

Extraction Migration: Screwing the American Worker with Foreign Labor

By Frosty Wooldridge

January 18, 2024

How do you think our country's rank and file workers will survive those 9,000,000 (million) illegal aliens who will scramble for jobs once they receive amnesty from Joe Biden?

It's called, "Screwing the American Worker with Foreign Labor."

Writer Neil Munro said, "Since at least 1990, the federal government has relied on Extraction Migration to grow the economy after allowing investors to move the high-wage manufacturing sector to lower-wage countries.

"The migration policy extracts vast amounts of human resources from needy countries. The additional workers, consumers, and renters push up stock values by shrinking Americans' wages, subsidizing low-productivity companies, boosting rents, and spiking real estate prices.

"The economic policy has pushed many native-born Americans out of careers in a wide variety of business sectors, reduced native-born Americans' productivity and political clout, reduced high-tech innovation, and allowed government officials to ignore the rising death rate of poor Americans.

"The policy also sucks jobs and wealth from heartland states

by subsidizing coastal investors and government agencies with a flood of low-wage workers, high-occupancy renters, and government-aided consumers.”

Our own companies across America would rather cut our throats than hire American workers for a fair and living wage. For certain, minorities with low educational skills face planned poverty by the big wigs in those Washington DC offices. In many ways, capitalism must be the cruelest of systems when it comes to cut-throat competition. The men in those big office windows overlooking Manhattan don't really care about the misery in Chicago, Detroit, Denver or any other city with millions of homeless. That's right! We now have another 8,000,000 homeless aliens in our midst.

As long as those big wigs have bodies to do the work, the big guns don't care where the labor originates.

But they face some really steep problems because even in my City of Denver, Colorado, we now have 37,500 illegals who can't write, read, spell, or comprehend English. They are useless to themselves, to our city, and totally useless to America. The big guns didn't figure on that one. Those illegal aliens pile up on the sidewalks, in busses, on city trains and in schools. So much for our Governor Polis, Mayor Johnston, and both U.S. Senators for being open borders and sanctuary city advocates! They are completely and totally incompetent!

So, what is Biden's endgame? Who is paying him off? How did his handlers come to the point where they figured America no longer needed borders?

Did you see the news where tuberculosis cases have entered America and dozens of cases are manifesting in cities from Chicago to New York? Do you know that TB causes 2,000,000 deaths annually around the world? How many of us will die from TB brought across our borders? Will those numbers rank

up there with the 100,000 drug overdose deaths annually from Biden's inviting drug cartels to distribute all those drugs to our youth?

Do you understand and appreciate that NONE of the illegals are checked for diseases? Whose bright idea was that? We know it wasn't Biden because he can't put two sentences together without a teleprompter. He cannot think beyond the moment because he's clearly suffering from Stage 1 or Stage 2 of Alzheimer's Disease.

Isn't it astounding that his wife knows his condition, but won't say anything? Isn't it further amazing that his inner circle knows he is beyond cognitive incapacity? Isn't it stunning that the mainstream media refuse to call for a cognitive test in order to discover whether he is fit to lead this country?

At what point will this "extraction migration" syndrome begin to wear down, tear down and burn down our entire economic system? At what point will these millions of illegals tear apart our entire fabric of American society?

This year, 2024, may prove to be the most ridiculous, the most stupid, the most insane, the most violent and the most dangerous moment in U.S. history. Why? Because a whole lot of liberals have taken leave of their minds to support a man in the White House who is clearly not all there in his own mind.
