

Brennan And Clapper's Secret Surveillance System

Kelleigh Nelson

Every time we witness an injustice and do not act, we train our character to be passive in its presence and thereby eventually lose all ability to defend ourselves and those we love. –Julian Assange

Every person remembers some moment in their life where they witnessed some injustice, big or small, and looked away because the consequences of intervening seemed too intimidating. But there's a limit to the amount of incivility and inequality and inhumanity that each individual can tolerate. I crossed that line. And I'm no longer alone. –Edward Snowden

When injustice becomes law, resistance become duty. –Thomas Jefferson

There may be times when we are powerless to prevent injustice, but there must never be a time when we fail to protest. –Elie Wiesel

The following information has been gathered from countless articles by Mary Fanning and Alan Jones of theAmericanreport.org. Their reports should be read by every American, including our nation's politicians.

Dennis Montgomery is a software designer and former CIA/NSA/DoD/DHS contractor. Montgomery built a surveillance system known as “The Hammer.” He blew the whistle on the Obama administration’s allegedly illegal use of that system to wiretap Donald Trump. ([Rand Paul claims Brennan, Clapper, Comey sent spies into the Trump campaign.](#))

Montgomery also developed technology for analyzing surveillance video from U.S. Air Force predator drones remotely piloted from Nellis Air Force Base in Nevada. Nellis Air Force Base is also the home of a charter school run by imam [Fethullah Gulen](#). Clinton’s hand-picked CIA handlers, [Graham Fuller and Mark Grossman](#), were selected to manage and direct Gulen’s cells in the U.S. and abroad. [Link](#)

Reminiscent of the theft of Bill Hamilton’s [Inslaw Promis software](#) allegedly by the Reagan administration’s Ed Meese, this is much the same thing. The government seems to steal from private enterprises what they want for their own.

Montgomery asserts that intelligence officials John Brennan and James Clapper ran “The Hammer” surveillance system. According to [CIA Vault 7](#) documents released by WikiLeaks on March 7, 2017, The Hammer (HAMR) is a browser exploit throwing framework that infects targeted devices and systems. The Hammer allowed spying on Supreme Court Justices, 159 [Article III judges](#), elected officials, and 20 million other Americans.

Mainstream Media Coverup

CNN's reporting indicates that CNN and The Washington Post

were engaging in a multi-prong strategy to cover up the Obama administration's illegal surveillance of Trump, including the participation of John Brennan, James Clapper, and Carl Bernstein. CNN and the Washington Post continue to ignore the fact that Montgomery turned over evidence to the FBI.

Testimony from former FBI General Counsel James Baker asserts the FBI took possession of evidence that proves that the Obama administration wiretapped Trump. They ignored Montgomery's claim. James Baker asserted that, "An individual named Dennis Montgomery, who I believe, to the best of my recollection, said that he had been a U.S. Government contractor and, in the course of that work, had come across evidence of unlawful surveillance by the government, of Americans including government officials and wanted to give that information to the Bureau, which eventually did take place."

Remember Bernstein told everything on Nixon, but he was silent on the illegal wiretapping of Donald Trump. [Obama's surveillance hammer on Trump is far worse than Watergate](#). Lt. General Thomas McInerney (Ret.), formerly the number three Air Force official at the Pentagon, also said "The Hammer" surveillance system is far worse than Watergate.

Only two days before he died, [Admiral James A. "Ace" Lyons \(Ret.\)](#), who served as commander of the U.S. Navy Pacific Fleet, appeared less concerned about dying than about

countering the coup against President Trump. Admiral Lyons was convinced that the coup was put in motion to cover up “The Hammer” and the actions of the men behind it. Admiral Lyons was a great patriot, and spot on in his reporting. [Link](#)

The D.C. Conspiracy

There is a conspiracy underway deep within the Washington D.C. intelligence and law enforcement establishments. The cabal should have much to fear, but as of yet, not one DOJ criminal has been indicted. U.S. Attorney John Durham is reportedly very interested in interviewing President Obama’s former intelligence chiefs, ex-CIA Director John Brennan and one-time Director of National Intelligence James Clapper. I would hope that happens, but as of yet, those two men are still walking free.

In 2015, contractor-turned whistleblower Dennis Montgomery provided the FBI with 47 computer hard drives of illicitly-harvested domestic surveillance data and classified testimony that, according to Montgomery, proves Brennan and Clapper illegally commandeered the foreign surveillance tool known as “The Hammer.”

Montgomery contends Brennan and Clapper used “The Hammer” to conduct unlawful domestic surveillance on President Obama’s political enemies for the purpose of “blackmail” and “leverage.”

Soviet Style Surveillance

Brennan and Clapper built a Soviet style total surveillance state modeled after the Stasi of East Germany. They did it by commandeering “The Hammer” for domestic surveillance, with greater tech capability for total control of the people. They must long to turn America into Soviet Russia.

According to Montgomery, Brennan and Clapper used “The Hammer” to illegally wiretap Lt. General Michael Flynn (Ret.) and Donald Trump. Oh yes, the leaders of the coup, [Obama](#), Brennan, and Comey all have professed their allegiance to Marxism and [communism](#) at various points in their lives. See [The Red Thread](#) by Diana West.

AG Barr and U.S. Attorney Durham recently traveled to Rome, Italy, where Durham reportedly retrieved two BlackBerry smartphones that were previously used by [Joseph Mifsud](#). The public really didn’t understand the significance of the retrieval. Special Counsel Mueller’s investigation portrayed Mifsud as a Russian agent. Mifsud is actually an FBI asset. According to Dennis Montgomery, when the BlackBerry phones are used on “The Hammer” platform they are a closed secret network that is encrypted and secure and cannot be penetrated.

It is of interest that Mifsud, Hillary, Comey, President Obama and others were using BlackBerry phones. How many others inside the [Crossfire Hurricane](#) covert FBI operation against Trump were plotting the coup d’état while also using non-government issued BlackBerry phones? Two of Hillary’s [BlackBerrys were destroyed](#) by Clinton Foundation advisor, Justin Cooper.

Despite the fact there was no criminal reason, the Obama administration used its *counterintelligence powers* to investigate the opposition party’s presidential campaign.

The Fusion Center

[Brennan concocted](#) the Trump-Russia intelligence “[Fusion Center](#)” narrative as a cover story because Brennan and Clapper had illegally commandeered “The Hammer” for illegal domestic surveillance and for wiretapping Trump, in violation of the CIA’s Charter. Fusion Center is a collaborative effort

between two or more agencies.

Back in August of 2018, Brennan told Rachel Maddow, “We put together a Fusion Center at CIA that brought NSA and FBI officers together with CIA to make sure that those proverbial dots would be connected.” He never mentioned that each of these intel agencies have separate charters and for good reason.

Whistleblower Montgomery says that on February 3, 2009, Brennan and Clapper got together to commandeer The Hammer for illicit purposes. Montgomery designed and built the supercomputer, just as Inslaw owner Bill Hamilton designed Promis software. The supercomputer system had served as a foreign surveillance tool and was transferred from Blxware in Washington state to a CIA facility in Ft. Washington, Maryland. There, Brennan and Clapper transformed The Hammer into a surveillance tool to target Obama’s political enemies.

According to [Military sources](#), the supercomputer has multiple safeguards to prevent intel personnel from using the system for unlawful domestic surveillance, but Brennan and Clapper bypassed those safeguards. They set up a more powerful system and illegally re-purposed the computer.

Targeting Trump

Brennan and Clapper allegedly spied on Chief Justice John Roberts, Justice Scalia, onetime head of the Foreign Intelligence Surveillance Court (FISA) Judge Reggie Walton, 156 [Article III Judges](#), [members of Congress](#), Rudy Giuliani, General Michael Flynn (Ret.), and Donald Trump.

General Michael Flynn’s attorney Sidney Powell says several former officials who were involved in the CIA /FBI Crossfire Hurricane operation are in ongoing talks with Justice Department officials.

The [Whistleblower tapes](#) released by U.S. District Judge G. Murray Snow, revealed that President Obama's intelligence officials, Brennan and Clapper, for whom Montgomery was working, used the spyware for unlawful domestic surveillance and to illegally wiretap Donald Trump "a zillion times."

President Trump's allegation that the Obama Administration was wiretapping him is not only supported by Montgomery's whistleblower revelations about Brennan's and Clapper's computer system, The Hammer, but also by statements made in March 2017 by whistleblower [William Binney](#), a former NSA Technical Director of the World Geopolitical and Military Analysis Reporting Group, by former CIA and State Department official [Larry Johnson](#), and by Montgomery's attorney [Larry Klayman](#).

FBI Director Mueller

Montgomery says it was Robert Mueller's FBI who [provided the computers](#) for The Hammer, and who also ordered an illegal FBI raid of Montgomery's home and storage facility. Mueller's FBI agents tied Montgomery to a tree, according to court documents.

U.S. Magistrate Judge Valerie Cooke excoriated the FBI for using falsified affidavits to obtain search warrants and forced the return of Montgomery's property. Obviously, the FBI hasn't changed its stripes since they continue to operate in a rogue and illicit fashion, even under AG William Barr and Deep State FBI Director Christopher Wray.

Mueller became, by appointment of Rod Rosenstein, and because of his close friend, James Comey, the Special Counsel investigator of the Russia collusion hoax. Montgomery claimed that Robert Mueller had been collecting information on Donald Trump for over ten years and he was the last person anyone should appoint to investigate the President and the phony Russian Collusion hoax.

The day before Robert Mueller was appointed as Special Counsel, he had interviewed with Donald Trump to once again become the Director of the FBI and was obviously rejected, and for good reason.

FBI Director Mueller wanted to use The Hammer to find out “who knew what” about the 9/11 terror attacks on New York City and Washington D.C. Mueller was in charge of the FBI’s investigation of the 9/11 attacks. John Milkovich’s book, [Robert Mueller: Errand Boy for the New World Order](#), tells of Mueller’s several coverups regarding the 9/11 terror attacks. Interestingly, Mr. Trump, as a builder of skyscrapers, took a special interest in the collapse of the twin towers.

Dennis Montgomery

Dennis Montgomery became a target of the government and the media who worked to destroy his reputation. Ultimately, he suffered a stroke. He had filed 18 whistleblower complaints. In D.C., Montgomery testified to DOJ’s Deborah Curtis regarding the 47 hard drives of The Hammer that contained illicitly collected domestic surveillance data, evidence that Comey buried after being turned in to Comey’s FBI.

Mary Fanning and Alan Jones write, “Assistant U.S. Attorney Deborah Curtis offered Dennis Montgomery limited immunity in exchange for 47 hard drives of illegally harvested surveillance data that Montgomery claims contains proof that Brennan and Clapper wiretapped General Flynn and Donald Trump. (This immunity was in coordination with [FBI General Counsel James Baker](#).) Then Curtis joined Special Counsel Mueller’s team and became the lead prosecutor on General Flynn’s case before abruptly leaving the Flynn prosecution and the DOJ.”

James Baker is suspected of leaking the discredited Steele dossier to Mother Jones reporter David Corn. Baker was also part of the group that plotted the take-down of General Flynn

and President Trump.

Montgomery asserts the hard drives have information that not only proves Brennan and Clapper wiretapped General Flynn but also provides proof that the DOJ conducted illegal prosecutions of President Obama's political enemies.

Baker later joined the Brookings Institution and its affiliate Lawfare, which acts as the political arm of the FBI and the intelligence community. [Link](#)

Conclusion

Invented lies and corrupt actions of high officials who have abused the power of their positions for political gain must be exposed and punished. They have sought to subvert our rules of law and undermine the Republic. They have damaged and are still damaging the institutions of American government, all the while squandering the nation's trust.
