

Can We Swap Out Americans For Foreigners to Maintain The Same Country?

“According to U.S. Senator Lindsey Graham (SC), you could take our entire population and swap it out for 320 million Chinese or Indians or Africans or Canadian or people from New Zealand, and the place would be no different, so long as the idea was still there,” Tucker Carlson of Fox News said. “Does anyone actually believe that?”

The United States houses 42 million foreign born in 2018. Demographic experts state that 100,000,000 (million) more immigrants will land on America’s shores within 30 years—at current immigration rates. Question: do you think we will survive those numbers as to water, energy, arable land, resources, environment and quality of life—and/or survive the most suppressed subject: sociological chaos from adding 100 million from different cultures, religions, world views and ethos?

One reader wrote, “I was in a discussion with a liberal friend of mine about illegal immigration and she proclaimed there should be open borders! Oh, I said, why’s that? She said people should be free to go as they please and come to this country as they please. Really, I said, well tell me... why do so many Mexicans want to come to the United States?

“She said for a better economic future and a better place to live. I said, ‘You mean it’s better here than Mexico... she said duh, of course it is. OK, I said... now tell me... why is that? She was a little surprised for a second then she said

well, they have a bad economy, no jobs, violence.....it’s full of slums. I see, I mulled that for a second or two then asked her... why is that? She said, I don’t know. I said.....when you do, come and talk to me about open borders.

“Mexico is the neighbor of one of the most affluent countries in the world in a rich region...it has two great oceans on either side, ports, natural resources, considerable population and tons of culture and history.....yet, it’s a s**t hole. Why? How come there is no automobile industry, no airliners produced there, no vibrant maritime shipping industry, a stable government, a history of law and order... why? Well, look at the US, we have all that and while we have violence, criminal activity, corruption and a government that is involved all over the world in political adventurism with our military... we still are a better place to live.

“Mexico uses illegal immigration as an economic and social relief valve. By allowing the teeming masses of unemployed, disgruntled or whatever Mexicans to migrate north they relieve themselves of some of the political pressure to change. How much more successful would stopping illegal immigration be if our trading partner to the south helped to enforce the border from their side?

“What if those deported for violating immigration laws were incarcerated upon their return to Mexico for a short stay in jail rather than being immediately free to find another coyote to take them across the Rio Grande? Simple answer is, Mexico likes illegal immigration.....a tribute and admission of their failed state and indictment of their leadership. Why is that?

“Now let’s assume that through mass immigration and the power of the vote, Mexicans succeed through invasion immigration in making the southern US into Norte Mexico? Do you think it would be the same successful region it is now??... look at the history of Latin countries.

“Do you see any of them being on a par with the United States? Answer is a resounding no. So, while Mexico remains the romantic homeland for many, it is in fact a failed state, racked by violence, organized crime and a dismal economy for most of its people. So, open borders? Tell me why we would want it here. As for immigration being good for this country, a small trickle of educated, talented or skilled from around the world that bring something to the competition would be good but, we have all the non-assimilating, uneducated, unskilled and not affiliated migrants we could ever want.

“After World War Two, Truman deported several million Mexicans to make jobs for returning US veterans. Just like you don’t drink your mother’s milk anymore, the days of needing open immigration are gone. We are in a new world with over 330 million Americans.”

You the American taxpayer shell out of your pocket \$296 billion annually for all immigration costs across 15 federal agencies. Immigrants send back \$120 billion of your dollars annually. They eat your schools alive. Los Angeles, Chicago, Miami, Detroit and more face failure. And we stand at \$20 trillion in debt nationally. (Source: www.NumbersUSA.org) At some point, all Americans must come to the reality of an added 100 million more immigrants, and do they want their kids

living in that population nightmare. If not, we need to change course by stopping all immigration into the United States.

Our children face this:

Share these videos all over America:

In a five minute astoundingly simple yet brilliant video, "[Immigration, Poverty, and Gum Balls](#)", Roy Beck, director of www.numbersusa.ORG, graphically illustrates the impact of overpopulation. Take five minutes to see for yourself:

["Immigration by the numbers—off the chart"](#) by Roy Beck

This 10-minute demonstration shows Americans the results of unending mass immigration on the quality of life and sustainability for future generations: in a few words, "Mind boggling!" www.NumbersUSA.org
