

Invasion of America via endless immigration

You almost cannot help but appreciate that Americans feel desperation in their lives at their inability to stop the invasion of their country by endless immigration.

Our U.S. Congress won't moderate a rogue Muslim president. Another 200,000 Syrian refugees continue flooding into our country—without our acceptance. The president won't secure our borders. The annual flow of 1.2 million legal immigrants proceeds without pause or question. None of the past five presidents protected our borders. The past 10 Congresses never, ever established laws for visa overstays that now make up more than 30 percent of illegal aliens within America.

The results of this invasion manifested in 9/11, Fort Dix Six, Boston Marathon, Chattanooga, Tennessee; Moore, Oklahoma, Phoenix, Arizona; New York Times Square bomber; San Bernardino, California—and MANY more to come. Worse, we added 100 million people in the last 45 years and expect another 100 million within 34 years by 2050.

Los Angeles, Chicago, Atlanta, New York City, Houston, Miami, San Francisco—face incredible consequences from sheer human numbers from water shortages to air pollution to horrible qualities of life for all citizens. Just watch the news every night for murders, accidents, failing schools, homelessness, despair and drug gangs.

One reader responded to my latest column:

“You know, America is the third most populous nation on Earth and yet we receive the highest number of immigrants,” said Tim. “There is something wrong with that equation. Neither China nor India encourages immigrants into their countries. In fact Russia, with a reasonably low population density in

Siberia, doesn't really do so either. When will the 'no vacancy' sign be turned on.

"I first became aware of this decades ago when speaking with an English owner of a small pub in a little Missouri country town. He said England was far more rural outside of the big cities than America. That really surprised me – and thirty years later it is truer than ever. I assumed the English countryside was more densely settled than America.

"And we are settling people with little or no connection to our culture or heritage. A nation cannot remain what it is if it is out-bred by invaders. Rome fell for that reason (among others). Lebanon is another example, one from modern times; the Lebanese allowed Palestinians to come as refugees and they more or less took over. Now Lebanon – which had a vibrant Christian culture and a peaceful multicultural society – is an Islamic hell-hole. That's what unrestrained immigration does.

"In fact, many nations have been blotted out by immigrants throughout history. The Britons are now but a memory, having been driven into the small peninsula of Wales by the invading Germanic tribes. The Khazars of Russia, a unique nation that practiced Judaism, is gone, driven out by Russians and Mongols.

"The Ainu of Japan are down to just a few thousand individuals. They once owned the Japanese Islands, Caucasian peoples who were swallowed up by the Asiatic Japanese. Missouri was once owned by the Osage; haven't seen any of them around here in a long time. We are next if we don't put some rational limits on immigration."

Because of immigration, we explode as the third fastest growing nation on Earth behind China and India. China grows by 8,000,000 annually and India by 16 million by their own hands. We add 3.1 million via immigration.

Right now, Catholic Charities, Lutheran Church Refugee Centers

and other organizations work overtime to flood America with refugees. They fail to consider what another 200,000 Syrian refugees will do to the communities where they land. Talk about mixing Muslims with Christians! Result: disaster after disaster. Just look at Europe!

Congress continues to flood our country with 1.2 million refugees from 190 countries year in and year out, decade in and decade out.

Those same Congressional Critters live in gated communities, private schools for their kids, and enjoy massive paychecks—\$174,000.00 annually for members of Congress—while the rest of us with average American incomes in the \$40,000.00 range, pay for all the welfare given to immigrants.

Weren't immigrants supposed to benefit our country by contributing? Instead, they use welfare as a way of life. It's a fat life, too.

Why aren't big national journalists writing about what's happening to us—middle American citizens paying for all this nightmare? Answer: Thomas Friedman, Kathleen Parker, Scott Pelley, David Muir, Lester Holt, Wolf Blitzer, Charlie Rose and the rest of them don't have to live in the mess they refuse to report about.

Within 30 years, it's not "if", but at the current rate of legal immigration, it's a demographic fact that we expect to import 100,000,000 (million) more legal immigrants injected into our country.

But you won't hear a word about it. Not one single word from the likes of "60 Minutes" or Matt Lauer or Charlie Rose or NPR's Terry Gross or Robert Siegel. I know because I queried all of them countless times in the past 15 years for an interview of my work and 35 other top experts.

We must flat out demand a national debate on whether or not we

want to destroy our country with THAT many people. I am about to create a "Social Media" campaign to invite everyone across the country to write top TV programs to feature interviews on what we face as a civilization. I will be giving addresses and letter templates so everyone can write top shows such as "60 Minutes" at 60M@cbsnews.com. My Facebook page covers all of what we face daily: Frosty Wooldridge

We need to force the leaders of our country into a debate on legal and illegal immigration. Next column will give you instructions. Be ready to send the template and addresses to all your networks.

"Any culture that will not defend itself against displacement through mass immigration faces extinction. That includes both time-tested and successful cultures. Embracing diversity results in cultural suicide. America's multicultural path guarantees its destruction via cultural clashes and conflict with Islam, Mexican and African cultures that diametrically oppose American culture. The more diverse a country, the more destructive and broken-down its future. The more people, the more it destroys its quality of life and standard of living. The more it adds immigrants, the more destruction to its environment. The more it imports refugees, the faster America, Canada, Europe and Australia lose their own ability to function and worse, their identities. Exponential growth of any civilization leads to ultimate collapse. You see it in Africa, India and China today. You will see it in Europe, Canada, Australia and America in the coming years, "IF" Western countries don't stop all forms of immigration." Frosty Wooldridge, 6 continent world bicycle traveler, witness to what's coming to Western countries as to endless refugee immigration.
