

# Gradual Child Abduction And Big Brother Government As Parent

I was deeply grieved when I read in our Salem, Oregon Statesman Journal on Feb. 18, 2019 about the states of Oregon and Washington's use of out-of-state-facilities to house foster children was "creating an unacceptable heightened risk of abuse and neglect" and causing more harm to youth who had already suffered from multiple, prolonged, or chronic traumatic events. The widespread use of restraints and physical abuse at a residential treatment facility in Iowa was where these states were sending foster care children. Washington stopped sending children to the for-profit Clarinda Academy but some of Oregon's most vulnerable children are still there and number of children being sent to out-of-state, privately run psychiatric units has more than doubled since 2017. There are currently more than 80 children in-out-of-state facilities.

In 2001 I wrote an article entitled: **FEDERALIZATION OF CHILDREN; GRADUAL CHILD ABDUCTION** which can be found under an article titled "[Oregon's Agenda for the 1990's: Children, Youth and Families.](#)" Congressman John R. Rarick of Louisiana said "October 5, 1971 became a dark day for America when the Federal Government was authorized to take over our children with the passage of the **BRADEMAS CHILD DEVELOPMENT PROGRAM** with a vote of 186-183 laying the foundation for the Federal Government to replace the home and for [bureaucratic 'experts' to replace the parents.](#)"

Simultaneously in 1971 the Oregon legislature created the Department of Human Resources to coordinate the activities of the state's principal social service agencies of which a child protective agency called Children Services Division (CSD) was

a component and the intrusiveness into families began on an official basis by the Gestapo. At first it was very subtle but as the years progressed, the governmental abuses escalated and people were totally unaware they were losing their Fourth Amendment to the U.S. Constitution which gave we, the people, the right to be secure in our persons, houses, papers, and effects against unreasonable searches and seizures and shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation and particularly describing the place to be searched, and the persons or things to be seized.

In 1975 Democrat Governor Robert Straub issued Executive Order 76-7 calling for an Early Childhood Project to be developed. It was performed pursuant to grant number H0087 from the U.S. Office of Child Development, DHD, D/HEW. The opening sentence in Chairperson Muriel Goldman's report to the Honorable Robert W. Straub said, **"Oregon has been a pacesetter in the area of energy and land use planning and conservation (aka socialism), now Oregon has the opportunity to be a leader in conserving and enhancing people resources.** The Report ended by saying, **"we must find a more efficient and effective way to help families provide for their children."**

And why did she say that? Well, Oregon was chosen to test Luciferian ideas. A few days before Christmas, December 23, 1971, when nobody was watching, the Rockefeller Foundation gave a half million dollar grant to the Oregon State University in Corvallis, Oregon to support research and graduate studies on "Man and His Activities As They Relate to Environmental Quality." The Rockefeller Foundation chose the Oregon State University for the "experiment" to run simultaneously with the Stanford Prison Experiment also in 1971.

Oregon's Democrat Governor Charles Martin in 1934 began the move towards **Utopian socialism** and in 1945 Governor Earl Snell signed the Public Employees Retirement System into law and,

other states wanting to reward what they deemed were “underpaid public employees” in comparison to the public sector, followed. As a result, Oregon’s PERS like those in other states is now bankrupt. Our current transgender Utopian Democrat Governor Kate Brown is asking for big bucks in her budget that she says is “for schools” but rest assured, the schools will receive very little because it will all end up in PERS. PERS RETIREES are already getting a lot more than they ever expected and more than PERS ever thought they should get. Ten thousand (10,000) retirees get over \$100,000 a year in retirement. (Source: Jeff Kropf, 1220 am on Dec. 10, 2018)

If Oregon was doing such a great job for providing for our children, why is it they are being sent to God only knows where in out of state facilities to be abused again.

## **HUMAN RESOURCES HAD TO BE MANAGED**

We gradually were being recognized as “human resources” and had to be “managed” like a lump of coal, a fish or tree. Government management of our forests found them ablaze in California and Oregon last year and since the government has taken over raising our children, our young people who aren’t locked up in some psychiatric facility are killing themselves at record rate. And while the elected sheriff should be the one investigating actual abuse cases, he finds himself an accomplice supporting the directive of unelected child protective workers (many LGBT) without due process for the accused. [No, your children are no longer yours](#). They belong to the collective.

Single mothers can be very vulnerable and [all it takes is one call to CPS and she’ll hear the knock at her door](#) oftentimes with the sheriff standing with the CPS worker. That is if a worker happens to be available and not busy transporting some other child to a facility in another state where Oregon is subject to a charge of \$8,000 to \$10,000 a month for their upkeep, according to the Statesman Journal article. Oregon

officials have not yet responded with details about how often caseworkers travel with children when they are sent out of state, how frequently caseworkers from Oregon see children face-to-face once they are in another state, or if any of the foster care children from Oregon have complained about their treatment or how many have been sold to child-sex traffickers we've heard about that are rampant. [[Link](#)]

## **FOSTER PARENTS**

And, of course, remembering the sin nature of humans, we have the "do gooder" folks who become foster parents (or teachers) for all the wrong reasons and generally it is for the money, not in the best interest of children. So if the [public school system doesn't break your child's will](#), then send in foster parents. In the T.V. program "What Would You Do" on 8/31/2018 told about a foster mother in a restaurant ordering some special food for her own daughter while ordering something of a lesser value for the foster child. When questioned about it by the foster child, the mother said, "because I only get 'x' a month to take care of you." What a great way to improve the foster child's self esteem...

And then [Ms. Smallback in an 8/21/2018 article](#) told about this abuse way back in the 40s – 60s and how a family who were good friends with a judge got approved to become foster parents and only young girls were placed with them. The husband raped the girls for decades. They also partnered with an unwed mother's home and took in baby girls from the unwed mothers. Some girls ended up missing. When unwed mothers went to the authorities to get their stolen babies back, they were sent to which judge? The depth of depravity warned about in the Bible and in these individuals was simply horrifying to the average human with a conscience.

In Oregon in 2007 a bill was introduced to unionize adult foster care homes and signed by Democrat Governor Kulongoski on June 1 and the Service Employees International Union Local

503 soon took advantage of collective bargaining rights and the Democrats got some more voters; however, since the U.S. Supreme Court Janus decision, a group called the Freedom Foundation with chapters in the State of Washington and Oregon, have been offering government workers an "Opt Out" decision from the unions and dozens of public employees have applied. **FREEDOM FOUNDATION, P.O. BOX 552, OLYMPIA, WASH. 98507. PHONE: 360-956-3482.**

## **GENDER DYSPHORIA**

Then there is the story about the Texas dad who could lose custody of 6 year old son for not affirming transgender identity. It seems his ex-wife was pushing their son into identifying as a girl and when dad refused to cooperate, he was charged with "abusive behavior." Walt Heyer, a former transgender woman who is now outspoken against the push for children to identify as transgender has highlighted the case of James Younger, who since the age of three has undergone [social transitioning](#) to be identified as a girl. His mother has enrolled the boy in school as a girl although when mother is not around, then James really wants to be a boy.

The article goes on to explain how the mother asked the court to force the father to pay for James to visit a trans-affirming therapist and also pay for any medical alterations or therapies that James may need to transition to female as he gets older. Subsequently, the courts agreed and have required the father to pay at least 50 percent for future gender-related medical expenses and the father has been banned by the court from teaching James that he is a boy and banned the father from dressing his son as a boy. Additionally, Younger cannot share religious teaching with his son on sexuality or gender. Friends all confirm that when the boy is away from his mother, he wants to act like a boy....

## **THE ALPHABET LICKSPITTLES NEED TO REPENT FOR SUICIDES**

Thirty-five percent of transgender youth have attempted suicide. The reason for this psychological trauma can be found in remarks made by Dr. Paul R. McHugh, the former psychiatrist-in-chief for Johns Hopkins Hospital, who said in a commentary in the WALL STREET JOURNAL in 2015 that transgenderism is a “mental disorder” that merits treatment, that sex change is “biologically impossible,” and that people who promote sexual reassignment surgery are collaborating with and promoting a mental disorder. And transgendered people who had reassignment surgery is 20 times higher than the suicide rate among non-transgender people and are far more likely to use cocaine, heroin and opioids. Amen – that’s exactly what the psychiatry industry said about homosexuality decades ago but lobbyists got that definition removed so we’ve come full circle and it’s the children that weren’t even born when that took place are now attempting suicide.

## **CHILD PROTECTIVE SERVICES CAUSE CHILDREN’S DEATHS-THE MEDIA SILENT**

LAISSEZ FAIRE TODAY reported on July 5, 2018 the truth about child kidnappers in America and how the Oakland Police executed a search warrant in connection with human sex trafficking of juveniles not an immigration investigation as many thought because Homeland Security was there. If the Outrage Industrial Complex (OIC) were out to save kids, CPS would have long been in its fickle crosshairs. This protest in Oakland accidentally revealed something about the “Abolish ICE” movement even some of the protestors are not aware of – that it is not really about kids. If it’s really about stopping the kidnapping of children, as has been the official narrative paraded around by the mainstream media, then **why not also go after Child Protective Services (CPS) with an even greater feverish anger and moral outrage?** The CPS has been ripping kids from their parents’ arms for years, often for wildly arbitrary reasons. And, worse, foster kids placed by the CPS are an incredible **six times more likely to die in**

**foster care than had they simply stayed with their parents.**

The media isn't entirely oblivious to the incredible incompetence and blatant corruption within the CPS either. The LAISSEZ FAIRE goes on to tell about the outspoken Carlos Morales, a former Child Protective Services investigator and author of *LEGALLY KIDNAPPED*, has been interviewed on several mainstream outlets. He's among a few lone (and largely ignored) voices who have been calling for the abolition of the CPS for years. In an essay on his website, Morales wrote this back in 2015:

"There are over 400,000 children in Child Protective Services care in America. Eighty percent of those cases are not for physical or sexual abuse, but rather parental negligence which can mean the child is playing outside, is too fat, doesn't like school, or – as in forty percent of cases – is for the parent using marijuana," which brings me to the Marijuana story on Feb. 19 in the state of Oregon. Environmentalists for decades have found reason to shut down the timber industry around these little towns who have recently turned to Marijuana dispensing outlets for a living.

In the meantime while the Oregon Gestapo is looking for parents for using marijuana, New York's "Reproductive Health Act" was passed by barbarians in their legislature and signed into law by Governor Andrew Cuomo who [makes murder and genocide the law in New York.](#)

## **UNIVERSAL HOME VISITS FOR NEW PARENTS COMING TO YOUR STATE**

The Oregon Health Authority was created in 2009 and oversees most of the state's health-related programs including addiction treatment, mental health and public health, along with the Oregon State Hospital, which is the state's unique take on Medicaid (thanks to Obamacare.)

One of Democrat Governor Kate Brown's priorities is the beginning investment in a six-year program to create **universal**

home visits for new parents. (SB 526) When the program is complete, every new parent, including adoptions, would receive a series of two or three visits by someone like a nurse or other health care practitioner. The visits could include basic health care screening for babies, hooking up parents with primary care physicians, linking them to other services and coordinating the myriad childhood immunizations that babies need, and rest assured, along with a myriad of snoopy questions will include asking the parents if they have a gun in their home. The Puppet Managers of the DEEP STATE are anxious to [GUT our SECOND AMENDMENT](#). “Gun control is like trying to reduce drunk driving by making it tougher for sober people to own a car.” (Author unknown)
