

# **Grotesque Abuse of American Citizens by Mainstream Media**

By Frosty Wooldridge

January 15, 2026

You cannot help but wonder which side of America the mainstream media stands. Do they want a civil society? Or, do they work for a chaotic society.

Which side of America do governors and mayors support? Do they support lawlessness or harmony? Do “Sanctuary City” mayors and governors choose law and order, or do they stand for anarchy?

If you noticed in the past four years, the democrats applauded and did nothing to stop 15 to 20 million illegal border violators that invaded America. The mainstream press did nothing to report the invasion. If not for independent journalists, and FOX NEWS, not one single outlet such as NBC, CBS, ABC, NPR, PBS and the likes of 60 Minutes or Anderson Cooper on CNN spoke a sentence about the invasion of America. They never questioned Joe Biden’s Alzheimer’s Disease when it was visually apparent in his speech, his falling down steps, or when he held his hands in front of him like a manikin in a store window.

When University of Georgia nursing coed Laken Riley suffered brutal rape and being beaten to death by an illegal alien as she jogged on a campus trail two years ago, the mainstream legacy media made it vanish within a few days.

Last year, when three illegal alien 18-wheeler truck drivers

killed seven Americans, you heard virtually nothing on David Muir's ABC news broadcast. Same when Lester Holt held down NBC's Nightly News. NPR gave the deaths 30 seconds.

When [www.fairus.org](http://www.fairus.org) stated that illegal aliens cost Americans \$150,000,000,000.00 (billion) annually in food stamps, housing, medical care, free schooling for illegal alien kids, along with "free" breakfasts and lunches—nothing reported.

When 400,000 pregnant women dropped their babies in 2025 on American soil, "anchor baby", at a cost into the billions for American taxpayers—nothing from the mainstream legacy media cartel.

They never educated the American taxpayer that illegal aliens were shoplifting over \$100 billion annually. They never educated the American people about \$100 billion in cash-transfers being wired out of America. They never reported on the costs to Americans who lost their jobs to illegal aliens.

When Minnesota Governor Tim "Tampon" Walz attempted to become Vice President of the United States, no one checked what he had been suppressing and hiding as to over 80,000 Somalian legal and illegal migrants siphoning off over \$9 billion in taxpayer funds by dozens of fraudulent day care centers, stores, and corrupt organizations within that state. Worse, Somalian Ilhan Omar compiled a \$30 million account "right out of the blue." Not a peep about her illegality of marrying her brother to gain immigration papers...not a peep about her 67.7 IQ that could not possibly have given her enough brainpower to "earn" that much money in less than two years. Plain and simple: she a fraud. Should be deported.

When you look at the incredible nightmare developing with Ugandan-born Zohran Mamdani's communist takeover of New York City, it shows you that the legacy media works tirelessly to take American down to its lowest common denominator: complete loss of patriotism, of law and order, and loss of culture.

What you're seeing is a command cartel of Anti-American companies and individuals working to degrade, dissemble and dissolve America.

NWV journalist Amil Amani said it best, "The American political landscape is not shifting by accident; it is being terraformed. While mainstream media pundits discuss "swing voters" and "campaign strategies," a much more calculated and cold-blooded operation is underway. Every major Blue State stronghold – from the decaying urban cores of the Northeast to the Pacific coast – has secured a permanent Democratic hegemony through a two-pronged assault: the strategic importation of millions of foreigners and the systematic siphoning of billions in taxpayer wealth to fund them."

In the past months, as our I.C.E. officers attempted to deport all illegal aliens out of our country, the legacy media does everything in its power to provoke "fringe" Americans to stop the arrests of criminal illegal aliens. Governors and mayors in California, Chicago, Portland, NYC and Minneapolis work against their own laws. They provoke and support breaking our laws. Even U.S. Senators like Liz Warren, a pretend-minority Native American, provokes anyone and everyone to break the law. Same with U.S. Senator Charles Schumer.

In fact, top provocateurs called for "fringe" demonstrators to attack I.C.E. officers to get them to draw blood. Last week, those provocations caused a ditzy 33-year-old mother of three to block I.C.E. officers with her car. In fact, she became so emboldened that she drove her SUV right at an I.C.E. officer, injuring him. He fired a shot to protect himself from being run over. Now, she's dead, and the mainstream media will keep her death on the headlines for as long as it will create chaos and lawlessness in Minneapolis and elsewhere.

Amani continued, "By maintaining "Sanctuary" status, these jurisdictions have effectively signaled that federal immigration law does not apply within their borders. This

creates a massive “pull factor,” drawing in millions of individuals who are entirely dependent on the administrative state from the moment they cross the threshold.”

Today, we feed 42 million people who do not work, do not contribute, who do not care about being responsible for themselves or their country. They suck off the system, along with millions of illegal aliens. A huge percentage of them lie, cheat and steal from the American taxpayer. It’s costing American taxpayers into the trillions of dollars.

Amani continued, “Simultaneously, California has led the charge in healthcare expansion by opening state-funded Medicaid (Medi-Cal) to all low-income residents regardless of status, a move that the U.S. House Committee on the Budget estimates will cost taxpayers billions annually. This financial burden extends heavily into the classroom, where local school districts are being crushed by the cost of English as a Second Language (ESL) programs and specialized administrative burdens, a reality the Congressional Budget Office acknowledges places a significant strain on state and local outlays. This massive redirection of wealth effectively forces property taxes through the roof, pricing native-born families out of their own neighborhoods to fund a system that prioritizes foreign nationals over its own citizens.”

In other words, we’re being cheated, left clueless and being made to pay for this massive immigration invasion and fraud in every corner of American society.

Amani said, “Once these populations are granted amnesty – which is the inevitable “Phase 3” of the Democratic plan – the electoral map will be permanently locked. There will be no “swing states” left. The billions siphoned from taxpayers today are the down payment on a one-party socialist future.

“The evidence is undeniable. The “Blue State Model” is a parasite-host relationship where the taxpayer is drained to

fund a demographic transformation that will eventually disenfranchise them entirely. This is not a conspiracy theory; it is the stated policy of mayors and governors from Los Angeles to Manhattan."

The fact remains that democrats want to dissemble America into a Socialist nightmare where everyone is equally poor. No rugged individualism! Just collective poverty for all. Per Zohran Mamdani.

Renee Good? She's just a bloody tool in the democrats' socialist/communistic war chest. She won't be a footnote in their quest for power.

As to the cartel legacy media, at some point, where they have become useless to the communists, they will be silenced just like in Russia, China and North Korea. If you can't see it; you're not paying attention.
