

Corruption Of Congress: UAW Forces Us Into Stack and Pack Housing Without Autos

By Andrew Wallace

November 29, 2023

Congress, UAW Leadership and Auto Companies have proven by their actions to be Enemies of the people and a Criminal Enterprise.

OUR CONSTITUTION PROVES IT

They are demanding that Americans buy expensive electric vehicles (EV) that most can't afford (even with the government subsidies). If the people could afford them we lack the capacity to produce and deliver the electricity required. EV sales promote imports from China that has the raw materials for the batteries. EVs have limited use.

The end result of forcing Americans to buy EVs which most don't want and can't afford would be to totally destroy the American Dream of home ownership and private transportation.

It would also destroy the American automobile Industry. These criminals want to force us to live in dangerous and dirty Stack and Pack Public Housing like they now have in Communist Democrat cities. No wonder that people now living in Stack and Pack public housing spend a good bit of their time in looting, shooting and crime.

As an aside, the new CBDC digital currency will not allow you

to carry pocket cash (it won't exist) and when electricity goes off you can't buy anything. We can't allow this instant slavery Unless the people really stand up quickly the Parasitic Super Rich Ruling Class (PSRRC) , which is the largest and most powerful criminal enterprise in the world will have enslaved us.

Many refer to it as the deep state, swamp, establishment etc. But I prefer to use a more descriptive definition of this criminal enterprise as the " Parasitic Super Rich Ruling Class "(PSRRC). It consists of the wealthiest families who own stock that controls corporate directors who in turn order corporate officers to bribe everyone else to do their bidding. Subservient Minions to the PSRRC are of course woke corporations, government, academia, military flag officers and anyone subject to their power and money. Remember the minions are only well bribed followers of the PSRRC.

Companies like Black Rock, State Street, et al. are maybe the most powerful examples of the PSRRC. The Tax Free Foundations are also part of the PSRRC. Effectively, these families and organizations control the world. There is nothing mysterious about it.

Those in the PSRRC are the "New World Order" people who say "we should own nothing and be happy" and they will rule the world.

In order to do this they must subjugate and impoverish the people. They have done a damn fine job of destroying us by usurping our Constitutional Republic It has been a gradual process, like the frog in water. The beginning of the end of the Republic was in 1913, "the Year of Infamy". This is when they passed legislation for Income Taxes, Tax Free Foundations and the unconstitutional privately owned Federal Reserve Bank.

A majority of federal government legislation and actions are unconstitutional.

This means that they are mostly ruling with no legal basis for much of what they do. Our Constitution is the Supreme Law of the Land and it is mostly ignored by the PSRRC and their minions in both parties.

Congress is elected by the people and the UAW Officers are elected by their members and there is little doubt that both have sold out their constituents.

How else could they refuse Tariff protection that would have kept well paid jobs in the United States? And now they are going to allow the layoff of 117,000 workers to produce EVs that will move us into dirty and dangerous Stack and Pack public housing using public transportation and no cars of any kind. They know that since China has the required raw materials America will soon produce no EVs

You ask why the American auto industry would commit suicide?

The officers and directors have a fiduciary responsibility to the stockholders but they take orders from the directors elected by key stockholders who don't give a damn about the company. But there has been some justice, officers that followed woke policies that reduced stock prices and income are being sued by stock holders.

There are two major woke concepts that are contrary to our Constitution and have resulted in starvation when fully implemented.

They are ESG (Environmental, Social and Governance) and DOE (Diversity, Equity and Inclusion) They have also forced these concepts on our military with devastating results. Because of this social engineering the military can't get enough qualified recruits and may have to resort to the draft.

The Constitution absolutely does not give the Federal Government the power or authority to force automobile manufacturers to build specific cars or to require them to

function with specified MPG (miles per Gallon)

There is no authority in Constitution for federal government to protect the environment, none.

The Federal government's powers are severally limited to those specified in the Enumerated Powers which they violate on a massive basis. In other words it is mostly a criminal enterprise to transfer the peoples wealth to the PSRRC and there minions.

Much of what federal government does is unconstitutional and therefore in violation of the Supreme Law of the Land.

Why did Congress, UAW Leaders and Automobile Companies allow government to take away the American dream of home ownership, private transportation and force us to live in dangerous stack and pack public housing in the near term? Twenty five percent of all housing units are owned and rented by corporations. I think there is only one conclusion. they are all minions of the PSRRC, money is their God and to hell with the people and the Republic.

When I write on serious Constitutional Issues I ask Joanna Martin JD a nationally known expert on Constitutional Law for her opinion. (visit her blog: [Publius Huldah Blog](#)) Following is her unedited response. I'll ask you.

Cite Article, Section, and Clause of the US Constitution which authorizes the federal government to involve itself in environmental protection.

There was a role for a Department of the Interior to manage the territories described at Article IV, Section 3, clause 2; but "territories" does NOT include lands illegally held by the federal gov't for national parks, national forests, oil fields, etc.

When the Constitution was drafted, the "territory belonging to

the United States” was the NorthWest Territory which the United States acquired as a result of our War for Independence. but that NW Territory has been long since divided up into States.

Pursuant to Article I, Sec. 8, next to last clause, the US may legally hold the federal lands purchased by them with the Consent of the States to carry out the enumerated powers. e.g., the fed gov't. may own post offices, dock yards, military bases, federal courthouses, land for the US Mint, etc.; and they have constitutional authority to exercise general legislative powers over those specific areas.

What Article, Section & clause authorize the federal government to set mileage requirements for cars?

What Article, Section, and Clause authorize the federal gov't. to require that automobiles be EVs?

Surely you know that the fed gov't's authority over the Country at Large is limited to the enumerated powers listed in our Constitution!”

May God Bless You and the Republic
