

How to create a national debate on immigration-population

As you can see from the enclosed immigration-driven population graph, your country, the United States of America, accelerates its population by 138 million people net gain, within the next 34 years. Over 100,000,000 (million) people from that growth comes from legal immigration. As long as our borders remain unguarded and open, the numbers of illegal immigrants will grow into the millions, also.

(Permission to republish this population graph by Roy Beck, www.NumbersUSA.org)

It's not farfetched that another 10 million illegal migrants will cross into America within 34 years by 2050. All immigrants overload our carrying capacity. Why do you think they fled their own countries?

Once that next 138 million people plus another 10 million illegal immigrants flood across our borders, our citizens of every race, creed and color become victims. Our culture, language and rule of law become victims. Our quality of life and standard of living degrade into third world status. Our environment takes an enormous hit as to water, soil, energy, resources and balance.

As you can see from the population graph; at current legal immigration rates of 1.1 to 1.2 million annually, or 100,000 legal immigrants monthly—which, by the way, equates to filling up the Rose Bowl with 100,000 people every 30 days and dumping them into America's landscape. Most without any language abilities, education or work skills to contribute, and most become welfare recipients paid by you! Again, it's not "if", but it's a fact that these 100 million immigrants WILL land on

our shores if we don't stop our US Congress by forcing a national debate on creating a total shutdown on all immigration.

"How can I help save my children's futures?" you ask.

Let's use social media like never before. I ask you to use the template letter below to write to some key media addresses. Can you imagine citizens across America taking this letter and sending thousands of emails and letters to the media? Send this letter template to your Facebook network, LinkedIn, Google, Digg and more. Copy your letter to the major news networks and radio shows in your area and in your Facebook quadrant. You can send this template letter to more than 50 Facebook media personalities.

Dear (Scott Pelley, David Muir, Wolf Blitzer, Laura Ingraham, Judge Janine, Lester Holt, Shepard Smith, Fox and Friends, George Stephanopoulos, Diane Sawyer, Meet the Press, Face the Nation and two dozen more)

According to the US Census Bureau, via endless legal immigration, our kids face an added 138 million more people within 34 years by 2050. We will jump from 300 million in 2006 to reach 438 by 2050.

We need a national debate on where our civilization is headed. Do we want to face insurmountable water shortages, energy exhaustion and resource depletion? Do we want our 35 most populated cities to double in population?
