

Growing Government Tyranny – Democrats Empower it. Republicans Are Clueless

✖ Tom DeWeese

Where is the Republican Party? As insanity spews out of the Democrat Party, the long-time overseer of limited government, free enterprise and individual liberty has no response, no unified plan to counter the Democrats, and, indeed, seems confused by the Socialist antics. The only part of the long-lost Republican cause that seems to be functioning is their near hysterics over the massive funds the Democrats are raising. Said a recent such Republican fund letter, “I’m hoping you have the courage and determination to fight for what we believe in.”

Of course, if the Republicans had the courage and determination to fight over the past two years for “what we believe in,” their fund-raising would be soaring. Instead they run candidates with nothing to say, seemingly clueless to the massive assault on our liberties. Now they wonder why they are being ignored in the elections.

Earlier this year I addressed the leadership of the Constitution Party. I presented them with the real agenda of the Democrats and I asked this question, “Do you want to be the majority party?” They answered with a resounding YES! I then gave them a strategy to win. It occurs to me that all freedom-loving Americans, no matter what party, can benefit from this strategy to use in their own local elections.

So, here is the speech I presented to the Constitution Party. Now, understand your true enemy, take these ideas, drain the swamp in your city or state, and take American back!

My Address to the Constitution Party Leadership

There has always been some kind of force loose in the world seeking domination over others. They built armies to invade, break things and kill people in order to grab resources, build wealth and power, enslave people and conquer.

We've lived through such threats from megalomaniacs like Napoleon, Hitler and Stalin. Secret societies have plotted to gain power in different ways.

In every case the efforts have failed. No one has ever managed to rule the entire world. In some cases they just pushed too far, too fast. Or they miscalculated the weather conditions in the lands they intended to control. It's incredible to note that both Napoleon and Hitler failed to remember that Russia has a severe winter which ultimately led to their downfall and defeat.

However, what if such power mongers could find a way to keep their aggression under wraps and out of sight from those they intended to conquer – until it was too late.

Better yet, what if they could actually get their targeted victims to help them achieve control over them? No armies. No shots fired. Instead the victims quietly pull in the Trojan Horse and celebrate its arrival!

What if there was a way for a small, dedicated group to rule the world by simply organizing under a single unifying plan, accepted by everyone as fact and necessary?

Acceptance of the plan would see every nation voluntarily surrendering its independence and sovereignty to the aggressors!

What could possibly be such a powerful message that some of the world's oldest and proudest nations would do that? What could get the world's strongest religions to turn their back

on their most fundamental beliefs? What would get the freest nation on earth to join in and agree?

How about the threat of Environmental Armageddon! Who could oppose saving the planet? Only selfish zealots who refuse to give up their creature comforts would oppose efforts to save Mother Earth! It doesn't matter how many rights you think you have if you don't have a planet to stand on.

The truth is, that's exactly the force you and I are facing today as it drives, almost unopposed to change our life style, economic system, and system of government.

The Club of Rome, one of the main forces behind this hidden plan to rule the world openly explained their tactic and goal saying, *"The common enemy of humanity is man. In searching for a new enemy to unite us, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like would fit the bill. All of these dangers are caused by human intervention, and it is only through changed attitudes and behavior that they can be overcome. The real enemy then, is humanity itself."* Diabolical! Turn man against himself so that he voluntarily submits to subjugation. The threat of global warming became the weapon of choice.

And it doesn't matter if true science refuses to cooperate in this scheme as actual global temperatures really are not rising and there continues to be no evidence of any man-made affect on the climate. Truth hasn't been important to the scaremongers.

Timothy Wirth, President of the UN Foundation said, *"We've got to ride this global warming issue. Even if the theory of global warming is wrong, we will be doing the right thing in terms of economic and environmental policy."*

To further drive home their complete lack of concern for truth, Paul Watson of Green Peace declared, *"It doesn't matter what is true, it only matters what people believe is true."*

Christiana Figueres, the Executive Secretary of the UN Framework Convention on Climate Change told us outright what the real goal of the threat of Environmental Armageddon truly is. *"This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for at least 150 years, since the industrial revolution."* Of course, she means free enterprise.

The blueprint for the implementation of this grand plan was revealed in 1992 at the UN's Earth Summit. It was called the Agenda for the 21st century – or just Agenda 21.

From its inception in 1992, at the United Nation's Earth Summit, 50,000 delegates, heads of state, diplomats and Non-governmental organizations (NGOs) hailed Agenda 21 as the "comprehensive blueprint for the reorganization of human society."

The 350-page, 40 chapter, Agenda 21 document was quite detailed and explicit in its purpose and goals. They warned us that the reorganization would be dictated through all-encompassing policies affecting every aspect of our lives, using environmental protection simply as the excuse to pull at our emotions and get us to voluntarily surrender our liberties.

So in their zealotry to enforce the grand agenda, social justice became the "moral force" over the rule of law as free enterprise, private property, rural communities, and individual consumption habits became the targets, labeled as racist and a social injustice.

Such established institutions and free market economics were seen as obstructions to the plan, as were traditional family

units, religion, and those who were able to live independently in rural areas.

Finally, Agenda 21 was summed up in supporting documents this way: *"Effective execution of Agenda 21 will require a profound reorientation of all human society, unlike anything the world has ever experienced. It requires a major shift in the priorities of both governments and individuals, and an unprecedented redeployment of human and financial resources. This shift will demand that a concern for the environmental consequences of every human action be integrated into individual and collective decision-making at every level."*

The policy of Agenda 21 is called Sustainable Development. You hear the term used in every part of our society, from community development to production of our food supplies, to manufacturing of nearly every product.

While sold as a means to secure a happy, healthy future of equality for all as it protects the environment, sustainable development policy, as it is enforced in every single community in the nation, has proven to be a direct attack on free enterprise, private property, and individual choice in our lives. It is the epitome of tyrannical, out of control government.

Ironically, its perpetrators were quite open and honest in their plans. We just didn't want to listen.

The official report from the UN's Habitat 1 Conference explained the reasons for the attack on private property. It said, *"Land...cannot be treated as an ordinary asset, controlled by individuals and subjected to the pressures and inefficiencies of the market. Private land ownership is also a principle instrument of accumulation and concentration of wealth, therefore contributes to social injustice."* That is a direct attack on the entire American economic system

But it gets even clearer. Peter Berle of the National Audubon

Society said, *"We reject the Idea of Private Property."*

Thomas Lovejoy, science advisor to the Department of Interior admitted, *"We will map the whole nation...determine development for the whole nation, and regulate it all."*

Harvey Ruvin, the Vice Chairman of ICLEI said, *"Individual rights will have to take a back seat to the collective."*

That is Agenda 21!

For over twenty years I have been labeled a conspiracy theorist, scaremonger, extremist, dangerous, nut case. I've been denied access to stages, major news programs, and awarded tin foil hats. All because I have worked to expose Agenda 21 and it's policy of sustainable development as a danger to our property rights, economic system, and culture of freedom.

Now, the Sustainable forces have taken their plans to the ultimate, inevitable point. No longer are they trying to hide its true goal – global domination. Now we have the Green New Deal.

I warned that Agenda 21 would control every aspect of our lives, including how and where we live, the jobs we have, the mode of transportation available to us, and even what we eat. The Green New Deal is a tax on everything we do, make, wear, eat, drink, drive, import, export, and even breathe.

In opposing Smart Growth plans in your local community, I said the main goal was to eliminate cars, to be replaced with bikes, walking, and light rail trains. The Green New Deal calls for the elimination of the internal combustion engine. Always higher and higher taxes will be used to get the public to "voluntarily" reduce their use of such personal transportation choices. That's how it works, slowly but steadily towards the goal.

I warned that under Smart Growth programs now taking over

every city in the nation that single-family homes are a target for elimination, to be replaced by high-rise stack and pack apartments in the name of reducing energy use. That will include curfews on energy use, mandating power be turned off during certain hours. Gradually, energy use of any kind will be continually reduced. The Green New Deal calls for government control of every single home, office and factory to tear down or retrofit them to comply with massive environmental energy regulations.

I warned that Agenda 21 Sustainable policy sought to drive those in rural areas off the farms and into the cities where they could be better controlled. Most recently I warned that the beef industry is a direct target for elimination. It will start with mandatory decreases in meat consumption until it disappears from our daily diet. The consumption of dairy will follow. Since the revelation of the Green New Deal the national debate is now over cattle emissions of methane and the drive to eliminate them from the planet. Controlling what we eat is a major part of the Green New Deal.

I warned that part of the plan for Agenda 2030 was "Zero Economic Growth." The Green New Deal calls for a massive welfare plan where no one earns more than anyone else. Incentive to get ahead is dead. New inventions would disrupt their plan for a well-organized, controlled society. So, where will jobs come from after we have banned most manufacturing, shut down most stores, stopped single-family home construction, closed the airline industry, and severely regulated farms and the entire food industry? This is their answer to the hated free markets and individual choice.

In short, the Green New Deal represents the largest step ever taken by the Socialists/ Sustainablists forces that have been pushing Agenda 21 for 27 years.

But just as I was met with scoffing and charges of being a conspiracy scaremonger, the Green New Deal has now been met

with scoffing and lack of concern. When I said the Green New Deal was the most radical step to enforce Agenda 21, many of my own supporters sent me snarky emails laughingly telling me that, "This is too nuts to ever be made into law!" Ha Ha!!!!

Then the laughing really started when the Republican-controlled Senate brought the Green New Deal up for a vote and the tally was 57-0. They didn't even vote for it themselves, went the joke. Such a silly, stupid little girl, they said with great hilarity!

Leaders of many establishment conservative organizations in Washington, DC laughed too.

Well, the fools are the Republicans, and the establishment Conservative Movement in Washington, DC, which have failed to understand the determination of these forces behind that "silly little girl." They set a trap and the Republicans marched right into it.

What really occurred is that this Green New Deal pushes the radical agenda way beyond anything ever imagined by Republicans and conservative leadership. In short, the Socialist Democrats made a classic negotiating tactic. They came to the table and delivered the most radical, complete, all-inclusive agenda for the total take-down of the American Republic, our free enterprise system, our property rights, and our way of life.

The Republicans were completely unprepared for it. Since they have ignored my warnings for 27 year, the Green New Deal sounded too nuts. Too far out. No one would fall for it. They laughed and dismissed it without a thought. The Senate vote showed them!

But watch what has happened since the Senate vote and the laughing began. One hundred Democrat Members of Congress have signed on to the House bill. Almost every one of the 20+

Democrat presidential candidates is talking about it. The news media is filled with stories on pieces and parts of the Green New Deal. The discussion is growing.

But here's the kicker – here's where the laughing stops as the Republicans fall into the trap!!! Florida Republican Representative Matt Gaetz announced that he is working on the Green REAL Deal!!! Says Gaetz – his bill will be more reasonable. In the Senate, Tennessee Senator Lamar Alexander is countering with his "Manhattan Project for Clean Energy." The difference? Almost nothing! Senator Lindsey Graham said "We owe it to the country to have an alternative to the Green New Deal." He said he was frustrated because large parts of the Republican Party still resist the idea of climate change legislation.

Sen. Graham and other faltering Republicans seem to not understand that any attempt to provide "an alternative to the Green New Deal" means an automatic endorsement of the radical and wrong-headed leftist environmental movement.

This is exactly what the Democrats were counting on. They made an outrageously radical proposal that moves the agenda miles down the road and then – to be more "reasonable" the stupid Republicans join right in with just a little smaller proposal. That's how we lose our nation – by being "reasonable" to tyrants.

The fact is, almost 50% of the Green New Deal is already in the works. California has set a deadline to force homeowners to install wind and solar power as traditional energy sources of oil and gas will be phased out within ten years.

In Minneapolis, Minnesota, the City Council is moving to eliminate zoning protections for single-family homes, calling such protections "racist." That same attack on single-family homes is taking place in the Oregon state legislature, the Chicago city council, and the Baltimore city council, to name

just a few. This marks the drive to abolish private property rights.

Smart Growth programs are in every city in the nation – targeting the elimination of private cars for transportation, in favor of public buses, trains, and bikes – just as called for in the Green New Deal.

Landlords are being targeted as the drive is on for rent controls – even as government is piling on the costs through higher taxes and more and more controls on energy use. How long can the landlords hold out?

And now comes this news. As the Congress, news media, and presidential candidates debate the “good ideas” of Green New Deal, New York City Mayor William De Blasio has rushed to introduce his own version. It’s a bundle of ten bills designed to meet the massive reduction of energy use called for in the UN’s Paris Climate Agreement which President Trump refused to join. Among its provisions are a ban on glass skyscrapers, hot dogs, and massive cut backs in energy use. Just as called for in the Green New Deal, the legislation seeks to eliminate more than one million cars from the road.

State by state, city by city, the radical provisions of the Green New Deal are being put into force – or at least openly considered. Controls on what we eat, how we live, and how we move about. Call it Agenda 21 or the Green New Deal – it’s a disaster to our economy and our way of life. It’s happening at a rapid rate. So who is laughing now?

The challenge to us is, what do we do about it? The fact is, every political party is talking about taxes, healthcare, immigration, and gun control. But no party is addressing the pain of the ranchers who are under siege of the federal government that is taking their land and their water.

No political party is talking about the attack on our food supply such as the World Wildlife Fund’s take over of the beef

industry. Yet we are getting reports daily now of dangers found in diseased beef.

No political party is talking about the over-taxing, and destruction of single-family homes and neighborhoods.

No political party is even discussing the destruction of our local system of government through the establishment of non-elected regional councils. These councils are eliminating political boundaries and the power of locally-elected representatives. The American system is disappearing in silence.

No political party is talking about the massive influence and control of the private, non-governmental organizations and planners that have invaded every single level of government, pushing these insane policies we now recognize in the Green New Deal.

NGOs are deeply entrenched in Congress, every state legislature and every county commission and city council. There they lobby, push, demand, and intimidate to get your elected officials to make their private agendas law. The fact is they are not government agencies and they have no power unless your elected officials give it to them. And they have no intention of giving up their power.

The only way we can toss them into the street is to elect people who understand their tyrannical agenda and will take strong action to remove them from the halls of government.

Democrats empower them. Republicans are clueless. Libertarians are pathetically confused by the whole process, continuing to believe that Public/Private Partnerships are free enterprise.

The Constitution Party is the only party that understands what needs to be done. You've never had a better opportunity to grow and change things and achieve your mission to restore the Constitution.

Do you, as a political party, want to get the attention of millions of Americans who are suffering from this government over-reach? Do you want to defeat the socialist democrats and the 'Me Too' Republicans? Do you want to restore the American Republic?

Then get mad and be the party that takes on these issues. Thousands of victims are desperate to hear any elected official, any party, even mention these policies that are overrunning every single city, county, and state.

They are losing everything. They have been shut out of the American dream. And if they hear you take on these issues in upcoming campaigns at every level of government – they will flock to you. Americans are starting to wake up to these dangers and they desperately want a new voice that stands for freedom!

Run candidates for city council, county commission, and the state legislatures, who will articulate these issues. Make it your mission to run these enemies of freedom out of town on a rail.

Speak to these victims – these desperate Americans. Name the names of the NGOs – challenge them. Challenge their policies and their funding sources. Show the public what a danger they are. And then challenge your opponents as to why they are giving these NGOs such power and influence.

Elected officials keep referring to these NGOs and planners who live off the federal grants as “stakeholders.” They are not stakeholders! You are the stakeholders. They are carpetbaggers – there to grab everything they can.

Paint a clear picture as to what life in American will be like under these policies. Will every choice Americans make in their lives be like a visit to the DMV? Make your opponents responsible for their own policies. Put their names to them. Make them defend their plans.

Help the people see the truth! That's how you drain the swamp
and restore the United States of America!
