

Immigration Altering The Political DNA Of America

In 2017, powerful interests push for blanket amnesty of 12 million and as high as 20 million illegal aliens. The journalist Ann Coulter, in her book **Adios America**, counted 31 million illegal aliens residing within America by researching U.S. Census Bureau records.

Since 1965, via legal immigration, birth rates and chain-migrated relatives, the United States added 100,000,000 (million) people from 196 countries around the world. If that trend continues on the same path, America expects to add 100,000,000 more people from around the world by 2050. (See population graph below)

Not mentioned by politicians, those 100 million people from 196 different countries represent 190 different worldviews, religions, language and cultures. America faces a complete altering of its political and cultural DNA toward millions of immigrants

pulling in their own directions, rather than for the American way of life.

Foremost among incompatible immigrants, Muslims number 3.3 million today within the United States, but they expect to reach as high as 20 million or more by 2050 at current immigration rates, birth rates and chain migration. A recent Fox News survey recorded that 51 percent of Muslim-Americans demand Sharia Law. As their numbers grow, so does their power to vote Sharia Law into their communities. They create parallel societies within our country, but in defiance of our

country.

If Congress allows an illegal alien worker amnesty, America shall suffer 20 million illegal aliens becoming U.S. citizens. That will change the DNA of America to resemble Mexico's failed society. It will become our first step down toward becoming a Third World country.

Mexicans will be able to 'chain migrate' entire villages into our country from the poorest, most uneducated peasants that can be exported to America.

They do not speak, act nor are they invested as American citizens. They represent the beachhead of an invading army of foreigners colonizing America. They're commandeering our school systems across America.

Sharon Barrett of Fort Collins, Colorado said, "We left California because you can't drive safely without danger of being hit by a Mexican. Our kids couldn't learn anything in school because of so much language chaos and functional illiteracy. We were vulnerable to home break-ins seven days a week. They steal everything that's not tied down. They're bringing the lawlessness from Mexico into the United States. We had to get out."

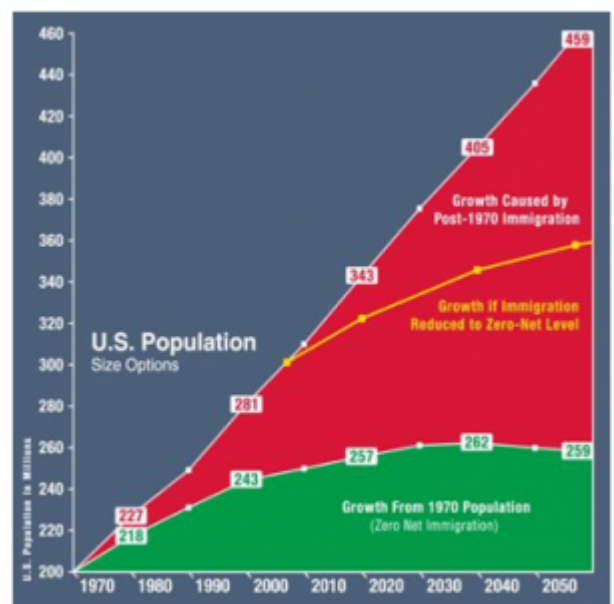

Samuel Huntington, author of **Clash of Civilizations**, said, "It is my hypothesis that the fundamental source of conflict in this new world will not be primarily ideological or primarily economic. The great divisions among humankind and the dominating source of conflict will be cultural. Nation-states will remain the most powerful actors in world affairs, but the principal conflicts of global politics will occur between nations and groups of different civilizations. The clash of civilizations will dominate global politics. The fault lines between civilizations will be the battle lines of the future."

What it means if the senate passes a mass amnesty—our country morphs into something other than the United States of America.

It will become a 'Fractured Colony of Mexico...or a Caliphate of the Middle East.'" English cannot survive endless immigration. We will no longer remain a lawful sovereign nation. We will most certainly suffer the loss of law and order. Our citizenship will be degraded to the level of foreign people with no identification with our country.

For example, Los Angeles Mayor Eric Garcetti, an American politician works for Mexican interests and sanctuary city immunity for illegal aliens. The same continues in Chicago, Detroit, New York City and Denver.

Do we want our country to turn into another third world? How about another China like what happened to Vancouver, British Columbia in Canada? Any American excited about the prospects of another Paris, France here in the USA? How about another Sydney, Australia? Or, will we keep degrading ourselves into slum conditions like Bombay, India? How about immigrating ourselves toward a billion people so we can catch up to China's insane population of 1.35 billion? How many of us want America turned into 100 different languages and still pretend it's America? Anyone thrilled about more gridlock auto congestion in our cities? How about more acid rain, air pollution and water shortages by adding millions of immigrants? How about higher prices for everything until we're all reduced to the lower class?

"Immigrants devoted to their own cultures and religions are not influenced by the secular politically correct façade that dominates academia, news-media, entertainment, education, religious and political thinking today," said James Walsh, former Associate General Counsel of the United States

Immigration and Naturalization Service. “They claim the right not to assimilate, and the day is coming when the question will be how can the United States regulate the defiantly unassimilated cultures, religions and mores of foreign lands? Such immigrants say their traditions trump the U.S. legal system. Balkanization of the United States has begun.”
