

# Can America Maintain A Stable Government In The Coming Years?

By Frosty Wooldridge

March 6, 2025

Fact: Mixing one culture into another never works. Mixing multiple cultures into other cultures doesn't work. Diversity doesn't work. Mixing religions never works. Mixing tribes never works. Mixing "world views" fails on every level. Mixing languages in one country leads to linguistic chaos in that country.

In the first quarter of the 21st century—Europe, Canada and America participate in a racial-linguistic-cultural-tribal experiment that has proven horribly destructive, non-viable and threatens the existence of Western Culture.

As shown in Trump's State of the Union address this week—angry, volatile, and nasty congressional critters attempted to create chaos in America's most sacred chamber in Washington DC. One disrupter got tossed out on his ear. Others walked out with large signs on their backs, "Resist." Still others raised signs calling the president a liar. Others said to, "Send Musk back to Africa."

This week at Barnard College, Muslim Palestinian activists stormed the building chanting anti-Jewish slogans. They want to see every last Jewish person exterminated.

On the news, a congressional hearing forced four of the top

“Sanctuary City” mayors to explain themselves for breaking federal laws. Johnston from Denver. Wu from Boston. Johnson from Chicago. Adams from New York City. All of them could and should be arrested for aiding, abetting and harboring tens of thousands of illegal aliens in their cities in direct violation of America’s laws. Yet, they remained defiant.

At the same time, those mayors have stolen billions of dollars from American taxpayers’ pocketbooks. They’ve placed illegal aliens over American citizens. They’ve gotten our citizens killed, raped and robbed.

While we know and understand that allowing biological men to compete in women’s sports is illegal, immoral, unethical and completely insane--all 47 democrat U.S. Senators voted to keep men in women’s sports. It shows that when you’re THAT open minded, your brains fall out of your skull.

When the president spoke to the joint session about the death of Laken Riley and other women killed by illegal aliens, not one single democrat stood up to honor the mother and sibling of Laken Riley. At the same time, those same female congresswomen wore pink dresses in support of women--but voted against those women because those congresswomen voted for open borders to allow 15 million illegal alien criminals into America. You can’t help but scratch your head over that one.

Several members of the infamous “Squad”, a group of congressional women who support men in women’s sports, who support open borders, who openly call all white Americans ‘racists’, and who simply hate the U.S. Constitution--do everything they can to undermine law and order. \*I’d bet none of them have read our U.S. Constitution, Bill of Rights or the Declaration of Independence.

Today in major cities like Detroit, Minneapolis, New York City, Denver, Miami, Chicago, Atlanta and more--you’ve got immigrant Muslim “citizens” practicing Sharia Law from the

Quran—with NO affinity toward America's culture, language or law and order. They've created their own enclaves or "no go" zones where America's laws can be broken at will.

Experts tell us that America houses people who speak 430 different languages in our country. In 1965, virtually everyone spoke English because they wanted to become Americans. That all changed with the Teddy Kennedy's 1965 Immigration Reform Bill that opened the gates to anyone and everyone with no mandate to speak English. We're forced to placate them at the ballot box, mercantile stores and schools. Please remember that every single language brings a different "world view" and different "understanding" of reality. Not having a common language in America brings misunderstandings, political tensions, cultural disintegration and religious conflict.

In 2025, we've got somewhere around 20 to 30 million illegal aliens living and working underground--siphoning off our tax dollars, stealing our mercantile goods, overwhelming our food banks, and creating havoc in our school systems, prisons and hospitals. They wire over \$100 billion annually back to their home countries.

We're seeing a complete devolution of America's culture, America's laws, America's Constitution and our way of life.

How much longer can we maintain governance over our country with millions of people NOT born in our country, with no affinity toward our country, no affinity toward our language, and millions more arriving in the next 25 years?

Right now, demographers tell us that 55 million legal immigrants, not born here, inhabit America. Another 20 to 30 million illegal aliens inhabit our country. That's up to 85 million foreigners out of 340 million Americans. Over 45 million Americans subsist on food stamps and welfare.

According to the U.S. Census Bureau, we are projected to grow

via mass immigration from 340 million to 440 million people within 25 years. That's a 4 million annual growth rate, net gain, X's 25 years. Voila! That's 100,000,000 people. They are arriving from over 190 countries with every incompatible world view, religion, culture, and language you can imagine.

How do you think that's going to work out?

How do we feed, house, educate and assimilate THAT many people? How do we grow enough food, provide enough water, and maintain any semblance of sustainability for our own citizens? How do we educate children with over 430 languages? What will happen to the "common thread" of being an American?

What happens when the incompatible languages and cultures start feuding with one another?

Have you read the history books of failed nations?

What about our depleting non-renewable resources at a horrendous rate to feed 440 million people? What happens when we can't feed ourselves or them?

Resource author Christopher O. Clugston said, "Our deteriorating natural environment – especially increasingly pervasive global NNR scarcity – is causing our deteriorating cultural environment – increasing political instability, economic fragility, and societal volatility. We're becoming increasingly frustrated, angry, and violent as a result...If I'm right, as Nature's Squeeze intensifies, so will our unraveling – so I don't see things improving, EVER! We can try all the political, economic, and societal expedients we want, but our predicament is geologically-based, and there is nothing we can do about it...Not what we want to hear, for sure, but Nature doesn't care what we want to hear!"

Finally, when you see all the political, linguistic, world views, cultural and religious conflict in the world—how in the hell will we survive it by importing another 100 million legal

and/or illegal immigrants into our guts? Why isn't anyone speaking up about it? Am I the only journalist who sees it?
