

# Impeach The President . . . Who?

Let's suppose, just for the sake of argument, what would happen if it is discovered that Donald Trump's real name is Barry Soetoro, that he was born in Kenya, that the birth certificate he produced was an inept CIA falsification, that the Kapiolani Hospital in Hawaii, where he was allegedly born, took that name several years after he was born?

What do you think would happen if Trump's Social Security card had been issued by a state where he never resided? What if nobody can remember him at the schools he allegedly attended? What if his university records were frozen and closed to the public?

What if it is discovered that Trump's alleged mother lived in Indonesia at the time it was teeming with CIA operatives who were frantically trying to overthrow the democratically - elected leader of that country and substitute him with a corrupt tyrant they could control?

Let's suppose that President Trump would have told about his Muslim faith and given \$100 million in U.S. taxpayer funds to re-build foreign mosques. That he had bowed in submission before the Saudi King. That he had attended for 20 years a Liberation Theology Church that condemns Christianity and professes Marxism. That he purposefully omitted "endowed by our Creator " from his recitation of The Declaration of Independence.

Let's suppose that it was Trump who said that NASA's "foremost mission" was to outreach to Muslim communities. That Trump was the first President not to give a Christmas Greeting from the White House, and who hanged photos of Chairman Mao on the White House tree. That he funneled \$900 million in U.S.

taxpayer dollars to Hamas. That he ordered the United States Postal Service to honor a Muslim holiday with a new commemorative stamp. That he said that America was not a Christian nation.

What if it is discovered that Trump's secret goal is to destroy U.S sovereignty, open the borders to an invasion of illegal aliens, export American jobs abroad and fuse the country into a global government he euphemistically called the "New World Order."

Would that have been motive for impeachment under the charges of treason of the highest order?

Of course not!

Actually, the impeachment frenzy against President Trump is because he has done nothing of the above. If he were an impostor and a traitor, the Invisible Government of the United States would love him from the bottom of its crooked heart. That love would have been a clear proof that Donald Trump is not in the White House because a large majority of the American people elected him, but that he had been selected by the same people who selected the Bushes, Clinton and Obama: the globalist conspirators ensconced at the Council on Foreign Relations in Manhattan.

If, instead of fighting the anti-American forces trying to make America great again, Trump would have been another traitor compelling big corporations to outsource American jobs to China, the globalist conspirators and their minions in the mainstream press would love him.

If, instead of trying to restore America's traditional values and more, Trump had worked hard in the shadows to destroy them, the politically-correct crowd would adore him. If Trump had declared that the non-existing global warming was the highest threat to America and its people, and told us that, in order to stop it we must lower our standards of living, the

mainstream media would call him a true American hero.

But no. To the globalist traitors President Trump is a real and present danger, and they are working hard to get rid of him by any means necessary.

A widely-accepted myth of American politics, repeated over and over, is that the American President is the most powerful man in the world. Well, the Trump presidency has shown that it is true, but only if the alleged most powerful man in the world is a puppet in the hands of the actual most powerful men in the world: the international bankers who control the world's economy, including the U.S. economy.

Banker Amschel Mayer Rothschild is often quoted as saying: "Give me control of a nation's money supply and I care not who makes the laws."

Well, he was right on the money. (pun intended)
