

Insurrection, Sedition and Chaos Erupting Across America

By Frosty Wooldridge

June 12, 2025

Before writing this column, I want to make a correction noted by a reader in Thornton, Colorado, concerning my commentary on June 9, 2025: [Consequences of 25 Million Illegal Aliens in America](#).

Frosty: "There were ten victims in the Boulder King Soopers shooting, not 13 as you stated in the piece. I was a civilian employee of the Boulder Police Department at the time and lost my friend and colleague Officer Eric Talley, the last to perish after nine civilians had been killed and before the slaughter was stopped by fellow responding officers. A correction would be welcome." James D.

Thank you James for keeping me on top of my research on anything I present to the public. It's extremely important to give accurate information to you, the public. The event took place on March 22, 2021. The killer is now serving 10 life sentences with no chance for parole.

We are all pained and give our prayers for Officer Eric Talley, and his friends and family. In so many ways, it tears at my soul at the loss of fellow Americans at the hands of illegal aliens—those who arrived in violation of our laws—and worse, to do harm to our citizens.

Let it be known that I try my level best to give you “ground level” reporting based on my observations and commensurate research. If I fail you, I fail myself. Thanks for keeping me on my journalistic toes.

Another thing along with James D.’s bringing to my attention, stems from the fact that our elected leaders continue making excuses for their incompetence, their violation of their oath of office, and their disregard for fellow Americans.

What’s happening in Los Angeles, San Francisco, Chicago, NYC, Boston and more cities, stinks. You’ve got governors, mayors and city councils opening their cities to lawlessness. Even worse, after the riots explode, clowns like Gavin Newsom and Karen Bass blame anyone but themselves. The reality remains: California encourages lawlessness by inviting lawlessness into its own population. When you create a lawless citizenry like we see in California, you’re going to see it explode because, right now, there’s got to be at least 1,000,000 illegal aliens in LA, alone. Another 2,000,000 around the rest of the state. Probably more!

And yet, you hear “newspeak” from Governor Newsom and Mayor Bass, like they practiced it right out of George Orwell’s book: 1984. They lie through their teeth. They obfuscate the facts. They’ve lied so much, they believe their own lies.

They pretend to be competent when they are the perfect example of The Peter Principle by Lawrence Peter. “In industrialized countries, people are promoted to their highest level of incompetence.”

In this case, you have so many illegal aliens in California, of course, they have registered to vote, and they voted for people who would protect them from deportation.

But the caveat remains: if you keep growing a third world illegal alien citizenry, it’s going to backfire. When you grow enough of them, they can and will overwhelm our systems of law

and order.

If you noticed, you're seeing a predominance of Mexican, Venezuelan, Guatemalan, Hamas, Palestinian and other flags being flown in all those demonstrations across our country.

One girl screamed out on a news report, "This land was stolen from Mexico. We want our land back."

Soon enough, not only will you hear from our Muslim enclaves, "Death to America", but in Sweden, they are boasting, "Sweden will become an Islamic caliphate...we only accept Sharia Law."

College students supporting Hamas' attacks on Jews spreads like wildfire across our eastern colleges. You're seeing only Palestinian flags and NOT our Stars and Stripes. How could that happen in America? Well, it's happening. That Jewish couple just got shot to death several weeks ago.

We better ask ourselves how far do we want to go down that "insurrection, sedition and chaos" rabbit hole?

The fact remains that Biden allowed over 12 million refugees with conflicting religions, cultures and world views. They will start demanding that we abide by their ideologies. It's already occurring across our country this past week. It can only worsen as we import more of them, legally or illegally.

What's beyond stupid grows beyond reason: our own youth are burning Old Glory and spitting on it in the streets of LA, and more than likely, across the USA. These kids didn't serve in the military, while at the same time, our universities are teaching them to hate America. If you teach enough young people to hate America, it will fall into "insurrection, sedition and chaos" just like what happened with the George Floyd riots.

Yes, we encourage peaceful demonstrations in America, and it's guaranteed by the First Amendment—but we cannot, should not

and will not tolerate anarchy, looting, firebombing our police and stoning our law officers and National Guard.

The reality is, these riotous youth don't have any "integrity" skin in the game. They don't have any understanding of the costs of "freedom" in America. All of them need to be shipped off to North Korea, China or Russia to serve on the front lines of Ukraine. They would gain one heck of an education. Totalitarian dictatorships use anyone as they please and they kill people in a heartbeat.

Personally, we need to deport every single last illegal alien in America. You want to wave your country's flag? Wave it in your own country. You want a better country? Then, work in your own country to make it better. We need to mandate English as our official language by Congressional Law. We need honest reporting by our mainstream media...which we don't enjoy! We need governors and mayors and city councils to rescind "Sanctuary City" status...and follow our laws as put into place by our elected leaders.

We need to support our troops, our police officers, our firefighters, and our laws. We need those hellishly political animals in Washington DC to stand up for America and Americans. They need to work with Trump instead of against him. We voted him into office, so that's his mandate. We need term limits, NOW! We need fresh minds to solve 21st century problems. Old men and Old women in Congress won't and don't get the job done. In fact, they don't know what's going on in America at the local level.

Finally, I am proud of America. I fly Old Glory outside my front door every day. I love this country because I've seen some really nasty countries around the world. We offer every American citizen the very best in opportunities no matter what their race, religion or color. Americans are the luckiest human beings on the planet. Wouldn't you agree?
