

COVID-19: Why Are American Scientists Silent on This?

By: Devvy

I want to refer back to my July 12, 2021, column, [COVID-19 Not a Virus: Can Any Scientist Prove Dr. Stefan Lanka Wrong?](#)

Genetics falsifies thesis of existence

“In the trial, the results of research into so-called genetic fingerprints of alleged measles virus have been introduced. Two recognized laboratories, including the world’s largest and leading genetic Institute, arrived at exactly the same results independently. The results prove that the authors of the six publications in the measles virus case were wrong, and as a direct result all measles virologists are still wrong today: They have misinterpreted ordinary constituents of cells as part of the suspected measles virus.

“Because of this error, during decades of consensus building process, normal cell constituents were mentally assembled into a model of a measles virus. To this day, an actual structure that corresponds to this model has been found neither in a human, nor in an animal. With the results of the genetic tests, all thesis of existence of measles virus has been scientifically disproved.

“The authors of the six publications and all other persons involved, did not realize the error because they violated the fundamental scientific duty, which is the need to work “legeartis”, i.e. in accordance with internationally defined rules and best practice of science. They did not carry out any

control experiments. **Control experiments would have protected authors and mankind from this momentous error.** This error became the basis of belief in the existence of any disease-causing viruses. The expert appointed by the court, Prof. Dr. Podbielski, answering to the relevant question by the court, as per page 7 of the protocol explicitly confirmed that the authors did not conduct any control experiments.”

The gold standard for identifying a virus has been Koch's Postulates which a lot of Americans now know about because of COVID-19. Hell, I can cite Koch's Postulates in my sleep I've done so much research on this science. Koch, enjoyed fame as a microbiologist for what became known as Koch's Postulates in identifying a virus. Friedrich Loeffler partnered with Koch for this scientific discovery way back in 1884, some 133 years ago. Not the first time this field of science was being developed. Koch and Friedrich leaned heavily on earlier research by a German doctor specializing in pathology and anatomy, Friedrich Gustave Jakob Henle.

From day one this mysterious “new novel” coronavirus was labeled that and remains today as a virus allegedly released from a bioweapons lab in Wuhan, China. Then along comes scientists and researchers who state no one can prove – not the CDC or any other government or health agency or lab in the world – including the Koch Institute in Germany has a purified isolated particles specimen of that virus.

Coronavirus', SARS-CoV-2?

Fast forward to 2017 and along comes Dr. Stefan Lanka, another German molecular biologist. Lanka has never said measles doesn't exist as a disease. His research focused on: Is it a virus? Now, is this furphy or a proven scientific conclusion? One would think American scientists would be interested in either debating Dr. Lanka on this or even conduct their own controlled experiments to prove him right or wrong.

Apparently not because after that trial the only mention of it was nothing but smear pieces by media in several countries. Other scientists calling him a quack, anti-vaxxer and all the usual labels. Dr. Lanka is no first-year biology or virology student. He's been in his field for decades. It's been almost four years since Lanka's trial (not criminal, he prevailed) and I can find no where any scientific challenge by scientists either here in the U.S. or other countries to either prove Lanka wrong or that he is right. Why is that? The answer is simple: **Because it puts 137 years of science on its head. Because we're talking gazillions of billions of dollars for vaccine manufacturers and research grants for labs and universities.**

I found this to be very helpful in distinguishing the difference between a disease and a virus: [Disease vs. Virus: What Is the Difference?](#) Under common diseases it lists cancer. Cancer is not treated with a vaccine. It also lists shingles. [According to the CDC](#), shingles is a virus and conveniently, there's a vaccine for it. Rubella or German Measles aka the three-day measles is allegedly a virus. If Dr. Lanka's scientific research holds, they're not viruses, either. Quite a conundrum.

Parents across this country continue to be forced to have their child get a measles vaccine when the child may not need it. Those parents who choose not to are vilified and told

they are selfish. Same crap going on now. And, measles continues to be called a virus:

[A safe and highly efficacious measles virus-based vaccine expressing SARS-CoV-2 stabilized prefusion spike](#), March 23, 2021. “Competing interest statement: The Ohio State University has filed an invention report for the measles **virus**-based SARS-CoV-2 vaccine platform.” Cha-ching!

[Researchers Clarify Why Measles Doesn't Evolve to Escape Immunity](#) – “Unlike SARS-CoV-2, which mutated into new strains in its first year as a human disease-causing **virus**, measles **virus** does not mutate in a comparable way.” Perhaps Miguel Ángel Muñoz-Alía at the Mayo Clinic might want to discuss measles being a virus with Dr. Stefan Lanka.

When I was a kid, you got the measles you stayed home from school. No vaccine. Natural immune system kicks in and fights it off. Yeah, kids get it and have longer than I've been alive. The key is keeping children healthy (diet, exercise) where today, tragically, pediatric diabetes continues to rise as countless young children are mildly fat to outright obese.

I believe civil discussions and even collaboration in the world of science is a very good thing – especially considering how far the world of science and technology has come over the past **137** years since Robert Koch developed the four-criteria process known as Koch's Postulates.

One particular disease Lanka focused on as have so many other scientists is HIV. Like millions of others, over the decades I've read my fair share about that terrible disease. The one book I highly recommend is: [Fauci: The Bernie Madoff of Science and the HIV Ponzi Scheme that Concealed the Chronic Fatigue Syndrome Epidemic](#), March 23, 2020. It's short and precise. [The author of that book](#) is also no lightweight.

In this era of vaccine mania, one would think measles is as

deadly as Ebola which is the one to really fear. The numbers are all over the place but by June 13, 2019, there were 1,044 reported cases of measles. Reported being a key word. No deaths. Yes, deaths do occur attributed to measles but, like this COVID-19, was the death due solely to measles or were there existing comorbidities?

Speaking of vaccine mania, there's another book by award-winning journalist, Torsten Engelbrecht, **I highly recommend**. Not because one is an anti-vaxxer which I am not. But because I believe there's just too much money in vaccines that may or may not be safe or effective. [Virus Mania: How the Medical Industry Continually Invents Epidemics, Making Billion-Dollar Profits At Our Expense](#)

"The central aim of this book is to steer the discussion back to a real scientific debate and put medicine back on the path of an impartial analysis of the facts. It will put medical experiments, clinical trials, statistics and government policies under the microscope, revealing that the people charged with protecting our health and safety have deviated from this path. To substantiate these statements, the authors cite dozens of highly renowned scientists and present approximately 1,100 pertinent scientific references.

"The topic of this book is of pivotal significance. The pharmaceutical companies and top scientists rake in enormous sums of money by attacking germs and the media boosts its audience ratings and circulations with sensationalized reporting (the coverage of the *New York Times* and *Der Spiegel* are specifically analyzed). **"The primary purpose of commercially-funded clinical research is to maximize financial return on investment, not health,"** says John Abramson of **Harvard Medical School**. Virus Mania will inform you on how such an environment took root-and how to empower yourself for a healthy life."

I've watched several hours of video and read every article and

interview I could find on Dr. Lanka. It is a lot of reading but as I've said repeatedly, one must take the time to fully understand all this science and the bigger picture regarding this SARS-CoV-2 nightmare. Not easy for me as I've had to constantly look up words like pathogens and all the other 14-letter words. When you buy a bicycle, it comes with instructions so you can figure out how to put it together. Same thing with this kind of research.

[Virologist Dr Stefan Lanka Files Charge Against German 'Government Virologist for Corona' for Crimes Against Humanity](#), June 22, 2020 – “Thus, at this point, a publication about the existence of the measles virus that stands the test of good science has yet to be delivered.

“Furthermore, at the trial it was noted that contrary to its legal remit as per §4 Infection Protection Act (IfSG) the Robert Koch Institute (RKI), the highest German authority in the field of infectious diseases, has failed to perform tests for the alleged measles virus and to publish these. The RKI claims that it made internal studies on the measles virus, however, refuses to hand over or publish the results.”

Why not? Why have no American scientists challenged his conclusions? I would think – and America has highly educated, highly experienced scientists in every field imaginable – some of them would be interested in challenging Dr. Lanka. But, there's a lot of grant and research money we're talking about in the scientific world. Just like the cancer industry.

[Dr Stefan Lanka Debunks Pictures of "Isolated Viruses"](#) – “For almost one year we have been asking authorities, politicians and medical institutes for the scientific evidence for the existence of such viruses that are said to cause disease and therefore require “immunization”.

“After almost one year we have not received even one concrete answer which provides evidence for the existence of those

“vaccine-preventable viruses”. **The conclusion is inevitable that our children are still vaccinated on the basis of scientific standards of the 18th and 19th century.** In the 19th century Robert Koch demanded in his generally accepted postulates evidence of the virus in order to prove infection; at Koch’s time this evidence couldn’t be achieved directly by visualization and characterization of the viruses, because adequate technology wasn’t available at that time. Methods of modern medicine have profoundly changed over the past 60 years, in particular by the invention of the electron microscope, yet all these viruses we get immunized against have still never been re-examined using this technology?”

Like TV shows solving murders. The killer was finally identified 20 years later using his DNA which wasn’t available at the time the murder took place.

If Dr. Lanka is correct, SARS-CoV-2 is also not a virus. [Dr. Stefan Lanka: “All claims about viruses as pathogens are false”](#), June 17, 2021. Now, can any American scientists prove him wrong? This is critically important. I am very interested in this because of where we are today with people dying at alarming rates after those experimental injections being passed off as vaccines.

COVID-19 injections are NOT effective. [Scientist Sounds Alarm: COVID Vaccines Producing Symptoms of Parkinson’s, Other Neurodegenerative Disorders](#) –“Immunologist and former NIH scientist J. Bart Classen analyzed data on COVID vaccine adverse events reported to the UK’s Yellow Card system and found thousands of reports of multiple symptoms that are “clear signals” of neurodegenerative disorders.” July 21, 2021

Dr. Peter McCullough, who initially supported the COVID injections, has now changed his mind: [DR PETER Mccullough – Urgent Warning About Poisonous Jabs](#) – “Dr. Peter McCullough MD is a Professor at Texas A & M College of Medicine, President, Cardiorenal Society of America, Editor-in-Chief, Reviews in

Cardiovascular Medicine, Senior Associate Editor, American Journal of Cardiology and others. He has written 46 peer-reviewed publications on COVID-19 and is considered among the world's experts on the topic, testifying in the US Senate Committee on Homeland Security and Governmental Affairs in November 2020, and throughout 2021 in the Texas Senate Committee on Health and Human Services, in the Colorado General Assembly, and in the New Hampshire Senate, concerning many aspects of the pandemic response...**"I think if we had had a data and safety monitoring board, they would have shut down the vaccine in February of 2021."**

People receiving those injections allegedly continue to get COVID-19 – in huge numbers. Of course, I would estimate 90% of them are tested using a PCR test as that is the "gold standard" for SARS-C-oV-2. A test the inventor, Kary Mullins, said should *not* be used as a diagnostic tool for infectious diseases as it's a manufacturing technique.

Now, added to the soup is a variant, Delta, allegedly coming out of India. Oh, wait! As I said in my column last week: They'll be endless "new" variants and sure enough two days later: Houston Methodist Hospital says they have its first case of the latest COVID variant, Lambda coming out of Peru. 731 people in the U.S. now have this alleged new variant. Keep 'em coming, keep people scared enough to get a vaccine that isn't a vaccine while desperately trying to hide the carnage from those injections. Most side effects are mild, go ahead get the shot. My God, this poor woman: [Julie Ann Nobles: Colorado woman develops Bell's Palsy, uncontrollable convulsions after experimental Moderna mRNA injection](#) – “She ended up in the emergency room 45 minutes after the injection because she was unable to swallow anything. Doctors gave her steroids and Benadryl, and sent her home. But three days later, she experienced excruciating neck pain, followed by facial numbness. By May 19, she was paralyzed on the right side of her body. Doctors performed a battery of tests and ruled out a stroke. Mrs. Nobles praised God that the diagnosis was “only Bell's Palsy.”

“Unfortunately, her condition worsened from there. Mr. Ben Nobles, Julie's husband, said on May 26 that his wife was diagnosed with Functional Neurological Disorder (FND). The COVID Blog calls the condition “Shawn Skelton Syndrome,” named after the first person we covered who display these symptoms. Julie started having uncontrollable convulsions and extreme difficulty walking.”

[Top epidemiologist: CDC undercounting vaccinated COVID cases – 'It's a fallacy'](#), “The CDC contends that only a small percentage of people in the United States who have been vaccinated will get COVID-19 – called “breakthrough cases” – but a leading epidemiologist argues that's **because the agency stopped counting the breakthrough cases of people who didn't die or were not hospitalized.**”

“Some months ago the CDC stopped counting breakthrough cases ... the large numbers of cases in people who had been vaccinated,” said Dr. Harvey Risch of the Yale School of Medicine in an interview Monday with Fox News’ Laura Ingraham. “So, of course, those cases don’t register for the CDC’s counts, and so the great proportion [of cases] that they’re claiming are in unvaccinated people,” Risch said. “And that fallacy is why the U.S. and the CDC’s count is different from than Israel or the UK. It’s a fallacy.”

“On Tuesday, Britain’s chief scientific adviser said 40% of people who have been hospitalized with COVID-19 were fully vaccinated. Sir Patrick Vallance told a news briefing that the figure was not surprising “because the vaccines are not 100% effective,” Britain’s Sky News reported.”

[Dr. Charles Hoffe Reveals Blood Clots in Majority of Vaccinated Patients and Speaks of “Permanently-Damaged Hearts”](#), July 21, 2021 – **“This Vaccine is Quite Clearly More Dangerous Than COVID-19”** – “Dr. Hoffe sent an open letter shortly after in April 2021 to the Provincial Health Officer in BC enumerating all his concerns and questions, something he describes on the Laura Lynn and Friends show (video linked below). In his letter he mentions the ruination of lives of patients now reporting chronic pain, neuromuscular weakness, serious neurological problems, and questions the continuing of the vaccine, when “this vaccine is quite clearly more dangerous than Covid-19...8. So my last question is this: Is it medically ethical to continue this vaccine rollout, in view of the severity of these life altering side-effects, after just the first shot? In Lytton, BC, we have an incidence of 1 in 225 of severe life altering side-effects, from this experimental gene modification therapy.”

Dr. Charles Hoffe has found **62%** of his patients experienced elevated D-dimer levels after the vaccine. He’s administered over 900 doses. Dr. Hoffe did his own research to try and find out why his patients were exhibiting micro-blood clotting

after getting one of those injections. [This is a must watch short video](#). **This is a very frightening prediction: Those who took the injection likely will die within three years.**

Lawsuits

Doe is the CMS employee who has sworn under oath her statements are the truth: Based on her long professional career, she states patient deaths within 3 days of the jab “would indicate the true number of vaccine related deaths was at least 45,000.” [See here](#).

I’m not shocked. Governors and politicians of all stripes are NOT going to be able to hide this slaughter much longer. And speaking of longer, I'm sorry this column is so long but people are dying, being permanently disabled, teens dying from Myocarditis or their lives changed drastically with a life-long heart problem. Vax manufacturers are pushing hard to get approval to start shooting up children. Time is of the essence and it's up to We the People to **demand**— and I mean by the tens of thousands to governors— Stop all COVID injections now.

I have sent another package to Sen. Bob Hall and six other members of the Health & Safety Committee here in Texas telling them they had best sit down with Gov.
