

First Week of 2024: D.I.E., Affirmative Action, & Claudine Gay at Harvard

by Frosty Wooldridge

January 4, 2024

In the end, lying, cheating, stealing and plagiarizing your academic credits—will get you fired from any job in America when reality checks into your life.

On Tuesday, Harvard President Claudine Gay resigned in disgrace over her support of antisemitism in Congress, and her support of Hamas demonstrations on Harvard's campus where she supported the harassment of Jews. After her horrific answers as to extermination of Jews (in context) to questions in Congress by Congresswoman and Harvard alum Alise Stefanik, the school newspaper, The Harvard Crimson, discovered Gay had plagiarized over 50 times in her academic work to obtain a PH.D.

One of the other guilty presidents of the University of Pennsylvania, Liz Magill, resigned first. MIT President Sally Kornbluth needs to resign, also. She's as guilty of incompetence as the first two.

As to a reality check, Claudine Gay's mentors and guardians at Harvard, incorporated "Diversity, Inclusion and Equity" to give her an "Affirmative Action" PH.D. In this case, "Piled higher and deeper" in fraud. There's an adage, "There's something rotten in Denmark." Well, there's something incredibly "rotten" in Ivy League colleges where you gain your

academic status not by the content of your grades but by the color of your skin and/or gender or transgender or your LGBTQ status.

It's that nuts out there in colleges across the country. Rather than maintaining academic standards, those college presidents want to boast that their minority students make the grades by "giving" them the grades.

That's why we have a Supreme Court Justice Ketanji Brown who cannot tell the difference between a man or a woman. Obviously, like Ms. Gay, Ms. Brown couldn't pass a biology course if her life depended on it. We've got a Vice President Kamala Harris who was picked because she was a female and a person of color. Forget qualifications! But in fact, she's an anchor baby of a white Jamaican male father and Asian Indian mother who were not citizens of this country when they conceived her, i.e., she's an anchor baby. Tell us please, exactly what Kamala Harris has accomplished in the past 36 months. Answer: nothing but hot air speeches!

Harvard alum and billionaire Bill Ackman demanded that Affirmative Action Harvard President Claudine Gay "resign in disgrace." With huge amounts of money about to be lost, the "higher ups" at Harvard forced her to resign. Most educational specialists expect her to be fired from her teaching tenure job for her extraordinary record of academic fraud. Her teaching duties are so important: African-American Studies. Her parting words after being fired, "I faced racial animus."

Gay said, "Amidst all of this, it has been distressing to have doubt cast on my commitments to confronting hate and to upholding scholarly rigor [sic]—two bedrock values that are fundamental to who I am[sic]—and frightening to be subjected to personal attacks and threats fueled by racial animus."

In reality, she swam in her own academic fraud...and sank! But

of course, she used the “race card” as a life preserver! Immediately “race baiter” Al Sharpton jumped into deep water with “reality” sharks and tried to rescue her. Sharpton can’t swim! No doubt multimillionaire Whoopi Goldberg will call all White People “white supremacists” and “white privilege.” Forget about academic standards!

As a former Big 10 athlete, I can attest to the academic fraud still going on for football and basketball scholar-shipped players that cannot perform 10th grade Algebra II problems let alone academic courses in the Big 10, PAC 12, SEC, and other four-year colleges. Even when Prop 48 passed that football players needed to maintain minimum grades, I can tell you that those kids do not maintain grades, but are given Crip courses to keep them eligible. The way they “hit” opponents and score touchdowns make their grades and MONEY at the turnstiles in college football. Yes, it’s all phony just like Gay making president at Harvard.

Then, you hear where the airlines are filling unqualified people into the cockpits of 747 jetliners to give “Diversity, Inclusion and Equity” an upper hand. Except, when one of those unqualified DIE people kills a plane-load of passengers--will the big dudes at the FAA actually mandate qualifications over skin color? It matters little what your skin color, eye color, and hair color happen to be! We passengers want to make it to our destination instead of being “shiskabobed” when a pilot forgets to check the landing gear.

Another piece of “ROT” occurring in America remains the absurd thinking that you can have a man compete against a woman in swimming, volleyball, wrestling, or basketball, or tennis, and pass it off as fair, equitable and competitive. IT IS NOT! Hopefully, in 2024, those people in high positions such as the D.I.E. and Affirmative Action people who hired fraudster Claudine Gay get their butts kicked with a “reality stick” and stop the nonsense of Transgender men competing against DNA

females. Fools that they are, instead, they need to come to their senses and create the National Collegiate Transgender Athletic Association. It's sure to be a BIG HIT among .000000001 percent of our nation's athletic fans. Let's give a shoutout to 10 times National Champion Riley Gaines for possessing the courage to stand up to the NCAA's stupid, inane and incompetent male leaders.

Additionally, in 2024, we need to stop Hamas supporters from flying their flags in our country in support of extermination of the Jews in Israel. We're sick of seeing the Palestinian flag in our streets. We're really sick of American-Muslims calling for the extermination of Jewish people.

Finally, in 2024, we need to elect a president who does not suffer from Alzheimer's Disease. We need our Congress to stop 302,000 people in December 2023, a new record, from illegally crossing our borders on top of the 8.0 million who have already illegally crossed under Joe Biden. We need to stop incentivizing them with cell phones, \$5,000.00 gift cards, free schooling, health care, hotels, and tickets to any city they wish to invade. We need our Congress and president to deport every last illegal alien from our shores. Yes, all 20 to 30 plus million of them.

Oh, and to former President Claudine Gay, don't let that Harvard presidential door hit you in the ass as you walk out of your "Affirmative-Action" office.
