

# How to Return to the American Dream and Our Constitutional Republic

By Andrew Wallace

October 30, 2025

Based upon the fact that most elected members of Congress are corrupt, I must conclude that these officials have chosen Communism which will lead to Civil War. Many citizens are still ignorant and apathetic as a result of brainwashing and propaganda. However, I believe that a majority of our citizens still want the Middle-class American Dream, with Justice and Prosperity in a Constitutional Republic. This paper will spell out comprehensively what must be done to preclude a Civil War.

1. Terminate all Foreign Aid and foreign Military Deployments. All of these expenses directly benefit the Evil Ones in the Deep state. We have no justified Interest in any country except our own. We cannot be invaded, we can only be defeated by weapons of mass destruction or from within. This is why we have no reason to be in NATO.
2. Terminate the Privately-Owned Federal Reserve Bank, which will stop money printing to finance Wars-for-Profit and a multitude of scams. Replace Fiat Currency with Gold and Silver money, which will pretty much end inflation.
3. Stop all federal payments to states for functions unconstitutionally usurped from the states or for functions not authorized by specific Enumerated Powers in the

Constitution. Either terminate the income tax or return most of the collections from a state to that state. The Income Tax reversed the roles of the states and federal government, making a Constitutional Republic impossible without these modifications..

4. Deport all illegal Invaders as fast as possible prior to the 2030 census. The Constitution states that giving aid and comfort to invaders is Treason. Communist Invaders have already commenced with attacks on citizens and police. The Draft may be required, as our military is too small to confront and deport invaders. If rioters resist using measures that could injure police, then deadly force should be used. So far use of deadly force has been too little and too late.

5. Writ of Habeas Corpus can be terminated in this situation of rebellion, invasion or threat to public safety. Lincoln did this during the Civil War.

6. There must be effective law enforcement to force elected officials and bureaucrats of the Administrative State to conduct their duties in a lawful manner. This is especially important since most officials have been bribed to support Communism and the Evil Ones in the Deep State.

7. It is well known that thousands of unconstitutional functions are performed by bureaucrats of the Administrative State. I call this the Criminal Enterprise, which maybe comprises 50% of Government. If I was to attempt to list them, no one would read this paper.

8. The American People have no faith or trust in the FBi or the National Security Agencies. I think the FBI should be disbanded and the security agencies be allowed only to gather information.

9. Many people believe, with good reason, that the election of President Trump saved us from a Civil War and bought us some time for Trump's programs to blossom and save us from total

Economic Collapse.

As an Economist, I can pretty much guarantee Unlimited Prosperity at an unheard-of level with the American Dream in full blossom for everyone willing to work, if the recommendations in this paper are followed. However if key elements are not followed, I can foresee a Civil War with the Communists and the Evil Ones in the Deep State aka Parasitic Super-Rich Ruling Class aka Wealthy Families and their Minions in government.
