

Climate Emergency To Produce a Global Government aka New World Order

By Cliff Kincaid

September 1, 2023

It's no surprise that the Communist Party USA is promoting the September 17th [March to End Fossil Fuels](#) in New York City. Anything which weakens the United States is on their agenda. Meanwhile, the march is being held in conjunction with the U.N. [Climate Ambition Summit](#), "the goal of which is to get world leaders to phase out fossil fuels." This "goal," if achieved, would destroy the United States.

In the same way the United Nations is demanding trillions in reparations from the United States over slavery, the U.N. will be demanding trillions in "climate reparations" over capitalism. In fact, a "[loss and damage](#)" fund has already been established to collect the money.

Ironically, out-of-towners are told to review the travel and logistics page for buses, trains, and carpools, in order to get to the New York City rally. The last time I checked, these modes of transportation used energy, including fossil fuels.

What we have developing is a communist group timing a march in conjunction with the activities of a communist-front organization, the United Nations. Founded by Soviet spy Alger Hiss, we call the U.N. the House that Hiss built.

If conservatives were smart, they would dump all the talk about impeaching Joe and Hunter over their convoluted bribery schemes and instead focus on the price of gas and other necessities caused by their green policies and inflation of the currency. This is something ordinary Americans understand.

The March to End Fossil Fuels is designed to bankrupt the middle class.

In addition to the “green energy” policies being imposed by the federal government, as Biden prepares to use emergency powers, the “progressive” states are moving ahead rapidly as well with their own policies.

Maryland State Delegate Mark Fisher reports that Maryland passed the [Climate Solutions Now Act of 2022](#) and will begin public hearings “to clamp-down on generators, refrigerators, farm animals – you name it.”

For those who think communism is dead, I would suggest examining what the CPUSA and other groups are doing these days. When they protest fossil fuels, their strategy is designed to make life harder for the “workers” they say they represent. They want to create more suffering. That, in their view, would help spark a revolution. On a global basis, they want a global government under the control of China and Russia.

In order to mask the communist nature of this one-world government, Pope Francis will assume a central role.

Under this pope, the Vatican has taken a strange turn, at odds with the anti-communism of Pope John Paul II and now functioning as an integral part of the international Left. The “liberation theology” movement and the reverence for the “Spirit of Gaia” or “Mother Earth” in the name of environmentalism have now assumed prominence under Francis, the first Jesuit pope.

Like the FBI, Francis has recently been [attacking](#) traditional Catholics who believe in sustaining moral values, such as opposition to abortion and preserving the nuclear family.

Taking the orders of Francis, the group Catholic Climate Covenant sponsored a “Laudato Si’ and the U.S. Catholic Church” [conference](#) with Creighton University that began with an opening speech by former U.N. official Christiana Figueres and ended by recognizing 13 individuals and organizations with Laudato Si’ Champion Awards.

Francis’s environmental encyclical “Laudato Si: On Care for our Common Home,” cites the mystical views of Pierre Teilhard de Chardin, a notorious New Ager described by Wallace Johnson, the author of *The Death Of Evolution*, as “a bridge between Christians and Marxists.”

Figueres was Executive Secretary of the United Nations Framework Convention on Climate Change (UNFCCC) 2010-2016.

We all know that the “Green Agenda” is benefitting Russia, with its vast oil reserves, but not as much attention has been given to how it works on behalf of Communist China. The benefits to China are summarized in an important new [report](#), “Where Green Meets Red: How the Environmental Agenda is Making America Dependent on China.”

The book, [Red Roots, Green Shoots](#), explains how “Marxist environmentalism” is driving the hysteria over “climate change.” The author was the first chair of the Commission on Environment of the CPUSA.

Of course, the scheduled New York City rally is not the first “climate march” to occur in the U.S. When President Trump was elected in 2016, a “[People’s Climate March](#)” was held, in order to stop his America First energy policies.

The [climate change scam](#), originally called “global warming,” was designed by Russia after the “collapse” of the old Soviet

Union gave rise to the notion that the world could come together as one. It is one of the great Soviet/Russian deceptions.

The upcoming New York City march will be joined by scores of communist and socialist groups, including the Ecosocialist Working group, which is part of the New York City Chapter of the Democratic Socialists of America (DSA).

It's tempting to laugh at these climate protesters, as they use fossil fuels to get to their rallies.

But many are desperate people under the influence of "green" dope, warning about a "climate collapse" that requires civil disobedience and violent tactics. You are beginning to see these people blocking traffic on the roads and highways.

Adding to the hysteria, the establishment journal foreign Affairs warns that "[The Age of Climate Disaster Is Here](#)." The author, Alice Hill, is the David M. Rubenstein Senior Fellow for Energy and the Environment at the Council on Foreign Relations and the author of *The Fight for Climate After COVID-19*.

You get the idea. So-called climate lockdowns will necessarily follow the COVID lockdowns.

Before our YouTube channel was censored, we aired a program on how the New Age Movement could use Pope Francis as their "Messiah" for purposes of influence or control in what has been called a New World Order.

The New Age Movement is very real, but except for the Marxist Jim Jones cult, whose followers committed mass suicide in Guyana, and Hollywood-based Scientology, we get very little attention or coverage of it.

The U.N.'s brand of religion can be seen in the fact that a few blocks from the U.N. is the [Quest Book Shop](#), where U.N.

officials gather to meditate and read material from the Theosophical Society. Founded by a Russian mystic named Helena Petrovna Blavatsky (1831–1891), who wrote *The Secret Doctrine*, Theosophy teaches that man can become God through mystical experiences, and can even perform miracles.

An occult Theosophist group called the Lucis Trust is in charge of the United Nations Meditation Room, where U.N. officials communicate with Mother Earth or other “spiritual” entities.
