Reported in CarryingCapacityNetwork.org)

Your two U.S. senators and Congressman/woman bring this nightmare to you every year, year after year, decade after decade. Since the latest figure of illegal immigration now stands at 22-25 million illegal aliens per the October 2018 Yale University Report, you, the American taxpayer might feel a huge vacuum sucking your wallet right out of your pants or your purse.

And, yet, such famous Congressional Critters like Nancy Pelosi or Chuck Schumer, who dominated Congress for the past 40 years, continue to tell you, "There is no crisis at the border." Except, the U.S. Border

Patrol reported a record of 78,000 illegal alien violated our borders in February. With 22 to 25 million illegals in our country, perhaps Pelosi and Schumer remain out of touch with reality.

How about this sobering figure as to LEGAL immigration?

29,000 LEGAL Immigrants per Week Cost Us, U.S. Taxpayers \$6.3 BILLION per Week, NET!

Unsustainable 1.5 Million Annual Legal-Immigrant Influx Costs U.S. Taxpayers \$330 Billion NET (i.e., after subtracting Taxes Immigrants Pay) per Year NET, i.e., \$758 MILLION per Year for EACH Congressional District (does not include State & Local Costs to Taxpayers)

See CCN's [Cost of Immigration Study](#)

David Durham, director at CCN, said, "If the 1.5 to 1.6 Million Annual Legal Immigrant Inflow were cut to 150,000/Year (i.e., Zero-Net Annual Immigration = Emigration), Federal Deficit could be reduced by One-Half Trillion \$ in a Decade!

Please help us (Carrying Capacity Network) PUSH A MORATORIUM, by intensifying our Activist Mobilization, Media, lobbying and public education efforts with a tax-deductible donation

What is Carrying Capacity Network?

Carrying Capacity Network confronts the controversial issues, makes the difficult choices, and adopts the innovative approaches necessary to meet the challenges facing our nation. CCN's action-oriented initiatives focus on achieving national revitalization, population stabilization, immigration reduction, economic sustainability, and resource conservation.

After much research on the issue of legal and illegal immigration, everything becomes SO depressing. That's why I stand with and support organizations that actually take action on behalf of American citizens. As you know, the invasion of our country continues because not enough people stand up and push back.

We either stand together and stop this legal/illegal immigration invasion or our children face a really sobering future. In order to educate yourself please check out: CarryingCapacityNetwork.org

As I've written hundreds of commentaries for the past 30 years, we either stop endless and massive immigration into America, or we're not going to enjoy an "America" and the "American people" ever again. We're literally galloping over a demographic and sociological cliff.

By joining such organizations as CarryingCapacityNetwork.org, you give yourself a powerful voice by joining with millions of other Americans who care about the future of our country.

Muslim Massacre In New Zealand: Predictable And More To Come

"Free institutions are next to impossible in a country made up of different nationalities. Among a people without 'fellow-feeling', especially if they read and speak different languages, the united public opinion, necessary to the working of representative government, cannot exist." –Enoch Powell

Samuel P. Huntington, in his book, **Clash of Civilizations**, made the cogent point that mixing cultures leads to violent clashes among different religions, ethnic groups and languages.

Last week, an angry Australian in New Zealand massacred Muslims in two different mosques with the vengeance of a jihadist right out of the playbook from the Paris, France massacres, along with the Brussels, Belgium explosions and

Nice, France killings along with Charlie Hebdo executions.

With clashing cultures and incompatible religions being imported into Canada, America and Australia—little wonder that more such violent reactions don't occur more often. Fact: Islam intends to dominate the world. Their Quran mandates violence in that pursuit.

In America, our leaders imported 3.5 million Muslims, which led to San Bernardino Christmas killings, Orlando, Florida gay nightclub massacre, Fort Lauderdale killings, St. Cloud, Minnesota stabbings, 3,000

deaths at 9/11 site in New York City, along with an average of 25 honor killings annually of Muslim women in the USA and the insane assault and battery of over 500,000 women subjected to the brutality of female genital mutilation. (Source: Ass't District Attorney Ed O'Callihan, DHS, Feb 2, 2018, press briefing)

In other words, when you mix a 6th century brutal and violent religion into first world countries, at some point, you force a response.

Remark on social media: "Along with "building too many Mosques" in Western Host countries & forcing their Kill-Joy Islam & their boring way of life upon host countries & proposing of "barbaric Sharia," contribute further to Muslim hatred & also they never ever assimilate.

“See, Muslims run away from their “Islamic Shit-Holes,” to western countries, for a good life...but when they settle down, they try to convert their Western host countries into the same “Islamic Hell-Holes,” they ran away from in the first place!”

Because of 9/11, most Americans feel queasy when they see a woman in a head scarf or a man in a white dress and cap. It brings them back to that brutal day in New York City when Muslim jihadists killed 3,000 people in the Twin Towers.

Additionally, Americans become a bit nervous, if not outraged when they hear Islamic leaders proclaim:

Illinois: Muslim Leader: “Everything We Represent Goes in Total Contradiction to What the West Represents” “My dear brothers and sisters, this idea of fitting in – we need to eliminate this from our vocabulary. Again, we are to stand out. We are a unique nation with a unique set of solutions. We are not to fit in.”

Other Muslim leaders proclaim, “Islam isn’t in America to be equal to any faith, but to become dominant. The Qur’an should be the highest authority in America, and Islam the only accepted religion on Earth.” Omar Ahmed, director of Council on American Islamic Relations.

Historian Andre Servier said, “Islam was not a torch, but an extinguisher. Conceived in a barbarous brain for the use by a barbarous people, it was, and it remains, incapable of adapting itself to civilization. Whatever it has dominated, it has broken the impulse toward progress and checked the evolution of society.”

In other words, Muslims themselves tell Western countries their intentions to conquer. Historians give greater understandings of the intentions of the Quran, but Western leaders fail to comprehend the point-blank intentions of Muslims in their countries. Thus, you see the devolvment and destruction of European, Canadian, American, New Zealand and

Australia civilizations.

Our freedom of speech faces censoring by Muslims. Last week, Judge Jeanine Pirro suffered censoring because CAIR didn't like the judge's pointing out that House Member Muslim Omar remains vehemently anti-Jewish and wears a hijab mandated by the Quran that she swore on to become a member of the US House of Representatives. Unfortunately, everything in the Quran counters everything in U.S. Constitutional Law. Additionally, the Quran mandates destruction of America, thus, Omar should be tried for treason and deported back to Somalia.

While New Zealand's leaders imported Muslims, they saw an uptick in honor killings, female genital mutilation, religious confrontations and severe unease among the Kiwi populace. I've traveled extensively over there. Nobody wants, likes or needs Muslim immigrants.

Huntington made it very clear as to the violence of mixing cultures and incompatible religions, "It is my hypothesis that the fundamental source of conflict in this new world will not be primarily ideological or primarily economic. The great divisions among humankind and the dominating source of conflict will be cultural. Nation-states will remain the most powerful actors in world affairs, but the principal conflicts of global politics will occur between nations and groups of different civilizations. The clash of civilizations will dominate global politics. The fault lines between civilizations will be the battle lines of the future."

As Western countries import more Moslems, their leaders guarantee more religious, linguistic and cultural confrontations, especially from Islam and Sharia Law. Moslems NEVER integrate into host countries. Take a trip to Detroit, Michigan or Minneapolis, Minnesota or Miami, Florida. Those cities morphed into foreign countries with no intention of ever assimilating into America.

One reader from Florida wrote me, "This is why they don't complain about immigration in south Florida: In Miami there is less than 5% White Americans and the native born African-American population has mostly fled as well. In Miami, you don't hear much complaining about immigration because there is no one left to complain. Native Floridians get it and have fled to other parts of the State. The recent hurricanes hitting Puerto Rico combined with their bond default has brought 3 million of them to the central Florida area. So the new line is now Ocala. You have to move North of Ocala to find anyone that speaks English at a 7-11." John E.

That's why, as America adds another 140 million people from all over the world by 2050—it signs its own death warrant as an intact, peaceful, cohesive and thriving civilization. Instead, America faces more San Bernardino's, Orlando's, St. Cloud's, Fort Hood's, beheadings, be-handings, honor killings, Sharia Law, female genital mutilation, gay killings, fatwa's and a host of Quran related violence. Violence remains the nature of Islam as it gallops toward dominance wherever it exists.

Only viable solution: immediate cessation of all immigration into the United States and Canada.

The Mess Of Legal

Immigration: Multi-Cultural Invasion – Environmental Consequences

Part 1: Importing crime, drugs, diseases and cultural chaos

If you ask average Americans about legal immigration, you hear responses mostly in the positive. Except if you ask Americans from Chicago, Los Angeles, New York City, San Francisco, Miami and other immigration-overwhelmed cities. Most of our major cities, where welfare departments cater to legal and illegal immigration, find themselves flooded with immigrants from around the world.

So much so, that you, the American taxpayer, shell out \$330 billion a year in welfare funding across 15 federal agencies.

Recently, I talked to Mr. David Durham, director of CarryingCapacityNetwork.com and Balance.org. His websites expose the stunning amount of money you pay for legal and illegal immigration.

Durham states, “Yet another Multi-National Caravan is headed North to our Southern Border and the overwhelming Evidence is that Illegal Migrants/Asylum Seekers come from Scores of Different Countries and Cultures with Values which reflect little or no Regard for the Environment.”

Consider the following Environmental Threats:

“Gypsies Threatening America, Defecating Everywhere and Beheading Chickens” via Pittsburg Post-Gazette & Tucker Carlson re Roma Asylum Seekers Invasion of Pennsylvania Town.”

“Lima River in Peru and Ganges in India and Yangtze in China are ‘Running Sewers’ and People in those Countries have absolutely no regard for Environment Whatsoever.” International Trekker, F. Wooldridge Personal Observations

Or a report that “Taiwanese Community in California Mad that Chinese Immigrants Pooping on People’s Lawns” Daily Mail & Chinese in L.A.com

Disease Threats

“‘Crisis’ of Seriously ill Migrants Slams Border Patrol – TB, Pneumonia, Influenza, Parasites’ Federal agents are referring 50 illegal immigrants a day for urgent medical care’ The MSM never reports this and open border advocates vehemently deny this fact. Look what these alone are costing U.S. taxpayers.

“Weeks after mainstream media outlets reported that illegal immigrants don’t bring disease into the United States, the Border Patrol reveals that it is getting slammed daily with

dozens of illegal immigrants carrying 'serious illnesses.' This includes tuberculosis, influenza, and pneumonia. In fact, a Guatemalan migrant who died in U.S. custody on Christmas Eve, had Influenza B, a virus that causes respiratory infections.

"Federal agents are referring 50 illegal immigrants a day for urgent medical care, according to figures obtained by Washington D.C.'s conservative newspaper. Authorities say, 'it's unlike anything they've ever seen before.' Many of the migrants have tuberculosis, parasites or the flu, the feds confirm.

"There are also lots of pregnant women about to give birth.

"Judicial Watch has interviewed medical experts that confirm illegal immigrants do indeed pose a serious public health threat to the U.S. by bringing dangerous diseases into the country. This includes tuberculosis, dengue and Chikungunya.

"After returning from covering the Central American caravan along the Guatemala-Honduras border, Judicial Watch spoke with a prominent physician in a border state who warned that the migrants will undoubtedly bring infectious diseases into the U.S. Among them are extremely drug resistant strands of tuberculosis and mosquito-borne diseases such as dengue and chikungunya that are widespread in the region."

"'Crisis' of Seriously ill Migrants Slams Border Patrol – TB, Pneumonia, Influenza, Parasites," –[Judicial Watch](#), 01/07/2019

Cultural Environment Threats – Child-Bride Approvals – Thousands!

Washington—Thousands of requests by men to bring in child and adolescent brides to live in the United States were approved over the past decade, according to government data obtained by The Associated Press. In one case, a 49-year-old man applied for admission for a 15-year-old girl.

"The approvals are legal. ... U.S. Citizenship and Immigration Services goes by whether the marriage is legal in the home country."

"There were more than 5,000 cases of adults petitioning on behalf of minors and nearly 3,000 examples of minors seeking to bring in older spouses or fiancés."

"Some victims of forced marriage say the lure of a U.S. passport combined with lax U.S. marriage laws are partly fueling the petitions."

"‘My passport ruined my life,’ said Naila Amin, a dual citizen from Pakistan who grew up in New York City."

"She was forcibly married at 13 in Pakistan and applied for papers for her 26-year-old husband to come to the country."

"‘People die to come to America,’ she said. ‘I was a passport to him. They all wanted him here, and that was the way to do it.’"

"Amin, now 29, said she was betrothed to her first cousin, Tariq, when she was just 8 and he was 21."

"Overall, there were 3.5 million petitions received from budget years 2007 through 2017."

"Over that period, there were 5,556 approvals for those seeking to bring minor spouses or fiancées and 2,926 approvals by minors seeking to bring in older spouses according to the data."

Fraidy Reiss, who campaigns against coerced marriage as head of a group called Unchained at Last, researched data from her home state of New Jersey. She determined that nearly 4,000 minors, mostly girls, were married in the state from 1995 to 2012, including 178 who were under 15."

What am I finding in my research of legal immigration into the

USA? Answer: our own 535 Congressional representatives undermine the foundation of our culture, our marital laws and our Western democracy. Your two senators and your House member approve this travesty of ethics, morality and our laws.

You're urged to visit CarryingCapacityNetwork.com and Balance.org to find out for yourself how Congress sends our country into a spiraling third world future of entrenched poverty, generational welfare and complete destruction of America's culture and way of life.

Why Is Congress Importing A Permanent Underclass?

At this point, we see 6,000 homeless in Seattle, 10,000 homeless in Denver, 50,000 plus homeless in Los Angeles and 11,000 homeless in San Francisco. On any day, America features one million homeless throughout 50 states. If we can't figure out how to solve those monumental social problems, how do we think we can save the rest of the world by importing over 100,000 legal immigrants every 30 days into our country?

Do you know that our U.S. Congress, based in Washington DC, and totally out of touch with what their actions are doing to middle-class Americans, continues to import one million legal immigrants from the third world onto our shores, annually? Do you realize they allow another 500,000 illegal aliens to jump our borders, annually? That's over 100,000 immigrants every 30 days. (Sources: www.NumbersUSA.org ; www.CIS.org)

Do you realize that Congress allows 22 to 25 million illegal aliens to remain in our country without fear of deportation? (Source: Yale University Study, Oct 2018) How do they do that? Congress refuses to enforce Federal Law Section 8 USC 1324, within our nation. In fact, employers of illegal aliens do not face arrest, prosecution or prison because your two senators and House member refuse to do their jobs.

What do you pay? According the latest figures at www.FAIR.org, you pay \$113,000,000,000.00 (billion) annually to maintain those illegals as to educating and feeding their children, along with medical care, and ESL courses, plus 12 agencies who must address this invasion with your money.

But that's not all, each state pays into the millions of dollars for illegals operating in their area. Illegal migrants cost Michigan \$928 million in 2018. In California, it's into the billions of dollars as they

feature over four million illegal aliens and possible as high as six million. They're slithering into welfare offices in all the major cities around America.

Do you think it's going to stop? Do you think it's going to become better? Do you think you will ever stop paying for legal and illegal immigrants? Answer: sorry, you will pay more and more as our U.S. Congress continues to **import a permanent underclass** into America.

Why do you think millions of people around the world live in misery? Why do their countries suffer poverty, hopelessness and dictators? Answer: their leaders and citizens lack the intellectual horsepower to create viable social, political and economic systems.

“The stresses caused by population growth cannot be solved by international migration. They must be confronted by and within each individual nation. Fundamental to the concept of national rights and responsibilities is the duty of each nation to match its population with its political, social, and environmental resources, in both the short and the long term. No nation should exceed what the biologists call its ‘carrying capacity.’” Dr. John Tanton

Why are Western countries successful? Answer: very smart people and very good educational systems built up by very smart people! Average IQ in Canada, America, Europe and Australia runs around 100 to 105.

Why are places like Africa filled with illiteracy and horrific poverty, overpopulation and futility? Answer: illiteracy dominates most African countries at 65 to 75 IQ's in Sub-Saharan Africa and 75 to 85 in upper Africa. Check for accuracy: www.brainstats.com

In fact, the most successful countries average 105 IQ's of the general public such as Japan, Singapore, and China. Whereas Somalia, Ethiopia, Sudan, Congo, Kenya and others run an average of 65 IQ.

It might be noted that third world birth rates, driven by illiteracy and failing countries, contribute 83 million new babies, net gain, annually. That's where all those third world people, and soon to be immigrants to America and the West, accelerate their numbers.

Since the line continually grows and accelerates, with those realities facing us, why are we importing 1.0 to 1.2 million

legal immigrants annually and another 500,000 illegally? What exactly do we think will happen as we import millions of intellectually challenged people. As a matter of fact, America's average IQ has dropped from 100 in 1965 to 98 in the last 50 years. We feature no less than 45 million foreign born from mostly third world countries.

How do you think that will play out in another 30 years as we add another 110 million more immigrants and their children? Take a guess!

It's not their fault; it's their condition. The great majority cannot perform basic educational standards. Thus, welfare, more welfare, their families and generations feed off our welfare systems. Thus, you see drug gangs, street gangs, and endless violence such as in Chicago and LA. And, a complete breakdown of ethics, rule of law and societal order. What happens with illiterate people? They draw down on violence, drugs, frustration and total loss of social fabric identification. What will be accomplished if we continue adding third world immigrants? Answer: we will be dragged down into a third world country by importing a permanent underclass of third world people who cannot perform in a first world country. They are creating permanent enclaves of separation from our successful society, but at some point, they will become violent enclaves that will become totally unmanageable. That kind of situation devolves into civil war.

When you entangle incompatible cultures such as a Somalian bush family, along with incompatible and violent religions such as Islam, and you add hundreds of different languages, and then, you toss in 100 million people with 200 different world views from the countries where they originated—do you think the United States stands a chance of surviving the next 30 years?

"Diversity within a nation destroys unity and leads to civil wars," said social scientist Garret Hardin. "Immigration, a

benefit during the youth of a nation, can act as a disease in its mature state. Too much internal diversity in large nations has led to violence and disintegration. We are now in the process of destabilizing America. The magic words of destabilizers are 'diversity' and 'multiculturalism'."

The only viable solution: we must engage Congress to rescind the 1965 Immigration Reform Act. We must shutdown all immigration for at least 20 years, or most shutdown all immigration, period. Anything less, and our children face a horrifically difficult and/or impossible future.

If you look at these two videos, you will see exactly what I am speaking about:

The Strange Death Of Europe:

Muslims Never Become Part Of A Host Country

Part 7. “Immigrants devoted to their own cultures and religions are not influenced by the secular politically correct façade that dominates academia, news-media, entertainment, education, religious and political thinking today,” said James Walsh, former Associate General Counsel of the United States Immigration and Naturalization Service. “They claim the right not to assimilate, and the day is coming when the question will be how can the United States regulate the defiantly unassimilated cultures, religions and mores of foreign lands? Such immigrants say their traditions trump the U.S. legal system. Balkanization of the United States has begun.”

In March 2019, the two new Muslim women in the U.S. House of Representatives, one from the stacked Muslim immigrant crowd from Detroit, and the other in “Somaliland” Minneapolis, Minnesota, move fast to enact five Muslim holidays into Federal Law. Ihan Omar of Somalia, voted into the House, and her sidekick, Rashida Tlaib, who wrapped herself into a Palestinian flag when she won a House seat, have pressed for eradication of ICE and DHS. Soon, they will submit bills to increase Muslim immigration and chain-migration numbers. With their increased numbers, they will introduce bills to enact Sharia Laws in America.

Already in Great Britain, 150 Sharia Law courts operate along with 50 Sharia Law city councils. We’re already seeing it in cities in Texas. Additionally, we see 30 Sharia Law cop cars now patrolling the streets of Muslim-dominated areas on New York City.

Former Muslim Amil Imani wrote, "In model, Islamic states such as Saudi Arabia and Iran, for instance, women do not dare complain about their Allah-decreed chattel status. If they protest in the

least, they are beaten by their husbands. And if they dare to demonstrate in public for equal family rights with men, they get severe beatings by the police and are hauled to jails for additional indignities and violence."

Note that the United Nations reported a minimum of 20,000 'honor killings' of women in Islamic-dominated countries, annually. They can be killed for any reason, such as a husband wants a third wife, but cannot afford her, so, he kills one of his wives, to make space for another wife. Muslims can kill their wives if they feel she has dishonored him. Muslim women fear for their lives every day of their lives. And talk about sexual mistreatment!

In his book, **The Strange Death of Europe**, Douglas Murray wrote, "Another story related events at an asylum center the day before. On the evening of September 27, 2017, a migrant called police from a Berlin center to say that he had seen another migrant abusing a child in the bushes. Three policemen arrived to find a 27-year-old Pakistani still in the bushes raping a six-year-old Iraqi girl."

Imani wrote, "In Islamic societies, freedom of expression, worship, and assembly are taken away. Women are indeed

treated as chattel. Young girls are subjected to barbaric genital mutilation to make them sex slaves and birth channels. Minors are executed, adulterers are stoned to death, thieves have their limbs amputated, and much, much more. Isn't that everyone's idea of paradise?"

I can share with you this: reading this book gives you an uneasy understanding and foreboding reality check as to what's coming into America. Any fool can see that we commit our own suicide as a culture, language and way of life. You've heard the saying, "The American People", but today we fail to meet that statement because we are becoming every other country's people.

Murray wrote, "In Holland, Denmark and other countries across Europe, politicians who oppose mass immigration, exist in a state of permanent police protection, change their sleeping arrangements most nights and sometimes live on army bases.

"The politicians that remain politically correct ensure that Europe is the only place in the world that belongs to the world, not to Europeans. By the middle of this century, China will still look like China and India will look like India as well as Russia like Russia, but not Europe ever again."

The London think tank asked 10,000 people across ten European countries whether they agreed or disagreed with the statement, 'All further Muslim immigration should be stopped.' The vast majority agreed with that statement. Unfortunately, it's too late with 50 million plus Muslims already embedded in Europe.

Immigrants maintain that they own their new countries. One said, "We refugees do not want to live in the same country with you. You can, and I think you should, leave Germany. Germany does not fit you anymore. Why do you live here? Look for a new home."

As you read the quote at the beginning of this column, you must ask yourself what America will do with, how will we cope

with, and what kind of a future will be in store for our kids with the projected 100 million legal immigrants added by 2050?

What do I see? From my own international experiences in such overpopulated, over-multiculturalized, over-diversified and completely fragmented societies—two outcomes: one would be a slow boil into becoming a third world country with illiteracy, entrenched poverty, racial strife, ethnic tribalism, enclaves of similar immigrants separating from American society, conflicting languages and tremendous confusion and loss of identity. Example: India. And, with more and more illiterate third world people, welfare rolls that break all our systems down. Additionally, our standard of living and quality of life degrade into the sewer.

Second scenario: I see tremendous racial and religious conflict. As we add another 100 million third world immigrants with ZERO compatibility with Americans, as well as NO cultural ability to function in a first world country, I see our Republic degrading into whites against Muslims, against blacks against Hispanics. And all three ethnic groups against themselves. I see horrific Sharia Law enclaves that degrade democracy into a standing joke. Women's rights? Gone!

I see total breakdown of American identity. You already hear it: "I am a Muslim-American" or "Pakistani-American", which is an oxymoron because Muslim cannot and do not possess any affinity to U.S. Constitutional Law. Why? Because the Quran is a political-religious-economic system totally counter to U.S. capitalism, separation of church and state, and the rule of Constitutional law. In an Islamic country, Muslims can legally kill anyone who chooses another religion other than Islam.

I see our entire environment and quality of life degraded beyond recognition from what we enjoy today. Our cities will be gridlocked and air-polluted beyond solving. Our water shortages will become acute, irreversible and unsolvable.

When oil exhausts itself, food shortages will drag us under. We face horrific consequences as to energy and resource depletion. Over 100 to 500 different languages from all these immigrants will create 100 to 500 different world views that cannot and will not EVER share the same page as to ethos of America.

In other words, we face an unmanageable future with unmanageable ethnic groups and languages bent on having their cultures mandated and ours dissolved.

At some point, we will face a Mt. Everest of problems that cannot be solved.

What can we do to stop this dismal future in America?

Solution: stop all immigration into America for the next 20 years. Help them in their own countries.

If you look at these two videos, you will see exactly what I am speaking about:

[“Immigration, Poverty, and Gum Balls”](#), Roy Beck, director of www.numbersusa.ORG, graphically illustrates the impact of overpopulation. Take five minutes to see for yourself:

The Strange Death Of Europe: Rapes And Murders Daily By Refugees

Part 6: Incredible crime rates as to rapes, murders, molesting Europeans by immigrants.

In his book, **The Strange Death of Europe**, Douglas Murray said," The desire to continue to feel yourself guilty arguably finds its end point in modern European liberal societies: the first societies in human history who, when they are hit, ask what they did to deserve it. For unassuageable historical guilt carries over into the present. It makes Europeans the guilty party even when they actually are hit, or worse. Several years before the latest surge in migration, the left-wing Norwegian politician Karsen Nordal Hauken, a self-described feminist, anti-racist and heterosexual, was brutally raped in his own home by a male Somali refugee."

Horrendously, the very people who plead for more refugees remain in gated communities to ensure their daughters and wives do not face the rampant rapes and molestations across all European countries invaded by immigrants. All politicians stand away from and above the violence.

What kind of violence? Please examine these few examples:

Mourtala Madou, a 33-year-old illegal immigrant from Niger, has been sentenced to life in prison for stabbing to death his 34-year-old German ex-girlfriend and decapitating their 21-month-old daughter at a subway station in Hamburg.

The grisly crime drew renewed attention to Germany's spiraling epidemic of stabbings and knife violence, which has raged since Chancellor Angela Merkel allowed into the country more than a 2 million mostly male migrants from Africa, Asia and the Middle East.

The double murder in Hamburg occurred the morning of April 12, 2018, one day after a family judge denied Madou (also known as Mado Bido M. or Mourtala M.) joint custody of his daughter. Madou followed the mother, Sandra P., and their toddler, Mariam, into the Jungfernstieg station in downtown Hamburg. In front of many passers-by, he opened his backpack, pulled out a knife and stabbed his stroller-bound daughter in the abdomen. He then slashed her neck and severed her head. Madou subsequently plunged the knife into Sandra P.'s back and cut through her vital organs. She died less than an hour later at a nearby hospital.

During interrogation by police, Madou said, "This is my child.

This is my blood. The mother separates me from the child. Then I separate the child from her.”

Police and prosecutors had initially tried to conceal from the public that Madou had decapitated the baby, but a commuter in Hamburg – who happened to arrive at the subway station moments after the attack filmed the scene on his phone. “Oh my God,” Daniel J. can be heard saying in English. “It’s unbelievable. He cut off the head of the baby.”

Heinrich Kordewiner, a blogger from Hamburg who discovered the video on Daniel J.’s Facebook page, uploaded it to YouTube. Hamburg police subsequently arrived at Kordewiner’s apartment with a search warrant, and confiscated his computer, mobile phone and other electronics, allegedly to find “evidence” of the “crime” of uploading the video.

Police and prosecutors have insisted that their silence about the child’s decapitation has been out of respect for the dignity of the dead. Others, however, have accused German authorities of censoring information about growing lawlessness – including spiraling knife violence – to “preserve civil peace.”

No One Is Safe in the Streets of European Cities Anymore with African and Middle Eastern Refugees that now number into the Millions

Knives, axes and machetes have become weapons of choice for immigrants in Germany, which has some of the strictest gun laws in Europe. People armed with knives, axes and machetes have brought devastation to all of Germany’s 16 federal states. Knives have been used not only not only to carry out jihadist attacks, but also to commit homicides, robberies, home invasions, sexual assaults, honor killings and many other types of violent crime.

Knife-related crimes have occurred in amusement parks, bicycle trails, hotels, parking lots, parks, public squares, public

transportation, restaurants, schools, supermarkets and train stations. **Many Germans have the sense that danger lurks everywhere**, but the lack of official statistics seemingly allows German authorities to pretend that the problem is imaginary.

Daily occurrences in European cities via refugees give asylum:

- **Fulda.** A 23-year-old Somali asylum seeker demanded a cigarette from a passerby: "Give me the cigarette. The cigarette is mine. Allahu Akbar! [Allah is the greatest!] I kill Christians!" When the man refused, the Somali drew a knife and repeatedly stabbed him in the upper torso. The injured man fled but the Somali pursued him: "I'm a Muslim. I want to kill you. I kill Christians. Allahu Akbar!" The man later died of his wounds.
- **Flensburg.** Ahmad Gulbhar, a failed Afghan asylum seeker, stabbed to death 17-year-old Mireille B. after she refused to convert to Islam. He claimed on his asylum application that he was an 18-year-old refugee from Syria. Medical exams showed that Gulbhar was at least 21 years old and possibly 29 years old.
- **Nordstetten.** A 26-year-old Syrian asylum seeker, Mohammed Omran Albakr, was arrested in the stabbing death of his landlord, Michael Riecher, a real estate entrepreneur. Riecher had sponsored Albakr and some speculated that the murder had a financial motive. Others said that Albakr murdered Riecher after learning that he was Jewish; that the murder had a religious and anti-Semitic dimension.

During my research for Part 6 of this series, I am looking at four pages of this kind of violence to Europeans who have been forced by their leaders to accept these 21st century barbarians or at best, savages from Africa.

The rape sheet on my desk looks like a ticker-tape listing

spewing out of a machine of women raped by Muslims and Africans. It's what they do; it's how they operate; it's their culture. It's become Europe's noose around Europe's neck. Brought to Europeans by their leaders! Murray makes it clear in his book. He documents everything.

Do we want this kind of America where rapes, jihad and violence to anyone who isn't Islamic, occur in our cities every minute of the day? Do we want the violence of multiculturalism and diversity where we face certain societal suicide and death to our citizens?

If we maintain our present course, none of us will be safe from this immigration onslaught of America.

Letters To My U.S. Senators Gardner And Bennet

Do you ever communicate your disdain, frustration and exasperation with your two U.S. senators and House member? Well, I do! Both pretend to serve the citizens of Colorado and America. Both have failed miserably after over a decade in office.

They don't do their jobs. They don't serve America or her citizens. Therefore, this week I wrote them this letter. And, you can do the same with your elected officials, because the fact remains, our U.S. Congress continues to fail

the American people year after year after year.

Dear Senator Cory Gardner, and Senator Michael Bennet:

What have you done in your years in Congress?

1. What have you done about the 300,000 anchor babies that we pay for annually because of the 300,000 illegal alien pregnant women birthing them in our country? Answer: you've done nothing to create a bill to stop this usurpation of the 14th Amendment that was meant for slave children; NOT illegal alien mothers! Do something for heaven sakes!
2. What have you done to stop illegal alien employment in our country that draws illegal aliens so much so, that www.CIS.org states that over 500,000 illegals enter our country annually? Answer: you haven't done jack squat in 10 years in Congress.
3. What have you done to arrest employers of illegal aliens for breaking our current laws, Section 8 of the US code, 1324, and what have you done to pass E-Verify? Answer: not a darned thing in 10 years. It begs the question as to what in the daylights you're doing up there in DC for 10 years.
4. What have you done to stop the Iraq and Afghanistan, and

Syrian Wars in the past 10 years? Answer: you keep funding them and you keep getting our kids killed. We didn't vote you into office to waste our money for 18 years in those useless wars. What in the name of common sense and reason gives you the right to continue and do nothing to defund those wars?

5. We've got a \$22 trillion national debt? What have you done to stop it and reduce it? Answer: Nothing, absolutely nothing. Get off your tail-feathers and move toward solutions!
6. We've got air pollution, water shortages and resource shortages facing America because of human overpopulation. What did you do in 2013? You attempted to double legal immigration rates to 2 million annually. Where is your head and common sense? Zilch!
7. We've got race problems in this country, but you help illegal aliens and refugees more than our own African-American ghettos. Why don't you help our citizens? Answer that one, will you?
8. We face horrific infrastructure breakdown in this country, but you do nothing to fix it? Why? Why are we paying you to do nothing?
9. We've got catastrophic climate destabilization in the USA from carbon footprint caused by overpopulation and we're about to add another 100 million immigrants according to the US Census Bureau. What are you doing to stop that horrible outcome? Answer: you're making it worse and you're doing nothing to stop it.
10. What are you doing to earn your \$194,000.00 annual salary? Answer: little to nothing. I worked as a math-science teacher here in Colorado on \$5,000.00 a year, and I got the job done every year. You're totally a complete and utter failure as a U.S. Senator. Change that and take action. We're sick of waiting. The only factor that counts in America is that you take a job, and then, you fill the job with results. Both you two senators continue to fail all of us because you don't do

anything that solves our nation's problems.

Instead of fiddling your thumbs and sitting at your desk, how about serving your constituents and our country. Start fulfilling the above 10 points and another two dozen other points that I could add. We, the American people, demand you serve us, our state and our country. Not everybody else's country and people!

We want results. We pay you for results, not speeches! Get busy and do your jobs.

Thank you,

Stem Cell Therapy: A New Model For Health Rejuvenation

Do you suffer from bad knees, hips rusted out, painful shoulders, bone on bone joints, Alzheimer's, MS, MD, PTSD, TBI and a host of other maladies of the baby-boomer generation?

You hear conversations about it, but much of the time, you're not sure because of so much controversy in the news. These days, you cannot trust much of the news because of incredible bias by reporters, TV talk show hosts and dozens of other different filters.

That's why I'm writing this column in order to give countless

Americans a chance to understand Stem Cell Therapy. At this point, doctors find that this therapy gives all of us the most advanced form of healing yet discovered on the planet. Even better, we utilize our own stem cells from a simple procedure in a doctor's office.

First, a bit of history. I've been a top-notch athlete all my life. I've played 20 different sports such as racquetball, tennis, including 30 years of triathlons, skiing, mountain climbing, weight-lifting, bicycling and much more. I've pounded my body, especially my knees, hips and shoulders.

When I reached 60 years of age, I played racquetball one day with the same vigor as a 21-year-old.

Unfortunately, my right knee suffered an injury that never healed. It became worse and worse.

When I alpine skied, it hurt.

When I played tennis, it hurt. When I bicycled, it froze up and hurt. On one of my last cross continent bicycle rides in 2016, it hurt daily, it froze up and wouldn't heal. I figured my athletic days faced an abrupt ending.

When I returned home to Denver, a local pro football star, Mark Schlareth of the Denver Broncos, spoke on TV about a clinic in town that performed Stem Cell Therapy. He vouched for his renewed shoulders, hips and knees. He promised that all his pain vanished, and he had returned to a normal life. No more pills to quell the pain! He said, "This procedure is quick, easy and gave me back my life."

I scheduled a free consultation the next week. If it worked for him, it might work for me.

At 9:00 a.m., I reported to the DenverRegenerativeMedicine.com office. One of the foremost medical doctors in the country, who has spoken on Ted Talks about regenerative medicine, Dr. Michael Cantor, met with me. He took X-rays of my knee. He showed where I had damaged the meniscus. He educated me as to why it wouldn't heal because of my age and the lack of blood flow.

"If I'm going to spend \$6,000.00 out of pocket," I said. "What percentage chance do I have for healing?"

Dr. Cantor said, "You will enjoy 99 percent healing that will give you back your knee, so you can bicycle, ski and backpack without pain. Essentially, your own stem cells will repair your knee."

"Let's do it," I said.

The next Monday, I walked into the office. They took a sample of my blood to refine it into "platelet rich plasma." Then, they took a syringe of my bone marrow out of my sacrum area. It took 30 seconds of slight discomfort.

From that point, they spun all the stem cells into a concentrated mass, and mixed it with the PRP, which took 30 minutes. Dr. Cantor walked back into the clinic room with a syringe.

He said, "This is all you. I am reinjecting your stem cells back into your knee with the PRP, which enhances your healing at the highest level. Those stem cells will work on your knee for the next 12 to 14 months. You will start feeling the difference in the coming months. Some notice a difference in days and others within several months, depending on their injury."

I walked out of the office 90 minutes later and drove home.

What are stem cells? They equate to a re-construction, remodeling and rejuvenating work-crew that heals your damaged parts. Like, if you cut your finger, stem cells go to the cut finger and begin reconstructing it back to new. If you break a bone, the stem cells repair it.

Within two months, I didn't feel much change. But in the third month, my knee stopped hurting. I followed the physical therapist's exercise protocol by pushing the stem cells to heal the knee to the demands of my athletic pursuits. Most people enjoy the pain stopping, but I wanted to return to my athletic career.

By month five, I began skiing, biking and heavy workouts in the gym. My knee performed fabulously. In the summer of 2017, I pedaled my bicycle 4,500 miles across the USA from Astoria, Oregon to Bar Harbor, Maine—at the age of 70. My book about the ride published in January 2019: **Old Men Bicycling Across America: A Journey Beyond Old Age.**

What else do stem cells accomplish? The research shows that stem cell therapy now finds incredible advancements in healing or dramatically improving COPD, Parkinson's Disease, Multiple Sclerosis, Alzheimer's, PTSD, LUPUS, Crohns, TBI, arthritis and many more maladies. Some studies show it works on cancer.

They obtain your own stem cells from your own bone marrow, or, they obtain it from your own fat cells through mini-liposuction. They can also harvest stem cells from the umbilical cord of a new born baby. After the baby arrives, they cut the umbilical cord and place it into a sterile package for processing. Once it's certified, you can use it with all its very young stem cells for maximum healing.

You might watch this nine-part series which interviews numerous doctors who perform the procedure across the USA. Over 100 clinics now operate. This series presents you with

all the information you need to make some choices for your health and those of your loved ones:

[The Healing Miracle: the truth about stem cells](#) by Jeff Hayes
Films

Also, in Florida, [Dr. Kristen Comella works on stem cell face lifts](#), joints, skin, PD, MD, MS, and much more.

[Another clinic with Dr. Tami Maragelia in Seattle, Washington.](#)

In California, [Dr. Mark Berman, plastic surgeon and face lift expert who performs stem cell face lifts.](#)

You can find clinics in Michigan, New York, Denver, Atlanta, Dallas and many more states.

You can call them for a consultation over the phone. Watch the Jeff Hayes series first, so you can glean all you need to know and create questions for the clinics.

Finally, stem cell therapy offers baby-boomers a new lease on life, a wonderful method for avoiding chronic pain, dementia and many other diseases of old age. Stem cell therapy provides the greatest advancement in human health renewal, ever, in the history of the world.

Take advantage of it; I did, and I am eternally grateful. I was so thankful to be able to pedal my bike across the continent that I began crying at different moments last summer because my mind felt grateful for the miracle of stem cell healing. What am I doing this week? Going bump skiing in the Rocky Mountains! This summer, bicycling the Continental Divide from Mexico to Canada. This kid doesn't waste a second with my healthy knees and the open road beckoning with adventure.

Ten Year Moratorium On All Immigration And Repatriation

Why exactly do we need to import 1.0 to 1.2 million legal immigrants annually onto our shores? Why does our U.S. Congress allow 500,000 illegals to jump our borders, annually? Why do we endure 22 to 25 million illegal alien migrants within our borders? (Source: Yale Illegal Immigration Study, October 2018.)

Why do we need another 140 million more people added to the United States by 2050? Do you possess a reasonable answer to that question? Will 140 million people improve anything in our country? Can you name one single benefit?

If you wander across Social Media these days, you find a lot of angry, thoughtful and reasonable people speaking their minds.

One of my friends, Gary Gobel said, "I support a moratorium on all immigration until we get the current situation sorted out. Today, we have some 22 millions of foreign nationals in our country, exact number is disputed and a poorly managed and thus broken visa program.

“Until we get our enforcement back up and running, deportations made and a competent visa program, all based on current legislated law—stop all immigration. This is a nation and not a charity; we owe no one immigration. Just

like you no longer drink your mother’s breast milk, the days of a young growing infant nation are behind us. We have 330 million citizens and plenty of talent in this nation and the days of needing immigration to develop instead of border control are gone.

“We are a mature nation of expensive social programs, supported by our tax paying, law abiding citizens. Get control of the situation and then maybe we can talk very limited legal immigration again based on merit and full assimilation and no.....that’s no, ethnic quotas.”

Does that make more sense than anything you hear on FOX or CNN or 60 Minutes or NPR or PBS? Does it make more sense than ‘open borders’ people who lack any understanding of what another 140 million people will do to America?

Gobel said, “This is the true hope of the world and not uncontrolled migrations, the answer is making your home better. Doing what our forefathers and patriots did for us....work hard, be involved, fight for justice and freedoms, and form a government worth keeping.

“In the beginning of this country, it was a time for

immigration but, that time has passed. We have a right to our life style, standard of living, our freedoms and our sovereignty.....an earned right. We don't need to tolerate foreign nationals protesting to make us feel bad that we don't want illegal immigration.....or, any immigration for that matter. We require them to respect our nation as a sovereign nation of laws and accomplishments that should be imitated as a template for success. Build that wall."

Or, place our best technology on the border to intercept and repel all illegal migrants. Put our soldiers on the border at $\frac{1}{4}$ mile outposts, so they protect us from this invasion, instead of 450,000 military people fiddling their thumbs on 700 bases in 80 countries around the world. Does that make sense?

Article IV, Section 4 of the U.S. Constitution reads, "The United States shall guarantee to every State in this Union a Republican form of Government; and on Application of the legislature, or of the Executive against domestic violence."

That's the responsibility of our president and Congress. Both fail us miserably and have been for the past 40 years. Both houses remain corrupt, a pack of liars and betray their oaths of office. Proof: the invasion has continued since 1986 without pause.

Gobel said, "I was in a discussion with a liberal friend of mine about illegal immigration and she proclaimed there should

be open borders! Oh, I said, why's that? She said people should be free to go as they please and come to this country as they please. Really, I said, well tell me... why do so many Mexicans want to come to the United States?

"She said for a better economic future and a better place to live. I said, 'You mean it's better here than Mexico.... she said, 'Duh, of course it is.' OK, I said... now tell me... why is that? She was a little surprised for a second then she said well, they have a bad economy, no jobs, violence.....'It's full of slums.' I see, I mulled that for a second or two then asked her... 'Why is that?' She said, 'I don't know.' I said.....when you do, come and talk to me about open borders."

Mexico's slums derive from an illiterate population and endemic corruption from the ruling class. That won't change, so we see no end of the Mexicans jumping our borders. When you import people from the slums, you create more slums in your own country.

"Mexico is the neighbor of one of the most affluent countries in the world in a rich region," said Gobel. "It has two great oceans on either side, ports, natural resources, considerable population and tons of culture and history.....yet, it's a shit hole. Why? How come there is no automobile industry, no airliners produced there, no vibrant maritime shipping industry, a stable government, a history of law and order.... why? Well, look at the US, we have all that and while we have violence, criminal activity, corruption and a government that is involved all over the world in political adventurism with our military.... we still are a better place to live.

"Mexico uses illegal immigration as an economic and social relief valve. By allowing the teeming masses of unemployed, disgruntled or whatever Mexicans to migrate north they relieve themselves of some of the political pressure to change. How much more successful would stopping illegal immigration be if our trading partner to the south helped to enforce the border

from their side? What if those deported for violating immigration laws were incarcerated upon their return to Mexico for a short stay in jail rather than being immediately free to find another coyote to take them across the Rio Grande?

“Simple answer is, Mexico likes illegal immigration.....a tribute and admission of their failed state and indictment of their leadership. Why is that?

“Now let’s assume that through mass immigration and the power of the vote, Mexicans succeed through invasion immigration in making the southern US into Norte Mexico? Do you think it would be the same successful region it is now??... look at the history of Latin countries. Do you see any of them being on a par with the United States? Answer is a resounding “NO.” So, while Mexico remains the romantic homeland for many, it is in fact a failed state, racked by violence, organized crime and a dismal economy for most of its people. So, open borders? Tell me why we would want it here.”

What makes sense to you? What are you doing about it? Would a ten-year shutdown of all immigration be reasonable? Answer: you betcha!

White Privilege Versus Black Privilege In America

Racism gallops across the American landscape hourly, daily, weekly, monthly and throughout the year. Everyone assumes

that whites cause racism, and blacks suffer victimhood from this phenomenon. But if you travel to Africa, blacks dislike whites and even kill them. In South Africa, the current black government leaders call for ridding that country of all four million whites.

Andile Mngxitama, president of Black First Land First (BLF), spoke at a rally last weekend in in Potchefstroom near Johannesburg, where he urged the crowd to kill white people, their children and their pets. (Source: NZHerald.co.nz, 12/14/18)

In America, blacks call whites “crackers, honkies, whitey...” and a dozen other nicknames. Whites call blacks...well, you can name a half dozen right off the bat. The fact remains: America continues as a racially conflicted society.

It's nothing new. Mexico finds incredible racism within its people. The same goes for highly racist Japan, India, Saudi Arabia, China, Canada, Australia, and European countries—and just about everywhere humans intermingle with different races.

Some religions espouse racism such as Islam. You can't get any stronger than, "Convert or kill all non-believers of Allah."

As discovered for the past three centuries in America, the Negro race and the Caucasian race don't get along, don't like

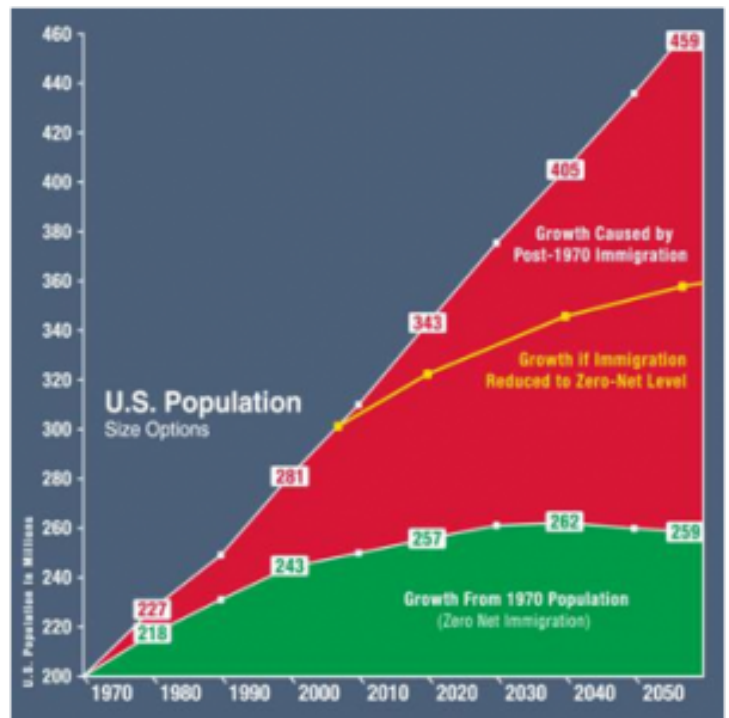

each other and find themselves in conflict on multiple levels. Because of laws, they tolerate each other for the most part. Some say different races “learn” racism, but in fact, racism stems from biologically-driven factors such as tribalism, language, culture and ethnic identity.

While European whites created parliamentary government with laws and penalties for breaking them, Africans originated from tribes with no written laws. When whites brought blacks amongst them, all hell broke loose because whites lived in a lawfully structured society that diametrically opposed African tribalism.

But since whites maintain a majority in America, blacks must abide by the law, whether it fits into their tribalism or not. At the same time, black Americans today hold more power positions, more political positions, and more media positions. Thus, they can make many charges against “white privilege.”

Recently, CNN black host Don Lemon enraged listeners with his racist rant against white people, “So,” he said, “we have to stop demonizing people and realize the biggest terror threat in this country is white men, most of them radicalized to the right, and we have to start doing something about them. There is no travel ban on them. There is no ban – you know, they had the Muslim ban. There is no white-guy ban. So, what do we do about that?”

Ironically, Don Lemon makes a huge salary from the white listeners of CNN. Is that white or black privilege for Mr. Lemon?

In one interview LeBron James, the multimillion-dollar NBA star said,

“When I first went to the 9th grade in high school, ‘I was like, I’m not f–ing with white people,’” he said, “because I was so institutionalized growing up in the ‘hood. It’s like, ‘They don’t f–k with us, they don’t want us to succeed.’

“So, I’m like, ‘I’m going to this school to play ball and that’s it. I don’t want nothing to do with white people,’” he said.

In the past few months, he restated on camera that he didn’t hang with white people because he doesn’t want anything to do with them. Ironically, his million-dollar salary arrives into his bank account by millions of white fans.

Even Oprah Winfrey in one interview blamed all whites for racism and said that the only way for racism to end: In 2013, she said that “older people, who were born, and bred, and marinated” in racism “have to die” before racism can be solved.”

Virtually every night on the news across America, you cannot

help but hear of racial unrest in all 50 states. It's assumed that whites cause racism. But in fact, it's a two-sided affair.

Black privilege runs deep: nearly 90 percent of the NFL remains black athletes with no affirmative action for whites. Blacks dominate 97 percent of the NBA with no affirmative action for whites.

One look in the entertainment field: Black Entertainment Television for blacks only. Miss Black America for blacks only. Blackish TV program for blacks only.

Black Caucus in the U.S. Congress. United Negro College Fund. All black lawyer organizations. MeetBlackPeople.org for black mating singles. National Association for Advancement of Colored People. Black Culinaricians. Rainbow Coalition and hundreds of other black-only organizations. Affirmative Action benefits blacks only.

If anyone attempts to create a "whites only" organization, they face immediate racism, white nationalism and white privilege charges.

How do you stop racism when it occurs via biological realities facing every ethnic group? How do you mitigate it in sports, the work place and social life?

After a lifetime of watching ethnic groups in my travels all over the world, I am not optimistic that humans will ever come to any acceptance of other races. Racism is as American or African as apple pie and elephants. It's as Japanese as a Samurai and/or as Chinese as the Great Wall. Racism runs as deep as a nuclear submarine. Different races separate everywhere in the world with their own kind. We can integrate schools, workplaces, churches and any other organizations—but people find commonality among their own race. It's in our DNA.

Here in the United States, where immigration completely

displaced the majority of 90 percent whites in 1965, to today, where whites will become the new minority by 2042, and give way to Hispanic-Latinos as the new majority—we all better find a way to respect one another rather than curse one another. We must do whatever we can to keep our national English language, because if we fail in that endeavor, different languages breed different world views and racial conflict because none of us will think or act on the same page.

With another 100 million immigrants projected to land on our shores within 30 years to jump us from 300 million in 2006 to 440 million by 2050, we either better stop mass immigration or we will all become victims of a fractured and fragmented multicultural and diversified boiling cauldron of a civilization.

The Strange Death Of Europe: Self-Abnegation Of Your Country

Part 5: What happens when you disrespect your country and/or arrived from so far away that you don't possess any connection to your new country? How do you disengage your own culture driven into your DNA to adapt to a new culture that remains strange to you? Answer: you reject your new country.

In his book, **The Strange Death of Europe**, Douglas Murray said "I keep a small notepad of extremely stupid things that

politicians say. "We feel that multiculturalism and diversity make our country more dynamic." And I thought that was one of the best. And I sort of couldn't, not use that. Because if somebody says something so stupid, you have to remind the general public of it. And we have to linger over a comment like that because it is preposterous. And it is also symptomatic. It is symptomatic of a type of person – not just a type of politician, but a type of person – who positively venerates everything other than the place from which they've come. We'll troll the world looking for things to praise so long as there's nothing at home to praise. And this is a culture of masochism, a culture of extraordinary self-abnegation and masochism. And I think that that quote from your former prime minister could not be improved upon as an example of that genre."

In the middle of America's race riots in the 60's, 70's and into the 80's, one of America's vice-presidents, Dan Quail, said, "Diversity is our strength; it makes us stronger." Of course, he never lived in the Chicago or Detroit ghettos where European-Americans discovered racial violence up close and ugly. In Detroit, race relations caused a 78 percent dropout-flunkout rate for African-Americans. White kids fled their schools because of extortions, violence, drugs and fear for their lives. Businesses shut down from so much shoplifting and theft. Grocery stores bankrupted. Graffiti, burned out cars and trash dominated the streets.

If diversity provided so much good, why did 1.2 million Detroit residents flee that city within 20 years? If Chicago remains the paragon of racial integration, how did it become the murder capital of America?

Why is it in southern California that African-Americans face incredible violence from Mexicans who hate blacks? And why, pray tell, has Detroit today, become an Islamic caliphate or parallel society within our own country?

If you speak up with the facts or truth as you experienced it, you're deemed a 'racist' by the mainstream media. If you make any comment contrary to the goodness of multiculturalism or diversity, you find yourself labeled as a xenophobe or nativist.

As Europe became more dangerous with its rising Muslim populations, no one could write or paint or print any satire as to the violence being committed by the new immigrants.

Murray reported, "On January 7, 2015, the Muslim assassins got lucky at the offices of Charlie Hebdo in Paris, managed to get past the buildings security, killed the body guards assigned by the state to protect the editors, and massacred most of the editorial team at their desks. As well as years of threats to their lives for depicting the Prophet of Islam, the editors had also spent years being dragged through French courts by the Muslim organizations of France."

No one considered the consequences of a religion whose prime directive directed its followers to, "Convert or kill all non-believers."

Over 100 passages in the Quran mandate violence to non-believers:

- 1) Slay the unbelievers wherever you find them. Qur'an 2:19
- 2) Make war on the infidels living in your neighborhood. Qur'an 9:123
- 3) Any religion other than Islam is not acceptable. Qur'an 3:85
- 4) The Jews and Christians are perverts; fight them." Qur'an 9:30.
- 5) Maim and crucify the infidels if they criticize Islam. Qur'an 5:33
- 6) Punish the unbelievers with garments of fire, hooked iron rods, boiling water; melt their skin and bellies. Qur'an 22:19

7) Do not hanker for peace with the infidels; behead them when you catch them. Qur'an 47:4

Every Muslim in Europe, Canada, America and Australia follows the holy Quran with zealous faith. If any of them attempt to question the Quran, they face "fatwa" or death by other followers.

Murray describes in three chapters, hundreds of violent events perpetrated by Muslim immigrants. He wrote, "Six years later, after another two British Muslims had hacked to death Lee Rigby, a drummer with the Royal Regiment of Fusiliers, in broad daylight in London, a Conservative Prime Minister Cameron emerged onto the steps of Downing Street and said, "This was not an attack just on Britain and on our British way of life; it betrayed Islam."

Ironically, after 9/11, committed by Muslims, President Bush stated that Islam, "Is a religion of peace."

In other words, all the leaders who promote mass immigration, and who are totally protected from its dangers, speak highly of the deadliest religion on Earth. Tell how wonderful Islam is to the 20,000 "honor killed" (legally) by their husbands, women annually or every girl who suffers female genital mutilation or gay killings or loss of women's rights, and the litany of barbaric mandates of Islam fill the history books with violence.

Murray wrote, "Like the politicians, most of the media across Europe throughout those years showed very little desire either to understand or say publicly what was going on. The causes were obvious: a combination of fear, cowardice and internalization of the threat."

It's much like when a lion chases down a gazelle. Every gazelle runs like hell to escape death, but when one poor soul suffers death, the rest of the gazelle's go back to grazing. As Muslims began their conquest of Europe, they affected tiny

areas. Today, at 50,000,000 strong, they degrade every aspect of European life.

“Europe seemed for a time to come to the conclusion that the problems of extremism would go away,” said Murray. “Yet whether the critics were killed, chased into hiding or chased from Europe, the problem did not go away.”

Finally, Turkish president Erdogan told a crowd of 20,000 Turks living in Europe, “I understand very well that you are against assimilation. One cannot expect you to assimilate into the countries where you live. Assimilation is a crime against humanity. Instead, make their country your country.”

Isn't that known as “conquering another country!”

What's amazing: Canada and America, and somehow Australia's leaders don't think it's going to happen to their countries. Thus, they push for more Muslim immigration. Mandates for Sharia Law cannot be far behind.

The Strange Death Of Europe: Loss Of Identity With Country And Culture

Part 4: Importation Of Millions Of Third World People Continue
Turning Europe Into A Third World Region

“Almost half of Swedish women are regularly prisoners in their

own homes because it is too dangerous to go outside. Muslim religious police and gangs are controlling ever larger areas. There are not enough police to stabilize the country. There is no help in sight for the Swedes, and Sweden is becoming an ever-greater security threat to the surrounding NATO countries,” reported Nicolai Sennels of Jihad Watch.

Every chapter of The **Strange Death of Europe: Immigration, Identity, Islam** by Douglas Murray sends a chill up any Western reader’s spine.

None of the leaders of Europe planned on or foresaw the chaos and religious zealotry of Muslims moving into their countries. They assumed that immigrants from such distant regions like Pakistan, Afghanistan, Ethiopia, Congo and Nigeria would gladly assimilate into advanced European culture. They escaped their shitholes to migrate to a modern country. European leaders assumed their cultures, their educational systems and their freedoms would be accepted by Muslims from the Middle East and Africa.

European leaders discovered their folly as racial, cultural and religious mayhem overtook Europe. Every European today, whether it’s Sweden, Norway, Great Britain, France, Germany, Denmark, Finland, Holland, Italy,

Spain, Austria, Switzerland—understands the plight of women in the face of the Islamic onslaught. Gays feel the Islamic rage. Jewish people find themselves being killed or terrified in their own neighborhoods.

Anyone who speaks out, or writes anything about Muslim conquest or draws a cartoon of the prophet—faces intimidation and/or outright getting his or her throat sliced. Murray gives example after example of anyone who thought “free speech” continued in Europe, would find themselves hiding or dead from Muslim terrorists who kill anyone to defies the Quran. Just for reporting these facts that I’m relating, if I wrote this account in France, I would face a “fatwa” or death to an infidel for simply speaking the truth about Islam.

If you look back at history, demographics dictate destiny of any country. Europe saved itself from the Muslim hordes when Charles Martel in 732 at the Battle of Tours in France, killed every last Muslim in the struggle for Europe. If Martel had failed, Europe would have rendered itself Islamic, which meant no free speech, women’s rights, children’s rights, religious choice, gay rights, no dancing, no artists like Da Vinci (Islam does not allow paintings of people) or any other freedoms that Westerners enjoy today. Islam proves itself a dark, violent and pernicious religion that spreads itself by violence and fear. Its prime directive in the Quran: “Convert or kill all non-believers.”

January 27, 2019, Jihad Watch, Christine Douglas Williams reported, “A 25-year-old Syrian man was arrested in the German town of Landshut this week after approaching a group of young girls on their way to school and molesting them. The case is just the latest in a wave of Muslim migrant sex attacks since the height of the migrant crisis in 2015, many of which have involved adults preying on minors.

“The sex assaults are rampant. Recall the Muslim rape gangs of the UK. The view of infidel women as sex slaves is enshrined in Islamic doctrine and still perpetuated (Quran 4:3, 4:24, 23:1-6, 33:50, 70:30).

“Muslim men are allowed by Allah to rape non-Muslim or infidel women to “humiliate” them, [according to a female Islamic](#)

[scholar](#) from the prestigious Al-Azhar University in Cairo, Egypt.”

After 1945, as Europe allowed itself to be overrun by the Muslim Turks as workers, but workers that failed to return to their homeland, the insidious march of the third world started in earnest. By 1973, Frenchman Jean Raspail wrote a penetrating novel, **The Camp of the Saints**, that showed an armada of third world wretched poor sailing toward France and all of Europe.

One of the captains said, “You don’t know my people. If this band of brutes ever lands on your shores, they will swallow you up.”

While Europe leaders such as Thatcher, Blair, Cameron, May, Merkel, Macron, Sarkozy and others perpetuated the mass invasion of their countries—they remained untouched in their gated homes. But the average European discovered his daughters and wife being harassed or raped. The average European saw his community turned to violence and trash. The average European watched as his/her schools turned into chaos.

The average European became the victims of Muslim terrorist attacks such as Nice, Brussels, Charlie Hebdo, Paris, Stockholm, Malmo, Oslo, Holland and **hundreds** of other individual attacks on Europeans.

Today, over 50 million Muslims Overwhelm Europe With Parallel Societies

Murray wrote, “Nothing demonstrates this failure in the multicultural era better than the fact that the ideologies—political and religious—of the incomers were rarely a subject of consideration and were almost never a permissible subject for debate.”

Soon, majority Muslim populations in cities across Europe practiced their barbaric Sharia Law. “No Go Zones” erupted

where police and firefighters dared not tread. The United Kingdom discovered 73,000 female genital mutilation victims along with hundreds of “honor killings” of Muslim women. Jewish communities fled their own homes from immigrant attacks on their synagogues. Women feared walking down the street for fear of their lives. If anyone spoke up, they faced brutal killings.

At one point a Somalian immigrant, Hirsi Ali, fleeing Somalia in order to escape female genital mutilation, wrote a short story on Islamic violence toward women, while living in Holland. The great grandson of Vincent Van Gogh, Theo Van Gogh produced a movie for her titled: Submission. A Muslim stopped Van Gogh on his bicycle as Van Gogh pedaled to work, and slit his throat and left a knife in his heart with a note that he would kill Ali next. More terrorist killings occurred to shock the Dutch. But instead of standing up, they backed down to all demands by Muslims.

The same occurred all over Europe. The European leaders didn't know what to do with all the violence. At this moment, British citizens voted to get out of the European Union because of the forced immigration into their lands. The Yellow Vests of France fight to stop Macron. Sweden's citizens anguish over the loss of their country to Muslim immigrants. In Oslo, according to my contact over there, nearly 40 percent Muslims now command the city with Sharia patrols, and blond Norwegians dye their hair black so as not to be molested by Muslims. Norwegians flee Oslo like Detroit whites fled Detroit in the 1990's to decline Detroit's population by 1.2 million people. From 1.85 million Detroit citizens back in 1970 to 648,000 today. More than half are Muslim immigrants.

Today, we see two Muslim House Members in our U.S. Congress who want more Muslim immigrants, and who do not want to see any stop of mass immigration. Both swore into Congress on the Quran, which explicitly commands its followers to install

Sharia Law. And, they work to install Sharia Law within the United States. The more Muslim immigrants, the more power they wield. The more power they wield, the more Muslim immigrants they command to grow their power.

Culture and identity equate to destiny. If you're not sure, take a look at the Native American Indians. The white man swept over this continent with endless, mechanized military might. The Red Man never recovered, and today, lives within internment camps, living on welfare and booze. His cultures, languages, land, religions, ways of life and freedoms no longer exist.

What does it all mean for Europe? Is a French person French anymore? Is English culture Muslim or British? Is Germany German or Muslim? Is a Muslim in Germany a German? Can a Muslim in Sweden be Swedish? Is a Norwegian a Muslim or Somalian or Pakistani? Do Muslims consider themselves Americans or Muslims? Answer: Muslims first, last and always. In other words, they do not identify with any country, but instead, their culture and religion, only. At some point, Europeans will not be allowed to identify with themselves or their country, but instead, they will be forced to identify as Muslims. Sharia Law dictates that outcome. And, as their numbers grow from 50 million Muslims, to 100 million Muslims, Europe's Strange Death is assured.

Take a look at Europe, and now Canada, and throw in Australia. All follow the path of the **Camp of the Saints** toward a very conflicted and unfortunate future.

The only solution: stop all immigration into America and Canada before we become like Europe. Stop all Sharia Law from being practiced or followed in America, Canada and Australia. If we don't, we will become like Islamic Europe.

Coming Thursday Part 5: Can Europe be saved? Can America be saved? Can Canada survive its immigrants?

The Strange Death Of Europe: Multiculturalism And Diversity Prove Destructive

Part 3: Multiculturalism & diversity shoved down the throats of Western countries only—Canada, America, Europe, Australia

Several dozen letters poured into my inbox in the past week from this series. One from Great Britain rendered these sobering words, *“And the faster and greater the dilution of citizenship due to immigration and multiculturalism, the less likely it will be to find anyone with enough courage to speak out, until finally the real truth of this terrible mistake will be lost forever.”*

As Douglas Murray states in his book, **The Strange Death of Europe: Immigration, Identity, Islam**, mass immigration and competing cultures wreak havoc on European culture like a 1-million-pound steel ball smashing into a skyscraper at the base. No matter how strong or tall the building, and no matter how long it soared into the sky—it will collapse.

At some point, with enough of the Middle Eastern and African immigrants flooding into Europe, every country will meet its end. It's called exponential growth, and/or, you could address it from the sociological angle, which means European ethos from each country will fall into the quagmire of diversity and multiculturalism.

Murray notes that Japan doesn't allow immigration nor does China. Nobody wants to immigrate into India. Notice Muslim countries like Saudi Arabia won't allow refugees, whatsoever, even though they are Muslims. Yet,

someone in power demands that Western countries accept every refugee that flounders onto their shores from across the Mediterranean or the Atlantic or Mexico.

The question: how many refugees can Europe, Canada, Australia and America absorb? Because the sad reality remains that in the 21st century, the United Nations expects more than a billion refugees as the human population adds another three billion by 2050.

One reader said, "There are only three basic ways of looking at all the issues Wooldridge raises here. Pessimistic, realistic and optimistic.

I would say Wooldridge is clearly being realistic, and certainly not OTT! [Murray is spot on as to what's happening in the United Kingdom] It is only the fear of being called racist and other condemnations including the "need" for all the benefits immigrants bring to our country. (Sic) I think we really mean to our economy and ourselves; we are not really that concerned about helping them. This fear of being called a racist prevents the average truly British citizen from speaking out."

The very freedoms of speech of Western countries allows the

immigrants to trash their hosts in the name of racism, xenophobia and nativism.

Murray wrote as to multiculturalism and diversity, "At the same time, the only culture that couldn't be celebrated was the culture that had allowed all these other cultures to be celebrated in the first place. In order to become multicultural, countries found that they had to do themselves down, particularly focusing on their negatives. Thus, the states that had been so open and liberal that they allowed and encouraged large scale migration, were portrayed as countries which were uniquely racist."

Today in America, charges of "White Supremacy" rain down on President Trump from "Black Supremists" who command the upper hand because of their minority numbers. We see Black Lives Matter, but no chance for White Lives Matter when only two percent of crimes against blacks are committed by whites, but 98 percent of killings of blacks are done by other blacks.

In Europe, 99 percent of rapes find Muslim immigrants as the culprits, but top officials do everything in their power to hide the facts so as not to espouse 'racism'.

Murray states that Merkel of Germany finds herself in a nasty fix, but Macron of France faces riots daily and Theresa May of the United Kingdom can't bow down fast enough or often enough to the growing Islamic immigrant mob ruling London.

In America, we see a failed gubernatorial candidate from Georgia, Stacey Abrams, who owes \$50,000.00 in back taxes and a reported \$150,000.00 in campaign debts—do a hatchet job on the State of the Union speech by Trump. She charges unfair voting and voter rights violations. How do you combat that from a black lady? You would immediately be labeled as a racist.

Today in Europe, Europeans sit shuttered in their homes, afraid to walk their own streets. Immigrants of every race,

creed and color hang out, harass and beat people up, especially women, if they travel in 'no go' zones in most cities dominated by immigrants.

I'm almost half way through this vital book. It portends a tenuous future for Europe. It almost cannot help but end in racial and religious conflict we haven't seen since medieval times.

In his book, *Clash of Civilizations*, Samuel P. Huntington wrote, "It is my hypothesis that the fundamental source of conflict in this new world will not be primarily ideological or primarily economic. The great divisions among humankind and the dominating source of conflict will be cultural. Nation-states will remain the most powerful actors in world affairs, but the principal conflicts of global politics will occur between nations and **groups of different civilizations**. The clash of civilizations will dominate global politics. The fault lines between civilizations will be the battle lines of the future."

Any culture that will not defend itself against displacement through mass immigration faces extinction. That includes both time-tested and successful cultures. Embracing diversity results in cultural suicide. America's multicultural path guarantees its destruction via cultural clashes and conflict with Islam, Mexican and African cultures that diametrically oppose American culture. The more diverse a country, the more destructive and broken-down its future. The more people, the more it destroys its quality of life and standard of living. The more it adds immigrants, the more destruction to its environment. The more it imports refugees, the faster America, Canada, Europe and Australia lose their own ability to function and worse, their identities. Exponential growth of any civilization leads to ultimate collapse. You see it in Africa, India and China today. You will see it in Europe, Canada, Australia and America in the coming years, "IF" Western countries don't stop all forms of immigration.

Part 4: What can Western countries do to save themselves? How can they preserve their cultures? What can the third world do to save itself?

The Strange Death Of Europe With America Close On Europe's Heels

Part 2: Quran mandates violence against every other religion, government and culture. It mandates honor killings, FGM and child marriages. It offers 72 virgins for martyrs who blow up sidewalk farmer's markets.

While reading **The Strange Death of Europe: Immigration, Identity, Islam** by Douglas Murray, I felt appalled at "a continent and culture caught up in the act of self-induced suicide. These include rapid changes in the dynamics of global politics, world leadership and Muslim terror attacks across Europe."

While Canadians, Australians and Americans only here about dramatic Muslim attacks such as the bombing of Brussels airport, or a truck running over shoppers in Nice, France, or Muslims massacring people in restaurants and theaters in Paris, France, or an entire newspaper being shot up outside Paris, or hundreds of cars being torched by Muslims in Malmo and Stockholm, Sweden to de-celebrate Christmas, or San Bernardino, California where Muslim shot up a Christmas party;

or where a Muslim killed 49 at an Orlando, Florida gay bar, or the beheading for a woman in Moore, Oklahoma for not converting to Islam.

What you don't hear about: 20,000 'honor killings' of Muslim women by their husbands or brothers annually in Islamic countries. Or, 500,000 female genital mutilation cases in the USA or millions of cases in Europe and Canada. Or, child sex trafficking, or the incredible numbers of rapes by Muslims in Europe. Or, you don't hear about the YouTube videos show Muslim men how to beat their wives without leaving a mark.

This is one of many videos on beating your wife: How to Beat Your Wife Without Leaving Any Marks—

Murray speaks about the leaders and media making sure that immigrants may not be exposed for crimes such as rapes, beatings, honor killings, female genital mutilation, sex trafficking of little girls, gay killings, Jewish harassment, shop lifting and more.

Why? Because Europeans fear being called 'racists.'

Murray wrote, "It took years for the central government, the police and local authorities or the Crown Prosecution Service to face up to the issue. When they finally began to do so, an official inquiry into abuse in the town of Rotherham [that's just one town of hundreds] alone revealed the sexual exploitation of at least 1,400 children over the period of 1997 to 2014. The victims were all non-Muslim white girls from the local community, with the youngest victim aged eleven. All had been brutally raped, some of them also had been doused in gasoline and threatened with being set on fire. Others were threatened with guns and forced to watch the violent rape of other girls as a warning should they tell anyone about the abuse. The local police were also found to have failed to act for fear of accusations of 'racism' and of what this might do to community relations."

In other words, the immigrant Moslem barbarians overpowered logic, law, decency, morality and the ethics of European communities. They brought their pre-Dark Ages religion with them, and manifested its violence at will, at whim and without mercy.

The same thing happened in November in Detroit, Michigan with two Moslem doctors being brought up on assault and battery charges for 12 years of operating on young girls to mutilate their genitals and cut off their clitoris's. How did the judge rule: he let them go along with their staffs for "cultural" reasons.

In other words, those Moslems made a mockery of U.S. laws for free choice. And, got away with it.

Murray shows how such British leaders as Tony Blair, David Cameron and Theresa May, not only make excuses for Moslem attacks, they enable them. Same thing happens in Canada with Justin Trudeau, "The Father of the Destruction of Canada." Moslems move so fast that Barack Obama hired 12 of them to push for Sharia Law in America. He installed a Muslim prayer room in the White House.

Sweden: [Multicultural Utopia. S.L.: All That Streaming, N.D.](#)

Not just immigrants, but Swedes will have to assimilate to the New Sweden. Violence, vandalism, no-go areas, killing police admits people to paradise, attacks on journalists, rape up 500%, rape beatings of Swedish women, slaughter of Swedish families, rape bracelets, riots, firework attacks on police, gun violence, burning of police cars, rape of elderly women, spitting on women, calls for genocide of Europe, etc.

Latest in America:

Ohio: Muslim plotted jihad massacre at synagogue, said authorities in Northwest Ohio "wouldn't even expect it" 1/30/19 by Robert Spencer

"Abdullah Ali Yusef, formerly known as Damon Joseph, likely thought that authorities "wouldn't even expect" his jihad attack on a synagogue because all their attention regarding antisemitism is focused on "right-wing extremists" and neo-Nazis. Islamic antisemitism goes unnoticed not only among law enforcement officials, but largely in Jewish communities as well. Yet it continues to proliferate in the U.S. and Western Europe. Good thing authorities in Northwest Ohio got lucky this time."

Each month, tens of thousands of Moslems chain-migrate into America. As their numbers grow, so does their power to break American laws. So does their electoral power grow to overrule the U.S. Constitution in each state. So does their power to commit terrorist acts against Americans.

Unfortunately, the more Muslims we import, the more terror events. It's the nature of the religion. It's not going to change, because, as their numbers grow, so does their ability to use 2,200 Mosques all over America for cover and planning of terrorist acts. The more their numbers, the more they practice or push for Sharia Law, the most barbaric religious paradigm on the planet. There's no way to soften their prime directive: "Convert or kill all non-believers." One look at Europe shows you our future.

Journalist Daniel Greenfield wrote, "When you turn on the evening news and see a running death toll, it's happening more and more often. The new brand of Islamic terror only needs one thing... Muslims. Lone wolf terrorism operates off the existing Muslim population in a particular country. The bigger the Muslim population, the bigger the risk. The FBI or other law enforcement agencies cannot monitor even a fraction of the Islamic settler population sympathetic to terror. As the Muslim settler population in the country increases, the number of terrorist cases will grow." (Source: Stop Lone Wolf Terrorism by Ending Muslim Immigration, August 2, 2016)

Which of us will be the next victim(s) of terrorist Moslem immigrants here in America? It could be you or your family, but it's going to be some Americans; that's a fact. Brought to you by your two U.S. Senators and House Member for not stopping mass immigration out of the Middle East terrorist countries.

The Strange Death Of Europe Versus The Strange Decay Of America

Part 1: What's happening in Europe manifests in America with each new immigrant

With the magic of the Internet, my columns reach all over the world. Readers respond from Canada, United Kingdom, Sweden, Norway, Germany, South Africa, New Zealand, South America, Mexico and Australia.

Many readers cry out as to the degeneration and chaos of their countries as to immigration, multiculturalism and diversity being shoved down their throats.

Where you see huge power elites sitting in their ivory towers dictating third world endless immigration into first world countries—those power brokers never live in or with the results of what they created.

One look at the Moslem and African ghettos, and “no go zones”

of France would turn your stomach. London, England now features two different cities: one Moslem that British citizens avoid. And the other British London that faces terrorist attacks at any moment from those immigrants plotting their attacks within the Islamic ghettos. Stockholm, Sweden features a new world banner: "Rape Capitol of Europe." Norway boasts Oslo where nearly 40 percent of Muslims dominate the city and feature "Sharia patrols" to ensure that Norwegians do not break Islamic laws. Thus, Norwegians flee their own cities where the immigrants rule.

Fortunately, I enjoy friends in Norway, Sweden, France, Germany and Italy who send me updates of what's really happening in Europe. For the most part, those power elites censor, and/or suppress the tension, conflict, cultural chaos and linguistic mayhem occurring in Europe.

Mark Twain, one of America's greatest writers, called it "Silent Assertion" or the big lie! Everybody knew what was going on, but the leaders washed over it, and pretended it wasn't happening. In 1861, that same "big lie" led to America's Civil War.

Today, in Western countries, the "Big Lie" manifests in the shoving of multiculturalism and diversity down the throats of successful societies, until they too, boil over with conflict.

"Immigration is a form of war in which the violence is delayed." ~ Martin Van Creveld

In order to understand more about what's happening to America's accelerating decay, I am reading: **The Strange Death of Europe—Immigration, Identity, Islam** by Douglas Murray.

Very Depressing Reading on Europe's Self-Destructive Fate

Murray's book sobers, depresses and predicts a miserable future for all Europeans as they lose their cultures, languages, ethos and, ultimately, their countries and ways of

life. From my experiences, he could write the same book for the United States of America, Canada and Australia.

“Tolerance and apathy are the last virtues of a dying society.” ~ Aristotle

After WWII, all of Europe needed laborers to rebuild a shattered continent. The Germans began allowing Turks to come into their country to work. Great Britain allowed a trickle, and then, under Tony Blair, a flood of Africans and Middle Easterners. Later, Sweden imported Moslems along with Norway. The same happened to Belgium, Denmark, Finland, Italy and Spain.

They didn't leave. They stayed. They created parallel societies mirroring their own countries of origin.

Great Britain, once the largest empire in the world, faces devastating immigration numbers that threaten to drive its current 65 million citizens to over 90 million by mid-century. To be “British” no longer applies, because the United Kingdom imported millions from Africa, India, Pakistan, Iraq, Afghanistan and just about everywhere else on the planet.

If the leaders of the UK continue, that country will become another Easter Island. That means it will ultimately collapse from an unsustainable population. Not to mention a sociological breakdown.

Not only that, Moslem immigrants in Great Britain no longer engage in Western Law such as parliamentary procedures. It features over 150 Sharia Law courts by its Moslem immigrants, and it features over 50 Sharia Law city councils. It features Sharia patrols by Moslem immigrants who detest and do not adhere to British laws. The UK features honor killings, terrorist attacks from its own immigrant citizens, female genital mutilation, killings of gays and disregard for anything British. In other words, the immigrants created

parallel societies that possess nothing in common with the host country.

“In multiracial societies, you don’t vote in accordance with your economic interests, you vote in accordance with race and religion.” – Lee Kuan Yew (Founder of Singapore)

What’s the trump card that allows the invasion to continue? If anyone steps up to speak the truth about mass immigration, they become a racist, nativist and pariah.

As Murray states in his book if anyone in England spoke up about the facts of endless immigration, they faced immediate condemnation, “This has a terrorizing effect far beyond the nation’s television studios, and with far more serious consequences. When these gang-rape cases came to court, they did so in spite of local police, councilors and care-workers, many of whom were discovered to have failed to report such crimes involving immigrant-gangs for fear of accusations of racism. The media followed suit, filling their reports with euphemisms as though trying to avoid helping the public draw any conclusions. The gangs were described as Asians when they almost solely involved Muslim men of Pakistani origin. Instead of carrying out their jobs without fear or favor, police, prosecutors and journalists behaved as though their job was to mediate between the public and the facts.”

Instead of dealing with reality, the media and public officials celebrated “multiculturalism and diversity” over facts, racial conflict, decaying schools and angst toward the barbarian Muslim immigrants. And, the Moslem immigrants against the British! In fact, all British people must remain alert to the next Moslem immigrant who will stab someone on the street or run them down with a car or blow up a restaurant or brandish an automatic weapon in the streets of London.

Part 2: We examine the same terrorist acts accelerating in America with its Moslem immigrants. We examine “at any

moment” Moslem terrorist attacks such as Fort Lauderdale massacre of gays or San Bernardino Christmas slaughter or Times Square car bomber. We examine 23 to 27 honor killings in the USA annually or the 500,000 female genital mutilation cases in the USA via Moslem immigrants. We examine the racial, ethnic and linguistic divides being promoted in America by immigration.

Pelosi, Schumer, Waters, Lewis, Feinstein: Severe Reasons For Term Limits

United States Congress House Speaker, millionaire Nancy Pelosi, 78, D-CA, kept 800,000 American citizens captive to her personal agenda for keeping open borders, endless illegal migration and allowing rampant drug gang-bangers free access to Americans.

Additionally, she supports “Sanctuary Cities” for illegals that create total chaos as to American laws, school systems and drug distribution. She approves of harboring criminal aliens, as well as supporting millions of employers of illegal aliens. She approves of “anchor babies” by the millions that gain instant citizenship. She refuses to enforce America’s immigration laws as to employment, transport and housing. She will NOT pass E-Verify to stop the job magnet for illegal aliens.

She does nothing to stop terrorists from entering America on visas that they overstay, and then, melt into the Islamic enclaves across America as they plan their next attack. Thus, we Americans pay for her incompetence, her ineptitude and flat out stupidity.

Nancy Pelosi, having served in office since 1981, offers the best reason for a 10-year term limit on all individuals

serving in the U.S. Congress. Serve for a maximum of 10 years, and then, you're out. Let new minds, new ideas, and younger citizens who actually know what's going on in America—to serve, state the obvious problems, and solve them with fresh

ideas. Pelosi suffers from cognitive decline, common sense decay and, when history writes her story, incredible corruption against the American people.

Charles Schumer, D-NY, also near 70, offers the male version of Nancy Pelosi. He follows her exact lead of incompetence, ineptitude and sheer stupidity as he obstructs our laws to decay this country into third world status. When history exposes him, he gave driver's licenses to Muhammed Atta, and, all those men who gave us 9/11. Schumer did nothing to stop and continues to do everything in his power to aid, abet and assist 22 to 25 million illegal aliens in America. He's a liar, cheat and thief. He's so corrupt that he would shame Al Capone and Joe Kennedy.

Maxine Waters, D-CA, 80, serving and doing nothing of any merit for 15 terms, continues to run her mouth, aided by a

vacant brain, and doing nothing in the House of Representatives of the United States. She may possess an IQ, but it lingers somewhere between a blade of grass and a toothpick.

She advises Americans to violence, supports Islamic Sharia Law and harangues about “Impeach 45...impeach him...impeach 45.” She has done nothing constructive for her constituents, ever, in her long tenure in the House. She does not suffer from cognitive decline because she never possessed enough intelligence to maintain any intellectual average level.

House Member John Lewis, D-GA, a follower of Dr. Martin Luther King, sat/sits in Congress for four decades without serving his African-American constituents worth a damn. He’s a blob in a suit, with a mouth that screams ‘racism’ at every news conference, but he’s done nothing to further or benefit Black America.

U.S. Senator Diane Feinstein, 84, D-CA, won’t step down from her perch until she dies in office. British Lord Acton said, “Power tends to corrupt and absolute power corrupts, absolutely.”

Feinstein possesses not a clue, not a hint, not any idea of how fast California declines, degrades and disintegrates under the third world onslaught of immigration. She’s completely out of touch with the realities of America’s accelerating problems—that become more unsolvable and irreversible with every passing week.

Notice that in the 33-day government shutdown, all those players did NOTHING to solve the problem. In fact, they did nothing to solve the problem 30 years ago, 20 years ago, 10 years ago and/or 5 years ago.

None of them push to enforce the laws on the books that would have prevented the shutdown. None of them offer any solutions to stop endless immigration from breaching our borders. None

of them support E-Verify. None of them offer a bill to stop anchor babies. None of them do anything to stop the MS-13 drug distribution network now totally dominating our cities. None of them stop the visas overstays with bio-metrics. None of them do anything to reduce the \$21 trillion debt. None of them do anything to rebuild our infrastructure.

But they do everything to aid, abet and give immunity to DACA and 22-25 million other illegal aliens. They DO spend our money for two useless 18 wars in Iraq and Afghanistan to kill our kids, all for nothing. Without a doubt, plenty of republicans need to be term limited, too. They're too old, too stodgy and too antiquated to remain in power.

Those points present a few reasons by Americans need to push, force and scream for "term limits" of a maximum of 10 years for all lawmakers serving in the U.S. Congress. You serve, you prove yourself, you do good things, and then, you're gone.

Stop the career, corrupt, criminal politicians. Move in new blood, younger bodies, fresher ideas and integrity. Einstein said, "The problems in the world today are so enormous, they cannot be solved with the level of thinking that created them."

Term limits! We need them, and we needed them 30 years ago. The survival of our Republic depends on passing term limits at all levels of government.

The Diversity Delusion: Destroying America's Heritage With Endless Immigration

You hear the liberal media expound on the merits of diversity and multiculturalism. They feature every kind of powder-puff story that regales America's bouquet of colors, ethnic groups and cultures.

When in fact, every newspaper, TV and radio show in the land reports on racism, racial conflict and violent conduct among the races within the United States. If this country cannot mitigate the racial conflicts due to diversity and multiculturalism in 2019, what can we expect when we import another 100,000,000 (million) legal immigrants by 2050—a scant 31 years from now.

Ever since my high school years, black and white Americans continue their contentious relationships. LaBron James speaks on how he won't take a white man for a friend and that he only hangs with fellow blacks. NFL players kneel in disrespect for the American flag that gave them unlimited freedom and money on the death beds of American soldiers. Fast food cashiers get into fights with white customers over a red baseball cap. A white police officer just received 90 years in prison for shooting a black youth. The Black Lives Matter group wants to create a separate black state in the southern states.

But what about the Dreamers Martin Luther King, Jr. spoke of? In his transformative *"I Have a Dream"* speech, King stated:

"When the architects of our republic wrote the magnificent words of the Constitution and the Declaration of Independence, **they were signing a promissory note** to which every American was to fall heir. This note was a promise

that **all men, yes, black men as well as white men** would be guaranteed the unalienable rights of life, liberty, and the pursuit of happiness. It is obvious today that **America has defaulted on this promissory note insofar as her citizens of color are concerned.**"

In disturbing contrast to King's words, just last week **the New York Times declared, "There's Nothing Wrong with Open Borders."** Staff editorial writer Farhad Manjoo cited Prof. Reece Jones, who decried, "hereditary rights to privilege based on where you were born." In other

words, Americans have no more right to our nation's protections and advantages than the other 7.6 billion people on the planet.

King proved correct: America does owe her own citizens protection and aid.

"Put American workers first" is not a slogan from President Donald Trump. It's a moral imperative, expressed by civil rights black icon Barbara Jordan: "Immigration, like foreign policy, ought to be a place where the national interest comes first, last, and always."

In her ground-breaking book, writer Heather MacDonald published: **The Diversity Illusion: How Race and Gender Pandering Corrupt the University and Undermine Our Culture.**

She speaks of the ominous immigration-threat out of the third world deforming and devolving Western Civilization:

"Humanistic study involves imaginative empathy and curiosity, which are being squelched in today's university in favor of

self-engrossed complaint. Teaching the classics is the duty we owe these great works for giving us an experience of the sublime. Once we stop lovingly transmitting them to the next generation, they die.

In her recent interview with television commentator Mark Levin, she said,

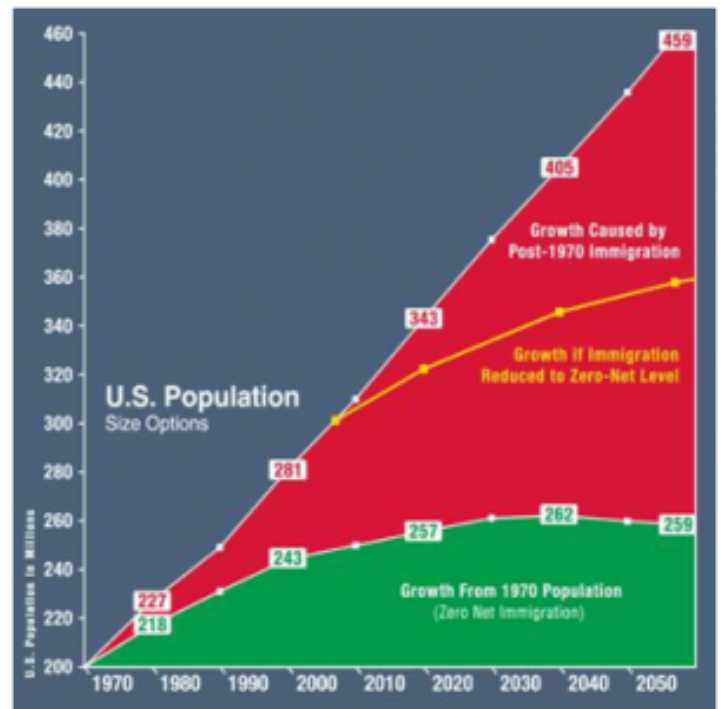

“...The 80’s was when it [indoctrination in oppressor/oppressed ideology] started in my view. That’s when you got radical multiculturalism to hit. I was in college in the 70’s. I’m very grateful for that because I was allowed to read John Milton, Williams Wordsworth and Shakespeare without anyone thinking to complain about the gonads and melanin in those authors. I got to lose myself in beauty, in greatness and sublimity. Come the 80’s and students are given a license for ignorance. ”

Today, an enormous percentage, well over 50 percent from my own research, cannot name the first president of the United States, and cannot name their two U.S. senators or House Member. Such are the illiteracy rates of our current generation.

Little appreciated and/or understood: what do we do when we import 100 million legal immigrants from 196 countries around the world within three decades? How does our culture survive against those other 196 cultures? How does our language survive? What exactly will define our identity as Americans?

You might hear in the press: “The views of the American people...” In reality, with 45 million foreign born today, and at least, another 30 million born to those foreign born, and another 100 million legal immigrants within 30 years—we will no longer be “The American people.” We will be “Everybody else’s country.”

“Immigrants devoted to their own cultures and religions are not influenced by the secular politically correct façade that dominates academia, news-media, entertainment, education, religious and political thinking today,” said James Walsh, former Associate General Counsel of the United States Immigration and Naturalization Service.

“They claim the right not to assimilate, and the day is coming when the question will be how can the United States regulate the defiantly unassimilated cultures, religions and mores of foreign lands? Such immigrants say their traditions trump the U.S. legal system. Balkanization of the United States has begun.”

At that point, can our society hold in the middle? Can our U.S. Constitution survive the diversity of 196 different world views, languages and cultures? Has anyone looked at why those next 100 million will move here? Answer: their cultures, religions, world views and educational systems utterly and totally failed. Please realize that the misery and starvation in their own countries will premanifest in our country. We import the world’s poverty and illiteracy causing it, into the very guts of our own country.

Multiculturalism Killing Our National Ethos

MacDonald understands that too much diversity and multiculturalism in our society most certainly will extinguish our heritage, our national identity and leave all our citizens in emotional, intellectual, and sociological conflict.

Think about Islam as a failed system in the Middle East. Its people flood into America from the refuse of Islamic countries. Islam's intentions in American society: Islamists have shown the world time and again who they are and what they stand for yet the world refuses to believe them. And even when moderate Muslims – people who were born and raised in Islamic societies – try to educate the West about what Islam truly stands for, the West still refuses to believe them, *too*.

The preeminent Arabic-language poet, Adunis Asbar, better known as “Adonis,” is now being vehemently criticized for stating that Islam cannot be modernized. He reasons that unless there becomes a “separation of church and state” within Islamic society, basic human rights and democracy will never come to fruition. He also astutely noted that Islam “does not contribute to intellectual life” nor does it produce art, science and world-changing vision.

“Diversity within a nation destroys unity and leads to civil wars,” said social scientist Garret Hardin. “Immigration, a benefit during the youth of a nation, can act as a disease in its mature state. Too much internal diversity in large nations has led to violence and disintegration. We are now in the process of destabilizing our own country. The magic words of destabilizers are ‘diversity’ and ‘multiculturalism’.”

If these words ring true for you, it's time for you to engage with what's happening in our U.S. Congress. You need to call to rescind the 1965 Immigration Reform Act, and for a total shutdown of all immigration into the United States to preserve what we have left of our country. You need to send these two videos out to all your networks to educate them as to what we face.

The worst decision you can make is to feel that you can do so little that you do nothing at all.

Congress Needs To Implement Solutions, Not Squabble

Part 4: Congress needs to implement solutions, not squabble.

In Part 4 of this series, let's deal with the nitty-gritty problems causing our society environmental, governmental and financial breakdown. Let's move with common sense to solve our problems.

Dealing With Our Challenges With Solutions

Today in America, we see 90,000 homeless in Los Angeles, 11,000 in San Francisco, 10,000 homeless in Denver and, as reported in "Homeless in America", about 554,000 homeless Americans on any given night in any given city. I actually witnessed those numbers on my bicycle trip through San Francisco and Los Angeles this past summer. I live in Denver, so I see the 10,000 on our city streets weekly. I snapped a lot of pictures of Americans down, totally out and suffering completely destroyed lives.

Yet, we paid \$6 trillion in two wars over 18 years that accomplished nothing—and they're still continuing because Congress funds them. You must know that the Military Industrial Complex power-brokers keep a lot of those 535 Congressional critters in their bank account.

Why not take financial steps like \$6 trillion and invest in America's poor, homeless and illiterate?

How about building apartment buildings in LA, Chicago, Denver and San Francisco with that \$6 trillion to house our homeless, give them some dignity and medical-counseling-job

training help? Give them some semblance of dignity to live their lives, and the potential to pull themselves up by their own bootstraps?

End the 50,000 Annual Visa Lottery System

Each year, Congress imports 50,000 people from the bushlands of Africa with no education, skills or abilities to contribute to America. They all subsist on your tax dollars. They create parallel societies distinct and separate from America. They create havoc in such cities as Lewiston, Maine; Minneapolis, Minnesota; Los Angeles, California; Detroit, Michigan; Miami, Florida and many more.

Those immigrants call their free ride, "the Golden Ticket." It allows them a free life on your back.

We need to stop all visa lottery free rides into our country. It's not fair to you, nor me or any American tax payer. And, it's creating conflict beyond our solving as they arrive with incompatible religions, cultures and languages.

Black Americans in Distress

Annually, 7 out of 10 black babies in America enter this world

without a father. The mother births them, rears them and lives on welfare or at the lowest rung of the economic ladder. The African-American family no longer supports discipline, education or personal accountability. The crime rates in Chicago and other black inner cities—scream off the charts with murders, violence, shoplifting, rapes, failing schools, illiteracy and hopelessness. This phenomenon destroyed the once vibrant Detroit, Michigan.

How about advancing solutions such as all male and all female schools or orphanages where the kids obtain discipline, educational excellence and identity? How about mandatory parental education for mothers to rear their children wholesomely and fully—to go along with their welfare checks and food stamps? How about paying Big Brother programs to mentor those boys and girls?

Let's create a national convention of black leaders that come up with ideas and solutions to bring the American Black Family back into a positive future for all African-American children. They deserve it and we need to provide them a chance to thrive in America.

We need to create redundant jobs for uneducated blacks-whites-Hispanics that fit their educational levels. With living wages to give them dignity in their lives!

We face 13,000,000 (million) children living in poverty in America. One in six children lives with food insecurity. Millions visit food banks weekly for their sustenance. Poor white, black and Hispanics need jobs, training, housing and dignified lives. Instead of wars, let's assist our own citizens of every ethnic group.

Term Limits for Congress and All Politicians

The level of corruption in Congress supersedes anyone's comprehension. Lack of term limits created "career corrupt criminal politicians." House Speaker Nancy Pelosi continues

at 38 years in the House. U.S. Senator Chuck Schumer hit 34 years of his senate career. Both do very little to solve and have not solved any of the problems noted within this four-part series.

Maxine Waters of the House along with John Lewis completely, after nearly 40 years each, have done nothing of note to advance or aid their black constituents.

We need term limits of a maximum of 10 years for all senators and House members. That would engender good experience, and then, out the door for fresh ideas, fresh minds and fresh solutions—of new senators and House members.

The Uselessness of the United Nations

The United Nations housed in the United States, must be the most worthless body of men and women in the world. Their members vote against the United States virtually all the time. Their members live the high life while their countries live in utter despair and poverty.

It's time to kick the UN out of the USA and take the USA out of the UN. Let them figure out how to 'run' the world without our money. Name one thing the UN has accomplished in the past 50 years. Answer: nothing of note.

The Fraud of Earned Income Tax Credit for Illegal Aliens

If you visit my Facebook page, Frosty Wooldridge, you will see where one illegal alien claimed four adults lived in his trailer in a live interview. Also, he claimed 20 children lived with him. In fact, only one child and no adults lived in that trailer with him. Yet, the U.S. Government sends him \$29,608.00 annually. He said, "Well, they offered it, so why shouldn't I take advantage of it."

That's your money times millions of illegal aliens defrauding, lying and scamming the Earned Income Tax Credit.

Whether you like it or not, you lose and then, your family loses horrific amounts of money via fraud of illegal aliens.

And, you pay for their in-excess of 2,000,000 (million) illegal alien children at \$8,000.00 annually K-12, \$2,000 per child for ESL courses, and \$5,000.00 for breakfasts and lunches for each child annually. We really need to deport illegals and their families out of our country. Just enforce our laws that take away their jobs from illegal American employers.

The Wall and What It Can Do

Annually, Mexicans smuggle \$69,000,000,000.00 (billion) of drugs into our country. Those drugs addict and destroy entire families as well as the addicted individuals. They bring drugs through vehicles at check points, and across the desert via mules who carry drugs to pick up points. Additionally, in excess of 500,000 jump our borders and blend into our country annually. (Source: www.cis.org , Dr. Steve Camarota)

We need a wall or 10,000 more border patrol agents, or drones, or conning towers, or cameras to stop it. Whatever the cost of a wall or drones or cameras—that would be much cheaper than giving away \$69 billion annually to destroy our own citizens' lives. When you count the educational costs of anchor babies and illegal children, a wall or anything to stop them would be a bargain.

A National Committee of Our Best, Brightest and Smartest

Our country stands eye-ball deep in trouble on multiple fronts. We're being invaded by endless legal and illegal immigration. We're \$21 trillion in national debt. We've got racial issues beyond repair. We keep pumping incompatible cultures and religions into the heart of our nation. We invite terrorists to create organizations that intend to defeat us. Such as CAIR, a terrorist organization within the USA:

“Islam isn’t in America to be equal to any faith, but to become dominant. The Qur’an should be the highest authority in America, and Islam the only accepted religion on Earth.” Omar Ahmed, director of Council on American Islamic Relations.

Let us create a national committee of our best and brightest minds in education, economics, race relations and environment, trade and other realms—to come together in a “master mind creative group” to come up the problems, define them, and then, offer solutions.

Okay, I’ve touched on a few problems, and you could name another 50 facing our country.

The worst decision is to think that you can do so little that you do nothing at all.

Solutions For Survival Of The United States In The 21st Century

Part 3: Congress needs to implement solutions, not squabble

In Part 3 of this series, let’s deal with the nitty-gritty problems causing our society environmental, governmental and financial breakdown. Let’s move with common sense to solve our problems. Let’s work toward a viable and vibrant future.

Solutions for Survival of the United States in the 21st Century

In 1970, American women began averaging 2.03 children per family. That created a stable and sustainable population that lived within the carrying capacity of a finite land mass.

Unfortunately, the 1965 Immigration Reform Act, by the late Teddy Kennedy, opened the flood gates to the third world. And, they poured into our country. Why? Because they jumped from 3.5 billion to 7.6 billion people in the past 50 years. Thus, they starve and live in misery. They want to migrate to Western countries to alleviate their misery.

They add 83,000,000 (million) of themselves, net gain annually, so there's no end to the line. What's the solution?

Stop all immigration into the USA. Help them with food, water, growing food and birth control in their own countries.

Why? Here's why: Share these videos all over America:

In a five minute astoundingly simple yet brilliant video, "[Immigration, Poverty, and Gum Balls](#)", Roy Beck, director of www.numbersusa.ORG, graphically illustrates the impact of overpopulation. Take five minutes to see for yourself.

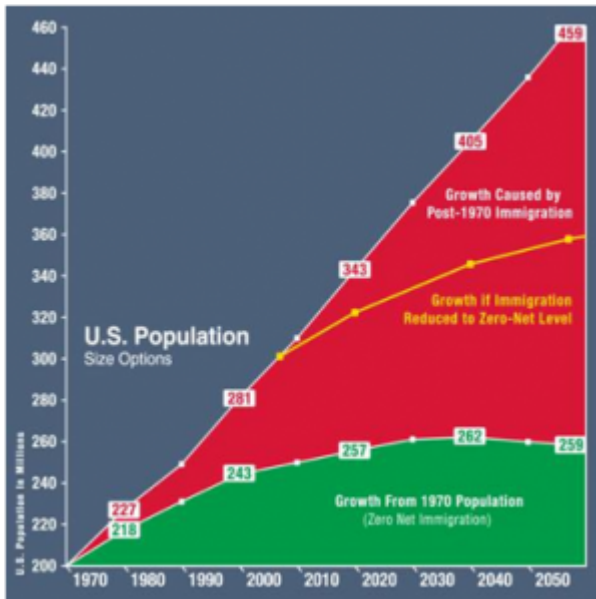

Sanctuary Cities Across the USA

We must enforce the laws and statutes of America by prosecuting mayors and governors of states who harbor, defend and create "sanctuary cities" that give immunity and protection to all illegal aliens.

If you break America's laws as to Section 8; 1324, of the Federal Code, you remain liable for prosecution. We either maintain law and order in this country, or we end up with anarchy and lawlessness. I would start with my own Governor Polis of Colorado and Mayor Hancock of Denver, Colorado. Both stand in violation of Federal laws as they both support sanctuary cities and sanctuary state. Both prove themselves criminals in the eyes of the law.

Rescind 1965 Immigration Reform Act That Floods America with Legal Immigrants

We must rescind the 1965 Immigration Reform Act. It's destroying the continuity and viability of our country, in fact, of our entire civilization. We don't need 1.2 million legal immigrants annually. We don't need to grow our population from 300 million in 2006 to 440 million in 2050.

If you think it's okay, here's a 10-minute video to show you why it's an impending nightmare to future generations:

["Immigration by the numbers—off the chart"](#) by Roy Beck

This 10-minute demonstration shows Americans the results of unending mass immigration on the quality of life and sustainability for future generations: in a few words, "Mind boggling!" www.NumbersUSA.org

Plastics and Recycling for the 21st Century in America

We must create an economic incentive to recycle our plastics, glass, tins, metals and all other containers sold on the open market. We need a 25-cent deposit-return law for everything made of plastic, glass, tin, metal, aluminum and other materials. That would guarantee a 99 percent return on all waste products.

We need to recycle all plastics to be used in road

construction. It's being done in Europe today. It's cleaner, more efficient and healthier for the environment to re-use plastics. Also, it would stop the desecration of the oceans such as the 100 million ton "Great Pacific Garbage Patch" that kills millions of marine and avian lives annually.

Also, we need to lead the world in such a deposit system internationally. We've proven that only one-third of Americans recycle much of anything. A 25-cent deposit law would make sure that 99 percent of Americans would recycle. If they didn't, kids would be picking up all that waste to line their own pockets. It's a win-win.

700 Military Bases in 80 Countries Around the World

Right now, because of the power of the "Military Industrial Complex", you and I pay billions of our tax dollars to operate 700 military bases in over 80 countries around the world with 450,000 military personnel running them. Why? Congress thinks we need to influence those countries, when, in fact, we are an invading military force.

We need to withdraw from those countries. After 18 years and \$6,000,000,000,000.00 (trillion) in Afghanistan and Iraq—and absolutely accomplishing nothing—we need to withdraw from those war-torn countries and leave them to their own devices. It's a lie and it's baloney that those terrorist countries could or would attack us. By leaving their countries, they have no reason to attack. Besides, they prove themselves backward goat-herder and poppy-seed growing countries and nothing more. Leave them alone so they leave us alone.

We cannot and must not use our military and our money to police the world. It's a waste of time, money and lives. And, in the end, it does nothing and accomplishes nothing. Except it's killed a lot of our finest men and women in the armed forces.

We Face Financial Collapse with a \$21 Trillion National Debt

All of our meddling and wars in foreign countries has given us a \$21 trillion debt. President John Adams said, "There are two ways to conquer a country: by the sword and by debt."

We're well on our way to destroying ourselves and watching this financial deck of cards drop down around our ears. This debt paralyzes our country. It makes us all poorer, and it will ultimately destroy any chance of balancing our accounts. The American people pay billions for interest with no benefit.

Congress created this massive debt and they need to stop it, and begin repaying it.

Part 3: We will examine our failing schools, infrastructure and laws. We need to create an entirely new educational system for all citizens. We need to work in the inner cities with new educational concepts. If not, millions of illiterate kids will not participate in America, and will become a nightmare of poverty, illiteracy and welfare. Hint: it already is happening.

Two Anti-American Muslims Elected To Congress And Immigration Solutions

Part 2: Congress needs to implement solutions, not squabble, not whine, not posture, not rhetoric

We American taxpayers shell out \$176,000.00 to \$193,000.00 a

year to each U.S. House of Representatives and Senate member to work in the interest of America and her citizens. They swear on the Bible to serve, protect and support the United States Constitution.

The two new Moslem House members from Michigan and Minnesota, Rashida Tlaib of Palestine and Ihan Omar from Somalia, swore in on the Quran, which mandates its followers to destroy any government and any

country that fails to subscribe to Islam. Therefore, the U.S. House of Representatives features two Moslems bent on destroying our U.S. Constitution.

In fact, Rashida Tlaib, upon becoming a House member, wrapped herself in a Palestinian flag, and told a Moslem crowd that she was going to work to impeach President Trump with, "We're going to impeach the mother f****r!"

The other Moslem needed to divorce her brother because it's against American law to marry your brother. Of course, as a Moslem, she will work to install Sharia Law, so she can remarry him. Moslems inbreed as a matter of culture. I predict as Moslems grow numbers in our country, we will be battling for our lives, our government and our way of life. They will continue to create parallels societies encased in Sharia Law. That 'law' provides a daily nightmare for women, animals, children and rational living. It's against free thought, gays, couple marriages and just about everything our country and society stands for in this modern world.

And newest dimwit House member, Alexandria Cortez (D-NY), works to turn our country into a socialist country by recognizing the three branches of government: presidency, House and Senate. If these people remain in our government, and more like them, we most certainly face a doomed future. IQ counts, and the lower the collective IQ of our leaders and citizens, the faster we degrade into a third world country.

At moment, the U.S. House members doodled and screwed around for so long that they chose a partial shutdown of 800,000 U.S. Government jobs rather than fund a wall at the Mexican border line. Watching Nancy Pelosi and Chucky Schumer play out their child-like games against nearly a million American workers—illustrates what kind leadership we pay for with our taxes: inept, corrupt, arrogant, duplicistic, child-like tantrums and a complete disregard for the American people.

Solve the problems BEFORE they become critical!

Fact: the majority of those 535 people don't do their jobs. If they did, we wouldn't be in this national disaster on multiple fronts. I know that my two U.S. Senators Bennet and Gardner lack leadership skills and solutions. Same with my House member Mr. Perlmutter. They work more for foreign interests than the American people.

What Congress Needs to Accomplish

Because Congress and the last five presidents dithered and dawdled for the past 40 years on immigration, we taxpayers shelled out trillions of dollars for 22 – 25 million people who violated our borders. They live, work and play at our expense, brought to you by our elected officials. They undercut our working poor, our taxes, our language and our culture. They shoplift, drive illegal and steal from us. They send our money to their countries. They import drugs to addict our kids. They lie, cheat and steal at every opportunity. They forge documents and Social Security

numbers. They don't pay taxes in the world's largest underground economy.

Worse, all those American employers cheat all of us by hiring them by the millions—just to make more profit. To hell with fellow Americans and our lives.

E-Verify to Hiring Illegals

How to stop this insanity: pass E-Verify to force employers to stop hiring this 21st century slave labor force. Create prohibitive financial and prison consequences so great that even the CEO of Marriott Hotels, McDonald's, Chipotle, Hormel Foods, Tyson Chicken and every restaurant, construction firm and other entities that knowingly hire illegal aliens—would be forced to hire legal Americans.

Stop Birthright Citizenship

Every year, 300,000 pregnant women from all over the world invade our borders to birth their child on our soil. At some point, some really stupid Federal judge said that the 14th Amendment applied to illegal alien mothers to render instant citizenship to their children. We pay for it into the trillions of dollars as to K-12 education, books, medical, food and housing. In reality, that amendment applied to the children of slaves in 1865, not 21st century illegal alien mothers.

We need Congress to amend the 14th Amendment to stop the “anchor baby” loophole. A pregnant woman must be a citizen of the USA in order for her child to enjoy citizenship. All others must be deported with their child. That would stop this “jackpot baby” instant citizenship fraud of the American taxpayer. Why haven't the elected officials accomplished this amendment 30 years ago? That may be the most frustrating question of our time.

Stop the \$70 Billion in Drugs Crossing Our Borders Annually

We face an opioid epidemic that has killed over 100,000 Americans. Those drugs cross our borders at \$70 billion annually. We need to shut down the border with a wall, concertina wire, foot soldiers, drones, (possibly landmines or the threat of landmines), cameras placed every quarter mile and the most severe jail time for anyone distributing those drugs to our citizens. If that means life in prison the first time you're caught, make a statement that we mean business.

We've got so many kids stoned, injected with heroin, meth and cocaine—that America faces becoming a drug-addicted nation. They're driving cars stoned, drunk and disoriented. They're texting that causes 4,000 deaths annually and drunks cause 15,000 deaths annually on our nation's roads. The end result: horrible destruction of individuals, families and communities. It's got to be stopped with the most severe consequences possible. If they sit in jail, they can't continue to kill us on the highways.

I'm talking total loss of driving privileges for five years with first drinking-stoned-texting conviction. Loss of car to impoundment and culprit must pay impound fees and automatic \$20,000 a year for insurance after return of driver's license. Second offense, total loss of driving privileges for life. If you break that law, you sit in jail for an automatic five years.

If we're going to move back toward a positive, healthy and thriving civilization, we must take measures that work.

Part 3: Solving the \$21 trillion national debt, reducing the 700 military bases in 80 countries and the cost, solidifying our national language, drastically reducing legal immigration, revamping jobs for our minorities to fit their intellectual and educational abilities, solving water shortages and resource depletion.

Jewelry For The Inside Of Your Mind And Heart—Jack London, Yukon Territory

Jack London, Yukon Territory, Gold Rush, Dawson City

Riding into the Yukon Territory of Canada presents you with several challenges. First, many grizzly bears inhabit the wilderness where you travel. And, they roam everywhere in search of food. Second, mosquitos the size of Jurassic Park raptors hover over your head at every stop. They suck the blood out of baby caribou enough to kill them. Black flies leave quarter inch welts on your skin. Third, when it rains, it roars out of the clouds like Hurricane Katrina.

In other words, no care, concern or mercy for you tiny little human beings attempting to explore that vast, untamed, savage land. In that wild place, the great adventure writer Jack London wrote: **Call of the Wild and White Fang**. Robert Service, poet of the Yukon, wrote: **Spell of the Yukon** and dozens of compelling poems. Also, tragic, if not hilarious poems like the Cremation of Sam McGhee.

London said, “You can’t wait for inspiration. You have to go after it with a club.... I would rather be ashes than dust! I would rather that my spark should burn out in a brilliant blaze than it should be stifled by dry-rot. I would rather be a superb meteor, every atom of me in magnificent glow, than a

sleepy and permanent planet. The function of man is to live, not to exist. I shall not waste my days trying to prolong them. I shall use my time. I'd rather sing one wild song and burst my heart with it, than live a thousand years watching my digestion and being afraid..."

We cranked the bikes off the Alaska Highway into deep forest green. It's a lonely road all the way to Dawson City. You must prepare with plenty of food, water filter and bear spray (two cans), and you must follow the "rules of the wilderness." I don't mind saying that we kept our eyes peeled for grizzlies. And, camping, well, that's a test of nerves. We ate in one spot, hung our food 300 feet from that spot, and pitched the tents 300 feet from the food spot. During the night, which is really all day, our ears perked to any sound on the perimeter of our camping spot.

I've been confronted by two grizzlies twice in the Yukon, and lived, but that's another story.

Riding into Dawson City, you ride into history. The 1897-98 gold rush drew 100,000 adventure seekers and prospectors. You still see them today as they walk the gravel streets of the city. Many of the old buildings still stand like the church, Diamond Tooth Gerdie's and hardware stores. Additionally, we watched the Yukon River slide past the city where an old Keno steam paddle-wheeler docked.

Right next to it, a three-story stone building, abandoned, stood just off the main street. We rolled our bikes over to a plaque on the side of the building.

"I'll be damned," I said. "The poet of the Yukon, Robert Service was a bank teller here. He wrote 'The shooting of Dan McGrew and The Cremation of Sam McGee while on his lunch breaks....I'm pretty sure he wrote the 'Spell of the Yukon', here, too."

An old bearded guy walked up to us, "Do you know much about

Robert Service?" he asked.

"Yes sir," I said. "I've read all of his works. I recited from memory,

The summer no sweeter than ever,
The sun shinny woods all athrill;
The grayling aleap in the river,
The big horn asleep on the hill.

This big, broad land way up yonder,
It's the forests where silence has lease;
It's the beauty that fills me with wonder,
It's the stillness that fills me with peace.

It's the strong life that never knows harness,
It's the wilds where the caribou call;
It's the freshness, the freedom the farness,
Oh God! How I'm stuck on it all.

"Not bad for a tourist," he said. "Have you visited his cabin or Jack London's when they lived here?"

"Heck no," I said. "I didn't know about their cabins."

"Just take the main street up to 9th and turn right," he said. "You'll run into their cabins."

"Thanks," I said.

We rolled down through town until 9th Street, and took a right. Within a quarter mile, we spied a small log cabin sat on a hill alongside a smaller one. The larger cabin belonged to Robert Service, about 350 square feet, and the smaller cabin about 100 square feet, belonged to Jack London. Both housed pot belly stoves, a bunk and table with pots and pans.

"This is where they lived, wrote and created some of the greatest works in American literature," I said.

"You got that right," Don said. "I've read everything Jack London ever wrote. If you haven't read 'Call of the Wild', you haven't lived."

Right here London wrote about adventure, "He was mastered by the sheer surging of life, the tidal wave of being, the perfect joy of each separate muscle, joint, and sinew in that it was everything that was not death, that it was aglow and rampant, expressing itself in movement, flying exultantly under the stars."

As I stood there with my friends, a gentle feeling of universal energy coursed through my mind. I took pictures of London and Service's cabins. Their works resonated in my mind as I've read everything they wrote and everything about them. I felt that 'surging of life' on the road on my bike. I felt that rampant glow of living coursing through my legs. I understood what those two men expressed in words and poetry.

"There is an ecstasy that marks the summit of life, and beyond which life cannot rise. And such is the paradox of living, this ecstasy comes when one is most alive, and it comes as a complete forgetfulness that one is alive. This ecstasy, this forgetfulness of living, comes to the artist, caught up and out of himself or herself in a sheet of flame; it comes to the soldier, war-mad in a stricken field and refusing quarter; and it came to Buck, leading the pack, sounding the old wolf-cry, straining after the food that was alive and that fled swiftly before him through the moonlight." – **Jack London, [The Call of the Wild](#)**

Because what they understood in their time, I understood in my time. It's called 'creative living' and it offers a dinner table feast for a man or woman's desires to experience the 'sheer surging of life' through their bodies, minds and spirits.

These are the moments of jewelry flooding into my mind and

heart.

London even wrote about bicycling: "Ever bike? Now that's something that makes life worth living! Oh, to just grip your handlebars and lay down to it, and go ripping and tearing through streets and road,

over railroad tracks and bridges, threading crowds, avoiding collisions, at twenty miles or more an hour, and wondering all the time when you're going to smash up. Well, now, that's something! And then go home again after three hours of it...and then to think that tomorrow I can do it all over again!"

Jack London's cabin 1897-98 in Dawson City, Yukon. Photo by Frosty Wooldridge

Why Congress Fails To Serve The American People

Part 1: If It's Broken: Raise the Hood and Fix It

In the past 50 years of my adult life, I have not seen such a collective of incompetence as witnessed by 535 U.S. Congressional representatives in Washington DC. They see crises after crisis boiling within the United States but refuse to fix the problems. Instead of representing the American people, they abet foreign interests, corporate interests, banking interests and illegal interests. They pander, pimp and excuse themselves by blaming the other side for everything that needs to be corrected in this country. But they never fix the problems. That's why we American citizens find ourselves in one hell of a mess.

When I grew up, I drove a 1953 Chevy station wagon. Six cylinders, one barrel carb and three on the column. No seat belts or headrest. It worked most of the time, but once in a while, the engine broke down.

My dad said, "If it's broken, raise the hood and fix it."

If you, in your own home, discover the lawn sprinkler doesn't work, you fix it. Or, you buy a new one. But you do what you have to do to make it work. If your garbage disposal breaks, you fix it or replace it. If you suffer a flat tire on your car, you replace it with a spare and immediately repair the spare, so it will be ready for the next flat tire.

Why can't 535 highly educated, intelligent, elected reps—introduce bills to fix the problems? Excepting the three new house members Alexandria Ocasio Cortez (D-NY), Rashida

Tlaib (D-MI), Ihan Omar (D-MN), and forever members, Maxine Waters (D-CA), Hank Johnson (D-GA), John Lewis (D-GA) and Sheila Jackson (D-CA). I would add inane stalwarts like U.S. Senators Charles Schumer (D-NY), Diane Feinstein (D-CA), Michael Bennet (D-CO) and Cory Gardner (R-CO). They flat out don't or won't work for Americans.

With the latest election of those intellectually challenged individuals in the House, it shows a downward spiral in the ability of our U.S. Congress to actually solve the problems facing America. For example, Cortez thinks the three branches of our U.S. government equal to: presidency, House and Senate. I would stake my life on the fact that Cortez, Tlaib and Omar have not read the U.S. Constitution.

That shows you how uneducated, if not downright stupid the constituents who voted those people into Congress.

House member Hank Johnson thinks that if we place too many ships and personnel on one side of the island of Guam, the entire island faces tilting over into the ocean. It's actually on video when he spoke in the House. I saw it. Then, last week, this intellectually challenged man compared Trump to Hitler. I think Forrest Gump's box of chocolates proved smarter than Hank Johnson. In Johnson's tenure as a House member, he has done absolutely nothing to serve his mostly black constituents. Yet, his constituents elect him term after term. I think Johnson's intellectual capacity equates to a box of chocolates.

House member Maxine Waters owns the biggest mouth in Washington DC, but nothing intelligent ever issues from her lips. She rants, raves and wants to "impeach 45" in all her speeches. She calls for violence against elected officials. She supports Sharia Law. She said in an interview last year that we were fighting the Korean War. I seriously don't think she could pass an 8th grade math, science, biology or history test.

Now, we face 20-something Alexandria Cortez from New York who won on good looks, toothy smile and total incompetency as to any understanding of the Constitution. She calls for a tax at 70 percent of income to equal the playing field. She mandates free health care for all and socialism, which would put us on the road to becoming another Venezuela. CNN and other news services interview her as if she possesses any intelligence, but scratch their heads at her 'air-head' responses.

Let's examine House member John Lewis, a civil rights advocate, who has remained in DC for over 35 years. In that time, he's used the word 'racist' to describe just about everyone he doesn't like—BUT, he's never introduced a bill or done anything to aid, assist, create jobs or educate African-Americans. He's a figure-head, a symbol and totally incompetent.

And, now, we face the first of many Moslems becoming fixtures in the U.S. House and soon to be in the U.S. Senate. These people, not of our country, not of our culture, not of our language, not of our religion and not of anything that has to do with being an American—took their oaths of office on the Quran. Reality check: the Quran mandates to all its followers to: "Convert or kill all non-believers."

The New York Times quoted new House member Rashida Tlaib as saying, "People love you and you win," Ms. Tlaib told the crowd. "And when your son looks at you and says: 'Momma, look, you won. Bullies don't win.' And I said, 'Baby, they don't.' Because we're going to go in there, and we're going to impeach the mother*****." (referring to President Trump) It is incomprehensible that a mother would talk that way under any circumstances but to say it to her son is beyond shocking.

Exactly how will those two Moslem members do anything to further America, when they are mandated to install Sharia Law, work for Islam and promote soft jihad within the United States? This quote says it all and speaks to what's coming:

“Islam isn’t in America to be equal to any faith, but to become dominant. The Qur’an should be the highest authority in America, and Islam the only accepted religion on Earth.” Omar Ahmed, director of Council on American Islamic Relations.

As a society and as a civilization, we stand eye-ball deep in trouble. But our leaders continue kicking the can down the road. It’s going to cost us our culture, language, cohesiveness and country. It’s going to cost us dearly. And yet, I don’t see anyone speaking up and trying to save our country at the local or state levels. And for certain, those 535 critters in Washington DC will keep us rolling down a very destructive path as to debt, endless wars, immigration, environment, overpopulation and the list drums onward.

In Part 2 of this series, I will speak to what needs fixing. It’s simple, yet, those folks in DC who are supposed to fix our problems—don’t and won’t. One of my readers came up to me last week in the recreation center where I work out, “Frosty, I read your stuff and it makes so much sense. But it makes my head explode because those people in Washington DC won’t do squat to help the American people.”

Top Issues Facing Americans In 2019

You, an American citizen, know me to be a straight shooter. I tell it like it is. I give the facts and support them with evidence. I don’t sweat the small stuff, because it’s all

small stuff. With all that said, I love America, warts and all. I love our Constitution. Yes, when I stand up against illegal immigration, and when I call for a shutdown of all immigration for the next 20 years, I do it for common sense, rational action and a look toward future generations enjoying a thriving civilization.

Here's a few things we need to consider in 2019:

How Republicans deny people their right to vote: require voters to be U.S. citizens or legal immigrants who earned citizenship. Require identification so we know who you are and your validity to vote. Require that you vote only once in accordance with our laws. Finally, you must be a live person to vote in our elections, not from your pine box, i.e., like much of California, Chicago, Denver, Minneapolis, New York City and other metro areas where voter fraud sways elections.

Democrats in 1961 gave us John F. Kennedy, who said, "Ask not what your country can do for you; ask what your can do for your country." Today, Alexandria Ocasio Cortez (D-NY) tells her constituents, "Free stuff for all of you...we need socialism, so everyone is equal...and I don't know how we can achieve that without anyone working, but somehow, I'll figure it out..." Democrats also gave us in 2019, Muslims who wrap themselves in the Palestinian flag upon being elected to U.S. House of Representatives while they swear themselves into office with the Islamic Quran that mandates destruction of the United States of America by force or birthrates. Fancy that Democrats, and you're not even embarrassed!

Imagine if those 7,000 caravan people marched on their own government demanding change instead of marching 2,000 miles towards our country and demanding charity, food, housing, medical, schooling and welfare for life.

The "me" generation or "millennials" want to **start** a revolution because they need "safe spaces", yet they lack the

understanding because they haven't read the U.S. Constitution, and most of them lack common sense and, hell, most of them don't know the name of our first president and they couldn't tell you the names of their two U.S. senators, and they don't know how **start** a lawnmower to mow a lawn. House Member Cortez leads them with her knowledge that the three branches of government in Washington DC are: presidency, senate and house.

The joke of the year is when Abraham Lincoln said back in 1861, "The worst mistake I ever made was appointing Ruth Bader Ginsburg to the Supreme Court." In other words, giving old people with cognitive decline the ability to remain on the highest court in the land stands as the prime reason for term limits and the same for all 535 congressional, career, criminal politicians.

Now that Miss Pocahontas Elizabeth Warren, (D-MA), wants to run for president, we have our first Indian maiden running for the White House. She named her Jeep "Elizabeth Warren". It's white but she says it's a Cherokee. She might be a Lakota, Sioux, Chippewa, Blackfoot, Nez Perez, Ramadan, Apache, Seminole, Clatsop, or any of a dozen tribes—but she'll get back with us after her DNA tests prove her minority status as an All-American Indian princess.

You might enjoy the X-ray that shows the difference between Obama and President Trump: a spine!

And for those who watch CNN, or Clinton News Network, where black man Don Lemon proclaimed that the biggest terrorists in America are 'white men' and that he needs to do something about them, I don't watch CNN for the same reason I don't drink from a toilet. My dog does, but not me.

As to the TV national farce and the snowflake Christine Blasey Ford who got attacked at a college party by some mysterious man, I hope she enjoys the millions of dollars she garnered on "Go Fund Me" for her 15 seconds of vitriolic fiction on

national television. What a flake of a woman and a disgrace to integrity.

And to the farce of the United Nations, what a joke! What a group of frauds that do nothing, but the American people pay and pay and pay.

Also, how to avoid being separated from your children at the U.S. border: First step—don't cross illegally. You are not a U.S. citizen, but if you want to come to America, do it legally. That way, you get to keep your children with you. Do it legally and we will welcome you and your children.

Did you see the “Yellow Jacket” rebellion in France? President Macron, who has lost his country to an Islamic invasion, crumbled like a biscuit when his countrymen stood their ground. At some point, all European men must grow a ‘pair’ and stop the invasion of their countries by Moslems.

And to you, dear fellow American citizen, let's try to save our country from this continuing immigration invasion both legal and illegal in 2019.

Wish List For 2019 America: Let's Wake Up And Improve America

Welcome to 2019. What hopes, wishes and suggestions do you suggest to our leaders for this brand-new year?

Obviously, 7 out of 10 Americans wish to heaven and Jenny Craig that they will lose 50 or more pounds. Millions wish Congress and the president would vacate Iraq and Afghanistan after 17 years of fruitless war, killing fields for our young and \$5.9 trillion wasted tax dollars. Millions more wish for racial harmony rather than confrontation, conflict and violence.

Most Americans wish someone would cure cancer, heart disease and diabetes. Americans of every color and class wish for world peace. Millions wish for environmental responsibility toward our beleaguered planet. Everyone wishes our U.S. Congress would serve the American people rather than illegal aliens, visa overstays and ceaseless immigration, both legal and illegal.

Huge numbers of Americans express their fear that America degrades into illiteracy, crime and racial dysfunction from top movie producers to sports doctors at prestigious schools.

While America faces horrific problems on its sociological front as it continuously imports millions of the third world immigrants onto its shores, those sheer numbers create water, energy, resource and environmental challenges beyond solving.

What about a wall to protect Americans from immigration invasion?

Writer friend Tom Shuford wrote, "Walls spell trouble for

President Trump. The establishment fears and despises him. A victory on walls would strengthen him, weaken them. Over \$45 billion per year to defend Afghanistan's borders? No problem! Same with a dozen other extravagantly costly, seemingly endless overseas projects. But a \$5 billion one-time expense to protect vulnerable sectors of the American border? Waste of taxpayer money. Walls are stunningly efficient. They work too well. Consider Israel, Hungary, and San Diego County."

Israel: Between 2010 and 2012, 55,000 mostly African illegal aliens crossed the Egyptian border into Israel. They settled in Tel Aviv and nearby towns. Citizens complained – loudly. In 2015, the Israeli government started a wall. Left-wing groups marched, protested, said it was racist. By 2016 the wall was finished. There were 11 illegal crossings that year. Israel made the wall several feet higher. There were zero illegal entries in 2017.

Shuford wrote, "Hungary: In 2015 Germany's chancellor Angela Merkel thrilled Western politicians and news corporations by inviting unlimited migration from Syria to Germany. Time Magazine named Merkel "Person of the Year." "Who's your favorite world leader?" a reporter asked candidate Hillary Clinton in the fall of 2016. "One of my favorites is Angela Merkel," chirped Clinton. Two months later President Obama described Merkel as "probably... my closest international partner."

What about the insanity of Germany's Angela Merkel? Hungary remains a small central European country. Hundreds of thousands of Middle Eastern migrants poured over Hungary's borders to get to their new promise land, Germany. Hungary built double barriers along its border, making itself an instant international pariah. But illegal immigration into Hungary fell 99 percent. If Europe survives (a big "if"), it will be because Hungary and few other perimeter nations spared that continent the full effects of Merkel's folly.

The San Diego Sector: In 1986 there were 630,000 border apprehensions in San Diego County, California. In 1989 a 10' fence was built. In 1996 a second fence 15' to 18' high was added. "Large numbers of unauthorized immigrants continued to flow into the U.S.," said The San Diego Union Tribune in 2017. But not through San Diego County.

Tom Shuford gave us a run down on the effectiveness of walls. Enforcement of current laws would be another aspect of stopping endless illegal border jumping. A wall would cut the \$70 billion annual drug trade, drastically.

My wish list:

U.S. House members Nancy Pelosi, Maxine Waters, Sheila Jackson, Hank Johnson, Luis Gutierrez, Paul Ryan, John Lewis, Hudson and most of the rest of them resign for being totally incompetent, and/or corrupt, and not serving the American people. They do nothing for the American, people, but in reality, serve foreign interests, illegal border jumpers and lawlessness. Those House members remain the reason our government fails to function for the American people. They remain the number one reason for "term limits."

U.S. Senators Schumer, Mitch McConnell, Cory Gardner and Michael Bennet of Colorado, along with dozens of other senators need to resign for failing to serve the American people. They align with illegal aliens, foreign interests and do everything they can to NOT serve the American people.

Additionally, all the 240 city mayors and dozen governors across America who support Sanctuary Cities and harbor 22 to 25 million illegal aliens should all be arrested, jailed and prosecuted. Start with the female Oakland, California Mayor Libby Schaaf who warns illegals of ICE raids.

Finally, someone needs to introduce a bill to stop the 300,000 illegal pregnant women who jump our borders annually to birth a child on our tax dollars for the next 18 years for each

child.

Reality check: none of this wish list will happen. The same old mess in Washington DC will continue and the American people will continue to pay their taxes to pay for the boondoggles, mismanagement and outright corruption that remains endemic in Washington DC. Ironically, Americans keep voting the same tired, corrupt, old souls back into office regularly.

The Founding Fathers never dreamed of career corrupt politicians that serve only themselves and not the American people.

This video offers you a glimpse of what our leaders cause, i.e., San Francisco: [Click On This Link](#)

E-Mail Frosty: frostyw@juno.com

The Wall, The Wall, The Wall: Are We A Country Or A Destination For Free-loaders?

U.S. Senate member Charles Schumer, (D-NY) refuses to defend America. He refuses to take his oath of office seriously. He refuses to allow a wall to be built across the Mexican border to stop drug trafficking at \$120 billion annually, year after year. He refuses to stop 500,000 illegal aliens annually who jump our borders. He won't stop and hasn't stopped the 300,000 illegal pregnant mothers annually who birth their child on our soil and then force us to pay for their welfare

for the next 18 years.

U.S. House member Nancy Pelosi, (D-CA), calls illegal aliens, "These immigrants are the future of America." She doesn't connect that they are illegal alien border jumpers who broke our laws and violate our Constitution every single day of their existence in America. She doesn't care that they work off the books, pay no taxes and send cash transfers to the tune of \$70 billion annually back to their home countries, thus draining our finances and adding to the \$21 trillion national debt.

Those two culprits don't stand alone. Look at Mitch McConnell, (R-KY), speaker of the Senate, does nothing to protect America's borders in his 'forever' corrupt criminal career as a U.S. senator. Same with all 100 senators who do nothing to stop the invasion of our borders. Same with Speaker of the House Paul Ryan, (R-WI), who did nothing during his career to stop the illegal invasion.

Thus, those people shut down the U.S. government to stop Trump's wall that would cost a fraction of what it costs to support over 22 million illegal aliens inside our country, and growing by 500,000 annually according to Dr. Steven Camarota of www.cis.org .

We pay an astounding estimated \$296 billion annually across 15 federal agencies to feed, house, medically care for, education and births of illegal aliens. It never ends. It continues year after year.

And yet, these nitwits in Congress quibble over \$5 billion or \$20 billion for the wall, when we pay \$296 billion annually to support those 22 million illegal aliens. (Source: Yale Research study on number of illegal

aliens within the USA, September 2018.)

You must ask the question: who remains in charge of the insane asylum titled: The United States Congress? What are those 535 people doing daily for us, the voters and citizens of this country? Answer: jack squat.

Question: why did you vote your democratic or republican House member or senator back into office when all of them refuse to stop the invasion of our borders? That must be the question of the century. Why would a country allow itself to be invaded, and in fact, pay for the invaders, but not pay for a wall to stop the invaders?

Sometimes I wonder if the citizens of this country simply grow tired of their freedoms, their citizenship, their language, their culture and their way of life. They become apathetic, lazy and complacent. They don't vote, and they don't engage.

Jared Diamond wrote a best-selling book on anthropology about how societies collapse. It's titled: **Collapse—How Societies Succeed or Fail.**

Guess what? The United States of America gallops along on the "failure" path like a horse possessed of loco weed. The horse

gallops out of his mind. The people of America race along with no concern for the future, no understanding of what another 140 million more immigrants mean to this civilization and no comprehension of what their children face.

It beats the hell out of me how our elected leaders can't see what's coming, but in fact, aid and abet the destruction of our "way of life" our environment and our culture. And, we sit by and watch it happen.

The Europeans commit themselves to the same future of destroyed cultures, overpopulation, living beyond carrying capacity and religious conflict that will degrade their rule of law and their cultures into mongrel multiculturalistic societies. And, we already see their descending toward the gates of hell.

Last week, a Moslem terrorist shot people up in Strasburg, Germany. A Moslem in Morocco beheaded two Swedish girls who were stupid enough to go hiking in the hills. He videotaped cutting their heads off as they screamed for their lives. I winced at the video.

Guess what, the United States of America now features 23 to 27 'honor killings' annually in this country. We feature 500,000 cases of female genital mutilation. We've got endless mini-terrorist acts in Detroit, Michigan; Minneapolis, Minnesota; Miami, Florida; Freemont, California and New York City.

We've got 35 documented Muslim terrorist training camps from New York to California. What's being done about them? We're actually supporting them with food stamps and welfare on our tax dollars.

If you thought 2018 featured enough craziness in Europe, Canada and America--you ain't seen nothing yet.

Where The Bolt Goes Into The Bottom Of The Globe: A Christmas Bicycle Journey

Merry Christmas to you, each American, Canadian, European and Australian citizen who reads my columns throughout the year. No question that my commentaries expose sobering realities facing America and all of Western humanity. Oftentimes, I am exasperated that our leaders fail to serve us, to represent us and to work for our best interests.

Whether you're from America, Canada, Europe or Australia—you must feel much the same ways as your leaders betray you, your family and your country. My heart goes out to you. I will continue to write and speak with the same honor as Thomas Paine, Thomas Jefferson, Ben Franklin, Abigale Adams, Susan B. Anthony and many others who worked for the best outcome in their time.

While America and the West face tremendous challenges in 2019, at this moment, I share with you a Christmas story that remains dear to my heart all these years later. This magical moment occurred while I lived and worked in at McMurdo Station, Antarctica, where the bolt goes into the bottom of the world. May it touch your heart and soul like it touched mine.

In the morning, a whiteout howled across McMurdo Station, Antarctica with 100 mile per hour winds and minus 80 degree temperatures. I had been confined to my barracks for two days

as a 'Condition One' storm worked its way over the icepack before me.

By late evening, the weather turned placid but a biting minus 60-degree temperature kept most people inside. A report came over the base radio that a few Emperor

penguins were waddling toward the open sea near the ice runway. Not wanting to miss a chance to see those majestic birds, I bundled into my cold weather gear—insulated boots, heavy mittens, five Thermax layers, fleece, three hats, face protection, along with ski goggles—and headed out the door to ride my bicycle over the ice runway.

Yes, there were bicycles at the scientific station for me to ride. I HAD to see those birds no matter what the cold. I jumped on the bike looking like an over stuffed bear with all my cold weather gear on. My breath vaporized as I rode toward the ice-covered ocean. My lungs burned with each inhalation of polar cold. About a mile around the cove, the setting sun glinted off the roof of the great British polar explorer, Robert Falcon Scott's Discovery Hut. He had died 90 years ago on his last attempt to reach the South Pole. The Hut had stood on the point of McMurdo Sound since 1902. It gave mute testimony to the courage those men displayed in their polar adventures. This was a cold, miserable place. Upon reaching

the South Pole in second place behind Admundsen, the crafty dog sledder explorer from Norway, Scott cried out, "Oh God, this is an awful place."

I rode along a path that led toward the ice pack in the sound. It's hard to describe pack-ice, but it's jumbled-broken ice chards being heaved and smashed into multiple shapes-triangles, domes, squares, tubulars, and wedges—like an Erector Set gone crazy. However, near the shore, it was reasonably smooth with a thin veneer of snow from the blizzard.

Above me, a gold/purple sky glowed brazenly in its final glory into the crevasses of the Royal Society Range across the sound. For once, a rare quiet softened the bitter edge of the crystal white desert before me. One of the glaciers, more than ten miles across at its terminus radiated liquid gold from the setting sun. Riding along, I nearly tipped over, but soon, I pulled through and gained the edge of the ice. Even with polar weather gear protecting my body, the numbing cold crept through the air, as if it were trying to find a way into my being.

The bike frame creaked at the cold and the tires made a popping sound on the snow I pedaled over. The big boots I wore made it hard to keep on the pedals. But I persevered and kept moving forward.

Across the ice, I looked through the sunlight and saw four black figures approaching. I shaded my eyes with my gloved hand. They drew closer, their bodies back-lit by the sun on the horizon. It was a family of Emperor penguins. I dismounted from my bike. From our survival classes, I learned to sit down so as not to frighten them. By appearing smaller, they might find me interesting.

Slowly, I lowered myself into the snow, cross-legged, like an Indian chief. Minute by minute, they waddled closer—straight

toward me. Three big birds, about 80 pounds each kept moving dead-on in my direction. The smallest followed behind them.

Another minute passed and they were within 30 feet of me. The lead emperor carried himself like a king. His silky black head-color swept down the back of his body and through his tail. A bright crayon yellow/orange streaked along his beak like a Nike logo.

Under his cheek, soft aspirin-white feathers poured downward, glistening in lanolin. His wings were black on the outside and mixed with black/white on the front. He stood at least 40 inches tall and his enormous three-toed feet were a gray reptilian roughness with blunted talons sticking out. He rolled his head, looking at me in a cockeyed fashion, as if I was the strangest creature he'd ever seen.

I don't know what made me do it, but I slipped my right hand out of the glove and moved it toward him—slowly. The rest of the penguins closed in closer. The big guy stuck his beak across the palm of my hand and twisted his head, as if to scratch himself against my skin. I felt glossy feathers against my hand. He uttered a muffled coo. The rest of the penguins cooed. Their mucus membranes slid like liquid soap over their eyes every few seconds. I stared back, wanting to say something to them, but realized I could not speak their language. However, at that moment, we shared a consciousness of living.

My frozen breath vapors hung in the air briefly before descending as crystals toward the ground. I battled to keep from bursting with excitement. Within seconds, one of the other penguins pecked my new friend on the rump. He drew back. With that he turned and waddled away. Following the elders, the little one gave one last look at me, as if he too wanted to scratch my hand, but was afraid, and turned with his friends. As they retreated, their wings spread out, away from their bodies like children trying to catch the wind in their

arms. The baby Emperor was last to go.

My hand turned numb so I stuck it back into the glove. As I sat there, I remembered once when a hummingbird landed on my finger near a feeder on a cabin porch in the Rocky Mountains—and I remembered the sheer delicacy Nature shared with me that warm spring day. Here, in this frozen wasteland beyond the borders of my imagination where man does not belong, Nature touched me again today with its pulsing heart and living warmth. I only hope my species learns as much respect for our fellow travelers as they show toward us.

I stood up, tightened my hood and looked for the penguins. They vanished. Only the pack ice rumbled toward the horizon. I turned to my bike. It's hard to believe that two rubber tires laced together with spokes and rims—and attached to a metal frame could carry me from the Amazon Jungle, along the Great Wall of China, across 15,000 foot passes in the Andes, through the scorching Outback of Australia, across Europe, to Death Valley and on to where the bolt goes into the bottom of the globe. That simple machine lying in the frozen snow had taken me to far-flung places on this planet and it had allowed me magical moments beyond description. That moment with the penguins probably was the best it had ever done by me. I remounted it and turned toward the base.

The ride back didn't seem so cold.

In January 2019, my latest book publishes and will be available at Amazon and 1 888 280 7715. It's highly entertaining for baby boomers and/or anyone who loves adventure: **Old Men Bicycling Across America: A Journey Beyond Old Age.**

My wife Sandi and I wish you and yours a blessed Christmas and may 2019 bring you good health, dear friends and high spirits. Merry Christmas, Sandi and Frosty

Politically Correct: Are You Naughty Or Nice?

Last week, Tucker Carlson of FOX NEWS, the most astute and rational talk show host on television along with Laura Ingraham, straight-talked his way into hot water by reporting truthful realities facing our nation as to immigration.

He said something like, "We're importing poor, uneducated, diseased and unwashed illegal aliens by the hundreds of thousands...." Of course, what he said stands true, but it's horribly non-politically correct.

In this politically correct day and age, you can't tell the truth. You must be politically correct, i.e., totally fabricate a new reality rather than offer the facts. What is affirmative action? Answer: giving incompetent and totally unqualified individuals because of the color of their skin—a job alongside those who acquired an education and skills to perform a competent job. In the end, the qualified employees must cover for and do twice the work for the affirmative action person. I've seen it personally.

The new U.S. House of Representatives member, Alexandria-Ocasio Cortez, fits the affirmative-action profile perfectly. Each time she opens her mouth, she lacks any comprehension of what's she's saying. To put it bluntly, she's an "air-head." Pretty face, but no light on in the lighthouse. Great rowboat, but no oars in the water. Nice ladder, but she's stuck on the bottom rung. Nice toothy smile, but no substance behind it. You can only imagine the intelligence of the

voters who voted her into office.

Last week, during the Christmas season, feminists complained about the 1949 song "Baby It's Cold Outside." The handsome and late Ricardo Montalban sang with his girlfriend Esther Williams about staying inside the apartment on a cold winter's night. The affirmative action-PC folks called it, chauvinistic, sexually overpowering the woman, misogynistic, attempted rape and just about everything but the term "racist" which minorities in America call all white people. Radio station DJ's banned it on their shows until millions of American men and women demanded it be played.

Losing the Foundation of America's Culture

In view of the lunacy of the PC crowd to remove "Baby it's Cold Outside" from holiday playlists, let's not stop there. Someone gave me a list of all the songs we should ban for being non-PC. The Snowflakes had better consider these "horrific" tunes:

1. I Saw Mommy Kissing Santa Claus: subjects minors to softcore porn
2. The Christmas Song: Open fire? Pollution of the air! Folks dressed up like Eskimos? Cultural appropriation.
3. Holly Jolly Christmas: Kiss her once for me? Unwanted advances.
4. White Christmas? Racist, racist, racist!
5. Santa Claus is Coming to Town: Sees you when you're sleeping? Knows when you're awake? Peeping Tom. Stalker. Creepy guy in red suit!
6. Most Wonderful Time of the Year: Everyone telling you be of good cheer? Forced to hide depression!
7. Rudolph the Red-Nosed Reindeer: Bullying. Unfair treatment by peers.
8. It's Beginning to Look a Lot Like Christmas: Forced gender-specific gifts: dolls for Janice and Jen and boots and pistols for Barney and Ben

9. Santa Baby: Gold digger, blackmail. Aggressive woman!
10. Frosty the Snowman: Sexist. Why not a snow woman?
11. Do You Hear What I Hear: Disregard for the hearing impaired.
12. Have Yourself a Merry Little Christmas: Make the yuletide Gay? Wow, just wow! How about transgender equivalency? How about non-gendered folks?
13. Jingle Bell Rock: Giddy up jingle horse, pick up your feet: Animal abuse!
14. Mistletoe and Holly: Overeating, folks stealing a kiss or two? How did this song ever get released?!
15. Winter Wonderland: Parson Brown demanding they get married...moral bullying.
16. Grandma got run over by a reindeer: Elder abuse.

Can anyone tell me what's going to happen when we multiculturalize our entire society into a mega-soup of cultures who hate Christmas? Muslims, Hindus, Kwanzaa, atheists, agnostics, sceptics and more! Demand we abolish our rituals? Force us into courts to defend our culture? Vote away our liberties because we're all racist scoundrels?

It's going to be interesting to see the transformation and deformation of our society as we import the rest of the world into our midst.

Allegory of France's

Destruction And The West's

"As seen from the outside, massive upheaval of Western society is approaching the limit beyond which it will become "meta-stable" and must collapse." – Solzhenitsyn

In the past four weeks, you witnessed thousands of French people rioting and stoning the police in the streets of Paris. While you heard from the main stream media that the entire ruckus revolves around gas taxes, the riptide undercurrent stems from mass immigration from Africa and the Middle East.

The French elite never experience the consequences of third world immigration, but the average French citizen must deal with rapes, schools collapsing, theft, trash on their streets, killings, Islamic jihad such as Paris and Nice, degraded neighborhoods, cultural displacement, and everyday fear of walking down the streets with the very real possibility of being raped or run over by an immigrant.

The French face being eaten alive and their culture degraded much like the 1974 novel *Camp of the Saints* by Jean Raspail. Some call it a brilliant novel on Europe's descendance into cultural hell. Others call it 'racist' because

the author attempted to warn the French people that endless immigration guaranteed the demise and displacement of the French out of their own country.

“You don’t know my people. If this band of brutes ever lands on your shores, they will swallow you up.” – Jean Raspail

Writer Paul Craig Roberts wrote, “The Russians and Chinese do not need to do anything about Europe and the United States. The West is self-destructing at a rapid pace. French generals accuse Macron of treason over the United Nations Migration Pact.”

The pact, signed by 164 nations on Monday, including France, does not legally bind but greases the skids for unlimited migration to be treated as a human right and criticism of mass migration to be treated as hate speech.

Craig wrote, “The letter accuses Macron of being “guilty of a denial of democracy or treason against the nation” for signing the pact without putting it to the people. The French state is late in coming to realize the impossibility of integrating too many people, in addition to totally different cultures, who have regrouped in the last forty years in areas that no longer submit to the laws of the Republic. Immigration is erasing France’s “civilizational landmarks”.

According to British MEP Janice Atkinson, the United Nations pact leads Europe into another 59 million new migrants within the next six years.

Knock, knock, knock fellow Americans! Your own Congress expects to import 100 million legal immigrants within 30 years. Anybody see a problem with that figure?

Atkinson said, “European countries are having their culture and identity crushed. It will be illegal not to use their prescribed language. And goodbye to your democracy and your way of life if the pact is implemented.”

Please note that allowing mass migration into first world countries guarantees the West a dismal if not conflict-ridden future. Further, the United States and Canada solve nothing

with the understanding that Africa, at 1.1 billion people in 2018, faces demographic projections of 2.0 billion by 2050 and 4.0 billion by 2095.

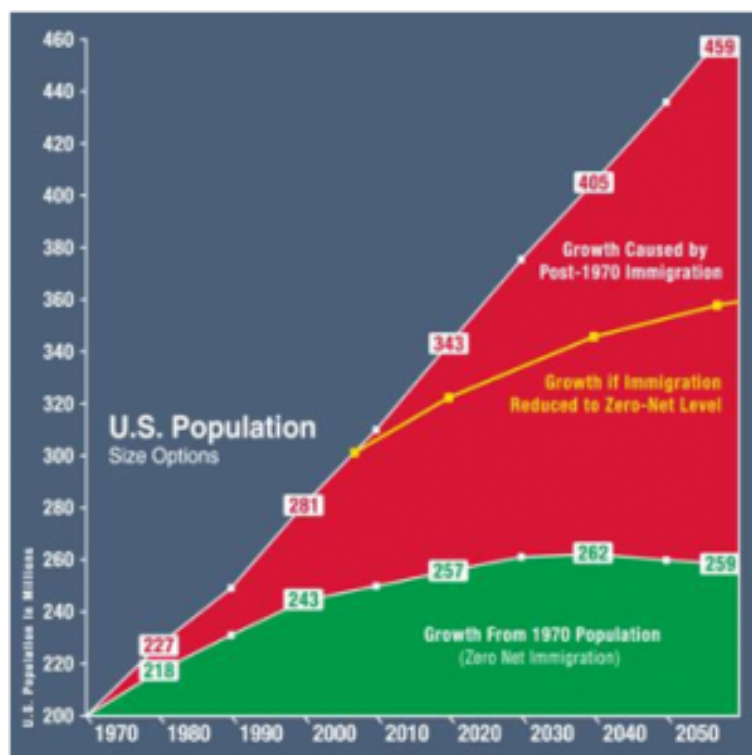

In all, the French people fight for their lives. At the same time, Great Britain, Germany, Spain, Holland, Belgium, Finland, Denmark, Norway, Sweden, Austria and Italy gasp their last breaths if they fail to stop all immigration from a line that never ends.

What I would like to understand: why are the leaders of the European Union bent on destroying European culture, education and stable societies?

Who, in their right mind, thinks that bushmen and women from Africa, used to living in huts, and hunter gatherers, and who lack any Western educational foundation, can do anything but live on welfare in first world countries?

While we watch the French attempt to save their country from the migration invasion, we, too, the American people, along with Canadians stand in the cross-hairs of a demographic Godzilla that will strangle our ability to exist.

The French people stand in riot lines in coming to grips with the impossibility of integrating too many people, especially from totally incompatible cultures, and, who created religious enclaves that possess no semblance of wanting to integrate or become French or submit to the laws of the French

Republic.

Well, fellow Americans, look no further than Detroit, Michigan or Minneapolis, Minnesota or Fremont, California or Miami, Florida or Los Angeles, California. Our own immigrants create parallel societies in our own country that possess nothing in common with America or American ways of life.

This [video sums it up](#) as to what's coming to America if we fail to stop all immigration into the United States.

"In multiracial societies, you don't vote in accordance with your economic interests, you vote in accordance with race and religion." – Lee Kuan Yew (Founder Of Singapore)

"Immigration is a form of war in which the violence is delayed." – Martin Van Creveld

"Tolerance and apathy are the last virtues of a dying society." – Aristotle

Main Stream Media Corruption: Ugly Slant Of The Truth

One of my longtime journalist friends, Kathleene Parker, out of Los Alamos, New Mexico, understands my frustrations as to why the American main stream media avoids any reporting on the immigration issue driving "galloping" U.S. population gains.

I spoke to her on the phone to gain her lifetime of

frustrations as to the “why” of the main stream media misleading, lying to and obfuscating to the American public. The MSM slants the truth to avoid reality and, in doing so, misleads the American people.

Parker said, “Frosty, I just heard from the editor and apparently my piece will be run sometime over the holidays, but since it’s part of our ongoing conversation I’ll forward it as an example of why you won’t get a thing on “60 Minutes.”

“This isn’t just, “Oh this editor, or that one simply doesn’t understand or get it.” It’s far more insidious and dangerous with it of note, that if we still had the Fairness Doctrine, you and I and other prominent writers would, could and should literally go after the networks for their omissions in reporting on population.

“Some recent additional research made me realize how profound and dangerous it really is—worse than even I had imagined because without a press willing to report on the nation and the world factually, all is lost, especially if they are doing

what old communist regimes used to do: modifying the “news” to their own agenda, and that is absolutely what media are doing, and Trump’s non-specific “fake news,” does nothing to solve it.

“I’ve been angry, thinking, “Where is the voice of ethical journalists and journalistic instructors on this?” But then,

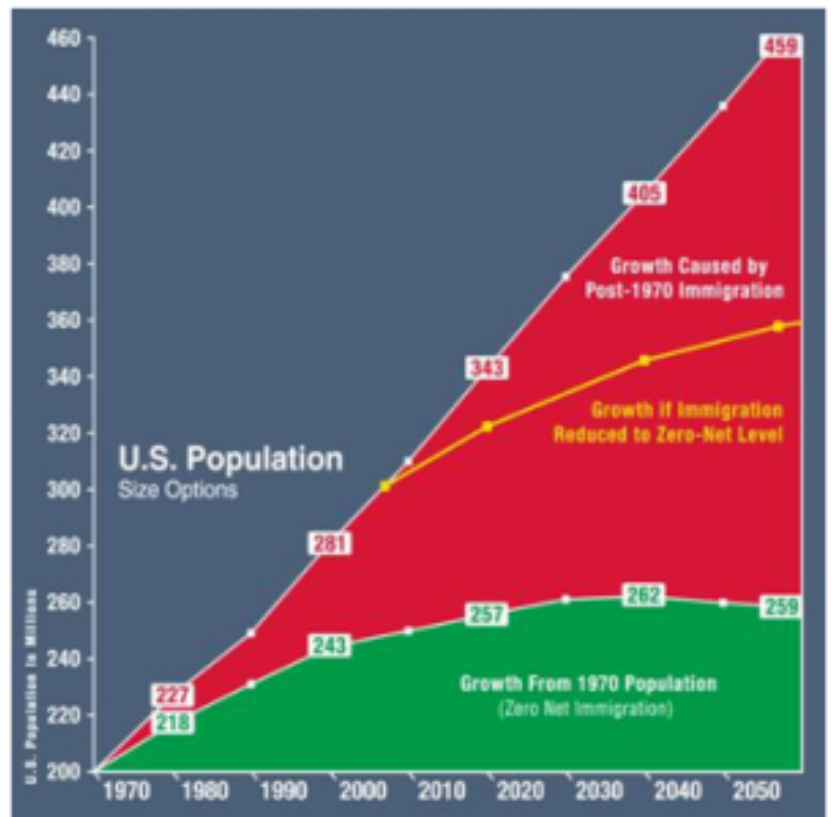

a friend pointed out, with today's media, who would know. As he summed it up, "Do you really think they are going to report on the need to re-regulate media to the standards before 1987? Good point. In fact, THE point, and I feel like the village elder, back as Hitler rose to power, trying in vain to get others to "get it," and to understand exactly the position we're in and HOW DANGEROUS IT IS!

"Media recently headlined a falling U.S. birthrate and hinted, absurdly, at pending worker shortages. The third most populated nation behind only China and India, we are ratcheting up by a staggering 30 million people a decade—82-percent immigration-driven—we must endure gridlock, pricey housing and congested national parks, not labor shortages.

"As the highest per-capita carbon footprint nation, that also makes us—far ahead of China—the most populated nation on the planet in terms of environmental impact, yet corporate media make sure we're not talking about that.

"Not reported is that ours is one of just eight nations—the only developed nation on the list—fueling half of all growth on the planet, a population explosion so astronomical that it should command headlines yet is ignored or misrepresented. This begs the question of what else goes unreported.

Main Stream Media Fans Emotions Rather Than Report Facts

“Democracies cannot survive without trustworthy information. Where are elected officials—“fake news” isn’t helpful—to restore laws to re-tame media so out of control they threaten our very system? Uninformed or misinformed citizens can’t vote wisely, and media, rather than promoting understanding through reasoned information, fan emotions and set the tone, far more than others, for incivility that is making us the “divided states of America,” not the United States.

“The population issue is critical to the Southwest, the nation’s fastest growing region. We’re in prolonged drought, with it likely that iconic Lake Mead could run dry in the 2020’s. The entire Colorado River system and 50 million people could face a water crisis so catastrophic some have called in “possibly civilization-ending.” In 2006, the nation hit 300 million people—though Clinton’s Council on Sustainability warned immigration must never drive growth—and already bumps against 330 million, to be 440 million by 2050, all unreported.”

National media, especially broadcast media, were heavily

regulated until:

- The 1996 Telecommunications Act removed limits on how many news agencies one company owns. Just 6 entities—before deregulation, 52—now own 90 percent of media. Wire services once distributed news from thousands of independent sources, guaranteeing diverse coverage. Now, the few independently owned papers—like the JOURNAL—are at the mercy of national news from that narrow base.
- Before 1996, a company could only own media. Now, conflict-of-interest protections are gone. We're told coffee is healthful, but is that because the broadcaster also owns coffee companies? If media urge war, do their owners also manufacture weapons?
- The Federal Communications Commission's Fairness Doctrine once required broadcasters to be fair, inclusive and unbiased. One T.V. station lost its license for presenting only pro-segregation stories. But, the Fairness Doctrine was abolished in 1987, and now such one-sided reporting—even on critical, complicated, hot-button topics like immigration—is universal, including on tax-supported PBS. and NPR., where unbiased journalism should be sacrosanct, when in fact, they stand among the worst. That's particularly insulting considering their covenant as non-profit, "public broadcast."

Parker continued, "Today, on unregulated networks, we get stories, by any definition, trivial. A cop shaving a guy or a father buying his daughter a dress, while nice, are not news. Other stories are confined to a narrow, boringly predictable base: racially motivated shootings, bullying, mobs destroying statues (and history), careers destroyed by unproven allegations of sexual misconduct (decades ago), livelihoods destroyed over a word—Yes, in America, for saying a word!—as talking heads cheer it on, rather than full-fill their

journalistic responsibility to ask whether something profoundly dangerous is happening and if, in fact, the Fourth Estate is much of the problem.

“Critical-issues reporting-in-depth investigation-is gone. No probes of whether that Congress fails is due to the Citizen’s United Supreme Court ruling; why the Democrats—once unfailingly for low-immigration—are suddenly and without explanation for open-borders; no

asking if politicians respond to medias’ agenda, rather than the peoples’ agenda; no asking why we explode our population even as we have fewer doctors per-capita than Zaire and the sick must wait months for specialist consults.

Those wanting secure U.S. borders are racists

“The rest of reporting is unapologetically biased. Tariffs are only bad. Border enforcement is bad. **Illegal border crossers are solely innocent victims, all of whom must be welcomed.** Those wanting border enforcement are racists.

“This while immigration is unfailingly reported absent context that today’s numbers exceed even the Great Wave of 1880 to 1920, or why Americans then angrily demanded it end—and strangely, did so without labels of racism. Nor are the Rockefeller, Clinton’s Council on Sustainability or black, liberal Congresswoman Barbara Jordan commission immigration reports ever mentioned. (Note that Barbara Jordan reported that endless legal immigration hurt black-Americans and should be strictly regulated in the interest of Americans.)

"A victim of this is media credibility. What happens if someday they must be believed but—like the boy who cried wolf—no one believes them?

"Reporters globally fight—die—to report truthfully. Here, many seem to report only what they want us to hear. And the price of that might be the destruction of our democracy to the ends of those who now own media."

Parker, of Los Alamos, NM, edited an award-winning Colorado weekly, edited a newspaper published by the Denver Public Library and was a correspondent covering Los Alamos for two major New Mexico dailies for 13 years. She now writes nationally on water, immigration, population, wildfire issues.

There you have it from a longtime friend and fellow journalist who tells about the realities of what we face. She's as frustrated as I am because the American public possesses no idea of what's coming with another 100,000,000 (million) immigrants by 2050.

Call your senators and House rep: 1 202 224 3121 or 1 888 995 2086. Demand a stop to all immigration.

Hating Your Own Country: Teaching U.S. Kids To Loathe

America

A recent poll showed that 53 percent of American teens and twenty-something's do not respect America. At sporting events, millions of students fail to stand for the national anthem. In southern California, you see more Mexican flags being displayed and flown rather than the Stars and Stripes. In Detroit, Michigan, you see the Islamic black flag with Arabic writing that Americans cannot decipher.

On social media, citizen journalists walk around asking people of all ages simple questions about America's past and her founding fathers.

"Please name America's first president," one journalist asked 12 people off the streets of Los Angeles.

Not one of them knew George Washington's name. One guessed, "Barack Obama."

"Who fought who in America's Civil War," asked one.

Out of six people, five didn't know we fought a Civil War to free the black slaves. One answered, "Vietnam in the 60's."

Today in America, while millions of third world people wait in line to migrate to America or crash our borders, we see a national angst of young people disrespecting our flag, our history and our

Constitutional Republic. Dozens of organizations work to dismantle the U.S. Constitution: for Muslims in Council for American Islamic Relations, for Mexicans La Raza, for American-blacks "Black Lives Matter." All of them "hate" America with a Capital "H". You can find another two dozen such organizations on the Internet.

Eminent Journalist Heather Mac Donald interview on Sunday with Mark Levin. She talked about her new book: **THE DIVERSITY DELUSION: How Race and Gender Pandering Corrupt the University and Undermine Our Culture.** She elaborated on many concepts that apply to the diversity/immigration challenge – beyond the university.

Mac Donald noted her luck at having attended college in the 1970's. She experienced "the beauty, the greatness and sublimity" of great works of western civilization without indoctrination in victim/oppressor ideology, which, since the 1980s, has deprived the young of a real education, given them a 'license for ignorance' and taught them to hate.

She said, "The 80's was when it started. That's when you got radical multiculturalism to hit. I was in college in the 70s. I'm very grateful for that because I was allowed to read John Milton, Williams Wordsworth and Shakespeare without anyone thinking to complain about the gonads and melanin in those authors. I got to lose myself in beauty, in greatness and sublimity. Come the 80's and students are given a license for ignorance. They were taught that the only thing they needed to know about a book was the race and gender of the author to know whether it was thoroughly dismissible without even being read. And they could go on to instead wallow in their own delusional oppression."

As you look around you today, at every news cast across America, you hear charges of racism. At the same time, you hear CNN bellowing the wonders of diversity and

multiculturalism. You've got hosts like African-American Don Lemon imploring his audience that the biggest terrorists and threat to America are "white men."

At the same time, a white journalist like Megan Kelly made one single comment about "black faces" during Halloween, and she discovered a pink slip in her mail box the next day and into the unemployment line.

MacDonald said, "And it is only gotten worse since then. And what we are doing is breeding the grounds for, I fear, Civil War, because students are being taught to hate, to hate the greatest works of Western civilization and, frankly to hate each other. The power elites are determined to drum into that students head identity politics which says he's either a victim or an oppressor."

Notice multimillionaire athletes degrading the American flag, degrading the president of the United States and creating cultural angst against other races. The biggest word used: racism.

"Oppressors are obviously white males, heterosexual white males. The only way they can get out of their oppressor category is to become an ally of the oppressed," said MacDonald. "The most preposterous delusion of all of this is students actually believe that they are at risk of their lives from circumambient racism and sexism on a college campus."

You're seeing it play out all the way down into pee wee team sports. Kids as young as 12 repeat the disrespect of their favorite sports hero such as basketball star LeBron James.

You see it in the disrespect of new United States House of Representatives member **Rashida** Tlaib from Michigan swirled the Palestinian Muslim flag around herself after winning a seat in Congress.

I venture to state emphatically that not one African-American

would choose to return to his or her homeland in Africa, yet House Member John Lewis, (D-GA) condemns America every time he stands in front of a microphone.

Illegal immigration benefits Democrats: more third world people means an expanded base for identity politics. There is another major factor: profound hatred for, resentment of, Western Civilization.

I am a few years older than Heather MacDonald, but I see the same things developing in our country. We're fragmenting ourselves with endless immigration and multiculturalism that cannot be put back into the box.

Levin asked, "Where do you see this country in five or ten years?"

MacDonald said, "We are either in civil war or we've gotten ourselves away from the brink of civil war."

Levin said: "You mean a physical civil war?"

MacDonald answered, "I absolutely do. We've seen it already. We've seen civil violence grow – people, with impunity, with the celebration and encouragement of politicians, beating each other up . . . Antifa harassing Tucker Carlson, harassing politicians or shooting them. Again, the universities are teaching students to hate on the basis of race and gender. Unless we counter that narrative, which originates in the view that America is oppressive. Unless we fight that narrative of endemic racism, we are in civil war."

In the past, the citizens of America were known as "the American people", as if we were a cohesive group. That adage degraded from 1965 with the Immigration Reform Act. Today, we have become "everybody else's country" and not our own. We really need to stop legal and illegal immigration or face the angst, anger and incompatibility of adding another 100 million third world immigrants to America.

I think McDonald understands our accelerating predicament. I see terrific internal conflict that will make the California wildfires look tame.

American Taxpayers Getting Reamed By Illegal Alien Households

A mind-numbing 63 percent of illegal alien migrants tap into American taxpayer dollars as to K -12 schooling, breakfasts and lunches, food, utilities, housing and medical care.

Not only do they violate our borders and break our laws every single day of their existence in our country—our U.S. Congress, your senator and House member—make you pay for them.

At this point, the Yale Illegal Immigration Study showed that 22 to 25 million illegal aliens now call America their home. The report, by Dr. Steven Camarota of www.CIS.org , showed that 4.6 million illegal alien households utilize U.S. tax dollars to house, feed, educate and clothe their families.

If you take the simplest number of two children, wife and husband into account for 4.6 million illegal households, that's a whopping 18,400,000 (million) illegal aliens living off your tax dollars. Worse, your U.S. Congress allows, promotes it and funds it. Your two U.S. Senators and House member do absolutely nothing to stop it.

In cold black terms, you, the American taxpayer are getting reamed by your own government and elected representatives.

Not only does Congress refuse to build a wall, but it refuses to stop anchor babies, visa overstays and an average of 1,500 illegal from jumping over our borders 24/7.

You pay for those illegals in higher taxes and national debt. You pay for it in unemployment checks for our own citizens. You pay higher prices for everything from shoplifted goods by illegals to insurance rates because they can't or won't buy insurance to paying for all their doctor bills. It's mind-numbing what you pay for as to illegal aliens.

Among the findings:

- In 2014, 63 percent of households headed by a non-citizen reported that they used at least one welfare program, compared to 35 percent of native-headed households.
- Welfare use drops to 58 percent for non-citizen households and 30 percent for native households if cash payments from the Earned Income Tax Credit (EITC) are not counted as welfare. EITC recipients pay no federal income tax. Like other welfare, the EITC is a means-tested, anti-poverty program, but unlike other programs one has to work to receive it.
- Compared to native households, non-citizen households have much higher use of food programs (45 percent vs. 21 percent for natives) and Medicaid (50 percent vs. 23 percent for natives).
- Including the EITC, 31 percent of non-citizen-headed households receive cash welfare, compared to 19 percent of native households. If the EITC is not included, then cash receipt by non-citizen households is slightly lower than natives (6 percent vs. 8 percent).

Today, 44 million Americans and non-Americans subsist on food

stamps paid for by your daily labors. Every time an illegal arrives in this country, eventually, you start paying for his or her babies, their education, their clothing, their food, their housing, their utilities and their medical care.

Programs Examined. The major welfare programs examined in this report are Supplemental Security Income (SSI), Temporary Assistance to Needy Families (TANF), the Earned Income Tax Credit (EITC), the Women, Infants, and Children (WIC) food program, free or subsidized school lunch and breakfast, food stamps (officially called the Supplemental Nutrition Assistance Program or SNAP), Medicaid, public housing, and rent subsidies.

In a few words, you and your family are getting ripped off and trampled by illegal aliens.

The Cost of Illegal Immigration to the United States

At the federal, state, and local levels, taxpayers shell out approximately \$134.9 billion to cover the costs incurred by the presence of more than 12.5 million illegal aliens, and about 4.2 million citizen children of illegal aliens. That amounts to a tax burden of approximately \$8,075 per illegal alien family member and a total of \$115,894,597,664. The total cost of illegal immigration to U.S. taxpayers is both staggering and crippling. In 2013, FAIR estimated the total cost to be approximately \$113 billion. So, in under four years, the cost has risen nearly \$3 billion. This is a disturbing and unsustainable trend. The sections below will break down and further explain these numbers at the federal, state, and local levels.

May I mention that those figures above by the Federation for American Immigration Reform stand for 12.5 million illegals and not the latest figure of 22 to 25 million. Essentially, you may tabulate that their figures are doubled by the Yale Study of 22 to 25 million illegals.

Guess what? It's only going to get worse because you will not see any change when Democrats take over the House in 2020. You are electing them and paying them to push for open borders. Their leaders like Bernie Sanders, Nancy Pelosi, Diane Feinstein, Charles Schumer and governors like De Blasio, Jerry Brown and John Hickenlooper all support open borders and sanctuary cities.

We, the American people, will pay and pay, and keep paying because Congress will do nothing to stop illegal immigration into America. Why? Because the American people keep electing the same career corrupt politicians who answer to their big corporate interests for endless 21st century slave labor.

Read it and weep! Then, what's in your wallet?

E-Mail Frosty: frostyw@juno.com

Totally Shut Down All Immigration Into The United States Of America

At some point, in the near future, the United States of America must shut down its borders to further foreign immigration. This country, and its citizens, cannot maintain responsibility for the rest of the world's failed countries or their citizens. America does not need or want the best and/or the brightest citizens from other countries. America cannot sustain itself with the countless millions of refugees around the world. America cannot continue as the charity ward of the

world.

Article 4 Section IV of the United States Constitution gives the president of the United States the power to stop any illegal advancement or invasion into all 50 states of the Union.

“President Trump was right to order troops to our border with Mexico to reinforce our overworked law enforcement officials and protect our sovereignty. No amount of leftist protestations should distract us from the fact that the primary purpose of our military is to provide security to America. And that’s exactly what the men and women in our military are doing.” – Retired Army Brig. Gen. Anthony J. Tata

As a mature nation of 330,000,000 (million) citizens, we face sobering challenges as to our viability via water, energy and resources. We face accelerating sociological chaos with our smoldering multicultural civilization. We gallop headlong toward environmental and quality of life issues that threaten to rupture and debilitate our society.

The Honduran Mob & Criminals

NWV journalist Kelleigh Nelson wrote, “Males aged 18 to 40 are 90% of these Honduran hordes claiming asylum from violence in Honduras that doesn’t exist. The MSM however shows only scripted

pictures of women and children which has been proven false by

both Judicial Watch and Ami Horowitz. This so-called caravan is a highly organized and created attack on our border and promoters uprooted these people simply to push a particular political agenda.”

Today, the U.S. Border Patrol estimates that 1,500 illegal alien migrants jump our borders every single night of the year. Their numbers equate to 500,000 annually. Totals exceed 22 to 25 million according to the recent Yale University report on illegal immigration into the United States.

Judicial Watch interviewed Ami Horowitz. This [18-minute interview](#) explains the planned invasion. The goal is to degrade U.S. security, and neuter U.S. sovereignty.

Our country absorbed over 100 million legal immigrants since the disastrous 1965 Immigration Reform Act by the late Senator Teddy Kennedy. It guaranteed that the European-Americans that created the U.S. Constitution and the most successful society on Earth would be a minority inside their own country within 80 years of its passage. A recent La Rasa leader said, “Whites will not be a factor in America after 2040.” He’s correct. Whites will be the 49 percent minority after being 90 percent majority in 1965.

Nelson said, “The ripples in America started in 1960 and we didn’t recognize them then as setting up Americans for white guilt, class tension and open border immigration for people who will “do jobs Americans won’t do.” Now those ripples are a tsunami.”

President Ronald Reagan furthered the flood of immigration with his 1986 Immigration Amnesty. That document authorized and encouraged tens of millions more from Mexico, Central America, South America, India and China.

The 1965 Immigration Act allowed “[chain migration](#)” for extended family members. That gave us millions of Indians who

have commanded every motel chain in America with borrowed tax dollars from Americans. As miserable as India proves itself, its citizens can't wait to migrate to America.

Communicable Diseases

Today, immigration, both legal and illegal forces diseases on an unsuspecting American public. We've got new polio strains from our African immigrants. We've got MDR TB from our Latino immigrants. We've got leprosy also known as Hansen's disease from our Asian immigrants. We've got lice, Dengue Fever, Yellow Fever and Chagas Disease from our South American immigrants.

Fox News reported that over a third of migrants are being treated for health-related issues. Sixty percent of them suffer respiratory infections. There are three cases of tuberculosis, four cases of HIV/AIDS, 101 cases of lice and skin infections, and four cases of chicken pox...and serious cases of hepatitis because of the unsanitary conditions in which they're living. Migrants could start a Typhus epidemic and bring in life threatening [Chagas disease](#) which is epidemic in Latin America. Over 14 million South Americans suffer from Chagas disease and 50,000 die annually. It's a parasite similar to malaria and Lyme's disease, plus it's incurable.

Anybody want more of these diseases flying into our country in the bodies of those immigrants? How many more do you want? The world's got plenty of diseased people to add to our population.

Criminal Elements

The Department of Homeland Security reports there are more than 600 embedded convicted criminals and MS-13 gang members within these hordes. Drug cartels, human traffickers, and common criminals want access to Americans. MS-13 needs more members to distribute its \$120 billion in drugs being brought across the southern border annually.

Nelson reported, "America's civilian terror toll *within the borders of the United States* increases at a rate of more than [12 dead Americans a day](#). Illegal aliens [have murdered more people](#) in the USA than were killed on 9/11 plus all our war dead so far in Afghanistan and Iraq *combined*. Illegals have murdered more than 75,468 people inside the USA since 9/11, that's almost 4,200 per year, and this is a low estimate."

"[Fox News reports](#) that Border Patrol agents are averaging 641 arrests every day, which works out to 19,230 in a month, or 7,018,950 per year. One has to wonder how many make it into the country who are never caught," reported Nelson.

If you faced this kind of invasion from the neighbors in your city, would you keep your door open to your house? Would you welcome a never-ending line of people to live in your house?

Why? Why would you save them to destroy your own family?

It's time to shut down all immigration into the United States. We cannot sustain the numbers. We cannot endure the sociological fragmenting of our society. We cannot save the world, but we can destroy, and in fact, are in the process of destroying America with all forms of immigration.

E-Mail Frosty: frostyw@juno.com

E-Verify Would Stop Illegal Immigration: But Congress Won't Pass It

According to the U.S. Border Patrol, no less than 1,500 illegal migrants violate our southern border with Mexico every night. Dr. Steven Camarota, www.CIS.org, stated that an average of 500,000 illegal migrants cross into the USA annually. They arrive via legal visas that they disregard and remain in the USA to find jobs. They arrive as anchor baby mothers. They arrive as workers.

An estimated 7 to 10,000 people from Central America rush our southern borders in an attempt to illegally cross into America for jobs and a better life. The entire world sends us 1,000,000 (million) legal refugees annually, and we absorb them via our U.S. Congress that can't seem to see our country bursting at the seams with too many people already and another 100 million about to be imported over the next 30 years.

The biggest draw for illegal immigration: jobs.

This mass transit of humanity crossing our U.S. borders continues after 40 years. Why? Because our U.S. Congress refuses to pass the most powerful law to stop them: E-Verify. That law, strictly enforced, would stop employers from hiring illegal aliens in their workforce.

However, Congress passed laws in the 1970's, still on the books that state that anyone who hires, houses or transports illegal aliens faces a \$2,000.00 fine for each illegal hired, transported or housed. And, up to five years in prison for hiring, transporting or housing an illegal alien.

The legislative and the executive branches failed to enforce those laws for the past 40 years. (Please note the correct branches of government Ms. Alexandria Cortez, one of our newest House members that thinks the three branches of government are, "The presidency, Senate and House." Dear God, yet another Maxine Waters in the House. Those two should be roommates as they share identical IQ's.) Result: 22 to 23 million illegal aliens now call the United States their home. They've embedded themselves so deeply that nothing can dislodge them. They've created underground economies, separate barrios, separate languages and parallel societies in America.

Those illegals send \$69,000,000,000.000 (billion) in cash transfers back to their home countries annually. Mexico: \$26 billion; China \$16 billion; India \$11 billion; Philippines \$9 billion; Vietnam \$7 billion. Please understand that illegal alien employers pay off the books, so they don't pay federal, state or local taxes. Thus, you not only get bilked out of your tax dollars, you pay for all those services for illegals in your state. (Source: www.Finder.com (Cash transfers out of USA annually)

That money flies out of the USA while U.S. taxpayers foot the bill for those immigrants' children K-12, food stamps, breakfasts & lunches, medical care and housing assistance. At

the same time, Americans pay out \$296 billion in tax dollars to support illegal immigration through 15 different federal agencies.

Yet, former Republican Speaker of the House of Representatives, John Boehner of Ohio suppressed passage of E-Verify his entire tenure. Same with House Speaker Paul Ryan. Same with Nancy Pelosi. The same goes for Senate leader Mitch McConnell. In fact, every leader of the Senate and the House for the past 40 years squashed any bills that would have arrested, detained, and prosecuted employers who hired illegal aliens. They also squashed any bills to stop anchor babies by keeping them in committee. Those democrats and republicans serve other masters other than American citizens.

Thus, we care-take 22 to 23 million illegal aliens in this country and their millions of babies, now estimated to be somewhere between 6 to 8 million anchor babies. (Source: Yale Study: September 2018; Illegal immigrant numbers study)

All the while, our unemployment rolls swell into the millions while we pay for food stamps, housing and welfare. More immigration means more American workers live in poverty from very low wages and fewer opportunities. A whopping 44 million Americans subsist on food stamps. Another 90,000 homeless dwell in tent cities in Los Angeles in the state where a mind-numbing six million illegal aliens live.

Why, pray tell, doesn't Congress pass E-Verify? Why don't they enforce the laws on the books? Why wouldn't they enforce E-Verify if it passed into law? Answer: big corporate giants like McDonald's; Chipotle's, Tyson Chicken, Hormel Foods, Montford beef, Marriott Hotels, Holiday Inn, construction firms, landscape firms, and cities throughout America dictate to their Congressional critters by bribing, cajoling with election money, and greasing their palms with greenback dollars.

In other words, our own leaders undermine the American working man and woman. Those same 535 scoundrels allow China to steal all our manufacturing jobs. They gave away our textiles, manufacturing, and car manufacturing to India, China, Mexico, and other cheap-labor countries.

While men like Charles Schumer of New York give long-winded speeches about how he cherishes America, he takes his knife out and stabs every citizen in the back. While Nancy Pelosi and Diane Feinstein in California promise to serve Americans in their speeches, they take out the cutting board and hack up Americans' jobs, quality of life and standard of living in favor of illegal aliens. While Paul Ryan of Wisconsin looks nice and promises to support the American worker, he squashed, suppressed and destroyed E-Verify every year he served as Speaker of the House of Representatives of the United States of America.

And, like a bunch of sheep to the slaughter, Americans vote those folks back into office decade after decade.

Why aren't there term limits to stop this betrayal of the American people? Answer: once those people gain power, they never want to give it up. Congress will never vote for term limits.

As the late British Lord Acton said, "Power corrupts; and absolutely power corrupts absolutely."

All the while, you and I face a harsh future paying for unemployment, food stamps, homeless, 18-year wars that cost us \$5.9 trillion and growing fragmenting of our country. By 2042, the Pew Research Center states that American Blacks and Whites will become the new minority at 49 percent in our own country, which will be dominated by Mexicans at 51 percent.

All brought to you by endless legal and illegal immigration condoned and supported by our U.S. Senate and House of Representatives. Why don't you give your two state senators

and House member today and thank them so much for screwing you and your family?

Anybody Looking At What's Happening To Europe?

While we watch a third world invasion from Central America knocking on our southern border with Mexico, is anybody watching what's happening to Europe? Canada? Australia?

Immigrants overrun each of those Western entities by the millions.

What's most interesting: their leaders invite the invasions of their countries against their countrymen and women. Worse, against their successful cultures!

European cultures face extinction or bastardization from incompatible religions, cultures and world views of the immigrants. Those immigrants fundamentally ransack the parliamentary laws of Europeans.

No less than 90 "no go zones" inhabit dozens of towns and regions of France, Germany, UK, Holland, Finland, Norway, Sweden, Italy and Spain. The immigrants created separate societies within those countries. Separate languages, cultures and ways of life.

Latest newspaper heading: PARIS BURNS: Riot police fired tear gas as 30,000 protestors furious at Macron.

(Globalist French President Macron giving his country away to Islam.)

Geller Report, "Europe is sinking fast. Left-wing globalist politicians have destroyed Europe, with reckless economic and immigration policies. This is what the Democrat Party wants for America. French President Emmanuel Macron is one of the many European political elites who despise President Trump. That is because Trump will not ruin America, the way politicians such as Macron have ruined Europe. The MSM in the United States love President Macron."

France accelerates into its own third world country as it allows endless immigration to cripple its culture, politics and economy.

Geller reported, "French police locked horns with thousands of angry protesters who stormed the streets with placards wearing yellow vests before hurling objects at riot police and starting fires. Shocking images show demonstrators waving an array of flags."

Notice "an array of flags" from citizens from multiple

nations.

Do you notice the same flag waving from different countries in Canada, America and Australia?

In Vancouver, Canada, now dominated by Chinese immigrants, the Canadian Maple Leaf flag remains out of sight to Chinese flags. In Sydney, Australia, no longer an Australian city, it features flags and immigrants from over 100 countries. And they don't speak English.

One look at Texas, New Mexico, Arizona and Southern California shows a preponderance of flags from Mexico and Central America.

What does it mean? It means Western countries import their own form of national suicide via allowing endless immigration to deform and displace their own cultures, languages and ethos.

A poll this week indicated that 73 percent of people in France have expressed support for the protests, which have been characterized as a grassroots movement.

The Truth Must be Told

In Dan Murray's book, **The Strange Death of Europe: Immigration, Identity and Islam**, he describes how Europeans have given themselves to "civilizational despair", and that they simply lack the energy to save themselves from what their leaders thrust upon them. They can't seem to summon the energy to save themselves.

One critic wrote, "Murray frames the moral dilemma facing the west through a quote from the prophetic 1973 book [The Camp of the Saints](#). Author Jean Raspail saw 'A million poor wretches, armed only with their weakness and their numbers, overwhelmed by misery, encumbered with starving brown and black children, ready to disembark on our soil, the vanguard of the multitudes

pressing hard against every part of the tired and overfed West.”

Murray describes the immigrants on the island of Lesbos, the slums of Malmö, and the streets of Paris. Later chapters go into extensive detail about the Islamic immigrants. They do not want to integrate. They have no respect for the host cultures. They are given to crime, especially rape. Their parts of the major cities – Paris, Stockholm, Berlin – become no-go zones for police, firemen and ambulances. They institute Sharia law among themselves and reject the host countries.

Europeans feature a fetid 21st century fatigue. European philosophy and culture crested at the end of the 19th century. It had nowhere to go except nihilism and hedonism, and Europeans chose that path. Europe allows Muslims to take over because it hasn't the strength to defend itself.

“Europe has given up on freedom of speech when it comes to Islam,” said Murray. “Too many events have shown that it is too dangerous. It is the politicians who are especially cowardly. The people by and large, and in increasing numbers, don't want widespread Muslim immigration. Yet the politicians keep the doors open and keep telling saccharine stories about how wonderful it all is.”

“There are huge contradictions between a Sharia law society and modern liberalism,” one critic said. “Treatment of women and homosexuals would top the list. Yet, liberals continue to push for open borders. Murray notes cases such as that of Pym Fortuyn in the Netherlands in which liberals came to oppose immigration (and, too often, to die for taking such a stance). He does not whatsoever go into the question of who owns the media that covers up Muslim crimes and broadcasts the message of diversity.”

There may be hope for Western Europe. The millennial generation is waking up. One of the most heartening books I've

seen recently is [Generation Identity](#).

Ironically, if you travel to Detroit, Michigan; Miami, Florida; Minneapolis, Minnesota; Chicago, Illinois; San Diego, CA and Los Angeles, CA—you see exactly the same trend occurring with immigrants migrating into the United States—parallel and hostile societies.

Essentially, as the USA imports another 100 million immigrants within 30 years, it will write its own national suicide story. It accelerates its own death via 1.7 million legal and illegal immigrants from 196 different countries, annually.

Sick Muslim Female Genital Mutilation In America: Legalized By A Black Robed Judge

Two years ago, several doctors in the Detroit area, and their staff members participated in female genital mutilations of female children under nine years of age. They've performed the barbaric Muslim ritual on hundreds of female children for 12 years until apprehended two years ago.

On October 20, 2018, an American judge ruled against the Michigan law that made the ritual illegal, and gave the doctors and their staff members, all Muslims, a free pass to continue. Where are the feminists? Where is the U.S.

Constitution as to free choice about one's body? No one possesses the right to disfigure or dismember another person's body, whatsoever.

Female genital mutilation proves the most barbaric, disgusting, cruel and violent act against a young female child under nine years of age. What is it? A practitioner uses glass or razor blades to cut the clitoris off along with slicing out the labia's majora and minora. They use no anesthetic. Then the practitioner sews up the vagina just enough to allow the child to urinate. Often the child dies from sepsis and other vaginal infections.

We faced hundreds of cases of infected genitals from the ritual in Denver, Colorado where I live, so much so, that Rep. Dorothy Rupert wrote a law to stop it. At that point, the Somali immigrants took it underground and continue the practice today. Lots of girls get buried in shallow graves somewhere on the prairie.

At this point, our U.S. Congress imported 3.5 million Muslims. They cut 500,000 of their female babies with FGM in the past 30 years. They also average 23 to 27 "Honor Killings" of their women annually in the USA.

(Source: Ed

O'Callihan, White House briefing, Feb 2, 2018, "Honor killings and Female Genital Mutilation in the USA by Muslim immigrants.")

If this doesn't make you sick to your stomach, I am at a

loss. Our first world, modern society bows to a 6th century, Dark Ages, violent religion by giving the 'Okay' to assaulting a young child without her voice to say "no" to such a barbaric practice. It's mandated in Sharia Law to keep a woman "pure" and faithful to her man, who by the way, considers her "property". He can divorce her or kill her at any time as a Muslim.

A federal judge on Tuesday ruled that the U.S. law banning female genital mutilation was unconstitutional and dismissed charges against several doctors in Michigan who carried out the procedure on underage girls as part Muslim sect's religious practice.

"U.S. District Judge Bernard Friedman ruled that Congress had no authority to enact a law that criminalizes female genital mutilation (FGM). "As despicable as [FGM] may be... [Congress] overstepped its bounds."

The ruling came after defense lawyers challenged the 22-year-old genital mutilation law that hasn't been used until 2017 when Dr. Jumana Nagarwala was arrested and accused of mutilating the genitalia of young girls.

In other words, any young girl can be assaulted by anyone with a blade or broken glass to cut out her clitoris and labia's majora and minor—without legal action against her. Plain and simple, in a first world country, this legalizes "assault and battery" of a child without provocation or choice.

"It's a giant step backward in the protection of women's and girls' rights ... Especially when there is a global movement to eliminate this practice." – Shelby Quast

Why are we allowing Muslim barbarians to continue their barbarity in our country? When they start tossing gays off buildings as they do in the Middle East, will that judge allow that practice, too? What about four wives being legal? Will

we acquiesce to that, too? How about "honor killings"? Will we continue to ignore the average of 23 to 27 of them annually to grow to over 100 or 500 annually?

In the sick and demented Muslim world, 20,000 women meet their deaths annually at the hands of husbands, fathers, brothers and uncles because those 20,000 women said something wrong, or they weren't needed as a wife, so the husband killed the first wife to marry another wife. (Source: United Nations, "Honor Killings Report")

Islam proves itself the most violent, demented, sick and disgusting religion in the world, but its followers just got a green light to cut all its daughters here in the United States.

Pathetic doesn't start to describe this ruling by this stupid, sick and immoral judge: U.S. District Judge Bernard Friedman.

If allowed to continue, our country stands at the cliff edge of losing women's rights, religious rights, gay rights, free speech, choice of religion and everything we fought for since 1776.

This is the most sad, disturbing and sickening column I have written in 40 years. Everyone one of those Muslim girls suffers her sexuality being cut out of her and a brutal assault on her right to choose her life.

Michigan state Sen. Rick Jones also slammed the ruling.

"I'm angry that the federal judge dismissed this horrific case that affected upwards of a hundred girls who were brutally victimized and attacked against their will," he said in a statement. "This is why it was so important for Michigan to act. We set a precedent that female genital mutilation will not be tolerated here ... I hope other states will follow suit."

I've said this statement before and I'll say it again:

The Islamic religion-political-economic system: a highly emotionally infectious, contagious, repugnant and debauched ethnic disease masquerading as a religion—added to a diabolical Sharia Law mandate. It warps minds of all adherents and forces them toward brutal, violent, cruel, vicious and insane behavior toward men, women and children.

It creates suicidal maniacs and insensate intellectual morons. Humans under its spell lose their sensibilities, rational values, dignity and minds. They resort to wanton acts of murder, cruelty, perversion and barbarism. Because of mass immigration into first world countries, this insane religious disease floods into every corner of the planet—and with it a complete destruction of women's rights, children's rights, intellectual rights, gay rights, free speech, free choice of religions, dress, free choice of spouse, killing of gays, honor killings of women and a complete loss of humanity by Islam's adherents. If not stopped by the willpower and force of first world countries, it will ravage the free world back into the Dark Ages. Frosty Wooldridge, six continent world bicycle traveler.

Immigrants Versus Americans: Fragmenting America's Culture

As the latest immigrant onslaught approaches our southern border, powerful forces continue their assault on American citizens, our laws, culture, language and ethos.

While many watch the caravan approach, this 12-minute video

shows the incredible speed of the invasion being perpetrated upon our country. It shows countless illegal migrants who have usurped our borders and claim they have reconquered their land: Reconquista via La Raza, which means, "The Superior Race." This video shows they mean business and they grow in numbers and hate for America.

In the Video below you will notice the Mexican flags flying high over San Diego, California

In reality, southern California features 22 Spanish radio stations. Additionally, six Spanish speaking television stations garner at least 5 to 10 million Spanish speaking people with no less than six million illegal aliens occupying San Diego, Los Angeles, San Francisco and dozens of small cities.

"Immigrants devoted to their own cultures and religions are not influenced by the secular politically correct façade that dominates academia, news-media, entertainment, education, religious and political thinking today," said James Walsh, former Associate General Counsel of the United States Immigration and Naturalization Service. "They claim the right not to assimilate, and the day is coming when the question will be how can the United States regulate the defiantly unassimilated cultures, religions and mores of foreign lands? Such immigrants say their traditions trump the U.S. legal system. Balkanization of the United States has begun."

And, yet, Governor Jerry Brown and U.S. Senator Diane Feinstein welcome the law breakers and border jumpers. California maintains its "sanctuary state" status for protecting every illegal alien within its state lines.

What has their leadership garnered? You will see 90,000 homeless Americans living in tent-tarp cities in Los Angeles. Another 11,000 homeless live in the streets of San Francisco, causing such hygiene problems, that professional conferences

have been cancelled by big corporations. How do I know about these homeless encampments? I bicycled through them this summer. They are real, and they are growing in numbers. In other words, third world poverty, illiteracy and misery entrenches itself in California. But, it's also manifesting in Tucson, Phoenix, Albuquerque, and dozens of towns in Texas.

In my world bicycle travels across six continents, and through dozens of third world countries—what word would you use to describe the prime driver of poverty and misery in those countries? Answer: illiteracy.

That's the driver. When a population remains illiterate, it births more babies who add to the illiteracy fire. The more illiteracy, the more it births more illiteracy. It becomes a vicious cycle that cannot be broken.

The illiteracy rates in Mexico and Central American countries drive their poverty. That poverty longs for "a better life", so it migrates to America and Canada. But people cannot all of a sudden change their culture and brain power because they enter a first world country. They simply degrade a first world country into the illiteracy rates of a third world country. Thus, the first world country devolves into a third world country. You're seeing it manifest in New York City, Chicago, Atlanta, Miami, Denver, Houston, Dallas, LA and San Francisco.

You're also seeing illiteracy manifest because of language. In Denver, Colorado, teachers must contend with and try to teach with 173 different languages. Result: American kids fail to gain an adequate education to thrive in this dynamic society.

As to diversity and multiculturalism riding in on the heels of every immigrants, James Walsh hit the nail on the head about "balkanization of America has begun."

If you travel to Michigan or Minneapolis today, you will see 150 enormous billboards featuring Moslems advertising their

religion and racial bias against Americans. Additionally, both states feature new members of the U.S. House of Representatives. They will be swearing into office on the Quran. Except the Quran mandates destruction of any other religion, governance and economic system that doesn't follow Sharia Law. Thus, the people of those two states voted for individuals known as "soft jihadists" whereby they slowly and quietly undermine the U.S. Constitution bit by bit, day by day, and person by person.

Boston imam Abdullah Faaruuq said on November 12, 2018, "What's wrong with you, you sick Americans? This is the land of the coward & home of the slave; Islam is America's future; without Islam America will meet its demise."

"Islam isn't in America to be equal to any faith, but to become dominant. The Qur'an should be the highest authority in America, and Islam the only accepted religion on Earth." Omar Ahmed, director of Council on American Islamic Relations.

And yet, our U.S. Congress imports these jihadists, both violent and soft, by the tens of thousands annually. As their numbers grow, Americans flee Islam dominated cities like Detroit, Miami, New York City, Chicago and dozens more. At some point, there will be no place else to flee from multiculturalism and diversity. The Pew Research Center stated that Latino-Mexican-Hispanics will become the new majority of 51 percent by 2042.

Can you imagine the results of another projected addition of 100,000,000 (million) immigrants by 2050? Can you imagine another 10 million Moslems imported into the USA? Can you imagine another 20,000,000 (million) Mexican-Central American immigrants? Can you imagine what their presence will do to our country as to language, culture, religion, quality of life and environment?

For the past five years, I've called for a total shutdown of

all immigration. We need to give our country a chance to survive, instead of flooding it into illiteracy, violent Islam and linguistic chaos. If not, we shall see our culture, language and ethos completely devolve into third world misery—from which none of us will escape.

Caravan Onslaught On Border: Bleeding America By A Thousand Cuts

When do too many become too much? Why must the world's miseries become America's responsibilities? At what point, does the immigrant line end?

In the past month, emotional writers around the United States tell us that we must accept and care for the 14,000-strong immigrant caravan chugging toward our southern border. More open-borders activists plan to fight the military in order to allow the migrants into the United States. The Catholic Church encourages its flock to violate our borders at every level. The Pope, standing behind the tall walls of the Vatican, scolds us for building a wall on the Mexican border. High powered leaders, like Joe Biden, Nancy Pelosi, Charles Schumer, Barack Obama, Diane Feinstein, Michael Bennet and more Congressional Critters, press for no borders for America. They feel we should dissolve our borders and open up our country to unlimited immigration.

Catholic Charities, Lutheran Charities, Muslim Charities and Jewish Charities encourage refugees, equip them and plant them in thousands of cities across America annually: all on your taxes. Congress aids and abets them.

An average of 300,000 pregnant women from all over the world violate America's borders to birth their anchor babies annually. Those babies cost you, the American taxpayer, billions over the decades, if not into the trillions of dollars. Congress does nothing to stop them.

Congress mandates 50,000 diversity visas annually to give a "Golden Ticket" to third world poor people to arrive in America with an apartment, food stamps, automobile and cash for as long as they choose. All on your taxpayer dollar! To sober you to this Congressional boondoggle, 14 million third world poor sign up for that Golden Ticket to America every year.

If given a free ticket on a plane to America, 100,000,000 (million) to as high as 500,000,000 (million) citizens of the world would gladly vacate their hellish countries to come to America, Canada and Europe. The United Nations reports that 68,000,000 (million) refugees languish around the world at this date. That number will exceed 100 million within 10 years. In India, 60 percent of Indians do not enjoy access to a toilet or shower. No wonder they chain-migrate into America like a human monsoon. (Source: Indian Express)

As it is, 1,200,000 (million) legal immigrant refugees flow into the United States annually. That's 100,000 every thirty days. Once established, they chain-migrate their relatives from 196 different countries.

On the illegal side, the U.S. Border Patrol reports that 1,500 illegal alien refugees jump our borders successfully 24/7. That adds up to 500,000 illegal aliens that break into America annually. (Source: Dr. Steve Camarota, Illegal Alien Flow into the USA, www.cis.org)

Bleeding heart Amanda Cater wrote a letter to the Bozeman Montana paper pleading on behalf of the Central American caravan of immigrants about to invade America's borders. She said, "The people seeking refuge are a very small percentage of our 325 million people. We must let them into our country."

She didn't mention that we suffer 11,000 homeless in San Francisco, 10,000 homeless in my City of Denver, 12,500 homeless in Seattle, and 90,000 homeless living in tarp cities in Los Angeles. In August 2018, New York City reported 63,025 homeless people, including 15,421 homeless families with 22,907 homeless children, sleeping each night in the New York City municipal shelter system. Families make up **three**-quarters of the homeless shelter population. (Source: Basic facts of homeless in USA, Google)

Cater didn't mention that 44,000,000 (million) Americans, refugees and illegal aliens subsist on food stamps that cost American taxpayer hundreds of billions of dollars annually.

Dr. Paul Nachman, a population expert in Montana, responded to Cater, "We already admit over one million legal immigrants yearly, causing substantial stress in our national life. (Think: stagnant wages, galloping housing prices, schools blitzed with influxes of non-English-speaking pupils, jammed highways, welfare burdens, inter-ethnic strife,

....) Meanwhile, in recent years, the Gallup organization has done worldwide polls revealing that 160 million adults want to move to the U.S., and the number would be much bigger when we count their children.”

Above all of this invasion, our national debt stands at \$21 trillion. Anybody see a problem with that?

Additionally, we face a fractured and fragmented Congress seething to disembowel President Trump and all Republicans. We face 240 Sanctuary Cities supporting all illegal aliens living within their boundaries. We face millions of employers cheating our tax codes by hiring illegals for a fraction of a living wage.

And yet, we’re expected to care for the rest of the world’s desperately poor, disenfranchised and sick. At the same time, those same third world refugees produce a net gain of 80,000,000 (million) new babies annually around the world.

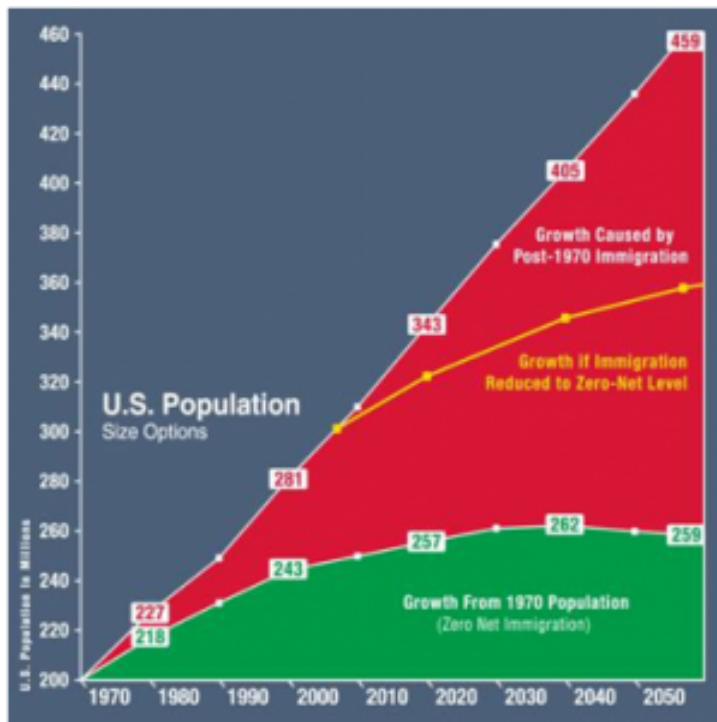

Thus, the line of refugees never ends. Watch this five-minute video to see what it looks like.

In a five minute astoundingly simple yet brilliant video, **“Immigration, Poverty, and Gum Balls”**, Roy Beck, director of www.numbersusa.ORG, graphically illustrates the impact of overpopulation. Take five minutes to see for yourself.

[Watch this 10-minute video to see where our country is headed.](#)

“Immigration by the numbers—off the chart” by Roy Beck

[This 10-minute demonstration shows Americans the results of unending mass immigration](#) on the quality of life and sustainability for future generations: in a few words, “Mind boggling!” www.NumbersUSA.org

The burning question begs to be asked: do you want to bequeath this kind of a civilization to your kids?

If you don't, you need to take action. If you don't care, don't take action and let history tell the tale how the United States, the most successful country in the world, devolved into a desperately poor, overpopulated and overwhelmed civilization.

Ironically, at a future date, American citizens discovered they could not immigrate to any other country in the world to save themselves.

Here's what it looks like graphically:

(Permission to republish this population graph by Roy Beck, www.NumbersUSA.org)

Merkel, Macron, Trudeau And May Versus Trump

This past week, President Macron of France, along with Merkel, May and Canada's Trudeau, shunned President Trump for being a nationalist. Norway, Sweden, Belgium, Denmark, Holland and Finland's leaders follow in Macron's steps.

A lady on Facebook chastised Trump for his steadfast honoring of America's right to borders and maintaining a sovereign nation. The entire Democratic party of America welcomes the 14,000 immigrant caravan to break over America's borders in their quest for a better life. What the Democratic Party and its followers don't realize: 100,000,000 (million) would move to America next week if given a plane ticket. So who receives the lucky lottery numbers out of billions on the planet living in squalor?

Mass migration into the hundreds of millions across the globe in the 21st century.

But what those leaders don't admit grows more ominous by the day. Since Merkel allowed mass immigration into Germany in 2015, and essentially, the entire European Union—every country in Europe boils like a cultural cauldron awash in linguistic chaos, violent Muslim religious confrontations and terror events, no go zones too dangerous for Europeans to enter and a growing “civilizational despair” at losing their countries to third world barbarians.

In the land of free speech, Norway locks up anyone who speaks out against Middle Eastern and African immigrants. No matter how many rapes of Norwegian women by immigrants, no Norwegian dares speak up against

the power elite. If anyone does speak up, they can be charged with a hate crime. No matter how many torched cars, vandalism of stores and homes, completely trashed schools and educational systems—immigrants cannot be blamed or corrected or deported.

In Sweden, once the most peaceful country in Europe, it absorbed so many Middle Eastern and African immigrants, that its citizens face becoming minority status within three decades. Additionally, rapes, robberies, torching of cars and shoplifting dominate the evening news. One prominent imam stated, "Sweden will become Europe's first Islamic caliphate."

In France, tourists must guard their purses from immigrants prowling the streets for 'marks'. European women cannot safely walk the streets of any city dominated by immigrants. France features parallel societies that speak, practice and fulfill Islam's prime directive: "Convert or kill all non-believers." France suffers from 90 'no go' zones where French citizens dare not tread. Sharia Law, alien and diametrically opposed to democracy, operates in all Moslem dominated cities. Under that law, no French woman possesses any rights whatsoever. While Macron welcomes hundreds of thousands of illiterate Africans and Middle Easterners, his

countrymen prepare for civil war. Yet, Macron chastises and condemns Trump for his loyalty to America.

In Germany, Merkel faces expulsion for her acceptance of 2,000,000 (million) Islamic immigrants. In a country about the size of Oregon, with 68,000,000 (million) people and too crowded to spit without hitting someone—she overloaded every city, town and village with people who cannot and do not enjoy any commonality with the German people. But the damage cannot be reversed. Nationalism grows by the day throughout Germany and much of Europe as citizens prepare to defend their homelands against an invasion of barbarians.

Theresa May, leading the United Kingdom, lacks the guts, gumption and vision to save her own country. In the UK today, Islam dominates dozens of once British cities. Much like Detroit, Michigan, British citizens flee the violence, rapes, robberies and destruction of their schools. Today, two different London's exist: one Moslem and one British European. Moslems created 130 Sharia Law courts and over 50 Sharia Law city councils. Honor killings occur with too much regularity on innocent women, along with thousands of female genital mutilation cases—these barbaric practices flourish in a country based on free speech, women's rights and children's rights.

And the man-child Trudeau of Canada simply immigrated his own country into a multicultural morass of confusion, anger, angst, welfare, languages and fragmentation. British Columbia of Canada will become the first state to secede and become the new overpopulation outlet arm of the Chinese.

Belgium, Holland, Finland and Denmark suffer the same fates as the rest of Europe. Every single African and Middle Eastern immigrant that crashes the gates of each country—brings that country closer and closer to its final destruction of culture, language and ethos.

Whether you read **Camp of the Saints** by Jean Raspail or **The Strange Death of Europe: Immigration, Identity and Islam** by Douglas Murray, or **America on the Brink: The Next Added 100 Million Americans** by FHW—you cannot help but succumb to the uneasy feeling that America shares the same fate with endless immigration.

In the wake of “Merkel’s Mistake,” the German prime minister’s 2015 invitation to the Middle East of unlimited immigration to her country – and therefore the European Union, a fair number of populist politicians have risen to power promising to radically curb mass immigration: Orban in Hungary, Duda in Poland, Kurtz in Austria. And Salvini in Italy.

If and when the United States collapses from endless third world immigration, Donald J. Trump will be seen as one of the few leaders in the world that saw the danger, acted as best he could to stop it, and yet failed because of the overwhelming power of the U.S. Congress to thwart him, and the incredible apathy of the American people who sat by watching their own country turn into everybody else’s county.

And worse, America ultimately collapsed into a balkanized, unsustainable, culturally confused, totally destroyed sense of identity and environmentally degraded civilization beyond repair.

CNN Commentator Don Lemon's Racist Charges Divide America

In a recent TV news cast on CNN, host Don Lemon said, "We have to stop demonizing people and realize the biggest terror threat in this country is white men, most of them radicalized to the right, and we have to start doing something about them."

This American journalist just about dropped my lower jaw to the ground upon hearing such a moronic statement by African-American Don Lemon. This man, vacant of serving his country, and mostly serving as a biased critic of all white people—owes his freedom to those who served.

Ephraim Mattos, as a member of Free Burma Rangers after his Navy SEAL Service, he and his teammates have rescued civilians who are caught up in wars not of their own choosing. He issued a statement that went viral.

" After surviving three wars, a gunshot wound, a near fatal drowning, a failed parachute, Taliban ambushes, ISIS snipers, mortars, mine-fields, suicide bombers and laying down my life for the cause of freedom while fighting shoulder-to-shoulder with my brother Arabs, Asians, Blacks, Hispanics, Christians, Muslims, Jews, Buddhists, Animists, and Atheists, I have now returned home to the USA where a ***CNN host has labeled me as a radicalized right wing terrorist simply because of my gender and the color of my skin.***"

Terry Gross of NPR interviewed a female journalist on the East Coast who wrote about deaths by a white nationalist killing 11 at a synagogue, but she never interviews anyone about the thousands of blacks being killed by other blacks in Chicago. On July 4, 2018, African-Americans from the "Windy City" engaged in 70 gun fights, knife fights and hundreds of

domestic abuse beatings. Not a word from Ms. Gross. Certainly not a peep from Don Lemon.

*Navy SEAL Mattos continued, "I represent just one of the hundreds of thousands of conservative white men who have fought to preserve freedom in this great Nation and in other nations. **My forefathers are the 3% who founded this Republic against the might of the British Army.** It was white Conservative men who died by the tens of thousands after charging into our southern states to free our black brothers from the slavery imposed on them by the Liberal left. We were the ones who acknowledged that women have a right to vote. We held the line in WWI and charged the beaches of Normandy in WWII. **We have fought for freedom and liberty for generations and we continue to do so today alongside all of our brothers and sisters regardless of their race or religion.**"*

Hitler said the same thing about the Jews that Don Lemon of CNN just said about white men. Lemon stands as the face of the Democratic Party and African-Americans. Whites fought for generations to free them and uplift them. Over 500,000 white men died in the Civil War to free blacks. As it stands in 2018, more blacks face slavery and starvation in Africa than ever in the United States.

Oprah Winfrey stated in a television interview that all white people need to die for her race to prosper. **In 2013, she said that "older people, who were born, and bred, and marinated" in racism "have to die" before racism can be solved.** Had she ever been born and lived in Africa, her home country, she would be starving to death in a thatched hut in Sudan.

Another oppressed minority in America continues to climb into power positions for one single reason: to install Sharia Law into America.

"Islam isn't in America to be equal to any faith, but to become dominant. The Qur'an should be the highest authority in

America, and Islam the only accepted religion on Earth.” Omar Ahmed, director of Council on American Islamic Relations.

And yet, voters in Minnesota installed Keith Ellison, a Muslim Brotherhood member, and domestic abuser, into the Attorney General slot, along with two House members of Islam. Anyone see some problems screaming toward our Disunited States of America?

For the first time in history, a single nation, once 90 percent European-American only 50 years ago, has absorbed over 100 million third world people from 196 countries with failed cultures, educational systems, violent religions, lack of jobs and bad governments around the world—and concentrated them into one arena, and hoping they will become Americans. In reality, they can’t, they won’t, and they are not becoming Americans. Do you, whether you are black, white, Christian, Muslim, Hispanic or otherwise—think it’s going to get better by adding 1.7 million more immigrants annually? Do you think the projected addition of another 100 million immigrants will solve racial, cultural and religious differences in the next 30 years?

You must be wondering what in the hell have we done to our country and our kids?

Cleaning Plastic From The

Oceans One Pound At A Time

The magic of www.4ocean.com cleaning plastic out of your oceans.

Back in 1963, my brother and I hoisted scuba tanks over our shoulders to dive in John Penne Kamp National Park on the south coast of Florida. We enjoyed stunning beauty, pristine reefs and a world of underwater wonders.

By 1967, Dustin Hoffman starred in the movie "The Graduate" where a mentor told him, "You got to get into plastics man...plastics are the future."

Well, in 2018, the future landed on all of us with plastics to the tune of 5.25 trillion pieces of plastic debris torturing the world's oceans. That horrific number of plastic pieces floats on the surface or descends to the bottom of every ocean, sea, lake, river and pond in the world. Oceanographer Julia Whitty, at On Earth Magazine, tabulated that 46,000 pieces of plastic float on every square mile of oceans around the world.

Plastics today reside in the tissue of fish, birds, whales, dolphins and turtles. It's permeating the entire food chain as it disintegrates into tiny pieces ingested by sea life.

Cruise ships jettison it, military fleets toss it overboard

and regular humans around the planet toss 3.5 million pieces of plastic into the oceans 24/7. Scientists calculated that 16 billion pounds of plastics land in the oceans annually.

In 2018, 1,000 miles off the coast of San Francisco, "The Great Pacific Garbage Patch" floats 100,000,000 (million) tons of plastic between two gyres. (ocean currents) It expands to the size of Texas and reaches 30 to 60 feet deep in places. It represents humanity's disregard, disrespect and outright savagery toward the planet and all living marine life.

Marine and avian life eat plastic bottle caps that look like food. It chokes their digestive systems for an agonizing death. It kills millions of seals, turtles, sharks, whales, dolphins, seagulls, pelicans and countless other species living in our oceans.

[How plastics kill ocean life.](#)

When Oprah Winfrey exposed the 60-million-ton Great Pacific Garbage Patch 20 years ago, I felt the world's leaders might gather in a conference to create a financial incentive of 25 cents on every piece of plastic sold in mercantile stores worldwide. That price would command everyone's attention for 99 percent returns of all plastic pieces. Instead every country in the world ignored the "Patch" so that today, it houses 100,000,000 (million) tons of plastic and kills even more marine life.

In the last decade, two surfers, Alex Schulze and Andrew

Cooper saw the beaches and oceans flooded with plastic. They decided to act. Please examine this short video to get an idea of their quest:

[Removing plastics from our oceans.](#)

If the video doesn't distress you, or it doesn't disturb you, or it doesn't make you angry at how humans continue destroying our planet home—then, continue to do nothing.

However, if these videos make you sick to your stomach, how about putting your anger, frustration and distress to work like those two surfer boys? How about taking action in your own community or state to create a 25-cent deposit recycling law for all plastic containers? Or, how about speaking to your two U.S. senators to create a federal 25 cent deposit-return law for the United States?

If you're too busy for those actions, how about donating \$20.00 or \$100.00 to buy bracelets from www.40cean.com . They will pick up one pound of junk out of our oceans with that donation. They will pick it up in 27 different countries with people who WILL take action because you bought bags, equipment and machinery to do the job.

Pass this commentary around to your friends. They may become outraged enough to donate \$1,000.00, \$50,000.00 or more. We MUST change our deliberate destruction of our planet.

The worst choice you can make: feel that you can do so little that you do nothing at all. You will never miss the \$20.00; and you can do so much good to bring about positive change on your planet's oceans for yourself and your kids.

I bought my bracelet with a seabird theme. You can donate for sea turtles, whales, sharks and more with color themes that fit your style. Once you join, share this with your friends. Let's create a national movement to make our world a thriving place for all life.

Contact them and buy that bracelet: www.4ocean.com

Vaya con Dios!

We Must Stop The Anchor Baby Invasion Of America

According to the Pew Research Center, in 2008, 350,000 pregnant woman jumped America's borders or rode in on a visa to birth their "anchor babies" on U.S. soil. That practice continues for the past 30 years by hundreds of thousands and now millions of pregnant women who birth their "jack pot" child in the loving arms of American taxpayers. (www.PewResearchCenter.org , Birthright Citizenship)

Last year, 2017, according to the report, 270,000 women birthed their anchor baby on U.S. soil.

The practice costs American taxpayers trillions of dollars over the last three decades. Each child enjoys pre-natal, birth in hospitals and post-natal assistance along with K – 12 education, food stamps, Section 8 Housing, free breakfast and lunches, living expenses and more on the U.S. taxpayer's back. Years later, the child may chain-migrate his or her entire family into America, and they do by the millions.

In other words, America stands as the "charity ward" for the rest of the world. You may look up on line for websites that encourage anchor babies from China, India, Mexico, Korea, Brazil, Africa, and dozens of other countries.

Former Senate Majority leader Harry Reid used to rail against “any country that would reward lawbreakers with citizenship.”

Journalist Kimberly Dvoark said, ““Birth Tourism” has become a billion-dollar industry due to America’s lax immigration and citizenship laws. More than a half a million anchor babies are now born in the US each year, creating instant

citizen status for the foreign parents who have foreign loyalties and connections.”

U.S. baby births create big business, especially in China. On the website usbabydiy.com, you may access endless pages of advertisements for birth centers, many of them found in San Diego, New York and Miami. The ads offer room and board for several months, including, services for/after pregnancy and tout the best medical care money can buy.

“Your U.S. born baby will become a U.S. citizen,” said immigration attorney Mr. Sapochnick. “Having a baby here, there’s nothing illegal about it. It’s just people are making it into a profit industry.”

Sapochnick said, “Baby brokers can charge anywhere from \$20,000 to \$50,000 per family.”

What Costs Do American Taxpayers Bear?

If you average anchor baby births at 300,000 annually, you’re looking at 300,000 babies times \$8,000.00 average for a hospital birth. The math staggers the imagination. If the

child suffers congenital heart disease, cleft palate or other deformities, the costs rise into the hundreds of thousands of dollars.

Next, take that child through K -12 education at \$8,000.00 annually times 300,000 students. Later, you must pay for English as Second Language costs at \$2,000.00 per year per child. You also pay for that child's breakfasts and lunches for 18 years because its mother lacks any money to pay for that child or taxes. You're paying for its mother's housing, food stamps, electricity, heat and water.

To show you how corrupt our U.S. Congress proves itself, Georgia House of Representatives member Nathan Deal, 15 years ago, tried to pass a bill to stop the anchor baby practice. It still sits in committee. Another current member of the House, Steve King (R-IA), introduced a bill five years ago to stop the anchor baby practices. It sits in committee, untouched. For some reason, all 535 Congressional Critters failed you, the American taxpayer, for the past 30 years. Who allows it, what reason, and why does this financial suicide continue?

Five years ago, because Ireland faced being overrun and financially bankrupted by desperate pregnant immigrant women from Africa, they shut down "birthright citizenship." They became the last country in the Western world to stop it. Nonetheless, 38 other third world countries retain birthright citizenship, but they suffer such poverty and lack of medical care, that no one violates their borders to birth a baby.

What does the Anchor Baby Invasion Mean in the End?

Such callous disregard for legal American citizenship by our U.S. Congress allows foreigners of every stripe to usurp our borders and prey upon our educational, welfare and economic systems. A record 87 hospitals and ER wards bankrupted out of existence in southern California and Arizona, and more to come

in Texas, in the past 10 years.

We're looking at parallel societies springing up in Spanish speaking and Spanish dominated slums in southern California. We see unsolvable homelessness, drugs use and illiteracy. Those persons lack any identity to America or allegiance. You will see more Mexican flags flying in Mexican dominated cities in California than Old Glory.

We also see Mexican nationalism digging deep roots into our southern states. Essentially, they re-colonize our four border states, slowly and ever so effectively.

The costs spiral into the trillions of dollars. For a country standing eye-ball deep in \$21 trillion of debt, such billions and into the trillions of dollars of costs to U.S. taxpayers for anchor babies means endless loss of American citizen financial viability.

It also constitutes a denigration of citizenship because it begins with violating the laws of our sovereign nation. It abuses legal immigration by sidestepping the rule of law. It creates move poverty in those immigrant ghettos where schools cannot function. Once that poverty manifests along with commensurate illiteracy rates, you see gangs, drugs, violence and more welfare births.

Whether President Trump stops the anchor baby invasion by executive order or Congress stops it by voting to amend the 14th Amendment, we need to stop the Anchor Baby invasion of America.

Caravan Filled With Terrorists, MS 13, Drug Smugglers, And Welfare Seekers

Article IV, Section 4 of the United States Constitution:

“The United States shall guarantee to every State in this Union, a Republican Form of Government, and shall protect each of them against invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot convene) against domestic violence.”

And:

A person (including a group of persons, business, organization or local government) commits a federal felony when she or he: assists an illegal alien, she/he should reasonably know is illegally within the United States or who lack employment authorization, by transporting, shelter, or assisting him or her to obtain employment, or encourages that illegal alien to remain in the United States by referring him or her to an employer or by acting as employer or agent for an employer in any way, or knowingly assists illegal aliens due to personal convictions.” Federal Law—Section 8 USC 1324 (a) (1) (A) (iv) (b) (iii)

In other words, in excess of 22 million illegal aliens remain in the United States in violation of our laws. And, another 7,000 to 12,000 approach our southern border with the explicit intention to breach our borders in the form of an invasion.

President Donald Trump, by authority of the Constitution, may send troops to California, Arizona, New Mexico and Texas to defend our borders against the impending attack. But he could face a Federal judge neutralizing his authority as president, and negate his orders.

Thus, any Federal judge can stop the president from his duties of office.

Judicial Watch said, "The caravan moving north toward our border is a serious threat to the sovereignty of the United States. It is a blatant challenge to the rule of law. For this reason, we sent our Director of Investigations and Research Chris Farrell and Judicial Watch Investigator Reporter Irene Garcia to Guatemala to uncover the truth about "caravan."

"The migrant caravan marching northbound through Central America is an "elaborately planned" movement that's benefiting human smugglers and bringing disturbing numbers of violent gang members and other criminal elements through Guatemala, according to government sources in the capital city."

The realities grow that, "MS-13 gang members have been detained and coyotes (human smugglers) are joining the march with clients who pay to get smuggled into the United States," a Guatemalan official told Judicial Watch. "People from Asian countries waiting to get smuggled into the U.S. through Central America are also integrating with poor Hondurans in the caravan, a high-level Guatemalan government source confirmed."

What the main stream media won't tell you continues: among

them are nationals of Bangladesh, a south Asian Islamic country that's well known as a recruiting ground for terrorist groups such as ISIS and Al-Qaeda Indian Subcontinent (AQIS). "There are lots of dirty businesses associated with this," Guatemalan authorities told Judicial Watch. "There's lots of human trafficking."

What makes this journalist angry stems from the fact that our last president, named Obama, encouraged such invasions by allowing 65,000 unaccompanied kids to cross the border. Then, another 40,000 found their way across. Obviously, huge organizations planned the former invasions and facilitated them.

Did Obama stop them? No! He broke our own laws by illegally granting DACA to illegal kids. Then, he shut down the U.S. Border Patrol to give them less ability to interdict those illegal migrants. And, he neutered ICE agents internally.

Worse, Congress stood by doing nothing: no passage of E-Verify in the past 20 years. No passage to stop Anchor Babies. No enforcement for employers of illegals. No enforcement for landlords to give illegals housing. No enforcement to stop transportation companies from moving them.

In other words, our own government violates our laws and facilitates this invasion. And, the American people continue watching it for the past 30 years while their country becomes infested with 22 million violators and millions of employers who hire them. Ironically, we pay for all of it with our tax dollars and our diminished jobs.

It's amazing we still maintain our own country. It will be even more amazing if we survive this continuous invasion by immigrants from all over the world, legal or illegal. My prediction: we're going to devolve into an overpopulated, chaotically cultural quagmire with no national identity or language. We face a racially divisive future not only of

blacks, whites and browns—but Muslim, Hindus and Sikhs. Our culture will degrade into more Pittsburg, PA killings and bombers like that nut in a white van.

We shall degrade into an incendiary country much like you see in Yemen, Pakistan, Syria and Bangladesh.

We lose the core of our national culture, identity and language. Guess what? It's already happened and we're in for one hell of a nasty ride. At this point, I don't see us saving our country.

Most Destructive Force In 21st Century America: Endless Legal Immigration

"Diversity within a nation destroys unity and leads to civil wars," said social scientist Garret Hardin. "Immigration, a benefit during the youth of a nation, can act as a disease in its mature state. Too much internal diversity in large nations has led to violence and disintegration. We are now in the process of destabilizing America. The magic words of destabilizers are 'diversity' and 'multiculturalism'."

Since the egregiously senseless 1965 Immigration Reform Act that opened our floodgates to enormous immigration numbers, our U.S. Congress flooded America with an added 140 million people within 40 years. If left to continue, another 140 million people expect to make America home within 30 years.

When Congress passed the Act in 1965, only 3.5 billion people inhabited the planet. Unfortunately, third world countries did not understand Earth Day and birth control, thus, they added 4.1 billion to reach 7.6 billion people globally. And because of their wretched lives in their own countries, they all want to immigrate to America. Your children face this demographic future:

Ten minute "[Immigration off the Charts](#)".

In 2018 and beyond, legal immigration proves itself the most destructive force in American history. Nothing in our history will prove as destructive as immigration. An endless line of legal and illegal immigrants overwhelms America's borders. Their desperate numbers grow by 80,000,000 (million) new babies, net gain, worldwide annually. Third world countries explode their birth rates beyond carrying capacity for their citizens. The results play out in lack of food, water and resources. Latest reports show 4,000,000 children die annually of starvation and 8,000,000 adults. (Source: United Nation report on worldwide starvation rates.)

That total number of displaced refugees, the biggest single-year increase in the history of the Office of the UN High Commissioner for Refugees ([UNHCR](#)), equates to 44,500 a day and brings the total number worldwide to 68.5 million refugees looking to migrate.

Within 20 years, that 68.5 million refugees expect to explode to over 100,000,000 (million) refugees worldwide. Why? Third world countries add 1 billion more humans every 12 years. In this five-minute video, it brings you a greater understanding of America's immigration predicament.

In a five minute astoundingly simple yet brilliant video, "[Immigration, Poverty, and Gum Balls](#)", Roy Beck, director of www.numbersusa.ORG, graphically illustrates the impact of overpopulation. Take five minutes to see for yourself.

While most of our 535 Congressional Critters continue to leave our doors wide open, they lack any understanding of the long-term consequences. My lifelong friend, the late Dr. Albert Bartlett, University of Colorado physics professor and population expert said, "Humanity does not understand the deadly consequences of exponential growth."

Essentially, he said that anyone who promotes endless growth and endless immigration equates to being an "innumerate" or mathematically illiterate. In other words, you can only cram a limited number of people onto a plane, dance floor, pool or movie theater. Once you overload that plane, it cannot fly or if it gets off the ground, it crashes.

Therefore, to continue importing 1.2 million legal immigrants into America annually, and another 500,000 illegally each year, our civilization faces collapses at some point in the future. It's a mathematical reality.

And yet, President Trump doesn't understand it. All 535 Congressional Critters don't understand it. All the top big wigs in banking, commerce, radio, TV and newspapers don't understand exponential growth.

Nonetheless, all of them or their kids will, at some point in the next 30 years, face harsh consequences as to water shortages, energy exhaustion and resource exhaustion. Not to mention our environment and quality of life degrading beyond repair.

What confounds this journalist: why doesn't anyone with a three-digit IQ see what's coming?

We've got seven states facing water shortages in 2018. We've got horrific gridlock in our cities. We've got air pollution clouding our cities' air and dropping acid rain on our soils. We've got prices skyrocketing on goods and services. We've got species extinction rates accelerating. We've got ghettos and crime exploding because no one can address the basic

causes of poverty: just like in third world countries. We've got racial conflict growing instead of diminishing.

The greater our numbers, the greater our consequences.

And then, when you understand Garret Hardin's warnings on multiculturalism and diversity, your heart must sink at what the future holds for your kids.

This country expects to add 100 million more immigrants from 195 different countries within 30 years. That equates to 100 million people with 195 different world views, religions, cultures and languages.

Why doesn't anyone see the consequences? You can see Europe's destruction with Islamic immigrants. You can see their cultures being destroyed. You can see their cities turned into chaos. You can see Sharia Law advancing on every country in Europe and Canada.

It's advancing into America at breakneck speed. We now feature an average of 25 honor killings of Moslem women annually in the USA and 500,000 female genital mutilation cases. We've got arranged marriages and gays in Detroit or Minneapolis must flee for their lives. (Source: Honor killings and FGM, Feb 2, 2018, White House Press room, DHS ass't DA, Ed O'Callihan report)

"Islam isn't in America to be equal to any faith, but to become dominant. The Qur'an should be the highest authority in America, and Islam the only accepted religion on Earth." Omar Ahmed, director of Council on American Islamic Relations.

And much like Europe and Canada, we, the American people along with our leaders, sit back and watch it happen to their country without even a whimper. We let Congress continue the immigration invasion without pause.

What are your kids going to do with another 140,000,000

(million) people added to this country in 30 years? At this rate of speed, legal and illegal immigration will destroy the United States of America from within by 2050.

Let's Examine White Privilege, Black Privilege And Brown Privilege

If you check the video replay of Dr. Phil's hour on Friday, October 19, 2018, titled: "White Privilege", you learned that every white person in America enjoys "white privilege" whether they express prejudice, bias, racism, or not. Every white person in America stands "guilty" of being unfair to other races because of a European-American's skin color.

That means black and brown people suffer prejudice in the market place, jobs, sports, social gatherings, elected office, doctors, nurses and virtually every aspect of American society.

Dr. Phil inferred that whites override blacks and browns because whites' numbers dominate American society. Thus, all blacks' and browns' problems stem from white prejudice, white bias and white racism.

Dr. Phil made every white person in the studio and across America guilty by the white color of their skin.

For a moment, let's examine "white privilege" to see what

exactly causes it or who decides it's valid and who suffers from it.

First of all, the United States Constitution guarantees every person born and immigrated into the USA, full rights of liberty, travel, speech, religious choice, dress, location for living, 12 years of schooling, and for the grand majority who earn their educations, a viable job in the work place. No other country on Earth gives its citizens such latitude, opportunity and choices than the United States of America: no matter what color your skin, race or religion.

For that reason, tens of millions, even hundreds of millions of people around the planet wish, hope and dream of migrating to America.

You will not find anyone giving up everything to move to Africa, Iraq, Afghanistan, Saudi Arabia, Kirgizstan, Pakistan, Bangladesh, India, China, Mexico and other third world countries.

Therefore, what makes every white person guilty of being white? How can you make the people of a single country guilty

of so much prejudice, bias and racism—when everyone in the world wants to migrate to that country?

Fact: if you do not follow Islamic Law in a Middle Eastern country, you face beheading, beheading, death, and forever never a part of that society. If you are not Muslim, you cannot obtain a job, a home or free rights in Islamic countries. If you are a woman, you become property of a man with no rights to speak, dress, choose a mate or anything having to do with personal freedom. If you follow a different religion, you face endless consequences both subtle and deadly.

Another fact: if you, as a white person, immigrated to Somalia, Sudan, Morocco, Ethiopia, Congo, Zimbabwe or most other black nations, you would find yourself totally racially segregated and isolated out of their tribes with no chance ever to become a part of their societies. At this point, the Black African Congress of South Africa attempts to kill all white people just for the fact they feature white skin. They want to purge four million whites off the face of the planet.

What about “black privilege” in America? Today, 85 percent of National Football League players dominate the game. The National Basketball League features 95 percent black players. You will not see any “quota” for white players in those leagues even with the fact that blacks totally dominate their ranks.

Today in America, black privilege enjoyed (s) trillions of dollars paid out since 1964 and the Great Society, to give every educational, welfare, food stamps, housing, college scholarships and medical care for black Americans. African-Americans enjoy the highest standards of living 100 times greater than their brothers and sisters in Africa. Blacks enjoy millionaire status on TV, radio, sports and movies.

Blacks enjoy black privilege in Black Entertainment Television

for blacks only, United Negro College Fund for blacks only, NBA, NFL, MLB, Miss Black America for blacks only, black scholarships in college, NAACP for blacks only, black lawyers' guilds for blacks only, Black Lives Matter, Black girls code, National Black Justice Organization, National Black Urban League, and dozens more.

However, if any of those exact same groups carried "white" in the title, such as "Miss White America" or "White Entertainment Television", the entire world would come down on such an organization with the biggest word in the country: RACISM and RACIST.

While most people of color can't wait to migrate into America, you will not see any white people moving to Africa, India or China trying their luck with anything whatsoever in those countries of color.

What about "brown privilege" in America? For over 240 years, English enjoyed being the national language in America. Today, Mexicans-Latinos-Hispanics speak more Spanish and demand its use on products and in food stores. Instead of melding into American society, brown privilege dominates construction crews, roofing crews, landscape, painting and fast food stores—ironically, 22 million of them illegally in this country. Every business caters to the Spanish language because of brown privilege. Every Mexican construction crew in California will not and does not respect or hire white people.

What about the up and coming "Muslim privilege" growing by enormous numbers in Minneapolis, Detroit, Los Angeles, Miami and other Moslem dominated immigrant areas. Do you think a white person enjoys any privilege in those areas where Moslems do not tolerate white skin, and certainly not a Christian?

So, are brown people guilty of their privilege? Are black people guilty? Are Muslim people guilty of bias, prejudice

and racism against anyone who refuses to become a Moslem? Their prime directive from the Quran states: "Convert or kill all non-believers."

What is racism? Answer: it's biological. It resides in the DNA of every race. If black people dominate in a country, you see black privilege. If brown people dominate in a country, you see brown privilege. If Moslems dominate in a country, you see Moslem privilege.

Notice that Sweden faces total destruction of its language, culture and way of life because it immigrated so many Moslems from Africa, that it faces becoming a minority in its own country and eventually, extinguished. Most European countries face the same fate with endless immigration from Africa and the Middle East.

Can it be solved? After 240 years in America and around the world, the race question rages as violently and angrily as ever in 2018. Any solutions? Yes, but difficult to engage. Each race could separate into its own enclave and region to end racism. People prove much happier when they live, work and play with their own race and language.

Multiculturalism and diversity do not work, cannot work and have proven not to work over the centuries.

What can the USA do with its own multicultural chaos, violence and anger? My guess: people will keep moving into neighborhoods with their own race, language and culture. For those living in place like Chicago, New York City, Miami, Detroit, Los Angeles, San Francisco and other racial cauldrons—continued violence, angst and social breakdown.

Worse, we remain on course to add another 100,000,000 (million) immigrants within 30 years. It should be a full boil by then with no solutions other than violence on a larger scale that cannot be contained.

Let's Open America's Borders To Everyone In The World

A friend of mine, Gary Gobel got into a conversation with an open borders lady.

She said, "There should be open borders!"

"Oh," I said, "Why's that?"

"People should be free to go as they please and come to this country as they please."

"Really," I said. "Well tell me...why do so many Mexicans want to come to the United States?"

She said, "For a better economic future and a better place to live."

I said, "You mean it's better here than Mexico."

She said, "Duh, of course it is."

"OK," I said. "Now tell me...why is that?"

She was a little surprised for a second then she said, "Well, they have a bad economy, no jobs, violence.....it's full of slums."

"Why is that?"

She said, "I don't know."

I said, "When you do, come and talk to me about open borders."

America's Borderless Borders Open to the World Already

With 240 Sanctuary Cities, scattered across our 50 states, that protect and house in excess of 22 million illegal alien border jumpers, why not open our borders to every country and person in the world?

Let's face it; those city councils and their mayors violate Federal Laws created to protect American citizens from foreign invaders, but since those council members vote to protect illegal alien invaders—why not make it a national policy to allow everyone to come to America?

Major city mayors like Chicago's Emanuel, New York's Di Blasio, Denver's Hancock, Boston's, Los Angeles', San Francisco and hundreds more violate our Federal laws with impunity. Nobody gives a damn about citizenship or our citizens anymore.

Why not give up our country to mass immigration? We could save all the miserable, starving and helpless humans around the planet from their horrible conditions. Maybe it's our destiny.

At least 100,000,000 (million) Africans would move here in a week. Let's save all of them. Another 300,000,000 (million) Indians would flee Calcutta and Mumbai tomorrow to move to America. Heck, at least 300,000,000 (million) Chinese would jump at the chance to move to America. Heck, look at Vancouver, BC Canada, now called Hongcouver.

Since 15,000,000 (million) Mexicans already jumped our borders, let's invite another 15, 20 or 30 million of them to live here. What could it hurt? "Donda esta el banyo?"

We already feature 14 million people signed up for the giveaway 'Diversity Visas' annually, known as the "Golden

Ticket" for their free ride and free life in America. Let's give them all a free pass into "Land of Milk and Honey."

Bangladesh, a country less landmass than the size of Iowa, houses 161 million people. Did you get that? They burst at their seams with 161 million miserable, crowded and starving people living in squalor. Let's take 100 million of their poorest so we can feel better about ourselves.

Let's take at least 10 million living in misery in Central America. How about another 20 million in Brazil, Venezuela, Columbia and Bolivia?

I've personally seen all those people in all those countries in all their misery. Yes, if given a chance they would jump at the opportunity to come to America.

If we opened our borders to those hundreds of millions, we could easily reach 1,000,000,000 (billion) people living in America within 10 years. It would create a booming economy. Imagine the benefits! Imagine the enhancement of our quality of life and standard of living. Imagine the boon to our cities and free flowing expressways whisking us off to the beach or the opera or skiing.

New York would easily double from 8.3 million to 20 million in a few years. Los Angeles could reach 30 million, easily. Denver would jump to 10 million. Chicago, well, another 10 million vying for a parking spot on their Interstates!

Should I go on? Of course, why not?

For certain, as a country of 1 billion, America could match India and China in their powerful dynamics of demographic success. Our rivers would run clear and clean. Our air! So pure! Our water! So plentiful! Our arable land for our abundant crops! So much of it!

Why don't we make it official? Let's open America's borders

to every human being on this planet that deserves a better life. How do you think it's going to turn out? Thanks to our 535 Congressional critters, we're already an open border country.

Turning America Into Everybody Else's Country: Cultural Suicide

At this moment, 44,500,000 (million) foreign-born, legal immigrants call America home. Within 30 years, with current legal immigration rates, another 100,000,000 (million) immigrants from all over the world expect to migrate to America. Their numbers expect to drive America's population from 300,000,000 (million) in 2006, to a mind-numbing 439,000,000 (million) people by 2050. Those immigrants arrive from over 100 failed countries around the world.

Anybody see anything problem with Americans being displaced from their own country both ethnically, linguistically and culturally?

In the past month, Congress carved up a Supreme Court justice's life like a butcher might carve up a beef carcass. U.S. Senators Diane Feinstein, Dick Durbin, Charles Schumer, Cory Booker and others lacerated Brett Kavanaugh's impeccable life of integrity with cruelty of Jack the Ripper. They trashed him on speculation. They demeaned him via

accusation. They quartered him without “due process.”

At the same time, 535 members of Congress don't mind hacking up America' culture, tearing the underpinnings of America's English language and ripping its ethos into millions of shards of foreign human imports.

Not a word from any of our leaders! Not a word from American citizens! Not a peep from top media people watching the invasion of America by millions of foreigners!

At the current rates of Mexican-Latino-Hispanic immigration into the United States and their extraordinary birth rates, Mexicans will become the new 51 percent majority ethnic group in America by 2042 according to www.PewResearchCenter.org.

While Brett Kavanaugh, along with his wife and kids, watched his life torn to shreds by an accusation, Congress failed to lift a finger to stop 22 to 25 million illegal alien border jumpers racing across our borders for the past 30 years.

No matter how many laws they break, no matter how many rapes they committed, no matter how many acts of burglary, shoplifting, killing, drunk driving deaths and forged identifications—illegal aliens in America get a pass, go free and enjoy immunity from prosecution. Additionally, their employers, landlords and bus drivers never see prosecution or jail time.

In fact, the Mayor of Minneapolis, MN promotes illegal aliens:

Minneapolis Mayor Jacob Frey announced last week that mandatory placards detailing immigrants' rights will be displayed in police squad cars, and now some officers are pushing back.

The signs will be in both English and Spanish, and will be displayed in all of the city's squad cars.

"Right now, cities have to step up and do what our federal administration and Congress won't," Frey said at a press conference Wednesday. "We will not let this lack of compassion at the highest levels of our government prevent us from doing what is right for our immigrant communities here in Minneapolis."

"They will make it clear that you don't have to answer questions about where you were born, your immigration status, whether you are a citizen and that you have the right to remain silent," he explained.

In other words, Frey breaks federal laws. If you promote illegality and crime, you receive more of it. When you harbor criminals, you produce more of them. Given enough time, you too, become a failed state.

As the current 22 million illegal alien migrants call America home, our Congressional critters don't mind U.S. taxpayers forking over \$296,000,000,000.00 (billion) to feed, school, house and support them across 12 other federal agencies, i.e., births, prenatal, post-natal, special care, food stamps, ESL, cost of jailed illegals from crimes, etc. (Source: www.numbersusa.org)

Within 24 years by 2042, European-Americans and African-Americans expect to become major minorities in their own country. Has anyone seen the likes of a complete devolvment of one country's culture, language and ethnic makeup

degenerated into hundreds of competing cultures?

How can so successful a country be disenfranchised into everybody else's country? All within less than 70 years? Are you, as an American ready for this future? What actions do you plan to take to stop it or do you approve it—so you just let it continue?

Has any country in history survived such a peaceful invasion-takeover?

Ask Sweden, Norway, France, Finland, United Kingdom, Denmark, Germany, Italy and Spain.

Call your senators and House rep: 1 202 224 3121 or 1 888 995 2086. Demand a stop to all immigration and stop to any Syrian immigration.

Definition of

slogan: "Immigration Shutdown

Now means the American people

want a total shutdown on all

legal and illegal immigration.

That means we want all illegal

immigration stopped by

arresting, prosecuting and

jailing employers of illegal

aliens. We deport all illegal

aliens by taking their jobs

away and as we catch them. We

want English mandated as our

national language. We demand a

cessation of Muslim immigration

in order to protect our culture,

language and way of life. We

can't save the world but we can

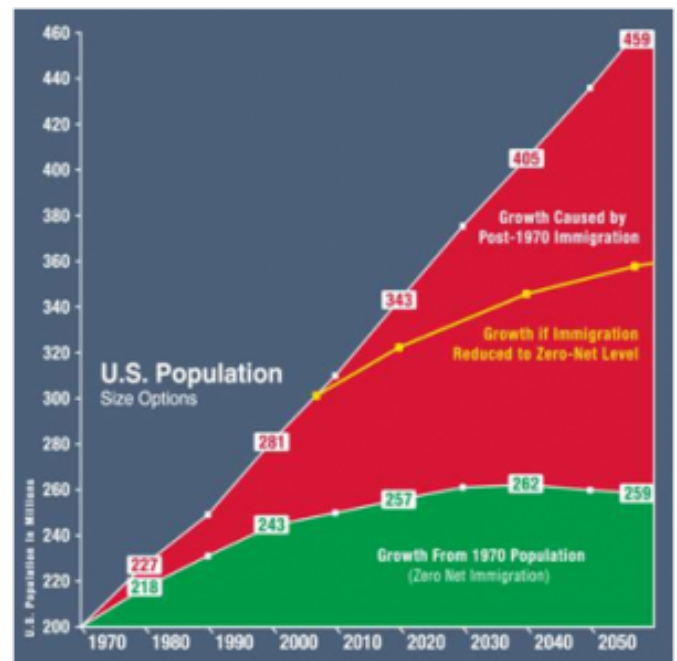

save or destroy our civilization.

We demand a stable population

that allows everyone to live,

work and thrive into the 21st

century. Especially our children." FHW

(Permission to republish this population graph by Roy Beck, www.NumbersUSA.org)

Muslims cannot in any way become Americans. The Koran forbids it. Their entire context of religious-political Sharia Law demands subjugation to their religion with no allegiance to the U.S. Constitution. The Koran forbids women's rights, marital choice, free speech, gay rights and religious rights. Our way of life remains completely out of bounds to Islam. This 15-minute video explains our plight:

UK IS WARNING USA!

Stan The Nomadic Road Warrior: A Traveler Through The Ages

“The trick is to die young as late as possible.” –Ashley Montagu

Through the years, I’ve hooked up with several remarkable pedal partners during my travels around the world. John Brown, a teacher from Kiama, invited me into his house late one afternoon while I pedaled down the Princess Highway south of Sidney, Australia. We became instant friends. A year later, we met in San Francisco for a coast-to-coast bicycle adventure across America. John possessed many preconceived

notions about life in the USA. But he never expected to meet a man named 'Stan'.

A month into our tour, heading east on Route 64, John and I had coasted six miles off the plateau leading out of the Grand Canyon National Park. We stopped at the Mobile gas station where 64 intersects Route 89. Our water supply ran low from camping in the desert the night before, so we filled our bottles from the station spigot. I pumped air into my tires when John said, "Hey, mate, I'm ready to ride." A few seconds later, I replaced the air hose when nature called.

"Gotta' hit the bathroom," I said, as I hopped off and leaned my bike against the station wall.

When I returned, John showed a puzzled look on his face. He twisted around with one leg swung over the top tube and gazed northward at the road. He clicked his brake handles by pressing them and releasing in rapid succession.

"What are you looking at?" I asked.

"Don't know," he said. "I barely got a glimpse of a guy riding by on a mountain bike, at least, I think it was a mountain

bike. I don't know because he had passed me when I looked up from my map. It was the strangest bike setup I've ever seen."

"Let's catch up to him and find out," I said.

We headed north on Route 89 into a blustery wind. The highway swooped down a long incline into a valley. Multicolored buttes and mesas slipped by us with sand devils swirling through the sagebrush alongside the road. Minutes later, we spotted orange flags flapping from the back of what looked like a small wagon moving slowly in the breakdown lane.

Up closer, it was a bicycle loaded like a gypsy wagon. Two dark blue mountain backpacks hung vertically stacked (in place of panniers) over the back wheel like saddlebags on a horse. A tent, sleeping bag and mattress filled the middle section over the rack. A wooden stick crossed in back where two orange flags hung out on the traffic side. In the middle, like the back bumper on an old Cadillac, a spare tire hung from the stick.

Pulling alongside the rider, I saw two blue front panniers under a plastic beige milk crate, which was braced to the old-style flared Schwinn handlebars. Two one-gallon Clorox bottles hung from the handlebars, on both sides of the gooseneck. A second set of Clorox bottles hung from backpacks behind the rider's arms. Sitting up in the milk crate and with its head poked out of a six inch round hole in the cardboard cover, was a black cat, looking like he was the navigator of this two wheeled road-ship.

I slowed to eight miles per hour—to match the speed of this wrinkled old man spinning a low gear. He wore blue work pants, high top leather work-boots, a red nylon windbreaker, leather gloves and an orange stocking cap. His weathered face and thin, wiry frame cast a long shadow under the morning sun.

John and I introduced ourselves to the fifty-nine year old man who called himself Stan. I asked him what kind of gear cluster he was cranking. He said it was a 22 front chain ring "granny" to a 34-toothed rear end low gear. That explained

why he was going slowly and cranking fast. He acted reserved, but as the miles unfolded, so did his astonishing story.

"Thirteen years ago, my life lacked purpose, so I pressed the eject button on the plastic world. I sold my computer company—bid farewell to what was left of my family and took off on my bicycle. I've worn out three others until I came across this mountain bike. I'll wear it out too, but so far, it's the best of the lot. I've customized it over the years so it's able to carry the 200 pounds of gear I pack on it."

"200 pounds!" I gasped.

"That's right," Stan said. "This is my home. I never thought I would be on the road so long but I know I will never go home. I live on my investments. My wife died of cancer and my kids don't give a damn about anything. If I had stayed in my job or tried to keep caring about things they didn't care about, I'd have gone nuts. Instead, I decided to be happy."

Our group rolled further into the desert as John and I probed Stan for more of his background. Thirteen years on the road from Alaska, the Yukon Territory, through the USA, Mexico, Central America and deep into South America. Never the same road twice. With that many years on the road, he possessed the stuff of legends. While he shared some of his experiences, the cat issued a "Meow." Stan smiled.

"This is my best friend, 'Little Chum'. Life throws me its disappointments, but Little Chum never lets me down. He's great company and never complains. He's cycled with me from Canada to Argentina with never an argument. He sleeps during the day and prowls around my campsite at night. We communicate unlike any two creatures. Little Chum knows my mind."

"Don't you ever get homesick for friends?" I asked.

"No point in returning. Life is today. Anything else doesn't

mean shit. I don't look back, nor do I have any false aspirations. I rarely think of home. They are busy with their lives. It's no longer my problem. My philosophy deals with this instant. Stan's Law states that wherever you are right now, bets are you're better off than you will be this time tomorrow."

"What about expectations?" John asked.

"No disappointments with my law," Stan replied. "You won't see me straining my neck around the next bend in the road or even talking about next week. I keep a diary, but when it's full, I throw it in the fire."

"What!" I gasped, nearly wavering into his packs.

"What's in the past is done. Besides, can you imagine carrying around 13 years of diaries? I'm already too heavy. No! I never ride the same road twice and I don't think about yesterday. I don't even care about yesterday."

Stan sat erect in the saddle. His smooth cadence complimented the millions of pedal strokes his legs had pounded out over the years. Deep lines in his face showed a comfortable acceptance of life—as he knew it. Stan proved himself a road warrior.

"Twenty-five miles is my daily target," he continued. "If I don't make it, so what? On the flats, I average 8 to 10 miles an hour. I figure I do a million foot pounds of work a year. But I'm in no hurry. Isn't that right, Little Chum?"

A faint meow came from inside the crate as Stan's legs spun their way through time. I thought about my load of 70 pounds and my own travels that paled in contrast to Stan's. What single event sent that intriguing human being toward his extraordinary destiny? My amazement increased as Stan revealed a few episodes from his bicycle sojourn.

"Hell, I've got enough roads to keep me busy 'til I die. I never think about how far I've gone or how far I'll go. I stay in the Americas because there are sufficient experiences here."

"Any funny ones?" I asked.

"Hundreds," he said. "The one I cherish the most happened a few years back in the Yucatan of Mexico. I was camped out one night in a stand of scrub trees. As usual, I put Little Chum out for his nightly prowl. I put my dentures in my coffee cup outside the tent. I got tired of knocking them over at night and getting water on the floor. Next morning, my teeth were missing, so I called to Little Chum. He sniffed the cup and followed his nose to a burrow about 20 feet away from camp and started digging. I helped him pull out sticks, fur balls and rodent skeletons before I got a foot into a pack rat's den. Wouldn't you know it, there were my teeth, smiling up at me. I rinsed 'em off and popped 'em back in my mouth. I tell you breakfast wouldn't have been the same that day without my teeth."

We laughed before John said, "Any dangerous times?"

"My worst experience was in the Peruvian Andes when soldiers slashed through my tent with their bayonets cutting my shoulder at the same time. They hauled me away to jail. They interrogated me just like you see in the movies. Bastards anyway! I wrote letters to the U.S. Embassy until I got some attention. My educational background and innocence got through to them. A sergeant befriended me and even discussed Mark Twain while my tent was being repaired. Two weeks later, I was released on a weekend, but since I didn't have any money until the banks opened on Monday, they let me stay in prison two more days. I can tell you that Americans don't have any idea of how lucky they are living in a free country. The kids growing up today take too much for granted.

"Another time I camped out in a bad spot, but it was my fault. I was tired and didn't think about where I set the tent down. It was in a dry wash. That night, a desert rainstorm drenched the area. I woke up to water seeping into my tent. I kept picking the floor up until a flood of water was pulling at every corner of my tent. I looked out the flaps to see Little Chum standing on high ground with each lightning flash. I was in the middle of a flood. I leaped out of the tent as a wave of water swept it downstream. For the next couple of hours, I sat in the rain, talking to myself on how stupid I was to set up the tent in such a bad place. Little Chum was soaked to the bone and shivering. In the morning, I tracked downstream and found my tent snagged on a stump. I was lucky to recover everything."

John and I kept trading places in order to query Stan. He proved a remarkable character. I felt like a polliwog and he was the big daddy, the one who had gone before, who knew the ways of the world. His philosophy intrigued me even though I couldn't begin to live like that. I carried great expectations for each new day on a bicycle adventure.

But that provided the key to his unusual life path. "You ever see anyone happy most of the time?" Stan asked. "That's the one thing about living and being human. Life's a miracle on this single green planet somewhere out in the black void of space. It gives a beginning and a lifetime later—it ends. When it's over, man, it's over! What we do in the interim is our choice. We're given certain abilities and intelligence, but for those of us born in a free country—we can decide our life choices. We can change our decisions at any time. If we don't move on choices, those choices vanish and we are left with what Thoreau said, "The masses of men live lives of quiet desperation."

"You got that right," I said.

"It may be true, but it is not necessary," Stan said.

"I am a professional cloud watcher," Stan said. "Clouds are not in a hurry. They change so slowly that most people never notice, never look up. But each of us CAN look."

"You ever hear what the Swiss psychologist Paul Tournier said," Stan asked.

"Haven't read him," John said.

"Most people spend their entire lives indefinitely preparing to live," Stan said. "They put off joy until their circumstances improve. They work and save for their retirement. Is someone to blame? No. None of us can change our family or growing up circumstances, but we can choose to change our attitudes and our actions."

Ahead of us in the afternoon a crossroads appeared. Stan pedaled through it without looking back as we turned east.

"Take care guys," he said.

"Where you headed next?" John yelled after him.

"I'm headed for grizzly country in Alaska," he yelled back. "I'm in need of a little excitement."

We watched his orange flags vanish over the hill. John and I continued our transcontinental trek with new ideas about life. The one thing that dismayed us most was Stan's disregard for the diaries he had thrown into the fire. But that was Stan. If it weren't for the way he lived, we would never have known about his teeth smiling up from the bottom of a pack rat's hideout.

What's more, he's out there tonight under the stars, filling his days with living. Stan doesn't complain, nor does he live in desperation. The wind caresses his cheeks and shoulders. Its stormy fingers play in his hair, and the rain cleanses his spirit. The stars, moon and sun have shared sweet secrets with him in the morning dew. He makes love with

nature on his bicycle. Stan celebrates the moment.

For John and me, it provided one hell of a moment with one of the most remarkable bicyclists we had ever met—Stan the nomadic road warrior.

Corruption Of Our Leaders—Can We Solve What’s Happening To America?

Part 2: Asks questions about our leaders’ endemic corruption, lack of action and just plain not serving the American people.

As you look across the American landscape, you see an array of zany people screaming in the streets about things they don’t like. When President Trump took office, Madonna threatened to blow up the White House. Actress Ashley Judd warned that more “nasty women” would disrupt the halls of Congress. Women openly wept and screamed at the top of their lungs, “He’s not my president!”

Actors Robert De Niro and Rosie O’Donnell openly called for impeachment of the president before he spent a day in the White House. Women marched by the hundreds of thousands against a legally elected president of the United States.

In fact, Dr. Christine Ford, who accused Supreme Court Justice Brett Kavanaugh of rape just days before his confirmation, walked down the streets of Washington DC with a sign that

read, "Not my president!"

Within the past two weeks, she accused Supreme Court Justice Brett Kavanaugh of attempted rape 36 years ago. No proof, no collaboration, but she galvanized America into loss of "due process of law" that a person must be "guilty by accusation" rather than innocent until proven guilty.

While we face horrific challenges in this country, most people give a pass to the members of our U.S. Congress for their extraordinary lack of serving the American people. Additionally, governors, mayors and city councils across America fail their constituents 24/7 on endless issues that need solving.

While Mayor Rahm Emanuel of Chicago defends, supports and enables hundreds of thousands of illegal aliens in that

sanctuary city, he watches legal African-American citizens fall prey to mass murders, horrible schools, lack of housing, lack of jobs, and failing health care systems. Chicago surpassed Detroit as America's murder capitol.

Same goes for the last mayor of San Francisco who warned

illegal aliens when ICE raids would occur. Additionally, that same mayor, a woman, would not stop sanctuary city status after Kate Steinle suffered a brutal murder by an illegal alien who had been deported five times. Then, a jury found him not guilty! He walked free!

California's Governor Jerry Brown offers sanctuary to over 4,000,000 (million) illegal aliens that work in underground economies, send their kids to our schools, take free medical care and enjoy food stamps on the taxpayers' backs.

At the same time, mayors and city councils of 240 cities offer sanctuary for millions of people who violated our borders and live in the USA in violation of our laws. They cheat, lie and steal from our system. They undermine our schools and our kids' educations. They send cash transfers of \$120 billion annually back to their home countries. Yet, they cost U.S. taxpayers in excess of \$296,000,000,000.00 (billion) annually across 15 different federal agencies. (Source: "Costs of Illegal Aliens" www.NumbersUSA.org)

Did you notice that the main stream media tells us that only 11 million illegal aliens inhabit America? Guess what, latest reports show 22 to 25 million illegal aliens run around our country in violation of our laws. They undermine our rule of law, our borders, our language, our culture and our way of life. What does our U.S. Congress and leaders do? They aid, assist, support and abet all 22 million illegal aliens against the wishes of the American people.

Schumer, Pelosi, Hudson, Waters, Bennet, Gardner, Graham, Hickenlooper, Emanuel, Flake, Hatch, De Blasio, Snider, Hancock and hundreds more make America safe for illegal aliens.

All the while, we taxpayers face \$21 trillion in federal debt.

While we paid for \$7 trillion in the Afghanistan-Iraq wars, our water mains break at 23,000 annually in cities across

America. We desperately need a total reconstruction of our cities infrastructure, but we can't afford it.

Those same Congressional critters gave us a \$1.5 trillion trade deficit to China. We're a debtor nation.

Our infrastructure crumbles like dried sawdust as to bridges, roadways and buildings across America, yet our leader wage ridiculous and endless across the world 24/7.

Most Americans don't realize that they pay for 700 military bases in 80 countries around the world with 450,000 military personnel pretty much twiddling their thumbs. Why? Can you think of an answer?

And why pray-tell, do we pay for 48,000,000 (million) people siphoning our taxes for food stamps, year after year, decade after decade? Why don't we enforce workfare for welfare? Doesn't it seem logical, rational and prudent to train people to become productive citizens rather than watch TV all day while eating pizza—on your dollars?

While schools in Chicago, New York City, Atlanta, Miami, Los Angeles must teach somewhere between 1 and 2 million illegal alien kids with our money, our kids must contend with hundreds of different languages being imported into America every year. In my city of Denver, Colorado, our teachers must teach to 173 different languages. How do you do that and not harm our kids' educations?

While each of us toils on the job, 350,000 pregnant women jump our borders annually and birth their "anchor baby" to lock them into the American Dream of free food, housing, medical and schooling for the next 18 years of their child's dependency on the American taxpayer.

Guess what, your two senators, and House member won't stop it, change it or improve it. They won't pass a bill or take action. That's why this nightmare continues.

Are the leaders of America corrupt or what? Are we crazy for re-electing them year after year, or what?

E-Mail Frosty: frostyw@juno.com

My Father Said That If You Tell A Lie, You Must Keep Lying To Cover Your Lie

He then said, "You get caught in your own lie for the rest of your life."

When I was a kid, I lied to my father once about going to a Cub Scout meeting. He dropped me off at the den meeting house. He brought me 30 minutes early. I sat around until I couldn't sit around anymore. So, I skipped down the street and made my way back home.

"How was Cub Scout's today?" my dad asked later that evening.

"Just great, dad," I said.

Later, at the Cub Scout Christmas Party, my den leader gave me the Christmas present that I had missed because I didn't make the party.

At that moment, my father looked at me, and I looked up to my father. He knew that I lied. I knew that I lied.

Back home, of course, I received some harsh discipline. I have never lied since that time.

My father said, "Son, if you tell a lie, you must cover it with another lie. You must keep covering the lie until you can't remember which lie you're trying to cover. It becomes a habit. You just got caught in your own lie. Do I have your word that this is the last lie you will ever tell in your life?"

"Yes, dad," I said.

"Good," he said. "Because when you tell the truth, you never have to cover it. You never have to think about it. The truth runs straight and true until the end of time. You will be respected by friends and foes alike because you can stand on your honor, your respect for others and respect for yourself."

"Thank you, dad," I said.

That's how I learned to tell the truth. It's easier to live with and easier to proceed in life.

Right now, we have Dr. Ford and Judge Brett Kavanaugh locked in a deadly triangle with one telling the truth and the other lying. In the end, it's a "he said" and "she said" truth-lie orgy commencing in Washington DC. By the way, the 535

Congressional critters in Congress may be the biggest batch of liars in the United States. Their called "politicians."

Mark Twain said, "When the U.S. Congress is in session, no man's life, money or property are safe from those lying scoundrels."

He also said, "If you were an idiot, and if you were a congressman, oh, but I repeat myself."

Frankly, I learned in 1968 that presidents lie like demons and that Congressional representatives to the U.S. Senate and House lie worse than whores in a bordello. Over 58,000 kids died in Vietnam over such lies and another 4,000 died in Afghanistan and Iraq on lies. Those two wars continue based on lies.

Then, of course, the Senate Judiciary tries to press charges against Brett Kavanaugh as if he is guilty of accusations by a woman who recalled an event 36 years ago with two frisky teens, but no rape. Not when he became a district judge. Not when he became a federal judge. Not back in July. But days before his confirmation. Anyone see anything wrong with such allegations at such a point in time? And she presumes innocence while Kavanaugh suffers guilt by accusation. No proof, except accusation who lies so much she cannot tell a lie from the truth.

When The Facts Become Exposed

Washington DC proves itself a dirty, deadly, ego-driven, maniacal bunch of politicians who do very little to help Americans, but cause much death and harm to so many Americans, i.e., Korea, Vietnam, Desert Storm, Afghanistan and Iraq. They won't secure the borders now at 22 million illegal aliens invading our country. They won't stop the \$62 billion in drugs crossing from Mexico annually. They won't pass E-Verify to stop employers from reaping millions of dollars while we pay. They won't stop anchor babies, while we pay and they won't

stop wars while we pay.

But they are quick to condemn a man who has led an extraordinary life of excellence. But they believe Dr. Ford who can't keep a lie straight because she can't cover it.

She said, "I don't know where it happened at or even what year it happened. I don't know if I got there before everyone else or after. I don't know how I got there or how I got home over 8 miles away (at the age of 15).

"My life time friend doesn't remember any of this (and the other 3 people I said were there testified under oath they don't know anything about this).

"I have a fear of flying , but have no problem jet-setting all over the world while on vacation. I've been on airplanes more in the past two months than most people in a year, but my fear is completely legit.

"I don't know who paid for my hotel and polygraph test(the afternoon of my grandmothers funeral, or maybe it was the next day, who knows). And guess what? I flew there. And that polygraph, it was only two questions, neither of which were about Kavanagh. But I passed so that's all that matters. And my PhD in psychology definitely, in no way, helped me with it or my testimony today.

"My friends on the beach encouraged me to continue contacting the media with my story (because we were running out of time). I can't name them, so we'll just call them beach friends. Yet while giving such great advice, none were willing to be character witnesses. Meanwhile, Judge Kavanagh had hundreds of character witnesses step up in a matter of days.

My lawyers, out of the kindness of their hearts, are helping me for FREE yet I have a "needed" gofundme page that currently is sitting at \$473,622. I'm so desperately in need of help

there's even a second gofundme with \$209,987. I promise though I'm not getting anything out of my testimony, that money is just going to cover my expenses.

I was the only person in the United States that didn't know Congress agreed to come to me instead of me going to DC. They really do care about my flying phobia after all.

You cannot cover lies with more lies. In the end, you get caught in your lies. Get the picture yet, America?

America's Suicide Rates: An Accelerating Epidemic

Unless, people wake up...

In church this past Sunday, I stood at the end of the corridor as people walked out of our sanctuary. Lots of faces smiled and many of my friends stopped to shake hands.

Near the end of the people walking out, an old friend named Mike walked up to me with a terribly troubled look on his face. Red welts lined his eyes with that glassy look from crying.

"Hey Mike," I said. "What's up?"

"My daughter cut herself again," he said. "She doesn't want to live."

Mind you, Mike and his wife provided the most incredible home

life for their two kids. They supported them through high school with soccer, basketball, band, clubs and dances. The two daughters couldn't have asked for better parents.

He mumbled a few more words. I embraced him for a minute. He felt lost with no answer for any of his personal pain or his child's emotional suicide drama.

"Hey," I said. "Call me if you want to go to lunch."

"Thanks, man," he said.

Today in America, we face unprecedented emotional consequences in our children by the hundreds of thousands—running from drug overdoses, beer binging, heroin addiction, glue sniffing, smart phone addiction, all the way to self-cutting, suicides, tattooing their bodies into freak shows, and severe depression.

An almost unbelievable 44,965 people, on average, kills themselves in the United States annually. Year in and year out! That's over 123 people killing themselves 24/7.

About 10 percent of suicides stem from teenagers at 14 killing themselves 24/7. Everyone cries over the Colorado Columbine shootings that killed 14 people. That same killing spree continues DAILY throughout the USA 24/7.

According to the Center for Disease Control and Prevention, "Suicide is considered the second leading cause of death among

college students, the second leading cause of death for people ages 25–34, and the fourth leading cause of death for adults between the ages of 18 and 65. In 2015, the CDC also stated that an estimated 9.3 million adults, which is roughly 4% of the United States population, had suicidal thoughts in one year alone. 1.3 million adults 18 and older attempted suicide in one year, with 1.1 million actually making plans to commit suicide. Looking at younger teenagers, suicide is the third leading cause of individuals aged from 10 to 14. Males and females are known to have different suicidal tendencies. For example, males take their lives almost four times the rate females do. Males also commit approximately 77.9% of all suicides, however, the female population are more likely to have thoughts of suicide than males.”

Suicide is in Our Schools

Crippling depression rages in American high schools. The CDC finds that among students in grades 9-12, 17 percent seriously contemplated taking their lives over the previous year. Beyond that, about 14 percent of high school-aged students said they’d even gone so far as to make a suicide plan that included how they would go about taking their own lives.

Suicide Effects the Healthcare Industry

Suicide creates an enormous effect on the healthcare industry. The CDC states that suicide costs more than \$50 billion annually to cover the medical expenses and work loss costs associated with suicide.

What’s causing such horrendous fatalities across our society? Why do our leaders allow Mexico to ship \$62,000,000,000 (billion) in drugs across our borders annually to feed our citizens’ needs for self-abuse? Why hasn’t Congress stopped the drug flow? Answer: too many people on both sides of the border make billions on the lives of our citizens.

Why do we allow our kids to eat fast food junk, i.e.,

McDonald's, Wendy's, Pizza Hut, Burger King, Arby's, In and Out Burger, Carl's Jr. Burgers and dozens of other chemical laden pretend foods? Why do we feed them soda pop and GMO foods that serve miniscule nutrient values, but load our kids up with dyes, chemicals, altered DNA foods, high fructose corn syrup, synthetic sugars like sucralose and aspartame, and a host of consequences enough to expand this column into a book?

What about the consequential obesity epidemic in this country where so many teens face being fat that they cannot feel confident or attractive—thus they fade into insecurity, painful emotional chaos and total loss of self-confidence—which adds up to severe depression?

What about the fact that our kids lose community every time they text, email and Skype each other rather than face to face communication? What about the fact that TV and 24/7 news, largely depressing, dominates the airwaves? What about the fact that our country carries on two wars for 17 years that promote violence to other countries and spend trillions of dollars that could have been utilized in our country for our people? How about massive poverty in our inner cities that continues decade after decade with no one creating solutions? What good can come of 7 out of 10 kids being brought up by a single mother on welfare in our inner cities?

What about the average father watching 4.1 hours of TV daily, 7 days a week? Mothers watch 3.5 hours daily. What about kids being brought up by TV's? How does a child gain love, support, comfort and security via a flat screen?

What about both parents working while nanny's and day care centers raise their children? How did we arrive at the assumption that both parents need to work while their kids face strangers bringing them up?

What about the loss of physical education classes, so much so, that a new generation of kids suffer from obesity, diabetes

and onset heart disease?

After looking at the research and these terrible facts, how can we solve a problem in our society that cares more for money than human health and wellness? It's not like McDonald's will suddenly start serving healthy entrées, salads and nutrient-rich liquids. For certain, most stores promote candies, potato chips, aspartame laden Cokes, Mountain Dews and Pepsi.

And, it's not like America's middle class even knows what's causing its obesity epidemic? Americans don't realize or understand how to eat correctly. Yes, fast food, TV dinners, Doritos and sugary treats taste a whole lot better than organic salads, salmon and vegetables along with fruits, grains and legumes.

How does all of this feed into depression and suicide? When you lose the balance of feeding healthy energy into your body, mind and spirit—you lose the balance of life and the will to live. That's why suicides will continue to snuff out millions of lives over the years.

The Strange Death Of The United States Via Immigration

Douglas Murray wrote a chilling book: **The Strange Death of Europe—Immigration, Islam and Identity**. In that book, he connects the dots as to Europe's impending demise into Islamic

chaos and cultural suicide. His conclusions bear out daily as Europe imports an endless line of Muslims from the Middle East and Africa. All of them, totally and completely unable, unwilling and disinclined to adapt to 21st century advanced societies. While they leave their bloody, rape torn and/or starving countries, they create those same realities in Europe.

Few people hold much hope for every country in Europe being overrun by third world immigration. Yet no one knows who drives that invasion. Europeans attempt to cope, but find their own leaders working against them.

"Terrorism has nothing to do with Islam." "Islam is a religion of peace." You hear these farcical statements in the face of centuries of violence in Islamic societies against their women, children, animals and each other. The Quran mandates violence in virtually every chapter.

Islam slowly drains the life out of Europe. Murray states, "And that something else is a will-verging on the pathological—on many Europeans' part to deny reality: realities about Islamic belief and practice, facts about Muslim immigration, and truths about European culture and history.

"This habit of what I will call "living in untruth," Murray contends. "It is facilitating political decisions by many Europeans that, taken together, reflect a type of **civilizational despair**. European culture—by which Murray means the heritage of Jewish and Christian faith, Greece and Rome, and the various Enlightenments—is being emptied out by two developments about which many of those most responsible for Europe's future are doing precisely nothing."

Exactly the same onslaught occurs in the United States brought about by members of the U.S. Congress flooding America with Middle Eastern Muslims and African Muslims. Almost

ironically, Americans sit, watch and despair—but do nothing. They mimic “civilization despair.” It’s like electing the class bully president of the class so he can beat you up from his position of power any time he desires.

This provides the most important quotes of our time:

“Immigrants devoted to their own cultures and religions are not influenced by the secular politically correct façade that dominates academia, news-media, entertainment, education, religious and political thinking today,” said James Walsh, former Associate General Counsel of the United States Immigration and Naturalization Service. “They claim the right not to assimilate, and the day is coming when the question will be how can the United States regulate the defiantly unassimilated cultures, religions and mores of foreign lands? Such immigrants say their traditions trump the U.S. legal system. Balkanization of the United States has begun.”

“Islam isn’t in America to be equal to any faith, but to become dominant. The Qur’an should be the highest authority in America, and Islam the only accepted religion on Earth.” Omar Ahmed, director of Council on American Islamic Relations.

“Diversity within a nation destroys unity and leads to civil wars,” said social scientist Garret Hardin. “Immigration, a benefit during the youth of a nation, can act as a disease in its mature state. Too much internal diversity in large nations has led to violence and disintegration. We are now in the process of destabilizing our own country. The magic words of destabilizers are ‘diversity’ and ‘multiculturalism’.”

Take a deep breath! Look at the Islamic conquest of America. It’s right on target. Ninety Muslims run for major political offices all the way to senators and governors in the USA in November. They’re hungry and dedicated to installing, bit by bit, day by day, Sharia Law as mandated by the Quran. They will stop at nothing.

And, they will wreak social havoc wherever they live in America.

This eye-witness person from Minneapolis, MN gave me this report. His and her names must remain private for their own safety. Our U.S. Government decided that Minneapolis enjoyed too many Caucasians, thus they decided to 'seed' Minneapolis with Somalia Muslims to the tune of 120,000. While the Minneapolis Star Tribune attacks whites complaining about their schools being destroyed and their neighborhoods vandalized, along with rapes of their women—the Somalian immigrants, coming to the USA from their Stone-Age huts, now take an entire sector of the city called: Somaliland. No whites dare travel in that sector.

This occurred last weekend and the MSM covered it up completely. It took 263 cops, helicopters with lights and fire crews to quell the Somali riots. At some point, with greater numbers, there won't be enough cops to quell the riots.

These witnesses reported from the Valley Fair Amusement Park in Shakopee, Minnesota. They spoke to a security guard who said Somalis were jumping the fences to bring in weapons and bypass the metal detectors. They were terrorizing children, running from the police and carried weapons.

Here's another eyewitness account of what happened Friday night at Valley Fair Amusement Park in Shakopee, Minnesota:

"I was there with my family and there was a fight near the Wave around 2200. Law enforcement responded and de-escalated the situation. There was a large group of Somalis who had no supervision that were fighting. The staff was running around chasing them, and spreading them thin.

"Sixty to seventy cell phones recorded the fights. At first, there were only three POLICE officers and two security guards available to break them up. Then half the Somali group started

to steal beverages and tried to go into secured areas. Knowing they were out-numbered the staff called for back-up."

Another eyewitness account from Valley Fair:

"Honestly, I was scared. There was a fight that broke out by us while we were waiting in line to go into a haunted house, and they had to push the line back so no one got hurt. People were attacking the security guards inside the park. I didn't personally see any weapons but I heard someone got stabbed. There were hundreds of rioters.

"I have six kids and we were told to evacuate. Someone said the swat team was there so my first instinct was "hurry up kids we need to get out alive." We got to our car and it took us about an hour to leave the parking lot. Numerous crowds of people were rushing by our vehicle chasing and fighting each other. I revved up my engine a little and this lady looks at me and says: "You trying to run us over? Don't think I won't smash out your windows you dumb bitch!"

"My kids were terrified. Luckily, we got out safely. As we were leaving, a ton more police officers pulled in and a helicopter and the swat team."

"Eventually 263 police officers, helicopters, K-9, fire, and ambulance were on the scene. The media is reporting it was a "minor" incident. I have video of the Somali mob in the parking lot."

Facebook removed video links. The media isn't reporting any eyewitness or video accounts although there are dozens. This explains why the media and police are covering it up. They can't have a negative narrative against the Somali community before mid-terms when Keith Ellison, Ilhan Omar, Mohamud Noor and Hodan Hassan are running for office in Minnesota.

Aristotle said, "Tolerance and apathy are virtues of a dying society."

If we keep traveling down this path by importing violent cultures into America, another author in the future will write a book: **The Strange and Needless Death of America via Immigration."**
