

# Bird flu: Another Gain-of-Function Disaster?

Authored by Devvy Kidd not AI

January 6, 2025

I was going to do Part II from my column last week: [“Anchor babies” are NOT Automatically U.S. Citizens – Part 1](#), however, this new hysteria over a bird flu must be addressed and investigated. Here we go again, just like COVID-19.

Back in 2009, CBS award winning investigative correspondent, Cheryl Attkisson did an investigation into the H1N1 ‘swine flu’ “crisis” and **discovered most Americans never even had it**. CBS published her phenomenal reporting on their web site *but killed the story for TV. She finally quit that “news” network*. Do you know courts have ruled media are allowed to lie to you? That is a fact.

Must read so YOU know the Center for Disease Creation (CDC) and the FDA (Federal Death Administration) are nothing but liars and pimps for big pharma:

[The US Swine Flu Epidemic That Wasn’t](#), July 24, 2024 by Cheryl Attkisson

“Instead of waiting, I decided to contact all 50 states and get the test results directly. About half of them provided the data promptly without issue. The other half balked and stalled, and I had to look at various state FOI laws, and remind the state health officials that they were required to

produce the information. It was not theirs to withhold.

“First, I learned that officials in some states, including California, disagreed with the CDC’s directive to stop testing for swine flu. They did not want to be quoted by name for fear of “going against the CDC.” But they thought it was crucial to gather the most-hard data possible about a novel, unpredictable virus.

“Once I had the state’s data in hand, it was easy to see the big story: ***There was no swine flu pandemic***—at least in the US!

“The people tested for swine flu or H1N1 prior to the CDC ordering a halt, were patients deemed most likely to have swine flu based on factors like recent travel to places that had a lot of swine flu at the time. Those specimens, my sources explained, should be nearly 100% swine flu if the CDC were correct in its assumptions about how widespread the virus was in the US.

***“Yet the majority of specimens weren’t swine flu at all!***

“I built a television news report giving the results of my investigation, had the story legally approved by my CBS lawyers, and it was set for air. A top executive at CBS News commented to me that it was the most original reporting on swine flu he’d seen done by any news organization! But the story never aired on TV.” Rest at link.

**The American people were once again driven into fear and hysteria over a lie, but big pharma raked in the cash with their swine flu vaccine.**

Now, it’s the bird flu that’s been making headlines (until the massacre in New Orleans) with MILLIONS of chickens and turkeys killed, severely damaging making a living for our family-owned farmers and ranchers who feed us.

**READ: [Fowl! Bird Flu: It’s Not What You Think](#)**

[Current Bird Flu Outbreak is Man-Made](#) – USDA Serial-Passage Gain-of-Function Research Extended Host Range to Migratory Waterfowl, Cattle, Sea Mammals, Jan. 2, 2025, Peter A. McCullough, MD, MPH: “We have seen no human-to-human spread and there has never been a human US fatality due to H5N1.”

[From an expert researcher over the decades, Michael Snyder:](#) “But another major global health crisis would make things so much worse.

“In recent weeks, so many of the usual suspects have been doing interviews in which they warn that a bird flu pandemic among humans has become inevitable. Do they know something that the rest of us do not?

“Already, we are starting to see public officials freak out. The state of California recently declared a state of emergency, and now [it is being reported](#) that Arizona has detected bird flu in the wastewater in the cities of Phoenix, Tempe and Surprise...

*“Bird flu has been detected in wastewater in multiple metro Phoenix cities, county health officials confirmed Monday.*

*“Routine wastewater surveillance in Phoenix, Tempe and Surprise – the three cities in the county where monitoring occurs – confirmed the presence of avian influenza, according to a press release from the Maricopa County Department of Public Health (MCDPH).*

*“The influenza subtype, which includes bird flu as H5N1, has been detected in multiple locations in the Valley in the past couple of months.”*

“Meanwhile, the bird flu continues to spread like wildfire among animals all over the nation.

“123 million birds, most of them chickens and turkeys, have already died in the United States alone. And now a farm in

Ohio that has nearly a million chickens has been infected..."

*"Ohio agriculture officials are investigating after avian flu was detected in nearly one million chickens in Darke County. The National Veterinary Services Laboratory confirmed Highly Pathogenic Avian Influenza was detected in Darke County on Dec. 27, involving 931,302 chickens."* (Did they hand count every chicken? A million is a lot. Maybe they do what the CDC does: They only **ESTIMATE** the number of people who get the flu, pneumonia or COVID.)

There's just one problem and it's the same fraud used to rack up the number of people who got the flu, COVID-19. *It's all about the testing.* I was hospitalized on Feb. 4, 2022, pneumonia. The toady ER doc said I also have COVID (unless I allowed the RT-PCR test, there's the door). I told him no I don't have COVID-19, I have lifetime natural immunity. You see, back in Dec. 1993, I got home from California to Colorado sick as ten dogs. My late husband took me to Swedish Medical Center.

The ER doctor told me I have the Beijing flu which was killing everyone in Denver! Going to give you a shot and pills. I said no you're not. I haven't been vaccinated since I was 5 years old. By 1993, I had done enough research to say no. You see, I had just finished reading Eustace Mullins book: *Murder by Injection: The Story of the Medical Conspiracy Against America.* No way was I just going to let some doctor jab with me with who knows what and more pills.

That doctor got his panties in a wad, called my husband into the room and bitched I wouldn't take the shot or pills. John said my wife is a grown woman and it's her decision. I have not had any form of any flu since then, 31 years ago. I went home and was really, really sick for 8 days but, thank God, my natural immune system was strong enough to fight back.

Anyway, in 2022, I was admitted and the next morning (as in

like 5:00 am), the cheerful nurse came in and told me “You don’t have COVID after all”. My response: I already knew that. But, I had a nice, single room for four days and went home. They used the RT-PCR to test. **One of the biggest scams besides the “FED” and climate change.**

[No, You Didn’t Test Positive for COVID-19](#), Jan. 10, 2022  
(Mine)

[Trump’s COVID-19 Diagnosis Came From a Research Tool](#), Oct. 5, 2020 (Mine)

[SARS-CoV-2: Isn’t It Time Someone Did this?](#), Sept. 27, 2021 – “This is the FDA document cited since last year: [CDC 2019-Novel Coronavirus \(2019-nCoV\) Real-Time RT-PCR Diagnostic Panel](#) originally dated July 13, 2020. The FDA shows a change of date to Dec. 1, 2020; the text remains unchanged. Pg 9: “Equivalence and performance of these extraction platforms for extraction of viral RNA were demonstrated with the CDC Human Influenza Virus Real-Time RT-PCR Diagnostic Panel (K190302). Performance characteristics of these extraction platforms with 2019-nCoV (SARS CoV-2) have not been demonstrated.”

“Pg 40 of report: The analytical sensitivity of the RT-PCR assays contained in the CDC 2019 Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel were determined in Limit of Detection studies. Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted, assays designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA...”

“So, they had nothing. No virus, no isolation and nothing resembling purified. Going to the CDC’s response to my FOIA: “The SARS-CoV-2 virus may be isolated from human clinical specimens by culturing in cells. In January 2020, CDC isolated the SARS-CoV-2 virus from a clinical specimen from

the first confirmed case of COVID-19 in the United States.”

“That would be the man from Washington State. They isolated this phantom virus from Patient Zero using what? Just when did the CDC actually “discover” COVID-19 because looking at [Dr. Lanka’s controlled experiments](#), it took up to five days to prove his findings. Recall what I quoted in [a previous column](#):

“Now, if you click on the link above, a confirmed case, it goes to a January 21, 2020, CDC page. **“CDC has been proactively preparing for the introduction of 2019-nCoV in the United States for weeks...”** One day after Patient Zero’s swabs and blood are sent to Atlanta, the CDC had already been preparing for this previously unknown COVID-19.”

Now it’s the bird flu. [New CDC Study Confirms Current H5N1 Bird Flu Strain is Very Mild](#); Mass Culling Results in Chicken-to-Human Transmission – 100% of poultry-linked human cases traced to reckless mass depopulation efforts. Jan. 1, 2025

Next – **Oh gee, what could go wrong?** [Bill Gates-Funded Researchers Turned Mosquitoes into Flying Syringes to Deliver Vaccines](#), Jan. 2, 2024

[Bogus Bird Flu](#), Dec. 30, 2024 – “Everyone needs to realize that the test being used to discover bird flu in milk tanks, dairy herds and elsewhere is the scientifically perfect credible authentic PCR test. Yes, the infamous PCR test. Remember false positives?

“The PCR test is a mechanism to genetically amplify material to find floating pieces or particles of something. The inventor, of course, says it is bogus for finding viruses. It was developed for genetic discoveries, not for finding diseases. Someone smart than I can tease out these differences, but suffice it to say it’s the wrong tool. You wouldn’t pick up a box end wrench to turn a Phillips head screw.

“Second, even if it were the right tool, it’s being applied incorrectly. Each cycle is like a microscope amplification. Remember turning microscope lenses from 35X to 100X? Each cycle of a PCR test amplifies magnification to find additional material floating in the sample. The official USDA and FDA number of cycles is 45. Massachusetts officials I think are the first state folks to say categorically that anything more than 30 cycles is bogus.

“How so? Because if you keep ramping up the amplification, smaller and smaller particles will show up. Any reasonable person knows our biological spaces are literally filled with floating molecular detritus. Pieces of cells, pieces of DNA, pieces of Democrats and Republicans, with maybe a piece of Libertarian and Socialist thrown in—goodness, in the air around us, in our bodies, in our nasal passages, exist bits and pieces accumulated from everything, everyone, and everywhere...

“I have no clue who or what is behind the curtain on this. It could be as nefarious as livestock extermination to keep burps and farts from turning us all into crispy critters; it could be as sincere and kind as wanting to protect us from sickness. Whether righteous or unrighteous, the agenda has the same outcome: paranoia from junk science.

“If you did not take the covid-inducing jab, do you spend half your day worried you might catch covid? Do you trust the Fauci-Collins covid narrative? Dear folks, bird flu is being hatched the same way from the same people and the same fraternity that blessed us with covid. Same boat crossing the same river.”

[Reckless H5N1 Bird Flu Gain-of-Function Experiments Must Be Shut Down](#) – Epidemiologist Nicolas Hulscher on Reality Check Radio, Dec. 15, 2024 – “Here are the [key points](#) about bird flu:

1. Practice of culling (mass destruction of entire healthy flocks) when a PCR test is found positive to “eradicate” the virus is futile and may work to constrain the food supply. The current strain H5N1 clade 2.3.4.4.b is not thus far causing necropsy or radiographic confirmed fatal pneumonia in birds or mammals.
2. H5N1 host range expansion into migratory birds and mammals likely occurred as a result of gain-of-function serial passage research and a lab leak.
3. Increased transmissibility of H5N1 has a tradeoff of decreased virulence. Using legacy human mortality rates from cases in Southeast Asia is not appropriate. The US has never had a fatal human case of bird flu.
4. Fear-mongering promulgated by the [Bio-Pharmaceutical Complex](#) is designed to promote mass vaccination of animals and humans with lucrative pre-purchased contracts to the vaccine manufacturers and their NGO backers. Mass vaccination into a highly prevalent pandemic is a mistake since it promotes resistant strains of the virus in the vaccinated.
5. If human-to-human spread occurs in the future as expected by many, it will be the product of gain-of-function research that has gone on for years with the goal of creating harm to human populations. (Interview at

[H5N1 Ubiquitous on Farms, Quarantines, PCR Testing, Culling, Vaccines All Useless in Protecting Workers Now](#), Jan. 4, 2025.

By Peter A. McCullough, MD, MPH

“The four year H5N1 avian influenza outbreak is ubiquitous on farms across the United States **because the [gain-of-function viral strain from the USDA Poultry Research Center in Athens Georgia](#)** is spreading by mallard ducks and other migratory water fowl and continually reinfecting the farms. Fortunately, it is a mild illness for both animals and man.

“Please enjoy this brief interview update on [Just the News](#),

[hosted by John Solomon and Amanda Head on Real America's Voice](#). Farms, meat processing plants, and chicken factories should outfit their workers with [Immune Mist and Emergency Contagion Kits from The Wellness Company](#). These simple tools can protect our workers from H5N1. This is far more practical advice than what has been given on [CNN by former White House Coronavirus Task Force member Dr. Deborah Birx](#). She is advising weekly PCR testing for workers with no practical advice on protection. Expect her to push hard in the weeks to months on mass H5N1 vaccination.” **Nasal and Throat Sprays, Gargles, Best Prevention for Bird Flu.**

[Bird Flu Should Be the Subject of a Criminal Investigation](#) – Current discussion about the reality of H5N1 – i.e., whether it's fact or fiction – ignores that the matter should be the subject of a criminal investigation, not merely scientific debate, Jan. 1, 2025

“When Dr. Peter McCullough, Nicholas Hulscher, and I investigated reports of what is being represented to the public as a new clade of H5N1 bird flu, it became apparent to me that life sciences professionals—at least those outside the clique that is performing Gain-of-Function research on H5N1—are lacking sufficient information to ascertain the reality of this phenomenon.

“This is why, in our discussions about our paper—[Proximal Origin of Epidemic Highly Pathogenic Avian Influenza H5N1 Clade 2.3.4.4b and Spread by Migratory Waterfowl](#)—I emphasized the **urgent need for further investigation of this phenomenon**. As we wrote in our Conclusion:” Rest at link.

California's maniac lunatic governor, Gavin Newsom, is going off the rails again over this bird flu and if he does the same as he did over COVID, many more small business owners will go under. Except for the big box stores like China (Wal) Mart. Right now it's just masks! Go to [my web site](#), front page and you'll see a massive amount of information – scientifically

proven – regarding masks and how harmful they are to the brain and worthless. Except for the Communist Chinese who dominated the market at China (Wal) Mart in sales.

Our farmers and ranchers need to raise holy hell with their state legislators who are already struggling to stay afloat. Headlines the other day: Dozen eggs \$9.00. Insane. I just purchased a dozen eggs from free range chickens, organic, for \$4.78. (Here in Texas) Kill off millions of chickens and turkeys which badly hurts those who produce what we eat (and drink milk). **Legislators, state and the U.S. Senate need to immediately haul in the big shots at the USDA Poultry Research Center in Athens, Georgia, put them under oath and subpoena their research records, all emails as well as hand-written notes.**

What you can do? Call Sen. Ron Johnson (R-WI), DC: (202) 224-5323 and Sen. Rand Paul (R-KY), DC: 202-224-4343 and ask them to open an investigation regarding the USDA Poultry Research Center and what they've been doing. And post the link to this column on X, all social media and your email lists. NO MORE lying and draconian mandates to control us.

For a thorough, comprehensive education on the Fed, the income tax, education, Medicare, SS, the critical, fraudulent ratification of the Seventeenth Amendment and more, be sure to order my book by calling 800-955-0116 or click the link, [Taking Politics Out of Solutions](#), 400 pages of facts and solutions. Order two books and save \$10.00
