

Detransitioned Teens: Regret for the Rest of Their Lives

By: Devvy

November 18, 2024

Humans are born with two biological sexes: Male and female. No amount of puberty blockers, teachers secretly encouraging KIDS they are not the biological sex they are born with and they should “trans”; social media encouraging young girls they’re really a boy. Cut off your breasts and never have children.

The same propaganda being promoted on social media sites only they and the prostitute media (with some exceptions) forget to tell confused young boys, girls, teens or their parents the long-term consequences of *what is being done to their bodies that is irreversible*.

This transgender “cult” has swept across this country over the past decade like a tornado. Right along with the NONSENSE of addressing a person using silly pronouns. “Hi, I’m the/they glad to meet you.” Employers have been sued for not addressing someone who needs mental health treatment to determine why that person does not want to use their name but rather “pronoun(s)”.

This country has seen the grossly unfair practice of allowing males who “identify” as female participate in women’s sports and by all means, get them into the women’s dressing rooms! Girls and young women work and train just as hard as males but have been cheated out of scholarships and wins because some

guy now says he's a trans girl. Men and women ARE different physically. There is NOTHING "fair" or "inclusive" about allowing biological males compete with women.

[Bill Maher lambasts liberals for defending trans inclusion in women's sports, praises Seth Moulton](#), Nov. 16, 2024: "The United Nations released study findings that say nearly 900 biological females have been denied medals in "sports because they were beaten out by transgender athletes.

"The study, titled "[Violence against women and girls in sports](#)," said that more than 600 athletes did not medal in more than 400 competitions in 29 different sports, totaling over 890 medals, according to information obtained up to March 30.

"The replacement of the female sports category with a mixed-sex category has resulted in an increasing number of female athletes losing opportunities, including medals, when competing against males," the report said.

It's all insanity while doctors and hospitals across this country are raking in the moola by the train load: [More than 200 U.S. hospitals, healthcare facilities perform irreversible transgender procedures on CHILDREN](#), Oct. 14, 2024:

"Between 2019 and 2023, the bodies of 14,000 American children were butchered by LGBT industry

"After analyzing thousands of insurance claims at hospitals and pediatric facilities across the country, Do No Harm learned that a shocking 14,000 American children had their bodies butchered by the LGBT industry between 2019 and 2023.

"It's a common lie in the trans industry in America that these procedures are very highly reversible, that there's no long-term effects," Serio added about the mass deception that influenced these children to destroy their bodies.

“We know that’s simply not the case, especially for children who are taking the hormones for a longer period of time. Some of them can have a sterilizing effect on children, especially when taken for a lengthy period of time.”

“Of those 14,000 children catalogued, nearly 6,000 of them underwent extreme transgender surgeries while 8,579 were given hormone drugs and puberty blockers that damage the endocrine system, potentially for life.

“We only included data that we could stand behind 100 percent, based on [Do No Harm’s] analysis of insurance claims data,” Serio further explained about how her group put together the database.”

[Meet the liberal young women helping their peers ‘detransition’ from transgender identity](#), Dec. 19, 2019

Their stories are so common along with those who became “trans” did it under peer pressure, sexually abused by their father, step-father or simply confused. No one to really talk to, rationally, and explain what ‘gender dysphoria’ is all about.

[Transgenders Mentally Ill & Should Be Treated With Compassion](#), April 2, 2017, “And therein lies the heart of this issue: Transgender is based on ZERO science. It is based solely on how someone “feels” about themselves from one day to the next and THAT – just like the issue of being born a sexual deviant – is exactly what any argument on this issue should focus on: science, not politically correct psycho-babble about fluid feelings.

“This is not about hating anyone who has been brainwashed into ‘identifying’ as the opposite of their biological sex at birth. It’s about science and the truth which the ‘left’ and brainwashed Americans across this country don’t want to hear.”

[Puberty Blockers Were Never Reversible or Temporary](#), Dec. 13,

2022: “A recent in-depth [report by the New York Times](#) confirmed what many gender critics have long known to be true: puberty blockers and other experimental hormonal treatments are *not* temporary or reversible, as activists like to claim.

“In fact, much of the evidence points to severe developmental damage in gender-confused children who are put on puberty blockers at a young age. One New York adolescent with whom the *Times* spoke, for example, said she was forced to stop taking blockers after two years because she suffered a severe loss in bone density.

“We went into this because we wanted to help,” the girl’s mother said. “Now I worry that we got into a situation with a very powerful drug and don’t understand what the long-term effects will be.”

“An analysis of multiple studies found that this young New Yorker is far from the only one whose bone health has deteriorated as a result of puberty blockers. From the *Times*:"
Rest at link.

[Doctor refused to publish \\$10 million study showing puberty blockers don't help mental health of teens who want to transition](#), Oct. 25, 2024: “Clinical and research psychologist Amy Tishelman of *Boston College*, who served as one of the original researchers in the controversial study, said: “I understand the fear about it being weaponized, but it’s really important to get the science out there.”

“Another clinical psychologist, Erica Anderson, told the *New York Post* that she was “shocked” and “disturbed” by the decision not to share this important information.

“Dr. Olson-Kennedy has the largest grant that’s ever been awarded in the US on the subject and is sitting on data that would be helpful to know,” she stated. She went on to call out Olson-Kennedy for not respecting scientific method, stating: “It’s not her prerogative to decide based on the results that

she will or won't publish them. It's contrary to the scientific method. You do research, and then you disclose what the results are. You don't change them, you don't distort them, and you don't reveal or not reveal them based on the reactions of others. You report as scientists what you've learned."

Just like those COVID experimental gene therapy injections being passed off as vaccines. Now a few years down the road as predicted by censored scientists, the number of deaths, people – including children/teens becoming permanently disabled or having horrible life-long health issues is off the charts.

Founder of an alliance for detransitioners supports Alberta's ban on sexual mutilation of gender-confused minors, Nov. 13, 2024

Hormones, surgery, regret: I was a transgender woman for 8 years – time I can't get back, Feb. 11, 2019: "At first I was giddy for the fresh start. But hormones and sex change genital surgery couldn't solve the underlying issues driving my gender dysphoria."

Mutilating children for profit.' "California teen sues doctors over breast-removal surgery at age 13 in Kaiser Permanente's SECOND blockbuster trans lawsuit. Layla Jane says her puberty blockers and hormones were a medical 'torment'. Kaiser Permanente doctors offered trans care after minutes-long consultations."

Not just kids – this woman tried to live as a man for 17 years; she was 61 at the time the article was published: Biological woman who cut off breasts to become a trans "male" now regrets "huge mistake", Dec. 19, 2019: "Transgender remorse is on the rise as yet another duped individual is reportedly expressing deep regrets after having chopped off her breasts in a failed attempt at becoming a "man."

“Describing these failed attempts at transitioning was a “huge mistake,” Karemer broke the taboo recently by admitting to media that would actually report on it that she has now decided to “de-transition” back into the woman she’s always been, and always will be.

“I’m a woman,” Karemer is quoted as saying. “I’m not meant to be a bloke. I’m trapped. I feel completely mutilated. It’s a complete mess – where do you even start? I just regret the decision.”

“Karemer says she has finally woken up to the fact that she was not a “man” living inside a woman’s body, but was instead a discontented person who hated herself for most of her life. And much of this self-hatred stemmed from having been sexually abused by her own father since her teenage years.

“It was around the year 2002 when, after watching a daytime talk show about transgender people, that Karemer believed she had found her “solution.” But as it turned out, nearly two decades later, this “solution” was actually a *deception*, and one that’s being used to exploit the lives of countless other damaged individuals just like Karemer who need mental health therapy, not “transition therapy.”

The sad and heart-breaking stories of females and males (at whatever age) who bought into becoming “trans” would fill a dozen pages. [Detrans Help: Resources for Detransitioners](#): “Detrans Help is a non-profit by detransitioners, for detransitioners. Our mission is to raise the alarm on the current state of “gender affirming care” and ensure detransitioners have access to the resources they need.

“When ideology is placed above objectivity in our medical system, innocent people are harmed. Due to the poor quality of research into gender “medicine”, the number of detransitioners is unclear, but Detrans Help knows our population is quickly growing.

“We serve detransitioners worldwide, as medical malpractice transcends local and national borders.”

Her story is just so heart breaking. Is your son or daughter next?

[‘I literally lost organs:’ Why detransitioned teens regret changing genders, June 18, 2022](#) – “I was failed by the system. I literally lost organs.”

“When Chloe was 12 years old, she decided she was transgender. At 13, she came out to her parents. That same year, she was put on puberty blockers and prescribed testosterone. At 15, she underwent a double mastectomy. Less than a year later, she realized she’d made a mistake – all by the time she was 16 years old.

“Now 17, Chloe is one of a growing cohort called “detransitioners” – those who seek to reverse a gender transition, often after realizing they actually do identify with their biological sex. Tragically, many will struggle for the rest of their lives with the irreversible medical consequences of a decision they made as minors.

“I can’t stay quiet,” said Chloe. “I need to do something about this and to share my own cautionary tale.”

Thankfully, a lot of states have passed laws to stop surgically mutilating confused boys and girls. Lord in heaven, some parents in this country push their son or daughter as young as 5-years old into puberty blockers so they can later be surgically mutilated.

[Attorney General Ken Paxton Sues Another Dallas Doctor for Prescribing Illegal “Gender Transition” Drugs to More than a Dozen Texas Minors](#), Nov. 8, 2024

“Attorney General Ken Paxton sued a second North Texas doctor for illegally providing “gender transition” drugs to more than

a dozen children.

“This is the third action Attorney General Paxton has taken to enforce Senate Bill 14, which prohibits doctors from illegally prescribing dangerous “gender transition” drugs to children. Attorney General Paxton recently sued a Dallas-area doctor in the first ever SB 14 enforcement action and another doctor in El Paso who provided prohibited interventions to children as young as twelve.

“SB 14, a Texas law that took effect in September 2023 and was upheld by the Texas Supreme Court in June 2024, prohibits “gender transition” medical interventions such as surgeries, puberty blockers, and cross-sex hormones for minors. Growing scientific evidence strongly suggests that “gender transition” interventions prescribed to or performed on children in an attempt to anatomically or hormonally alter their biological sex characteristics have damaging, long-term consequences. Additionally, the prohibited interventions are experimental, and no scientific evidence supports their supposed benefits.”

Another horrible crime against humanity. Parents should find out exactly what their child’s school teaches or promotes this butchery – mostly in secrecy so parents don’t find out. Keep them away from social media (Tik Tok, etc) and the poison plastered all over about how wonderful it is to have your penis removed and a new vagina!

YOUR VOICE

On Nov. 5, 2024, Donald Trump not only won the Electoral

College, but he received the highest ever Republican popular vote (last number I could find 3 days old) is over 76 MILLION. A few states are in violation of the law because they are still counting ballots.

Americans said we've had enough of your communist propaganda, DEI, being called racists, garbage, homophobes, the list goes on. The hate drips from their mouths on the boob tube, social media and cable networks. America's been brainwashed to believe "trans" is the solution for a child/teen's confusion about their biological sex. Biological males destroying women's sports (Go start your own female trans sport teams), males "identifying" as female into girls/women's locker rooms to get an eyeful. [Lawsuit against Univ of Wyoming sorority alleges trans woman watched female members with 'visible erection'](#), March 30, 2023

We're sick of it. Fed up with lunatics and dishonest doctors raking in the cash to surgically mutilate children/teen and even women in their 20's and political cockroaches who promote this terrible crime against humanity.

America: Our voice was heard on Nov. 5, 2024 but we cannot and must not remain silent on protecting children/teens from such harm. Of course, first is to get accurate facts and any credible scientific findings promoting this – always find out who is funding them.

[Elon Musk has revealed the pain of losing a child to the trans cult, July 23, 2024](#): (Emphasis mine) “Musk has broken the final woke taboo by speaking about the grief felt by parents of ‘trans kids’.” “It’s not often one feels sorry for a billionaire. Yet it was hard not to sympathise with Elon Musk as he told Jordan Peterson about the time he was ‘tricked’ into allowing his son to become a ‘girl’.

“His voice crackling with emotion, he said he was hoodwinked into ‘signing documents’ for one of his older sons, Xavier, to go on puberty blockers. What he didn’t realise at the time, he says, is that **puberty blockers are ‘actually just sterilisation drugs’**. The end result? ‘I lost my son’, he says, the grief for his boy who was turned into a ‘girl’ clearly etched on his face.”

[Horrific: A ‘Transgender’ Athlete Left a Female Volleyball Player Partially Paralyzed](#), Aug. 3, 2024 –“Payton McNabb was 17 years old when a male athlete who thinks he’s a woman spiked a volleyball in her face so hard that she lost consciousness. She told Daily Mail that the man “cackled in delight,” as did his teammates, when she was injured.

“McNabb was left with brain damage and paralysis on the right side of her body. She gave up on her dream of going to college on a volleyball scholarship, and now faces difficulty walking.

“All this, because a community of parents and school staff allowed a male athlete to play on a women’s team in the name of “inclusivity” and “fairness.” While the “transgender” athlete who injured her is off living his life, McNabb struggles day-to-day with the injuries she sustained from this one high school game.”

[20 Republican AGs Investigate Top Medical Group for Pro-Transgender Deception](#), Sept. 24, 2024 – “Twenty Republican Attorneys General are investigating the American Academy of

Pediatrics for possible consumer deception when touting “transgender” medical services for children.

“The AAP continues to mislead and deceive consumers by maintaining its claim that puberty blockers are ‘reversible,’” says a September 24 letter to the AAP by the state attorneys.”
