

Is The Federal Death Administration (FDA) at it Again?

Authored by Devvy Kidd not AI

November 25, 2024

Probably like tens and tens of millions of Americans, I didn't give a great deal of thought about the FDA other than it's a government agency that approves drugs and treatments that are allegedly safe for humans and animals. The American people (under, say, age 90) have grown up with so many federal alphabets soup agencies, they've become immune to the dastardly deeds done by these unelected officials – except when it hits their life.

That agency [derives its jurisdiction from treaties](#) (circumvent the Constitution) and has been getting away with destroying people's health for decades, and in too many cases, the result is death. The FDA is nothing more than another out of control agency answerable to no one.

Back in 2004, I wrote a piece on [Donald Rumsfeld and aspartame](#). The mail came flooding in with accusations that aspartame was perfectly safe because the ghouls at the FDA said so! I followed up the deluge with a column under my own by-line; [Aspartame Concerns – Junk Science, Quack Doctors?](#)

Dr. [Betty Martini](#) has been a pioneer in exposing the devastating effects of ingesting that deadly chemical. Naturally, she's been attacked on a regular basis as have

doctors and scientists who have studied the effects of aspartame on the human body – particularly the brain. Anyone who dares expose the truth which cuts into the profits of the big pharma houses is persecuted by the pimps at the Federal Death Administration. Many are political prisoners for doing nothing more than trying to naturally treat their patients.

In 2007, our former governor (TX), Rick Perry, issued an Executive Order that blew up in a NY second regarding forcing 6th grade girls to get this new HPV vaccine, GARDASIL. Our state legislature struck back like lightning and Perry ended up eating his EO. Oh, not because he cared about the health of young girls, but purely for political reasons.

[Perry walks back his HPV vaccine stance](#), Aug. 19, 2011 – “So why would Rick Perry sign this executive order so unpopular within his own political base? The answer may be in his relationship with Merck & Co (the pharmaceutical company responsible for creating the HPV vaccine GARDASIL) and the advocacy organization Women in Government.”

[Judicial Watch: 16 new deaths from Gardasil vaccine](#), Sept. 30, 2010 – “Records Document 3,589 Adverse Reactions Related to Gardasil between May 2009 and September 2010, including 213 Cases Resulting in Permanent Disability

WASHINGTON, Sept. 28 /Standard Newswire/ – Judicial Watch, the public interest group that investigates and prosecutes government corruption, announced today that it has received new documents from the U.S. Food and Drug Administration (FDA) under the provisions of the Freedom of Information Act (FOIA), detailing reports of adverse reactions to the vaccination for human papillomavirus (HPV), Gardasil. The adverse reactions include 16 new deaths (including four suicides) between May 2009 and September 2010. The FDA also produced 789 “serious” reports, with 213 cases resulting in permanent disability and 25 resulting in a diagnosis of Guillian Barre Syndrome.”

Only after enough Americans die or thousands have their health destroyed, does the FDA pull some of these dangerous drugs: [Treachery and Tragedy](#), Oct. 8, 2007. My column giving so many examples of “safe” drugs pulled from the market after lives are ruined or death. I hope you find time to read it.

The ghouls at the FDA need to be held accountable, *but they never are*. Too many of them come from big pharma companies. **And, of course, it's all about the money – BIG money.** Why do you think big pharma corporations hate natural treatments and cures? [The FDA: A Pain From the Neck to the Big Toe](#), Oct. 25, 2013: “At the same time, doctors are encouraged by pharmaceutical companies to employ more expensive and profitable treatments. As a result the overall cost burden increases. Evidence suggests that doctors are prescribing Colcrys in large volumes to treat gout flare-ups and as a long-term preventative measure.

“Once again government has taken something that was both cheap and beneficial and turned it into a monopoly that hurts the general public and drives up the cost of medical care to the benefit of Big Pharma.”

And they've never let up attacks on supplements that actually benefit your health, but be sure to get some whipped up vaccine (think COVID-19 EXPERIMENTAL GENE THERAPY injections.)

[The FDA Escalates Its War on Health Freedom](#), Sept. 17, 2011

[Economists Against the FDA](#), Sept. 1, 2000: “Today men with risk of heart trouble know to take half an aspirin a day. By 1988 it was well established that aspirin greatly reduces the risk of myocardial occlusion. But for years the FDA forbade aspirin makers from advertising that fact (the FDA still significantly restricts advertising about it). The FDA surely killed tens, and quite possibly hundreds, of thousands of Americans by this restriction alone.[4]

“The FDA delays, stifles, and suppresses life-saving drugs and

devices. Such drugs and devices as Practolol, Interleukin-2, Taxotere, Vasoseal, Ancrod, Glucophage, Navelbine, Lamictal, Ethyol, Photofrin, Rilutek, Citicoline, Panorex, Femara, Prostar, Omnicath, and Transform have been subject to long delays, killing tens of thousands and causing awful suffering.[5]"

Big pharma OWN not just greedy career politicians in CONgress but also our state legislatures. Their media presence on the boob tube is incredible. HUGE advertising bux. In Feb. 2022, I spent 4 days in the hospital for pneumonia. On Oct. 30, 2023, I had spine fusion surgery; overnight stay because I'm a widow. August 27, 2024, vascular surgeon removed an entire vein from my left leg; incision about 14". Groin to below my knee; overnight in the hospital again because I would be home alone. Had to board my furr-babies a week each time so I could take care of myself.

Since I haven't owned a TV for 8 years, what did I do laying in a hospital bed? Why the TV, of course! Only watched one channel, ID, the whole time. EVERY commercial break (which I muted) was a pill for this, a pill for that, shots for the flu and on and on. Actually, I was shocked and it takes a lot to shock me anymore. A 4-5-minute commercial break and you might see one for laundry detergent.

I recently became aware of relatively new FDA approved arthritis drugs for dogs and cats. Anyone whose read my columns over the decades and receives my free email alerts knows how much I love dogs. Been a dog owner for 57 years; all rescues from dog pounds, humane societies or rescue organizations. The article I saw caught my eye as my Tibetan Mastiff is 14-15 years old and has some arthritis. My severely physically abused over time Cardigan Corgi (I've had two years now) has some arthritis. He's about 12 now. No one wanted him because he was considered a "senior" at ag 10; he spent 10 months in a cage when I adopted him. I wanted Cesar; I love him dearly.

But, after reading the article I happened on, I spent quite a bit of time researching, pros and cons. I'm not a doctor, veterinarian and have zero training so I must rely on CREDIBLE sources in order to make an informed decision. So, FDA, keep your goons harnessed, this isn't canine medical advice.

Pet owners must ask their vet about side effects because they are endless and too many deaths. Below are but a small number of articles by vets or researchers about those drugs approved by the Federal Death Administration (FDA).

[Two New Breakthrough Drugs for Arthritis in Dogs and Cats: Librela for Dogs, Solensia for Cats](#) (Includes video), [Dr. Andrew Jones, DVM](#). Sept.16, 2024 – “In my experience, most pets benefit greatly from holistic treatments, and these are often much safer than some of the newer drugs on the market. Would I use *Librela* for my dog, Tula? No. Would I use *Solensia* for my next cat? Absolutely not. If I wouldn't inject myself with a monoclonal antibody monthly, I'm certainly not going to inject my pets with one.” Instructions on record at my vet (since 2006; he and his staff are truly wonderful people who do care): Neither Maddy or Cesar are to be given Librela. I'm looking into the CBD option. [10 Best CBD Oils for Dogs with Arthritis](#)

[Librela \(Beransa\) – Wonder Drug Or Disaster In The Making?](#), Oct. 31, 2023

[What you should know about SOLENSIA and LIBRELA for your fur baby with Osteoarthritis](#)

[Dog parents want arthritis drug pulled from shelves after being linked to hundreds of pet deaths](#), Nov. 13, 2024

[Avoid The Pain, Avoid Librela for Dogs](#)

[Recall – The Issue](#): “The recent release of Librela, touted as a “miracle drug” for canine osteoarthritis, has deeply impacted thousands of pet owners and their beloved companions

internationally since 2021.” I am quoting this from Sam B. who is a veterinary professional with over a decade of experience. Sam has witnessed firsthand the devastating consequences of the drug Librela, which is used to control pain from arthritis in dogs. Solensia is the same drug used to control pain from osteoarthritis in cats. Despite its promise of relief from arthritis pain, Librela & Solensia have resulted in thousands of adverse reactions, leaving dogs & cats in agony and their owners desperate for answers. It is imperative that action is taken to address this urgent issue.

“The continued availability and promotion of Librela & Solensia pose a grave threat to the well-being of countless dogs and cats. With each passing day, more dogs and cats are subjected to unnecessary suffering and even death as a result of severe adverse reactions to these drugs. The lack of accountability from the manufacturer, Zoetis, exacerbates the problem, leaving pet owners with broken hearts, mounting medical bills, and unanswered questions. If left unchecked, the widespread use of Librela and Solensia could lead to irreversible harm to countless canine and feline companions and erode trust in the veterinary pharmaceutical industry and Zoetis.”

Too many pet owners have had to surrender their beloved companions because vet bills are through the roof. But, with inflation and all these new FDA approved “safe” drugs for your furr babies – that in this case appears to hurt your furr babies – more trips to the vet you can’t afford for something that could have been prevented.

[Facts about bedinvetmab and frunevetmab – Zoetis Librela®/Beransa® for dogs, Solensia® for cats Side Effect Resources](#) – “Tens of thousands suffering severe, often deadly, outcomes

“Your pet may require life saving interventions only a health care professional can provide. If a vet tells you this

product has no side effects or that it is 100% safe they are dangerously uninformed. Holistic veterinarians offer additional non-pharmaceutical treatments often unavailable at traditional clinics.”

[Librela Lawsuit Says Zoetis Failed to Warn Pet Owners About Dangers of Canine Osteoarthritis Drug](#), Oct. 16, 2024, *Hartney v. Zoetis, Inc.*, filed Oct. 9, 2024: “The 38-page lawsuit shares that Librela, the brand name version of bedinvetmab, has been linked to thousands of reports of [adverse events in dogs](#), including behavior changes, urinary incontinence, seizures, worsening osteoarthritis symptoms, and death. Per the suit, there is no available antidote should a pet have an adverse reaction to the long-acting drug, which was approved by the FDA in 2023 to treat osteoarthritis-related pain and is administered by injection on a monthly basis.

“The suit alleges [misrepresentations about Librela by manufacturer Zoetis](#), the world’s largest animal health company by sales, have caused “millions upon millions of dollars in damages for pet owners,” with the company to date continuing to maintain that the [drug is safe for dogs](#).

“The plaintiff, a Florida resident, says that within days of the first administration of Librela, her dog, Jake, a poodle mix diagnosed with coxofemoral osteoarthritis, began to experience drastically increased thirst, decreased appetite, limited mobility and [worsening pain](#). In May of this year, Jake had to be euthanized as his condition had “become so dire and his quality of life so poor that there was only one humane option,” the lawsuit states.”

[Control studies and outcomes. NO THANKS.](#)

[A randomized, double-blind, placebo-controlled study of daily cannabidiol for the treatment of canine osteoarthritis pain,](#)

Sept. 1, 2020, National Library of Medicine.

Trust the FDA or CDC (Center for Disease Creation)? When pig's fly.

I know we as a nation are in dire straits on so many levels; **the rot and corruption run deep from city councils, unconstitutional cabinets and agencies to the WH.** But, our beloved pets bring joy and comfort during the bad times. They are companions for the lonely, not to mention guide dogs for the blind and saving lives every day. I know I'm prejudiced, but I believe dogs are a gift from God. They only want love, not being beaten on a regular basis. *The love they give back is priceless.*

Thanksgiving is in four days. From all I've read, yes, some dog foods are turkey but *not the same as you might be cooking*: no spices, onions, etc. You might wish to look up feeding your furr baby turkey on Thanksgiving – especially not giving them turkey bones.

While families across the nation give thanks for blessings, please pray for our fellow Americans who are suffering. If you missed Minister Rob Pue's Nov. 23, 2024 column, *it's a heart breaker*: [Appalachia Needs Help – This Is Real](#) (Do read his entire column.)

"Meanwhile, Christian ministries, other organizations and individuals have stepped up to help. People helping people, directly, without government involvement seems to be much more effective than the federal or state government. The current need now is for shelter, as thousands continue to live in tents, and winter is here.

"Once again, individuals are coming forward to build temporary shelters with heat and electricity for families who have nothing. But the need is enormous, and it appears FEMA is just endless "red tape." Countless thousands have lost everything, including their loved ones, who will never be

found. One cannot comprehend the sheer devastation of this disaster unless you see it with your own eyes.

“Meanwhile, the mud that now covers everything is highly toxic, contaminated with “forever chemicals” that have been stirred into the mix from chemical plants and factories that were destroyed. Some have called it “East Palestine, Ohio “times” a thousand.” Cadaver dogs, and horses used to reach those trapped in the mountains are dying from the poisonous mud. One person described how her rubber boots were dissolving in the mud because of the toxic sludge. The water is unsafe. People are suffering beyond belief and will soon be freezing to death. This is in the United States of America. Appalachia needs help. This is real.”

Entire families swept away by thousands of tons of mud; As Pue says, winter is here and you can imagine living in a tent right now in that region is simply beyond words. Come January, a VERY serious plan targeting DoD and our state legislatures must be started about what really happened during Helene in that area – here we’re talking about weather manipulation which is very real.

Please have a safe and blessed Thanksgiving. Keep your powder dry. The crazies who should be in state mental hospitals, armed illegals and terrorists are roaming all across this country.

For a thorough, comprehensive education on the Fed, the income tax, education, Medicare, SS, the critical, fraudulent ratification of the Seventeenth Amendment and more, be sure to order my book by calling 800-955-0116 or click the link, “[Taking Politics Out of Solutions](#)“. 400 pages of facts and solutions. [Aspartame sweetener ruled 'possible' cause of cancer by WHO](#), July 14, 2023 (Let's hope Trump does it again: Get the US out of the rotten, corrupt WTO)

Most people don't read the label on products they purchase. They should.

[FDA ACCUSED OF LYING ABOUT SWEETENER](#) – Letter from Dr. Betty Martini to Jeannie Ertter-Prego of the US Food and Drug Administration, April 26, 2024: "I am addressing your recent lies and nonsense on aspartame. That makes FDA guilty of Title 18, Section 1001 of knowingly misinforming the public on aspartame, the same law the FDA themselves used on the original manufacturer of aspartame, Searle, for lying and misinforming.

"You say, "Aspartame is one of the most thoroughly tested and studied food additive the Food and Drug Administration (FDA or the Agency) has ever approved. More than 100 toxicological and clinical studies reviewed by FDA confirm that aspartame is safe for the general population." Now here's the real truth of the matter on those studies:

"On January 10, 1977 in a 33 page letter, FDA Chief counsel Richard Merrill recommended to U.S. Attorney Sam Skinner that a grand jury investigate Searle for "apparent violations of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. 331 (e), and the False Reports to the Government Act, 18, U.S.C. 1001, for "their willful and knowing failure to make reports to the Food and Drug Administration required by the Act, 21 U.S.C. 355 (i), and for concealing material facts and making false statements in reports of animal studies conducted to establish the safety of aspartame." The FDA calls special attention to studies investigating the effect of NutraSweet on monkeys and hamsters.

"Both U.S. Prosecutors Sam Skinner and William Conlon hired on

with the defense team and the statute of limitations expired. Who does that surprise? We know the power of the pharmaceutical industry. Don't want to get indicted just hire the prosecutors. When the District Attorney goes to work for the godfather expect acquittal.

"In August, 1977 The Bressler Report (FDA audit) compiled by FDA investigators and headed by Jerome Bressler, was released. The report found 98 of the 196 animals died during one of Searle's studies and weren't autopsied until later dates, in some cases over one year after they died.

"Records for approximately 30 animals showed substantial differences between original observations on pathology sheets and the observations on pathology sheets submitted to the FDA. There were numerous other inconsistencies and errors noted. For example, a rat was reported alive, then dead, then alive, then dead again; a mass, a uterine polyp and ovarian neoplasms were found in animals but not reported or diagnosed in Searle's reports. The FDA investigators found dose-related uterine polyps in 15% of 34 animals.

"And you have the audacity to say aspartame is safe? And this is just the tip of the iceberg. I personally spoke to Jerome Bressler as did Dr. H. J. Roberts and Dr. Russell Blaylock." Rest at link.

[2 Things Mainstream Media Didn't Tell You About FDA's Approval of Pfizer Vaccine](#) – "Buried in the fine print of Monday's approval by the U.S. Food and Drug Administration of the Pfizer Comirnaty COVID vaccine are two critical facts that affect whether the vaccine can be mandated, and whether Pfizer can be held liable for injuries."

Speaking of the holidays and because **I want American businesses to stay in business**, for those worrying about Christmas shopping (my late mother used to start buying in July. One gift here, another there so she didn't have to

scrape together a load of money for the Christmas rush.), here's two great family-owned businesses (I have no financial or family connection for full disclosure:

I highly recommend [Sisters Thrift Store](#). Get 20% off at checkout and always free shipping! SISTERLYLOVE20

We're all aware of the grossly inappropriate books found in school libraries. I purchased two sets of these great children's books – I read them before giving one set of four to a friend's 6-six year old grand daughter and one set to one of the Christian schools in my city. [Hearty House Children's books](#).
