[TCP News](#) –How far the world has fallen. Nothing is any longer off limits or taboo so it would seem. An 8-year-old revealed on social media that she is dating a 13-year-old – *with her mom's blessing*. Both are so-called influencers on social media.

This 8-year-old girl is a model, and already has almost 500,000 followers on [Instagram](#). Apparently her mother is more than a little permissive. Mom is apparently fine with her daughter dating a 13-year-old.

From [The Gateway Pundit](#):

“After facing a wave of backlash over the seemingly clear abuse of her child, the mother wrote on her personal account ‘*this is their life, and they will figure it out on their own.*’”

The 8-year-old girl, Milana Makhanets, is popular among kids and has millions of followers on a Singaporean social media site.

From [RT](#):

“A scandal has erupted in Ukraine after it was revealed that an eight-year-old blogger with millions of followers is dating a 13-year-old boy, with the complete blessing of her mother, who controls all her social media accounts.

The young Milana Makhanets has almost seven million followers on Singaporean video-sharing app Likee, a TikTok analog popular with young Russian and Ukrainian kids. Milana also works as a model, often participating in children’s fashion shows.”

Here is our question: why is everyone seemingly solely focused on the girl? What about the 13-year-old boy? What about his parents? No 13-year-old should be dating, and this child should surely not be “dating” an 8-year-old girl.

It is truly tragic that parents would pimp their own children out to make money.

Another [post](#), from a lawyer named Anna Malyar, claimed that Milana’s *“mother made a seductive woman out of an eight-year-old girl for perverts.”*
