

Distractions and middle class must be eliminated

While a number of constitutional scholars are challenging the “natural born” citizenship of several GOP presidential candidates and the GOP neo-cons are once again doing their best to cause divisions in the GOP by attacking Donald Trump, and then there are Hillary’s e-mail scandal and all the time the United Nations environmental crowd is working diligently to eliminate the middle class saying anthropogenic (man-made) pollution with their gas guzzling driving machines is producing global warming (AGW) so the UN must shackle the planet to “save” It.

WHY MANY REPUBLICANS HAVE EMPATHY FOR DONALD TRUM

Donald Trump is popular because of the many times the same scallywags trying to demonize and set him up have done likewise to county and/or state GOP activists who now have great empathy for Donald and pray for his safety because they, too, have been treated likewise only on a smaller scale, perhaps.

GET US OUT OF THE UNITED NATIONS

The 2016 Presidential election is simply another distraction from the redistribution of wealth goal by the U.N. One World Elitists Group. And have we heard one presidential candidate in either party announcing we should get out of the mostly communist controlled United Nations which is costing the U.S. taxpayers more than one-fifth of the U.N. Budget?[1] The 2013-2015 U.N. budget was \$5.4 billion and the U.S. has accounted for 22 percent of the total regular budget every year since 2000. The headquarters of the United Nations property in New York City was originally a slaughterhouse before globalist John D. Rockefeller donated the land to the

city.

PLEASE UN – LEAVE US BEHIND

“As we embark on this collective journey, we pledge that no one will be left behind,” reads the UN Manifesto, entitled Transforming Our World: the 2030 Agenda for Sustainable Development. But if you love liberty, self-government, free markets, or the U.S. Constitution, you will almost certainly wish that the UN would leave you behind,” said Alex Newman in his article: UN Agenda 2030: A recipe for Global Socialism. The preamble even claims the UN goals will “free the human race from the tyranny of poverty” and “heal” the planet, or as the planet is also referred to in the document, “Mother Earth.” Not – so subtly purporting to usurp the role of God, the UN even claims that the “future of humanity and of our planet lies in our Hands.”[2]

“The new agenda is a promise by leaders to all people everywhere...presumably conflating ‘leaders’ with mass-murdering gangsters such as Kim Jong-un, Raul Castro, Robert Mugabe and other despots who hold great sway with most of the regimes comprising the UN,” says Newman. It’s a universal, integrated and transformative vision for a better world just like the Utopia the Owenites/Harvard/Unitarians dreamed about in the 19th century who said man was basically good while the Calvinists were declaring mankind was depraved and in need of a Savior. To create this Utopia, a process called Smart Growth or “visioning” is implemented. In order to pull this charade off, they needed the children early and in public schools.

THE STORY OF CAIN AND ABEL

Let me use the illustration of Cain and Abel in Heb. 11:4. A great many people today think that environment is what makes the real difference between men. They say if you can just make the environment Politically Correct, every person would be all right. If we could just get rid of the slums and put people

into nice homes, then the people would be nice also and this, of course, is what President Obama is already proposing as described in the DeWeese article above about Utopia.

THE CAT IS OUT OF THE BAG

Ottmar Edenhofer, who from 2008 to 2015 was a co-chair of the UN's Intergovernmental Panel on Climate Change (IPCC) Working Group III on "Mitigation of Climate Change," said that the AGW is all about politics masquerading under a false label of science. He should know because he is also deputy director and chief economist of the Potsdam Institute for Climate Impact Research in Germany, one of the major tax-supported climate think tanks providing the World Bank with pseudo-scientific studies to justify confiscating the wealth of the planet in the name of saving nature; however, now that the cat is out of the bag we learn the real goal has nothing to do with saving the environment and is totally aimed at redistributing the wealth of the planet – from the middle classes to the ruling classes.[2]

UNITED NATIONS NEEDS CHAOS AND DISTRACTIONS

Governments and dictators from around the world have agreed to a "climate" deal dubbed the Paris Agreement. And to what do we have to look forward? In 1965, Democrat president Lyndon Johnson signed into law the "Immigration Reform Act..." which overturned America's traditional immigration policy and replaced it with the most liberal, "easy-access" immigration policy in our history. And now we learn the founder of FOX News, Rupert Murdoch is co-chair of what is arguably one of the most powerful immigration lobbying firms in the country, the Partnership for a New American Economy (PNAE) consisting of progressive mayors, executives from large corporations and the Chamber of Commerce and they lobby Congress to open the flood gates for more immigrants. Once again, business craving cheap labor and forgetting about the welfare of the community so the Trump campaign is a direct threat to Murdoch's efforts

to open America's borders.

The UN agreement aims to restructure the global economy, phase out cheap and abundant energy over the coming decades, redistribute the wealth of Western taxpayers to Third World regimes, and empower the UN to oversee a planetary "climate" regime that would require comprehensive monitoring and tracking of emissions across the West, as well as huge reduction in emissions.

And who will suffer the brunt of the regulations: The Western governments, of course. While the Third World governments will receive bonus points for denying their subjects access to resources. Western governments will be required to fund expensive and unreliable "green" energy projects that can't find adequate private funding. Let's not forget: The Republicans held power for 12 years and they did nothing about the energy problem that would only get worse. Readers will remember earlier bad investments at the behest of President Obama. One, of course, was Solyndra which supposedly produced an innovative new type of solar cell using U.S. tax dollars before going bankrupt. The owners were Obama's cronies. And then there was Obama's idea: Cash for Clunkers.

AND MORE ORCHESTRATED DISTRACTIONS WITH HARNEY COUNTY, OREGON

As I draft this article Ammon Bundy and his family is pleading for the occupiers to "stand down" and go home to their families. He's in jail with 8 others while four at the Malheur compound remain vigilant. A community candle light service was held honoring the spokesman, Robert "LaVoy" Finicum who was shot and killed along Oregon Highway 395 near milepost 50 in Harney County on 1/26/2016. The complete, unedited video of Joint FBI and OSP operation on 1/26/2016 can be seen [here](#).

IT ALL STARTED WITH UNCONSTITUTIONAL INTERFERENCE BY GOVERNMENT

From my Prehistoric Googling files, I have some old articles

that tell of unemployment in Harney County in 1985 as looking very bleak with the outlook uncertain. While there were job gains in many industries, the increase did not measure up to 10-year averages. And, once again, the only services that increased more than average were state government and local government jobs – more cronyism. The area's non-farm wage and salary employment index- considered one of the agency's most reliable economic indicators- actually declined from 108.5 in April to 107.9 in May.

In 1991 the Oregon legislature was allocating funds to have dislocated workers retrained, moved to the cities to live in high rise apartments like cattle where few residents have cars and the cars you see on the roads are electric vehicles. In fact, large parts of many cities are designated as "car-free" areas. Most people, therefore, walk, ride bicycles or use public transportation to get around during the day. People who live in these designed urban areas are called "megaregions."

And then the 9/22/1992 headline reads: Harney County joblessness takes a turn for the worse and Oregon counties and schools were going to lose \$45 million a year from timber receipts due to the Spotted Owl being put on the endangered list shutting down the forest industry. The current 2015-16 Oregon Blue Book says Harney County's economy is forest products, manufacturing, livestock and agriculture. What isn't mentioned, however, is how the United Nations wacko environmentalists once again used distorted science and the spotted owl to close down the timber industry and the same thing is happening in Harney County with the cattle ranchers. Beginning in the mid 80s, 1.2 million acres of old growth forest was being preserved to protect 550 pair of spotted owls at a cost to the Pacific Northwest of \$2 billion to \$5 billion and between 760 and 1,330 jobs in the forest products industry. The Malheur Wildlife preserve is for the "birdies," people who come to worship them.

OWL AMONG SACRED BIRDS

The 2005 book Hidden Secrets of the Alpha Course said originally the owl was the symbol of the Canaanite sun-god Molech, mentioned in the Bible. Today, the owl is one of the emblems of the Illuminati. For over 128 years world-wide leaders participate in the Bohemian Grove festivities in the woods the last two weeks in July 65 miles north of San Francisco for Satanic Rituals- their mascot burned in effigy to an owl god (Moloch).

Isn't it interesting how so much of what is happening today seems to be occultic. The timber industry shut down to protect the owl. Abortions and Planned Parenthood are mentioned in Jeremiah 32:35 where their sons and their daughters had to pass through the fire into Molech. The videos that went viral about Planned Parenthood selling aborted baby body parts was just another distraction which brings us currently to the protesters in Eastern Oregon at the Malheur National Wildlife Refuge that has attracted worldwide attention. This so-called "siege" is simply a carry-over from the showdown on the range that began in 2014 at the Bundy ranch in Nevada that was once again, clouded by deliberate misinformation from government officials and the media.

AND WHERE WAS THE SHERIFF TO PROTECT THE HAMMONDS?

In an article on 1/25/2016 CONSTITUTIONAL SHAKEDOWN in Harney County, Oregon by John Davis, we find that David Ward, the sheriff it turns out, used to work for the BLM and testified against the Hammonds regarding the fires. And for the full story about what is going on in Eastern Oregon, check this out.

The international press seems to be covering the Malheur standoff sufficiently. But have you read it appears the Bundy and Hammond ranches may have rich uranium deposits which BLM desperately wants? [Link]

And if you have trouble accessing this story above, then try

the one following by Dave Hodges about Hillary Clinton using her influence as Secretary of State to cut a deal with the Russians to fund her presidential campaign with these uranium deposits. [Link]

VETERANS STAND IN SOLIDARITY

Testimonies of others who had their land taken by the same means tell of their abuse and how they've lost everything, so Jon Ritzheimer, a former marine, veteran of the Iraq war from Lakeside, California wanted to go to Harney County to stand with the patriots in solidarity. Before leaving, he made a video for his wife and 3 and 5 year old daughters saying, "I love you but your daddy swore on oath to protect and defend the Constitution against all enemies foreign and domestic and that's why he couldn't be with you on Christmas nor why he can't be with you on New Years. The oppression and tyranny that has taken place in Oregon we know it is taking place all across the U.S. The Bundy ranch was the prime example and we, the people, need to take a stand and no matter what happens, no matter what lives are pushed out, just know that I stood for something. Don't let it die in vain."

Micahel Medved, a Seattle radio station talk show host, seemed perplexed that these militants, as the media calls them, are trying to take over this public property which is used by hikers, hunters, boaters and people who are birdies, people who come to watch the birdies. The words highlighted are the same words that a "crisis actor" at the Malheur Wildlife Refuge spoke to the cameras. The following is self-explanatory. Please remember neo-con Medved's name was on the recently published National Review list against Trump.

TWO PARTY SYSTEM ANOTHER HOAX LIKE OBAMA'S PRESIDENCY

Our two-party system leaves a great deal to be desired from our Constitutional Republic. What we have today is U.S. administrative government – form of Communism. The two parties

are a constant form of distraction, a sideshow designed to grab and keep our attention by producing a lot of “heated” debate that accomplishes nothing. And short of divine intervention, there is the upcoming farce called an “election” that will show America is a one-party state. Both Democrats and Republicans work for the agenda of the Illuminati.
