

# Just 51 Days to STOP THE STEAL

By Lex Greene

September 15, 2024

If you still believe in freedom, liberty, justice, peace, tranquility and prosperity for yourself, your children and grandchildren, then you only have 51 days to STOP THE STEAL already deployed at the county level for the 2024 elections on November 5, 2024.

If you are determined to defend and enforce the US Constitution and Bill of Rights for all future generations, you are running out of time to do it.

## **Anatomy of the STEAL**

We are up against a “[global reset](#)” by [Marxist Nazi tyrants partnered with Klaus Schwab’s World Economic Forum](#) (WEF). Joe Biden and Kamala Harris are mere puppets of Barack Obama and Hillary Clinton. But Obama and Clinton are mere puppets of the WEF Nazi global cabal.

This election isn’t just between democrats and republicans, vying for support from independents. This election is “winner take all” and all the marbles are in play. Everything you ever thought America was for the past 248-years, is about to end abruptly in less than 60-days, if “we” don’t STOP THE STEAL.

For the official record, election fraud is nothing new. There is no debate over whether or not [election fraud happens](#), only to what degree. Everyone knows that illegal ballots are cast,

counted and certified in every election and a laundry list of candidates have challenged election results for decades. The only issue is whether or not elections are being decided by that fraud.

Everyone also knows that in this Presidential election cycle, one candidate is the “democratically” elected and nominated former President, and the other is an unelected current Vice President with a blank resume’ who was installed by party elites without a single primary vote, despite 14-million primary voters having voted for someone else. We have never seen a more “undemocratic” presidential candidate in U.S. history.

Prior to 2020 and the planned CV19 event used to convert elections to mail-in and dropbox voting, fraudulent election activities played a much smaller role in our elections. But from 2020 on, political powers have perfected the art of stealing elections as explained below, and they have installed the processes down at the county level across the entire country now.

### **Current Challenges**

- No electronic voting machine is secure from cyber-intrusions, hacking, and vote manipulation
- Despite false statements concerning internet connectivity by officials, they are connected
- Many states have moved towards unsecure “mail-in” and “dropbox” balloting
- Many states have eliminated any means of knowing the legal eligibility of voters
- Many states have thousands of “illegal voters” still on their voter rolls
- Honest election officials are being removed from oversight if they raise any questions
- The courts have refused to allow any evidence into the courts, because they know

- Some states have even adopted [Constitutional Amendments and new election laws](#) to make it impossible to detect election fraud, while blocking public transparency and disallowing any transparent recounts or audits

These are just the high points. There are many more ways cheating is planned for the 2024 elections, including engagement by all news networks and social media platforms being used to mislead the American public regarding polling data which makes the election look close enough to hide the steal.

And in case you are unaware, the Obama-Biden-Harris government has weaponized the [Department of Justice](#) which has established "[special sub-agencies and task forces](#)" designed to target anyone who attempts to expose any part of the steal currently in place.

The Democrat Party has shepherded the mass foreign invasion of our country over the past four years (and much longer under Obama's eight years) to the tune of at least 20-million illegal aliens who the federal government has granted "[protected status](#)" in the lead-up to the most critical election cycle in U.S. history.

### **Unverifiable is Uncertifiable**

The notion that an election can be lawfully "certified" when the ballots, voters and electronic systems cannot be lawfully "verified," is not just silly, it's treasonous. The efforts that some have taken to eliminate all "citizen oversight" of the elections and deny "legal standing" in the courts for legal citizen voters, demonstrates that our Constitutional form of government is teetering on the brink of total collapse.

The simple truth is, under the current election procedures in place, [the elections are not certifiable](#), simply because they are not verifiable. States that do not require any legitimate

form of voter ID have no way of knowing who is voting or whether or not those voters are eligible to vote under our laws.

Federal Law makes it legal for only “legal American Citizens” otherwise eligible to vote, to vote in our elections. Non-citizen residents, foreign visitors, and illegal aliens are prohibited from voting in U.S. elections, and everyone involved knows it. So, in order to allow illegal voters to cast a ballot, they have removed verification measures so that no one knows who is voting or if they are eligible to vote.

It should go without saying, but I have to say it now...dead people cannot vote legally either, nor can anyone cast more than one legal ballot in just one proper voting district. But both things still happen in every election cycle...

### **In-Person, Paper Ballots, Hand Counts**

In a perfect America, free from any evil intent, modern technologies would make managing elections much more efficient. But in today's America, those same tools have become weapons against the lawful American voters.

A nation which does not have legitimate, verifiable and lawfully certifiable elections, does not have a government of, by, or for its people. Even the Iraqi's had more security measures in their elections after the fall of the Hussein regime. The Hussein (Barack Obama) regime in control of the USA right now, is far worse than Saddam ever dreamed of being.

### **YOUR role in STOPPING THE STEAL**

One should have to look no further than the fact that the 2020 elections saw more votes than legally eligible or registered voters to see the problem in plain view. Of course, those concerned with legal legitimate elections have seen plenty of evidence already. But those who don't care how they win, will use any tool or weapon to win. These folks cannot see what

they choose not to see...and they certainly will never admit it, no matter how blatant and obvious.

*"I'm just one person, so what can I do?"*

Since alone, none of us can do anything, we cannot afford to work alone. There is strength and security in numbers. Unite with others determined to STOP THE STEAL.

*"The courts won't do anything to stop it."*

The fact that the courts haven't done anything to stop it since they stopped the Al Gore steal in 2000, is proof that this is a very safe assumption, with only 51-days to go until election day. So, we best not rely on any court in the country to stop the steal...even though [legal efforts are still underway](#) in the courts.

*"Where is our power?"*

In the USA, "all political power is derived from the consent of the People," you and me. STOP CONSENTING and what I mean is, if your silence is being interpreted as your consent, STOP BEING SILENT. Work together with a very loud voice!

*"Where can I make a difference?"*

Remember, "all politics is local," especially elections, which is why the LEFT has installed the steal down at the county level. In every county across the country, elections are run by local county election officials. This is where we have to go to work immediately.

In the [2020 presidential election](#), President Trump won 2,595 of 3,153 counties across the country, 82.3% of the counties in the USA. Biden won only 558 counties, a meager 17.7%. Yes, I'm well aware of the reality that democrats control all major population centers, which is how they take over RED states and a RED nation in elections. But that isn't the point here...

This means that We the People have the power to “stop the steal” in 82.3% of the RED counties across the country, if we work together in each of our counties to do it. That will isolate the theft to only 17.7% of the deep blue counties, making the theft entirely detectable and uncertifiable in those areas.

NOTE: *BLUE counties are mostly stolen by illegal ballots dumped into the count. But in RED counties, the theft is mostly done via electronic vote switching in real-time, via electronic system networking and internet intrusions. Unplug the machines in all RED counties and return to paper ballots, hand counts and on-site election monitoring, transparent recounts and audits. By far the most dangerous threat to American duly elected government today is the widespread concerted effort to block election data from public access and scrutiny, in a near complete extermination of open public transparency. The Department of Justice and numerous State governments are “criminalizing” legitimate citizen doubts about the integrity of our elections. This is all 3<sup>rd</sup> world stuff that should never be allowed anywhere in the USA.*

If all true American patriots work together at the county level, we can stop the steal in all RED counties, 82.3% of the nation, isolate and expose the theft in the 17.7% of BLUE counties, where the theft will mostly happen via unverified voters and uncertifiable illegal ballots.

**Last...**

My WWI Grandfather used to say, “Can’t...has never done anything!” ...and he was right! He taught us all to completely remove the word “can’t” from our vocabulary, because “can’t” simply means “won’t.”

This is the last chance Americans will have to save our Constitutional Republic via an election. After November 5, 2024, if we fail, it will be the end of our [Constitutional](#)

[form of government](#) and what comes next, no American will like!

**At this moment in American history, if you are not “all-in,” you are “out.”**

Never forget that this country was freed and established by the work of just eight determined very average men who launched what would become the Declaration of Independence resulting in the Revolutionary War, our Constitution and Bill of Rights, that has so far lasted for 248-years.

The enemies within will not stop until We the People stop them. We only have 51-days to do it. Is there some higher priority in your life? There can't be...if you want to save this country!

If you made it to the end of this piece, you can never again ask what you can do to help save this country, because I just told you what all of us can do. You can never again claim that there's nothing you can do, because there's plenty you can do. You can not continue to blame anyone else for what doesn't get done, if you're not going to do it yourself.
