

Corruption Of Our Leaders—Can We Solve What’s Happening To America?

Part 2: Asks questions about our leaders’ endemic corruption, lack of action and just plain not serving the American people.

As you look across the American landscape, you see an array of zany people screaming in the streets about things they don’t like. When President Trump took office, Madonna threatened to blow up the White House. Actress Ashley Judd warned that more “nasty women” would disrupt the halls of Congress. Women openly wept and screamed at the top of their lungs, “He’s not my president!”

Actors Robert De Niro and Rosie O’Donnell openly called for impeachment of the president before he spent a day in the White House. Women marched by the hundreds of thousands against a legally elected president of the United States.

In fact, Dr. Christine Ford, who accused Supreme Court Justice Brett Kavanaugh of rape just days before his confirmation, walked down the streets of Washington DC with a sign that read, “Not my president!”

Within the past two weeks, she accused Supreme Court Justice Brett Kavanaugh of attempted rape 36 years ago. No proof, no collaboration, but she galvanized America into loss of “due process of law” that a person must be “guilty by accusation” rather than innocent until proven guilty.

While we face horrific challenges in this country, most people give a pass to the members of our U.S. Congress for their extraordinary lack of serving the American people. Additionally, governors, mayors and city councils across America fail their constituents 24/7 on endless issues that

need solving.

While Mayor Rahm Emanuel of Chicago defends, supports and enables hundreds of thousands of illegal aliens in that

sanctuary city, he watches legal African-American citizens fall prey to mass murders, horrible schools, lack of housing, lack of jobs, and failing health care systems. Chicago surpassed Detroit as America's murder capitol.

Same goes for the last mayor of San Francisco who warned illegal aliens when ICE raids would occur. Additionally, that same mayor, a woman, would not stop sanctuary city status after Kate Steinle suffered a brutal murder by an illegal alien who had been deported five times. Then, a jury found him not guilty! He walked free!

California's Governor Jerry Brown offers sanctuary to over 4,000,000 (million) illegal aliens that work in underground economies, send their kids to our schools, take free medical care and enjoy food stamps on the taxpayers' backs.

At the same time, mayors and city councils of 240 cities offer sanctuary for millions of people who violated our borders and

live in the USA in violation of our laws. They cheat, lie and steal from our system. They undermine our schools and our kids' educations. They send cash transfers of \$120 billion annually back to their home countries. Yet, they cost U.S. taxpayers in excess of \$296,000,000,000.00 (billion) annually across 15 different federal agencies. (Source: "Costs of Illegal Aliens" www.NumbersUSA.org)

Did you notice that the main stream media tells us that only 11 million illegal aliens inhabit America? Guess what, latest reports show 22 to 25 million illegal aliens run around our country in violation of our laws. They undermine our rule of law, our borders, our language, our culture and our way of life. What does our U.S. Congress and leaders do? They aid, assist, support and abet all 22 million illegal aliens against the wishes of the American people.

Schumer, Pelosi, Hudson, Waters, Bennet, Gardner, Graham, Hickenlooper, Emanuel, Flake, Hatch, De Blasio, Snider, Hancock and hundreds more make America safe for illegal aliens.

All the while, we taxpayers face \$21 trillion in federal debt.

While we paid for \$7 trillion in the Afghanistan-Iraq wars, our water mains break at 23,000 annually in cities across America. We desperately need a total reconstruction of our cities infrastructure, but we can't afford it.

Those same Congressional critters gave us a \$1.5 trillion trade deficit to China. We're a debtor nation.

Our infrastructure crumbles like dried sawdust as to bridges, roadways and buildings across America, yet our leader wage ridiculous and endless across the world 24/7.

Most Americans don't realize that they pay for 700 military bases in 80 countries around the world with 450,000 military personnel pretty much twiddling their thumbs. Why? Can you

think of an answer?

And why pray-tell, do we pay for 48,000,000 (million) people siphoning our taxes for food stamps, year after year, decade after decade? Why don't we enforce workfare for welfare? Doesn't it seem logical, rational and prudent to train people to become productive citizens rather than watch TV all day while eating pizza—on your dollars?

While schools in Chicago, New York City, Atlanta, Miami, Los Angeles must teach somewhere between 1 and 2 million illegal alien kids with our money, our kids must contend with hundreds of different languages being imported into America every year. In my city of Denver, Colorado, our teachers must teach to 173 different languages. How do you do that and not harm our kids' educations?

While each of us toils on the job, 350,000 pregnant women jump our borders annually and birth their "anchor baby" to lock them into the American Dream of free food, housing, medical and schooling for the next 18 years of their child's dependency on the American taxpayer.

Guess what, your two senators, and House member won't stop it, change it or improve it. They won't pass a bill or take action. That's why this nightmare continues.

Are the leaders of America corrupt or what? Are we crazy for re-electing them year after year, or what?
