

Cognitively, Physically, and Ethically Unfit for the Presidency of the United States: Joe Biden

By Frosty Wooldridge

June 5, 2023

Several weeks ago, pushing her wheelchair, aides brought 90-year-old U.S. Senator Diane Feinstein (D-CA), back to her office after several months of recuperation from a debilitating bout with shingles, ongoing dementia and other maladies besetting her advanced age. She can barely see out of one eye as her eyelids droop beyond repair. She may be indicative of the breakdown of America's representative governance.

Out in Pennsylvania, heart disease and severe stroke victim U.S. Senator John Fetterman (D-PA), walked into the Senate chambers wearing a hoodie and pair of shorts after three months in a hospital for deep depression and other mental ailments. His mind cannot understand questions...so he needs a computer to decipher what's being asked in order to answer. His all-democrat base elected him not because of his scant qualifications, but because he was a democrat. Fetterman has not and clearly cannot function as a U.S. senator. He may be another indication of the breakdown of America's representative governance.

Last week, during the commencement speech at the Air Force

Academy near my home, 80-year-old Joe Biden (D-DE), suffering from Alzheimer's Disease and/or some form of dementia, with growing physical and cognitive decline, tripped on the stage before falling onto the wooden planks near the podium. Horrified aides hauled him back up to his feet before guiding him back to his seat. The 900 graduating Air Force Cadets gasped that their Commander in Chief read the entire speech from a teleprompter...that at the end told him to exit the podium "stage left." With his body and mind failing him, Joe Biden continues to stagger forward into each day...not knowing the day of the week.

What's VERY disconcerting stems from the fact that his wife knew he suffered from cognitive decline back in 2019 when she urged him to run a third time for the presidency of the United States. His aides all know that he suffers from severe cognitive decline in 2023, yet not a whisper out of any of them as he runs for a second term in the next 19 months.

How do I know the signs of Biden's dementia? Answer: he mis-speaks, can't remember names, forgets entire sentences, stumbles, cannot remember something 30 seconds after being told...just like my wife who suffers from Alzheimer's Disease. I wouldn't support my wife for president of the local PTA. She would be incapable of serving. At the same time, I take care of her 24/7 with heart, hugs, attention, love and everything to make her feel joy in this world.

The big question: why are Biden's wife and those aides along with the entire mainstream media covering up the fact that the current president of the United States, Joe Biden, is totally unfit for the office of the presidency? He's a danger to himself, our country and the future of America. Another peril stems from the fact that "someone" is running this country, making huge decisions that affect all of us, and we didn't elect them, don't know who they are or what their intentions.

Texas GOP Rep. Ronny Jackson, MD, a former White House

physician to three presidents, is continuing to raise flags over Biden's health, concluding that he is "not fit mentally or physically" after the president fell on stage Thursday during a commencement ceremony at the U.S. Air Force Academy.

"I don't wanna' sound like a broken record, but I'm going to say it again: This man's not fit mentally or physically to be our president, and it's a bad situation for us."

Jackson said during a Friday evening appearance on Fox News Channel's 'Hannity.' "Part of the job of the President of the United States is to inspire confidence and project power, and he's not doing that. He can't do that, he's too old to do that, and I think it's a shame."

The many gaffes and the recent fall he endured show that Biden, according to Jackson, "Is offering a package that doesn't sell around the world. It's becoming a national security issue for us. We have to do something about it."

Physically, he looks like a walking cadaver. He shakes hands with the air after a speech. He must be physically guided at White House functions and foreign summits. He nearly took a nosedive down a flight of concrete steps at the G-7 summit. He embarrasses himself and our country every time he speaks without a teleprompter.

If a majority of the American people re-elect Biden to give him four more years to the age of 86, it's almost a sure bet that he will suffer a stroke, heart attack, cancer and/or serious fall that could end up as a concussion. That event could very well happen in the next 19 months. His exit from the White House would upgrade the worst Vice President in the history of America into the Oval Office...Kamala Harris. Not picked for her qualifications, but for the fact she was a woman and person of color. She is the ultimate in "Inclusion, Equity, Diversity" that's destroying our formerly "merit-based" society.

Ethically, Joe Biden has lied, cheated and deceived everyone during his lifetime. He didn't want his children bussed into a "racial jungle" aka, integrated schools back in 1970. He voted against Civil Rights for blacks. He lied about his college degrees. He plagiarized throughout his career. He put his hands on and sniffed little girls' hair in front of cameras for decades.

While Vice President, he used his weight to get his pervert of a son, Hunter Biden, a \$50,000.00 a month position on a Ukrainian oil company's board of directors. Usually in a cocaine stupor, Hunter Biden would not know an oil derrick from a John Deere tractor.

When it comes to "ethics" and swearing on the Bible to uphold and defend the U.S. Constitution, Joe Biden has broken his oath every day for the past 28 months. He illegally invited into our country at least 7 to 8 million illegal alien border jumpers. He's invited Mexican drug cartels to pour their poisons into our youth to the tune of over 170,000 deaths in the past 28 months...that's 300 drug-overdose-deaths PER DAY. Biden has created sex trafficking, child labor and drug addictions in our young. He's responsible for the surge in \$94.1 billion in shoplifting, annually.

Biden stands in violation of Article IV, Section 4 of the U.S. Constitution. He also violates U.S. Code 8, Section 1324 in that he won't enforce our laws. These are impeachable offences.

His lack of "ethics" has overwhelmed our schools, hospitals and cities. We're seeing San Francisco, LA, Portland, Seattle, Chicago, St. Louis, Detroit, and NYC being destroyed by criminals that are set free within hours of arrest. His ethics oversee over 100,000 homeless in California who camp out, drug-up, and destroy city streets and businesses. All those drugs flood over our unprotected borders. Is anyone thanking Joe Biden for this nightmare? Ironically, 38 percent

(approval rating) of Americans think he's doing a good job! That 38 percent must be among the 45 million functionally illiterate Americans on welfare, food stamps and Section 8 Housing.

Like the people of California who voted for Feinstein when she was clearly in need of being put out to pasture...why did they vote her in again? Like the people of Pennsylvania, why did they vote such incompetence and physically, a heart attack/stroke person into the U.S. Senate in Fetterman? Fetterman's opponent, Dr. Oz stood like a skyscraper over a mud hut in intelligence and ability to represent Pennsylvania over Fetterman. Yet, the voters chose a mud hut. They got one, too. What happened to common sense in America?

Why is the mainstream press covering for this president who is clearly in the grips of Alzheimer's Disease and/or some form of dementia? Why haven't our elected officials enacted the 25th Amendment to send him to an assisted living home? Why hasn't the mainstream media reported to the American people what is actually happening in the White House?

When will democrats and republicans in Washington DC stand up for our country? Let's quit the charade! If they won't stand up, what kind of a national nightmare awaits us?
