

It's Only Words...but...

Jews number only 16 million in a world population of eight billion. Just limiting the adjectives “smart” and “brilliant” to words – as opposed to science, technology, biotechnology, medicine, et al. – consider how many Jews have won the Nobel Prize in literature, the astounding number of Jews in the fields of advertising and public relations, the music industry, newspapers and publishers, TV, film and videos, and more.

The Strong Delusion of AI

There's no bottom to the depths of depravity to which mankind will go when they choose to live apart from God. We now mock the “Intelligent Design” of God's creation, yet find ourselves worshiping at the altar of Artificial Intelligence, choosing to believe the lie, while intentionally denying the truth. Truly, many now have been given over to depraved minds and strong delusion. God help us.

FP&L Rejects Citizen Requests for Lower Rate Adjustments

Therefore, Floridians are likely to suffer large rate increases over the next years, and be forced to pay for useless solar farms as the utility turns to its Green Scam

agenda. Solar farm spread also means less open land for recreation, wildlife and agriculture, of course.

Prosperity Requires Real Money, Not Fiat, CBDC, Crypto, nor the Federal Reserve

Money is the lifeblood of an Economy, and those who control money control the country, regardless of who is elected. The Federal Reserve Bank is privately-owned and responsible for ups and downs in the Economy. If gold and silver was used rather than fiat dollars, things would be more stable without inflation.

Americans' Quality of Life Jeopardized Due to Reduction of Refineries

In recent decades, no new refineries have been built in America. Building these projects is not only expensive but also fraught with environmental and political opposition, particularly with rising concerns over climate change and the transition to greener energy. These projects can experience

delays due to various factors, including financing, logistics, and regulatory hurdles.

The Fulfillment of the Prophecy of Elam (Iran) – Jeremiah 49:34-39

On March 14, 2024, Christian prophet Brandon Biggs prophesied and posted on social media that Donald Trump would receive an assassination attempt on his life, but the bullet would miss his head and it would strike his ear. He also saw Trump going on to win the presidency.

Palestinians: Victims of Islamic Delusion

Despite suffering huge losses at the hands of their enemies, the Jewish people remained resilient and outlived their tormentors. The pogroms in Russia, the ghettoization in much of Europe, and even genocidal Nazism failed to wipe out the Jews. But as this book demonstrates, the return and rebirth of the Jews to and in the Promised Land in 1948 did not mark the end of their ordeal.

It's Criminal for Congress to Spend Peoples Money on Unlawful Foreign Aid

Foreign Aid is unconstitutional and Criminal because there is no Enumerated Power authorizing it in the Supreme Law of the Land, our Constitution. Foreign Aid promotes and supports Wars, Bribes, Kickbacks, Revolutions, and generates worldwide hatred of America.

No Motor, No Fun

We reached Miner's Castle at the western end of the park. The view from the cliffs is one of Michigan's finest natural - attractions. The castle is actually a rock formation created by wind, water and waves. Anyone looking out over Lake Superior can't help but feel a sense of peace from down deep in his or her spirit.

Republican Woman Injured

Trying To Enter Lake County Meeting

Autumn Jacunski, a Lake County GOP Precinct Committee member, had her hand purposefully slammed in a door by Vice Chair Mike Trainor, as he tried to prevent her from entering a meeting last week in Leesburg. Ms. Jacunski hand was injured enough to force seeking medical treatment at an emergency room of a local hospital.

To Elect an America-Hating Communist to Office Is To Betray America

Again, they flee their war-torn nations, poverty, government abuse, etc., and then, while running for office here in America, they mean to establish the same un-American system of government from which they claimed that they needed asylum.

Ignorant, Foolish Democrat Herds Believe They Are Above

the Law

Attorney General Ken Paxton Continues to Urge the Supreme Court of Texas to Declare Rogue Democrats' Seats Vacant for Abandoning Office, August 21, 2025: Attorney General Ken Paxton filed his merits brief before the Supreme Court of Texas, presenting the legal grounds for declaring vacant the seats of the Democrat legislators who abandoned their duties and fled the state to break quorum.

Wisconsin Definition

Religious

I guess we can take the win, but personally, I want more. I want a court, a judiciary, an entire legal system, that follows the law and doesn't make it up for themselves as they see fit. That's why I cannot be satisfied with this court's decision.

Bobble-Heads . Lies

Lies, Lies and more Lies! The Democrat Party is unraveling boldly, without shame, right before our very eyes. Lying is now a behavior totally acceptable and expected as the norm throughout our government and businesses. So, when did the acceptance of lying become acceptable?

Texas Democrats Slink Back: Time to Lock Them Up and Throw Away the Key

The Texas Democrats who bolted from their duties like cowards in the night have finally crawled back to Austin, tails between their legs, ending a pathetic two-week tantrum over rightful Republican redistricting. These so-called lawmakers fled the state on August 3, 2025, to sabotage the GOP's ironclad plan to carve out five new congressional seats – seats that belong to the people of Texas, not to whining liberals desperate to cling to power.

It's all Downhill From Here, 'Cept What's Up

That's the way the snaking road treated me on Route 89 heading into Jerome, Arizona. What made it even more maddening was the incessant up and down—all that morning. By the time I reached the cobbled streets of the town, I was tired. It was hot and sticky from not taking a shower the night before. I stopped at a small park.

Trump is Right, We Live in Democrat Controlled Hell Holes

A few examples: we must ask the government's permission now to collect rain water, plant a garden, go fishing, own a property, start a business, build a home or do any type of home improvement, own a dog, drive a car, get married, own a weapon, go hunting, hold a rally and even set up a lemonade stand.

The Greatness of Humility

It is commonly accepted that those with significant wealth and power are the ones who keep the world running. While they do have a lot of influence, the truth is that it is the vast number of common folks who clean offices, remove the garbage, and maintain the distribution of food, water, and energy who do far more to preserve civilization and our way of life.

It Takes a Bunker To Hide the Evidence

Citizens are not happy about this library, either. Several acres of a formerly lovely park in Chicago were plowed under

to house this monstrosity. The \$850 million desecration of Jackson Park, on the city's south side destroys some of the outdoor space that is so scarce in South Side. Precious green space was destroyed.

Ding Dong the Witch is Dead

Don't send a preacher to do a warrior's job. You don't have to be a man of God to be God's man. Pray for President Trump's conversion. Stop expecting an unsaved man to do what our Cowardly Lion Pastor's won't.

Wind Turbines and Solar Panels ONLY Generate Electricity

Today, over 6,000 products derived from petroleum enrich our lives. They have reduced infant mortality, doubled global life expectancy from around 40 to over 80 years, and made it possible to travel anywhere in the world by plane, train, ship, or car—drastically reducing weather-related deaths to nearly zero. These were all unimaginable in societies before 1800.

Instauration Magazine

Kenny Rogers was “instrumental” in recording the libber anthem, “We are the World.” Loretta Lynn, Crystal Gayle (“Don’t it make my Brown Eyes Blue”), The Oak Ridge Boys, and Lee Greenwood conducted a fund-raiser for the repulsive terrorist and South African presidential candidate Nelson Mandela in both 1988 and 1992.

High Speed Chase

Nonetheless, it had been a good day. Red flowering cacti filled the air with their sweet scent and pink streaks sliced the heavens into sections while lighting up billowing thunderheads that boiled toward the sunlight. Their tails faded into the eastern darkness. Saucer-like clouds skidded across the sky to the south of me.

Election Fraud: Mid-Term Elections

One of the shadow governments greatest achievements is election fraud and mail-in-ballots have become their sledgehammer. Of course, the toxic Motor Voter of 1993 aka the National Voter Registration Act, was the first stepping stone. Us old timers fought like warriors to stop it but those who hate America with their millions and billions with the

help of the prostitute media defeated us.

Solar Energy Expansion Is Robbing Floridians Of Money and Land

It appears that Florida Power and Light is on that same “renewables” train along with other “social justice” warriors. Don’t forget their pledge in 2022: Net Zero by 2045. Did they close the hearings because they are afraid of the well-deserved blow-back about the costs and reliability of solar energy??? Is the Tallahassee cabal in concert with this, to hide the Globalist cloud overhanging the state?

State Sovereignty

Which came first, the states or the federal government? An even better question should be who created whom? Did the federal government create the states? No, the states created the federal government when they ratified the Constitution. So if the states are the “parents” of the federal government, why are they not sovereign over it?

Israel, Defender of the Free World

Unfortunately, the leaders of France, Canada, Germany, England and Australia aim to please their overwhelming population of Islamists. They are supporting the murderous intent of the enemies of civilization rather than standing by the one small country who is trying to save the free world.

Private Property Rights Are the Key to Freedom

Nearly an unlimited variety of government programs, schemes and tricks are employed to control land use and violate the concept of private property. There are international rules and treaties, federal regulations and programs, state projects, and local plans – many interconnected to one specific goal designed to change our society, form of government, and way of life.

Stan the Nomadic Road Warrior

Through the years, I've picked up pedal partners during my travels around the world. They've pedaled through 50 states with me for a glimpse of one of the wealthiest societies on the planet. Sometimes, they discover different aspects to the

United States of America than what they expected.

“Enlightened” Energy: Why Did Florida Power and Light (FPL) suspend Rate Hearings?

We know that power bills for ratepayers in Florida have escalated sharply in the last two years, and are scheduled for more of the same same in the next 4+ years. People are NOT happy, and have told FP&L AND Tallahassee just that.

An Attitude of Gratitude

There are so many sad, depressed and lonely people in our world today. They're not just pessimistic about the future, they're frightened of the present and overwhelmed with deep depression that they live with every day. For some, it's the loneliness from the loss of a loved one or a fractured family. For others, its fear of their financial situation or future.

Optimal Health is a Few Months Away – Just Start Somewhere

Find a functional doctor, a naturopathic doctor, a chiropractor trained in kinesiology and nutrition, or a good friend who walks in health and can give you sound counsel. Find sound health experts (not medical industry actors) and learn. Stop what's killing you, figure out how your vehicle was assembled and what works for it. You can have optimal health in a matter of months, you just have to start somewhere.

Taxpayer-funded Smithsonian Honors Pro-Russian Communist

We discovered that the longtime pro-Russian communist Angela Davis is currently being honored by the taxpayer-funded National Portrait Gallery of the Smithsonian Institution as a “luminary” whose “lifelong impassioned advocacy for those without a voice looms large.” The recipient of the Lenin Peace Prize, Davis was a Communist Party candidate for vice president of the United States when the CPUSA was funded by Moscow and provided cover for Soviet espionage activities.

Youth Sports and Character Development, Part I

At my first practice as Head Varsity Basketball Coach, I explain to the kids that it is a privilege, not a right to play on the basketball team, and that part of this privilege means they have to do the right thing on the court, in the classroom, and at home. As basketball players they are now leaders at the school and are expected to act that way. I explain that the type of leaders I expect are Servant Leaders.

Governor Newsom Has no Solutions How to Run California's Economy Without Crude Oil

California Governor Newsom remains unaware that electricity came AFTER oil, as ALL electrical generation methods from hydro, coal, natural gas, nuclear, wind, and solar are ALL built with the products, components, and equipment that are made from the oil derivatives manufactured from crude oil. Without Crude Oil there can be no Electricity!

Arrested for Having Too Much Fun

Heat waves rippled off the summer pavement while the blazing sun baked the land. Trees lined the highway, with crows and sparrows flying in all directions, but nowhere in particular. One crow was having a difficult time as four sparrows darted in on him, pecking at his feathers. Each time they attacked, he dove away from them.

Florida's Commander In Chief

A Commander in Chief has full knowledge of whatever goes on in his government, or should. The fact that Trump 45 did NOT, was because of the work of the Deep State, deeply buried in and around his administration. If DeSantis does not have knowledge of the goings on in Tallahassee, as he often insists, is he then acknowledging the active presence of Globalists in his own administration?

The American Dream, in Many Ways, Stands in Contrast to the Word of God!

If we reach what we call success here, then we have, in

essence, created a world with no need of the Living God. For those that might not yet fully understand, it would be little to do with the Lord and a whole lot to do with the world.

A Twisted Case Leads to a Twisted Decision

So why did the attorneys for Braidwood Management take such an odd and twisted approach to the illegal actions of the task force? Probably because courts have so twisted and ignored the Constitution they simply make up new rules as they need them, and that this was the best approach they thought they had. To me, that is a truly bad state of affairs.

My Name is Corruption – My Master is Greed

Keeping with the Obama Administration's mission to conduct the most diverse outreach campaign in history, the director of the U.S. Census Bureau is touring Mexican border towns with high illegal immigrant populations to personally assure that those who fill out questionnaires this spring will not be deported.

Explaining the Geyser of Jew Hate

We live in a world of eight-billion people, the vast majority of whom have never seen or spoken to or met a Jew...a Jew whose numbers comprise a microscopic 16 million, only half of that number in Israel, another approximate seven million in America, and about another million throughout the world. This represents less than an almost-invisible micro-droplet in the Atlantic Ocean.

Unearthing A Glorious History

James Madison, the fourth President of the United States, is considered the Father of our U.S. Constitution. Madison was the primary author of the First Amendment. He was President Thomas Jefferson's Secretary of State. Jefferson authored the Virginia Statute for Religious Freedom, and it was championed by Madison.

Walking Across America on His Hands

That summer of 1984, I pedaled through heavy traffic for the beginning of my coast to coast bicycle adventure. The Los Angeles smog choked me for 100 miles into the Mojave Desert.

After crossing the Colorado River, I breathed easier when the brown cloud flowed south toward Phoenix. I pedaled into cleaner air in the mountains.

Texas Republicans Unleash Hellfire on Gutless Democrat Deserters

Texas is under siege, not by invaders, but by gutless Democrats who fled like rats from a sinking ship, abandoning their posts to sabotage a righteous redistricting mission. More than 50 Democrat lawmakers bolted the state

The Great Conservative Hope in Canada

Looking back in history, recall that American Founding Father Thomas Jefferson had wanted to invade Canada. In a letter dated August 4, 1812, he referred to the “acquisition of Canada” being “a mere matter of marching” that will result in “the final expulsion of England from the American continent.”

Fear Not, the Cavalry Is Coming!

While the defenders, with their families behind them, sought to muster their courage, most of them saw the situation as hopeless and thought they would not live through the night. But Aragorn remembered the words Gandalf told him four days earlier at Edoras: "Look to my coming at first light on the fifth day. At dawn, look to the east."

Knowledge Increasing

I've read that in 1900, human knowledge doubled every 100 years. By the end of 1945, the rate had come down to every 25 years, and by 1982, our knowledge doubled every 13 months. I've also read that within the coming year, and through the use of Artificial Intelligence, which is rapidly expanding, human knowledge will double every twelve hours!

Orlando County Commissioners Threatened With Removal by Uthmeier/DeSantis Team

Donald Trump is, at this point in time, our best hope, I still believe. Donald John Trump is not perfect, he is our best and

only hope right now. He and his troops have enough with which to deal, without a “conservative Republican” of national fame lifting her leg on the whole mess at this point.

Data Centers: Monster Moves

If you live in an area where the water is controlled by a government or a government approved private entity, the control you have is limited. If you live where your water comes from a well, you know that water can become scarce in a drought, which limits you as well. In more recent years, we’ve seen water bans in communities of all sizes due to droughts.

From Sydney Sweeney Fiasco to Candace Owens: Have Both Completely Lost Their Minds?

That is where a lot of Zohran Mamdani’s support is coming from: not from hardcore Marxists, but from disillusioned people who did as they were told, and the promised benefits never materialized. It goes without saying that Mamdani’s proposed solutions would be disastrous.

Nuclear Power in a Free Enterprise Environment is the Pathway to Abundant Low-Cost Electricity

The rising cost of electricity is primarily due to the entrenched nature of utility monopolies, which restrict consumer choice and inhibit market competition. As the electricity demand steadily increases—driven by factors such as the proliferation of electric vehicles, population growth, and the rapid expansion of energy-intensive data and AI centers—electricity supply remains limited by outdated regulatory frameworks and market models.

Wonder of Bicycle Travel: Magic Moments

How about that moment this summer, pedaling with your friend on East River Road along the Yellowstone River, Montana headed south toward Yellowstone National Park? The western sky burned scorching orange colors into the thunderheads in the heavens at the end of the day.

When Socialists Become Jihad Communists

This omission is significant. In a major report for our group, former KGB officer Konstantin Preobrazhensky noted, “The communists have considered Islam their ally from the very beginning, because in the early 20th century, Islam was the religion of the ‘oppressed people.’ Support of Islam was considered a part of Russian-based anti-colonialism.”

When The FBI Is Used Against American Mothers (Video)

Recently, I had on the Sons of Liberty Radio one of the best guests that I have had in some time. Her name is Sherronna Bishop, aka America’s Mom. She is a constitutional conservative and patriot, who stood up to protect her children from harmful government policies.

One Small Win for Parents’ Rights

At least for now, the children in the MCPS will be protected from the sexualization and indoctrination the Board attempted to force on them over the objection of the parents. I pray

that the court's prediction comes true, and that this type of indoctrination is exposed for the evil it is.

Will RFK, Jr. Stop the Lies and Unnecessary Killing of Our Food Supply?

I'll tell you something else. I live in W. Texas in what's known as the Permian Basin. While the 'Bird Flu' hysteria was pumped and dumped on the nightly snooze (that would be the propaganda machine called a TV and their "news" programs; I haven't owned one in almost ten years), the cost of eggs here remained about the same as usual at the HEB where I usually shop.

Pam's Poison Fetish

Attorney General Pam Bondi and EPA Administrator, Lee Zeldin are working with the chemical association to appeal this ruling. Pam Bondi was a registered lobbyist with the Washington, D.C.-based firm Ballard Partners and has represented wealthy special interests and foreign governments, including Qatar and a refrigerant company with ties to China.

Eudaimonia: That Perfect Moment in Your Life

Hopefully, you ride your bike into 'eudaimonia' moments that bring a smile to your soul, face or spirit. Each eudaimonia instant offers you creative engagement, emotional uplift and a sense of your common bond with all. Life on this planet. Let's make the 'Roaring Twenties' of the 21st century a bicycle phenomenon for all people on Earth.

People Are Beginning to SEE!!

The RPOF is still trying to hide who they are. In their latest letter to Dorisamy, they grouped the Reclaim Campaign with Planned Parenthood and the League of Women Voters! That is, with those who kill babies and help with election fraud. (see VOTESCAM, by the Collier Brothers for the history of LWV's assistance there.)

'Rage and Vain Things'

There IS hope, but you MUST take this seriously now. TURN BACK, people! Remember God, and if we seek Him in true sorrowful repentance, He will hear from heaven and have mercy on us. He IS merciful and gracious and full of love for those who truly seek Him. But time is short. RIGHT NOW is your time of decision.

Electricity Generated From Wind and Solar Cannot Replace Fossil Fuels!

Understanding how energy systems work is key to smart decisions. Fossil fuels are not just fuels—they're essential inputs for modern economies. Renewables alone can't replace them. Without public awareness of these realities, policies risk being shaped by ideology rather than practicality.

Social Justice, Destruction of Property Rights, and Government Tyranny, Part 1

As our nation now moves toward the celebration of our 250th birthday, to save our Republic it's urgent that American citizens unite to demand an answer from our locally elected representatives, who do you represent – the citizens who elected them or powerful special interests armed with a destructive agenda?

An Alachua County “Plum”

I am SOO sick of this kind of thing. Leftists mouthing off about their hatred for good moral people, and their support of violence and/or institutionalized ignorance or illegal activities (voter fraud comes to mind...). I would like to see this anti-American squirm in front of cameras, at the very least.

Radical Diehard Muslim Candidates are the Threat to Freedom

The solution is not negotiation or appeasement – it's resistance. Americans must reject Muslim candidates at the ballot box, not out of prejudice but out of survival. Every vote for them is a vote for Sharia, a vote for the end of freedom. The Constitution is not a suggestion; it's a fortress, and we must defend it with unrelenting fury.
