

Danger: Gulen charter schools and the Fethullah Gulen movement Pt. 2

Watch this little one with care, filled with God, and great in worth;

Babes, before they come to birth, shine above in azure air.

God in bounty gives us this, they are sent to us on earth,

All his wisdom in their mirth, all his mercy in their kiss. –Victor Hugo

Knowing how we have been misled by those we trusted hurts, especially from people like the Bush Clan who most Republicans blindly put a great deal of faith, time and money into.

Knowing there are those who are going to support a person no matter what, hurts more.

This information has been researched and reported by many and has even been in our courts, so please read and help us remove the Gülen Charter schools and the entire movement from our shores and bring awareness as to our governments involvement in changing the world thru the hidden efforts of the CIA and world leaders.

In addition to his schools in the US, Gülen has schools and Madrasas (Arabic word for educational institutions) all over the world. His Madrasas were outlawed in countries like Russia and Uzbekistan and his schools were under investigation in the [Netherlands](#). Plus, the origin of his immense wealth, which he uses to open and operate these schools all over the world, is unclear. As proven previously a great deal of it is American tax \$\$.

The CIA's **Graham Fuller**, former handler of Fethullah Gülen, is currently one of the top American experts on Turkey and the Middle East. As a former CIA agent it was HE who endorsed Gülen to be allowed to not only enter the U.S., but take up

residence in the Poconos Mountains, start over 100+ Charter schools collecting our tax dollars in the process along with the freedom to indoctrinate our children.

One of the frequently discussed issues in contemporary Turkey is the political influence of “The Gülen Movement,” (Hizmet) or the religious network inspired by the teachings of Fethullah Gülen. Almost all observers including the FBI agree that the movement needs to be taken as a serious “radical threat”. The very fact that one part the U.S. government gave this man permanent residency in our country claiming him to be an excellent scholar, while the rest of the country including the FBI look at Gülen for what he is – a “radical Muslim” while using our children and working within the confines and protection of our government is treasonous to me.

In an interview last year Fuller was asked if the U.S. would be sending Gülen back to Turkey as Prime Minister Erdogan had asked and Fuller basically stated Erdogan has no proof of any of the charges against Gülen and he would be staying in the US – Obama agreed.

With the very large role Fuller played in bringing Gülen to the U.S. (and keeping him here) he still fails to admit the dangers the Gülen schools and movement is placing on Americans within their very borders. Could this be because of Fuller’s link to other “radical” Muslims? You betcha!

In my previous article I explained his role in the Gülen “invasion” and now interesting facts are coming out in regard to how and when Gülen actually started working for the CIA.

Some Americans (especially in Washington) are upset with Wikileaks for the information he has released. I am not as I consider most of what he released was informing “we the people” of the back door maneuvers of our government and most of them against us – their main enemy.

Some of the information released contained details on US

unease over Gülen's operations with the classified documents recounting U.S. officials' growing concern over the large numbers of Turkish men seeking H-1B visas to work at American charter schools founded and funded by Fethullah Gülen and OUR tax \$\$.

✖ Turkeys" consular officials had noticed that most of these applicants share a common characteristic – they are generally evasive about their purpose of travel to the US. One destination for visa holders was the Truebright Science Academy, a charter school founded in North Philly by followers of Gülen. An analysis of H1-B visas conducted by the Inquirer showed that the number granted for Gülen charter schools has grown substantially since that 2006 report. More than **2,500** have been issued since 2007. The acting chief executive at Truebright, Tansu Cidav, has declined to discuss the school's operation. State pension records show Turkish staffers at Truebright are paid more than their American counterparts. In the last school year, a Turkish math teacher who was not certified and spoke little English was paid \$54,000; a certified American science teacher was paid \$40,200. Keep in mind ALL Gülen workers including teachers are to give back 40% of their pay check which is then in turn given to one of the Gülen Foundations. That's an additional \$2,160 a year of OUR tax dollars funding GÜLEN!

TrueBright was refused a renewal of their contract and closed in December, 2014 because of numerous "failures": failure to meet academic goals, lack of a defined curriculum, failure to attract students from its catchment area, not offering world languages or Advanced Placement courses as promised.

TrueBright since its opening had not only been part of FBI and Dept. of Labor investigations but sued by several American employees alleging discrimination.

Another perfect example of the system not following up on the certification of teachers working in Charter schools and their unelected school boards. They are pleased to be able to offer

these people less money and no benefits until caught (Teach for America teachers?) Most non-American teachers at the Gülen schools are uncertified in this country and here on the H-1B non-immigrant status visas. One-third of this schools teachers alone were from Turkey.

The reason they need to use so many H-1B visas is they bring over a person and they work for 6 months then they let them go and bring in a replacement. The first person then just stays in the US if and when forced to leave. Most are not!

Am I the only one here screaming at the parents who complain their children cannot understand most of the Turkish teachers? Then why in the heck (I am being nice) is your child in that school??? Didn't you tour it or talk to anyone there before enrolling your child? Talk about putting the cart before the horse!

Can you believe the president of TrueBright's unelected parent/teachers association was a minister – Rev. James W. Wright, Sr., who stated he had no knowledge that the school administration had lied about the number of seniors who had graduated from the school – they said 50 students and it was only 33.

Now the real wake-up call!

Former top CIA official **Graham Fuller** spent 20 years as operations officer in Turkey, Lebanon, Saudi Arabia, Yemen, Afghanistan, and Hong Kong. In 1982 Fuller was appointed the National Intelligence Officer for Near East and South Asia at the CIA, and in 1986, under Ronald Reagan, he became the Vice-Chairman of the National Intelligence Council, with overall responsibility for national level strategic forecasting.

Following the days of the Boston bombings a brand new name began to emerge – Ruslan Tsarnaev. Discovered to be the bomber's uncle, he became known to the press as Uncle Ruslan. "Ruslan" gained notoriety for the ferocity with which he

denounced his own nephews and their alleged Islamic radicalism. He said all the right things the right way to the “authorities”. But wait – who is this guy anyway?

Uncle Ruslan, a lawyer, and his nephews and their family are from Chechnya! They are Russian Muslims!

As more information came to light about these brothers we find they had worked with the CIA/USAID and they were working and living at the home of none other than our reported **Graham Fuller**, strong proponent of political Islam, inspiration for the Iran-Contra affair, character reference on more than one occasion for Gülen, former Rand Corp. analyst and former FATHER-IN-LAW to Uncle Ruslan. Oops!

Fuller was also the senior CIA person who was the architect of the Afghan Islamic fundamentalist Mujahideen war against the Soviets and he was also involved in creating a global jihad network, presumably acting on behalf of CIA interests.

Are Americans to still believe the CIA is not behind the increase of “radical Islam” in this country?

Yessir its true – Graham Fuller’s daughter Samantha Fuller had married Ruslan Tsarnaev (who has changed his name to Ruslan Tsarni) and he is the uncle of Tamerlane and Dzhokhar Tsarnaev, the Boston Bombers. Ruslan and Samantha Fuller were married in the early 1990’s and divorced sometime in 2004.

More than a little embarrassed, Fuller spoke to the press claiming Ruslan was “homesick” for Chechnya and that his English was “shaky”. Yet a few days later a very English-fluent Ruslan gave his press conference from his very affluent Maryland home denouncing his nephews to the world.

In 1995, Ruslan Tsarnaev incorporated the Congress of Chechen International Organizations in Maryland, using on the incorporation documents the very same address as Fuller’s home

address in Rockville Maryland. Tsarnaev also at one time worked for one of the Dick Cheney's Halliburton shell companies used as a front to obtain oil contracts from the Kazakhstan government and in 2005 was also working for the CIA/USAID which is part of the State Dept. and actually a front for the CIA allowing access to an array of places around the globe.

(USAID were the ones responsible through the Centre for Applied Nonviolent Action and Strategies (Canvas) who took Middle East students and trained them in readiness for the 'Arab Spring'. CANVAS is part-funded and supported by globalist foundations like George Soros's Freedom House and Open Society Institute, as well as CIA-linked National Endowment for Democracy and, of course, the full frontal USAID – our \$\$.)

Through the investigation of the Boston Bombings, Fuller continued to state it was “absurd” to try and link the CIA to the Boston bombings. Really?

In addition, Fuller has long made the argument that Islam is a potentially useful geopolitical tool for the United States to manipulate for their own use. He has been quoted as saying, “The policy of guiding the evolution of Islam and of helping them against our adversaries worked marvelously well in Afghanistan against the Russians. The same doctrines can still be used to destabilize what remains of Russian power, and especially to counter the Chinese influence in Central Asia.”

Tamerlane and Dzhokhar came to the US in 2003 with their parents and sisters. In early 2011 Russian officials asked the FBI to look after Tamerlane's activities. “The request stated that it was based on information that he was a follower of radical Islam and a strong believer, and that he had changed drastically since 2010 as he prepared to leave the United States for travel to the country's (Russia) region to join unspecified underground groups.”

The summer of 2011 interview of Tamerlane and his family didn't reveal any problems according to the FBI. In January 2012 Tamerlane returned to Russia for 6 months and supposition is that he spent that time with Chechen Islamic rebels. His father claims he never left the US.

I might be a female, but when I went to school the object was to have you learn and become smarter – not like today where you are to leave after 12 years of schooling as a “dumbed down” indoctrinated shell! The CIA has its name tagged all over many dirty dealings which include things done inside and outside the US which have and continue to affect our lives and not necessarily in a good way.

Imam Gülen's “movement” is described as “religiously-inspired” and some refer to Gülen as a scholar, however he only attended school through the 5th grade, but he seems to have smart enough people under him running his several hundred educational organizations such as K-12 schools, universities, and language schools (mostly English) that have been established around the world, mainly in Central Asia, Caucasus, Balkans, and 146 Charter schools in the U.S. You understand, Gülen claims he has NOTHING personally to do with the schools or foundations. But, isn't Islam a religion?

How did he receive his U.S. residency status while he was 'wanted' by the then Turkish Government, is no longer a mystery. Now, this man owns and operates charter schools all across America obtaining our tax dollars through various foundations despite the fact his Madrasas were outlawed in countries like Russia and Uzbekistan.

Of course, Secretary of State Hillary Clinton helped in the establishment of the Turkish Gülen Charter Schools and the Gülen Movement in the US with a brokered deal to split the revenue from the sale of the oil captured in Iraq by ISIS

Radical Islamic Terrorists, a deal made between Prime Minister Erdogan's and Gülen's factions in Turkey and overseen by the CIA. The captured oil was subsequently driven to the Turkish border in oil truck caravans to be sold by Prime Minister Erdogan's son. For using her good offices to help Gülen, Clinton was paid an estimated \$1 million with half going to the Clinton Family Foundation and half to the Clinton Presidential Campaign (payment to a political campaign by a foreigner is in violation of US Federal Campaign Laws). "So what difference does it make?"

Never forget that "a poor man's war is terrorism while a rich man's terrorism is war" – and sometimes those lines cross for the purposes of big-power politics.

Anyone wishing to form a national coalition to remove all Fethullah Gulen activities from the U.S. may contact me at info@americaismyname.org
