

Can We Solve What's Happening To America?

In 2018, Americans face excruciating problems on multiple fronts. It's almost beyond our emotional ability to turn on the TV at night to watch the news. It's beyond depressing, and worse, it never gets better.

House members like California's Maxine Waters calls for violence toward anyone she doesn't like. She calls for impeachment of the president of the United States along with dozens of other House members. All with no basis in facts.

You watched a Supreme Court nominee with a spotless record become embroiled in sexual and violence scandal from a woman 36 years ago. How does anyone counter or combat the aftermath of such accusations?

We've got millions of immigrants pouring into our country with no end in sight. They overwhelm our welfare systems, social services and educational systems. They wreck our food banks and classrooms for our own students. They're bastardizing our culture, language and ethos.

An astounding 52.2 million Americans live on welfare in the

United States. That ranges from housing, food stamps, school lunches, schooling for illegal aliens, medical care, dental care, home heating, electrical support, EBT, day care and the list grows.

(Source:

www.census.gov.org)

Government source, "Approximately 52.2 million (or 21.3 percent) people in the U.S. participated in major means-tested government assistance programs each month in 2012, according to a U.S. Census Bureau [report](#) released today. Participation rates were highest for Medicaid (15.3 percent) and the Supplemental Nutrition Assistance Program, formerly known as the food stamp program (13.4 percent)."

Over 100,000 immigrants land on America's shores every 30 days without pause, without end and without any ability to work or skills of any kind. And, we pay for them and their children.

An average of 350,000 pregnant women violate our borders annually to birth their child on our cities, on our dollar, our hospitals, and our costs for the next 18 years. Anchor babies must be one of the longest and biggest scams on the U.S. taxpayer, ever. And, there's no end in sight as Congress won't stop it.

We've got over 20 million illegal aliens living and working in our country in violation of our laws, but they get paid in cash from employers who beat the system and never pay taxes. Thus, we suffer the largest underground economy in the world. Some make a lot of money and the rest of us pay all their taxes.

Immigrants both legal and illegal send \$120 billion in cash back to their home countries annually. That's our money being shipped out of our country. We're being financially bled to death.

At the same time, Mexico sells us \$62 billion in drugs annually to quench our voracious appetite for getting stoned, altered mental state, altered heroin highs and more.

All those opioids caused over 65,000 deaths in America in 2017. And, no one in Congress will lift a finger to stop the drug flow. We've got high school kids dying of heroin overdoses...football captains, homecoming queens and water boys.

We've got Black Lives Matter marching to stop violence against African-Americans by police, when 97 percent of black Americans die from other black Americans killing them in the ghettos from Detroit to Chicago to Los Angeles and most major cities.

America, once a first world country, with laws and an advanced culture, features an average of 23 to 27 Muslim honor killings of their women, annually. Additionally, 500,000 cases of female genital mutilation now in the USA, which proves the most barbaric, horrific and God-awful operation on a little girl that the Islamic religion could ever create or import into our country—now flourishes in our country. It's a flat-out assault and battery on a little girl before she has any choice. Yet, none of our laws will stop it. We're being degraded into a 6th century Dark Ages religion by importing Muslims. (Source: White House Press, October 2, 2018, "Honor Killings in America" Ed O'Callihan, DHS)

We see Muslims running for 90 public offices in the USA all the way to the governorship of Michigan on their way to installing Sharia Law, which, by the way, negates all our Constitutional rights, women's rights, children's rights, religious rights and animal rights. There's nothing good

about Islam in America.

Worse, Detroit, Miami and Minneapolis face being turned into Muslim caliphates where only Muslims live, welfare and produce more offspring at record levels.

We're being so multiculturalized that we face countless parallel societies that possess nothing in common with Americans or the American Way of Life.

Many of the resident intellectuals, overanxious to avoid all appearances of bigotry, support the radical ethnics in their resistance to assimilation. Cosmopolitans terrified of "ethnocentrism" embrace what can only be called "ethnofugalism"—a flight from the ethnic center of their own upbringing. Those who promote limitless diversity seem not to have noticed the disorder and violence associated with massive diversity in Africa and the Balkans. The faster the rate of immigration and the more diverse the reluctantly conjoined cultures, the greater is the threat of balkanization...

It cannot be too often repeated that an extravagantly multicultural nation is poorly positioned to compete with nations that have not succumbed to the siren call for more "diversity." Think of Japan. In facing the real dangers of overpopulation following World War II, Japan showed that she could achieve a unanimity of purpose that is hard to imagine in a multicultural nation. Whatever measures may be required to tame population growth, their difficulty will increase strictly in proportion to the amount of diversity in the population. In a multicultural nation patriotism withers under the onslaught of internal competition between ethnic groups. The nation is then less favorably positioned to deal with external competition. Everyone within the multiethnic nation suffers.

—Garrett Hardin, *Living within Limits: Ecology, Economics, and Population Taboos*,

We feature 42,000,000 (million) Americans who cannot read, write or perform simple math. These functionally illiterate end up with alcoholism, drugs, tent cities and human misery beyond imagination. San Francisco gives 11,000 homeless drug addicts clean needles that get tossed all over the sidewalks. Defecation in the streets. Another 90,000 homeless create blue tarp cities for miles along the cement canals and old roads. (I traveled in San Francisco this summer to see it firsthand. It's pretty sickening.)

We've got millions of Americans out of work and hopeless ghetto dwellers rampaging around in gangs, while everything could be made in our country, unfortunately sells in Walmart and Home Depot, "Made in China." Yet, Chicago provides a black killing ground more deadly than the wars in Afghanistan and Iraq.

And what about law and order? How about \$52,000,000,000 (billion) annually in shoplifting theft in the USA? Can you wrap your arms around that number? It means you pay more for all your food and mercantile goods because somebody steals billions in goods and gets away with it.

We stare into the bank vault of a \$21 trillion debt brought to us by our own U.S. Congressional critters. Our second President John Adams said, "There are two ways to conquer a nation: one is by the sword and the other is by debt." We owe China \$1.7 trillion in trade deficits brought to you by our own Congressional officials over the past 20 years.

Along the way, we burn up our resources and soldiers in useless, stupid and insane wars that last for 17 years! Are we back in the Dark Ages?

This column touches only a few of our mounting problem, that, at some point, will prove irreversible and unsolvable. Man, do you think we're going to make it out of this mess?
