

It is Impossible for Trump to Drain the Swamp Unless He Obeys the Constitution!

By Andrew Wallace

November 20, 2024

To save the economy from hyperinflation, a worthless currency, and a great depression, the federal budget must be reduced by about two trillion dollars, requiring also a return to Constitutional Law!

I support President Trump because his promises will stop the destruction of the Republic, TEMPORARILY. But near-term survival requires reducing the budget by at least two trillion dollars a year, which can be easily accomplished by following the mandates of the Constitution. Now, a majority of the federal government is unconstitutional and is a functioning criminal enterprise. We all should agree.

Following are only some of the changes that must be made to return to Constitutional government and economic survival:

1. Terminate unconstitutional departments such as Education, Agriculture, Labor, Transportation, Energy, Health and Human Services, and Housing and Urban Development. The Constitution limits these functions to the states, and definitely NOT to the federal government. It should be required that some income taxes collected by the federal government in a state be returned back to that state. Federal government can make up the difference with tariffs and by elimination of

unconstitutional departments and functions, as the creators intended.

2. Terminate the private, unconstitutional Federal Reserve Bank and return to gold and silver currency as required by the Constitution. We have fiat money because swamp can't print gold to finance wars for profit or boondoggles, and to enable them to rob the people with inflation. The Great Depression was caused by the Federal Reserve Bank inflating and deflating fiat currency, allowing the wealthy to buy property for pennies on the dollar. The Federal government was financed 100% by tariffs and excise taxes until 1913, when unconstitutional fiat money and the income tax replaced tariffs. Remember, you can't print gold or control its quantity to finance wars, etc.

3. The Federal Government should return to funding its functions by tariffs and excise taxes (as it was until 1913). Tariffs protect industry, jobs and wages. Tariffs are not a sales tax on the people, as proclaimed by the Communists. Tariffs should be more than adequate if Trump obeys the Constitution. This also assumes that the unconstitutional Federal Reserve Bank is abolished and we have returned to Constitutionally-mandated gold and silver money. This will stop wars for profit, Inflation, and support economic stability (the return to this country of many factories). Most negative factors in our country were caused by the Deep State for their benefit alone.

4. The Constitution specifies that the Federal Government can't spend money on the states or for foreign aid. Social Security and Medicare are legal insurance programs without any reserves; Congress spent the money elsewhere.

5. Climate change is a fact, but we can't control it. Government efforts to tax people to control climate is a scam. We all know this.

6. Democrat voters are supporting Communists and don't know it. Most Democrats support the family, free enterprise, the Constitution, and religion, but Communists who control the Democrat party do not!

7. Only Congress can pass laws. Therefore, Presidential Executive Orders and orders from bureaucrats in the administrative state have no power over the general population.

The federal government has no power unless Constitution gives it to them. See Article 1, Section 8: (https://www.usconstitution.net/xconst_alsec8-html/) That is why there can be no federal law on abortion or why the government can't order production of electric vehicles or anything else except in wartime. But our government is mostly unconstitutional and operated as a criminal enterprise doing what they please.

8. Terminate unconstitutional FEMA and return its functions to the states, as is Constitutional. The legitimate power of the federal government is limited by what the states gave to it in the Constitution. To the extent that the federal government operates without Constitutional authority, Congress, the president and participating outsiders are functioning as a criminal enterprise. It is accepted fact that all important federal officials are being bribed by a specific economic group to act in their private interest rather than that of the People, in violation of their Constitutional Oath of Office.

9. Financial aid to Israel and Ukraine or to any other country Is unconstitutional! Many people believe that the support for Israel aid for genocide is a result of an outside political power that controls our government (through bribery/blackmail). I refuse to name this purported political power because I don't want to be vilified, slandered, indicted, attacked or murdered as is their wont. But you can surely guess!

10...Remember that any support given by government or anyone to invaders is Constitutional treason.

In Conclusion, let me say again, it would have been impossible for President Trump to win the election without the financial support of the Israeli Lobby.

Let me also state that it will be impossible for Trump to drain the swamp or avoid devaluation and a great depression unless he follows the Constitution in all respects. I will support President Trump as long as he takes this unique and rare opportunity (first time in history) to return to a Constitutional government and economic stability. Trump, like all men is less than perfect but he is the only man with the courage, following, and opportunity to return a prosperous Republic to the People by following the Constitution, as his Oath requires. But he has not indicated that he will do this. If he violates his qualifying Oath, he vacates his office.

But remember no governor, congressman or administrative state bureaucrat obeys the Constitution, they obey the deep state (money).
