

Could Mail-in Ballots Help Trump Win?

By: Devvy

Last week President Trump unleashed another zinger which drove the shadow government's MSM pimps into another round of conniption fits. It also elicited the usual vomit from parasites like Pelosi, Chuckie Schumer and other jackals in the Democrat/Communist Party USA. Even white-collar criminal, 77-year old dementia addled Joe Biden worked his way through the cobwebs in his cranium to bark Trump might try to delay the election!

Paid liars on CNN, MSNBC and various "news" papers *all had the same talking points* over Trump's comment that mail-in ballots would on a universal scale produce the most inaccurate and fraudulent election in history. Perhaps delay the election until people can vote safely and securely, he said. The meltdowns were a joy to watch!

Safe, secure and accurate counting of the votes is something Democrats and global elites absolutely do not want.

Trump knew when he sent that tweet he has no power to change the date of the general election this November. He does these blurbs to plant the seeds about corruption – especially now regarding a fair election. Naturally it sets off the vermin on the boob tube, liberals (socialists) and progressives (communists) in print media on line.

I've been writing about vote fraud since 1993. So many

columns I can't list them all. I wrote a short 44 pg booklet in 1998, *Blind Loyalty*; I sold 700,000 copies *at cost*. My booklet exposed page after page after page of proven vote fraud by machines as well as human cheaters out to win at any cost.

I will for the sake of those who have missed my other columns give you a prime example of how it's done. On primary night in my run for the U.S. House, March 26, 1996, despite being behind only 5-7% points behind Rep. Waffle Wally Herger two weeks before the primary and no scandals, my race was called at 8:01 pm – one minute after the polls closed and *no votes counted*: **86-14** in favor of Herger.

The Secty of state stopped counting at around 6:00 am. The numbers never changed. Additionally, in the **largest county** in the district I went to vote **my name wasn't even on the ballot!** We had to write in my name. I was in shock but there was nothing I could do. I had the certificate from the Secretary of State proving I was eligible to be on the ballot.

While my race was called at 8:01 pm, *the county clerk's office didn't even get the ballots until as much as four hours later.*

Check these winners/losers that night: **85-15, 81-18, 85-15, 81-18, 85-15, 86-14, 87-13, 81-18 and 86-14** which was my race. Those were the results for a few incumbents vs challengers for the U.S. House throughout the state of California. Every incumbent, including Herger, all voted for NAFTA. All challengers including me were opposed to that unconstitutional, destructive 'agreement'. Wonder why we all allegedly lost?

Those house seats were scattered all over the state of California. Unless you're specifically looking at a particular race, in a state the size of California or Texas, **people don't put together the pattern, but it sure as hell is there.**

The perception in my run was that the voters in that district

overwhelmingly approved of Herger's voting record which they did NOT. My support was firm and widespread. The morning after the primary a woman called my office to tell me she worked at a precinct in a smaller county.

When she came in primary night, she observed ballots spread all over the table in a back room instead of in sealed boxes which is the law. She was told to mind her own business and go back to work. I didn't ask her if she voted for me, just would she swear to it an affidavit which she replied, yes.

The Republican Secretary of State refused to look at my case after I filed a formal complaint. Republican Bill Jones was Secty of State in California at the time. His goal was "100 percent participation but zero tolerance for voter fraud". Empty words when it came to my race.

In violation of state law ballots were taken out of the secured boxes in a back room before transporting them to the county clerk for counting but Jones didn't give a damn. I didn't have the money at the time to sue or pay for a recount in such a huge district. That's when I left the Republican Party and have remained no party since.

Let me tell you another race where an incumbent was ousted by cheating. Very popular incumbent "B-1 Bob" Doran [R-CA] back in 1998 ran against Loretta Sanchez. He allegedly lost. "A task force found 748 votes that had been cast illegally—624 from non-citizens in addition to 124 that had already been thrown out by California officials."

Non-citizens meaning illegal aliens. Like his opponent, Sanchez. Long story short, I went to Lynwood, Calif., where Sanchez was allegedly born. No birth certificate to be found anywhere. Back to Sacramento, ordered up a copy of her birth certificate that didn't exist and three long weeks later, well, a copy came in the mail. Mind you, while at the records office of births for California in Sacramento there was no BC

for her to be found yet one magically appears three weeks later in the mail.

The National Voter Registration Act of 1993, aka the Motor Voter Act, signed into law by globalist Billy Clinton was a gigantic open invitation for vote fraud. How we patriots fought against it but the American people en masse remained silent. Recently ballot harvesting has been used which I believe enabled the Democrats to take back control of the US House.

States dominated by elected Democrats have been successful in making sure voters need provide no proof they are U.S. citizens which is obscene. Democrats need illegal aliens voting to stay in power.

This is evil: [Kobach: The Tenth Circuit Wrongly Strikes Down Kansas's Proof-of-Citizenship Election Requirement](#), April 29, 2020 – Judicial activism at it's worst and an open invitation for illegal aliens and non-citizens here legally to vote in OUR elections.

Ballot harvesting must be killed. There's no solid chain of security. Those of us fighting vote fraud all these decades – specifically ANY electronic machines and counting machines – were floored when learning about ballot harvesting.

Ballot harvesting is collecting and submitting mail-in ballots by third party individuals, either paid workers or volunteers instead of the ballots being submitted by the individual voter at ballot collection sites. It should be banned in all states. Kudos to Florida: [GOP Wins Court Case, Keeping Florida Ballot Harvesting Ban in Place](#), July 19, 2020 – A huge blow to Democrats in that state.

Illegal aliens have NO right to be on U.S. soil. They have NO right to vote in our elections but were given the green light via the Motor Voter Act, ballot harvesting and now mail-in ballots.

[Nearly 2 million non-citizen Hispanics illegally registered to vote](#), Feb. 15, 2017 – They can't bring themselves to say illegal aliens. Trump named globalist Mike Pence to head up a vote fraud task force. "He says he wants the investigation to focus on inaccurate voter registration rolls, which are maintained by the states and the District of Columbia."

In January of 2018, that task force was shut down. Why? "President Trump dismantled his controversial voter fraud commission as the group faced lawsuits, oppositions from states and fighting among its members." **Why should investigating vote fraud be considered controversial?** No doubt about lawsuits filed by the American Communist Lawyers Union (ACLU) and *blue states who depend on vote fraud to win*. Hell, it's already underway again with some caught and prosecuted:

We know the Democrats have taken ballots to people in nursing homes who, due to issues like dementia, should not be allowed to vote. My mom has advanced dementia so I fully understand, but during career criminal Billy Clinton’s run – proven – volunteers would actually hold the hand and pen of a voter and mark boxes on the ballot for a person nearly comatose.

Tech giants are working to defeat Trump. MAKE NO MISTAKE ABOUT THAT. Congress has diddled for years instead of reigning in big tech giants over their blatant censorship and now at the 11th hour, they will be powerless to stop them from in-your-face interfering with our elections.

The Democrats are busy right now putting together legal teams in key states to challenge Trump's win if (and pray he does) he is declared the winner Nov. 3rd.

As I said in [my column last week](#), this is the kill shot for the shadow government and their plans to finally cement a world government destroying our sovereign nation once and for all.

The only thing standing in their way is Donald Trump, losing control of the House and keeping a Republican majority in the Senate.

This means Trump needs our help. So do incumbents who've won their primaries from governors to local mayors.

The biggest mistake ever made was using voting and counting machines which are so easy to hack as has been proven over DECADES. The American people wanted fast-food style elections and so here we are drowning in fraud.

But, could mail-in ballots backfire and actually help Trump win in November?

I believe so but only if done right. Paper ballots hand counted in front of the public with voter registration card/forms and sign-in logs analyzed is the ONLY way to guarantee a fair election – not just for the presidency but also critically important are seats in the U.S. House and

Senate as well as governors, state reps and senators.

Democrats and cash cows like George Soros believe they're going to lose the election unless they can steal it. Don't tell me all Democrats in this country are fine with the rioting, looting, killing and their Democrat governors and mayors who've destroyed their economy and bankrupted so many over COVID-19 are going to reward them in Nov. Thinking Democrats can also see Biden is a pathetic old man with advancing dementia.

We all know the fiasco over 'hanging chads' during the race between George W. Bush and Al Gore (bechev). What a farce. In the case of mail-in ballots, **we now have the actual ballots and can blow vote fraud wide open.**

One must have a game plan and this goes for national as well as local elections. It's a shame less than 1% of challengers ever bother to challenge the outcome of an election because if they did conduct a forensic analysis, massive vote fraud via machines would have blown up that whole scam decades ago.

No question if President Trump allegedly loses in states which allow ballot harvesting and mail-in votes a forensic analysis of the vote MUST be done. That means comparing voter registration cards against incoming ballots. Demand mail-in ballots be hand counted in front of witnesses and compare them to voter registration rolls (people voting twice as well as a voter who married and did not change her name on the voter registration card receiving two ballots).

Compare the number of registered voters by district to the number of mail-in ballots sent out, sent back and those collected via ballot harvesting. Check number of eligible voters in the state and then add up the alleged number of

votes counted. Check the person's registration card for party affiliation and then check the mail-in and absentee ballot to make sure party affiliation wasn't altered.

Call your county Republican headquarters (if you don't know who, call your county clerk and they can tell you) and volunteer to help. I don't care if it takes a month to count every absentee and mail-in ballot, Biden must not be allowed to steal this election or we are toast.

GET INVOLVED. FIREWALL: [Group Launches Nationwide Effort to Stop Democrat Election Fraud](#), June 17, 2020. Also, [True the Vote](#) is an excellent organization. GET INVOLVED NOW. Trump and his legal teams can't do it all. THIS IS OUR ELECTION and by God, We the People must make sure it isn't stolen. Again.

There you have it. What I've presented is just a drop in the bucket or this column would be 100 pages long. It's now up to us.
