

Clueless People = Complicit People

By Kat Stansell

June 10, 2023

If the past is the prologue to our future, why are so many still clueless as to where we're heading?

What has happened to this country since 2020 leaves no room for doubt. Our country is under attack, and at the edge of a totalitarian abyss.

Lady Liberty needs every American to help save her. Americans have been complacently enjoying their many freedoms since our boys returned from WWII. The joy of peace time and the return of loved ones made America almost lightheaded. Levittowns (those first suburban housing developments in the early 50's) were built and babies were born – LOTS of babies; that was the beginning of the "Baby Boom". America entered into a consumer economy, driven by relief and hope, that this would be our last war, and that the blessings bestowed on us by our Creator could be enjoyed in peace.

Voting became a civic duty, which we did automatically, thinking we were being good citizens. We went to the polls dutifully, having little idea about the beliefs and track records of the candidates for whom we were voting. If they broke their promises we groused as we watched the news, then forgot about it. We failed to demand that they adhere to their oaths of office to protect and defend that great document that provided all those lovely freedoms we so enjoyed.

We became complacent in our abundance, and complacency kills countries. We see that more every day. Years of this has led to what we have today. Our Constitutional Republic has been being destroyed, while we've sat back and enjoyed the fruits of our labors without getting involved in our governance.

Since we are responsible for this mess, it is our job to fix it if we want to continue as a free people. That cannot be done from our keyboards and couches. Patriotism is an out-the-door activity, literally and figuratively.

* * *

How often have we said to ourselves...“if I'd only known then what I know now”. . . ? Hindsight is always 20/20. Looking back in time gives us perfect vision of what went down, and what we should have done differently. What follows is a view backwards, from the looking glass, and thoughts on how we can best stand against what is happening to us.

* * *

The stolen election of 2020 was a Coup, an illegal seizure of power. It's plain to see. The facts are irrefutable. Jan. 6 began the Purge, which always follows a Coup, of those the illegal government feared most, and it continues to this day. Since Jan., 2021, the government has shredded our laws, politicized the courts, given favor to criminals while attacking and jailing the innocent, and damaged our children's minds and health. Our “elected” representatives do not represent our wishes. Our schools have become indoctrination camps where history is fiction, math doesn't “add up” and following the science is a joke. Parents who object to the teaching of gender dysphoria, or treatments and procedures on our children without parental consent, are arrested and treated as criminals – not the ones being set free. Where America was once the leader in military strength, educational achievement, healthcare and personal freedoms, we are no

longer.

Our food and fuel supplies are being shut down and our real estate market is largely impacted by foreign nationals operating at Black Rock and Vanguard.

Our strategic petroleum reserves are down 29% in one year (June, 2022 – June 2023). As recently as March of 2020, our DOE purchased 77 million barrels to ADD to the reserves, to help compensate for price drops due to over-supply. Guess who was calling which shots.

<https://www.crsreports.congress.gov>.

Inflation, intentionally caused, has given financial pain to many. We're being told we can't cook on gas stoves, or drive vehicles that have combustion engines. This is our free country?

We were masked, shut down, poisoned and lied to by the multi-billion dollar drug industry in cahoots with our government. We have wasted billions in Ukraine, covering up for the Clinton, Biden and Obama Crime families, while we weaken our own military. To add insult to injury, our own tax dollars are being used to fund our destruction!

Now, we are being told that we will own nothing and be happy about it.

How can anyone not see this??

When we lose our freedom, everyone is going to lose their freedom. EVERYONE, regardless of age or political preferences, will be treated the same. That is what communism is all about. The "great equality" means that NO ONE, no matter how smart or rich, tough or meek, will have the chance to make free choices about anything.

Everyone will be trapped in the legislated equity of a totalitarian society. Food and energy consumption will be regulated, and both will be in short supply. Millions will die, as has always happened, throughout recorded history, when communism takes over a country.

Those who cannot see, after all the obvious warnings that flash in our eyes daily are, frankly, clueless, which makes them complicit, as they are helping the Globalist powers that want America gone, by not doing all they can to stand against them.

* * *

If you want to get into action, it is NOT too late, and there are many things you can be doing in your own county or town. Forget about DC for now. They've not listened to us in a lot of years; we have no power there.

Here's what we CAN do, where we do have power:

*Know your local councilmen and other elected officials. Go to school board and town/county council meetings. Speak up. Question what they are doing. Find out their policy for accepting citizen input on agenda items. Can you get something onto the meeting agenda? If so, DO IT. (Note: in previous research, I have learned that the farther left is your area, the less willing they are to hear from citizens. Surprise, surprise...right?)

*Ask each elected sheriff, or local state rep/senator to make a public statement that they support their oath of office. Make it a simple questionnaire format, and spread the word on their responses. If they won't or don't respond, publicize that everywhere.

*Get trained to be a poll worker for the next election. Volunteer to work on local election integrity, and/or DONATE to those who are giving up their savings and livelihoods to

prove the truth.

*Learn the parallel hand-count process which is bi- partisan and FREE to the states. It verifies the machine count in real time at elections, without even touching the ballots. Help to get your state, counties or even precincts to PARTICIPATE in this effort, which is THE most important thing we can do to save our elections at this point. Volunteer for this in your precinct. For all those election officials that swear by the accuracy of their machines, this should be the ideal way for them to prove it. If they refuse, you know they have something to hide.

*Become a legislative watchdog in a field of your interest or expertise, and learn to use your state's legislative information system online, to follow bills: who sponsors/introduces them, its movement through committees, and who "horse trades" with whom and on which issues. Every states needs at least one good citizen who will follows bills and report out on their findings.

*For the very committed, you can even learn the ropes on how to become a candidate!

There is training and information on all this and more, and I will be bringing it to you, very soon, in my Substack or podcasts. Because election integrity is the sine qua non of issues in this country, I'll be starting there. Just get ready to get ready, and don't give up.

Don't ever, ever give up.

If our young American soldiers could do it – against all odds – on the beaches of Normandy in WWII, 79 years ago, we can still do it today. The deck was stacked against us then, as it is now. We were supposed to lose then, just like we are, today. But, we are proud Americans who love our freedom above all else, and we CAN win this, perhaps against all odds, again. With the help of our Creator, and each other, we CAN do

this. Please help. Your family and your country need you desperately.

As Thomas Jefferson told us, if a government fears its citizens, there is liberty. We must make them worry about us and the power we have together.

Join your neighbors in the battle for America. Get off the couch and out the door. We have a country to save!
