

New Transparent Government? What About Bill Binney?

A new dawn seemed to open up for America when Donald Trump was announced reelected by tens and tens of millions of Americans last November. Who knows the exact count because there were voting problems both human and likely machines. Not enough this time around to stop the overwhelming support for Trump. But, hey, let's try a couple of assassination attempts to get rid of him!

[BREAKING: Tulsi Gabbard Drops Bomb on Voting Machines – Says Evidence Shows Voting Machines Can Be Tampered With to Steal Elections](#), April 10, 2025

Well, imagine that from “former” Democrat, newly minted Director of National Intelligence (who endorsed mentally absent, life-long criminal Joe Biden) as if it's something new. Tulsi became a Republican in October less than a month before Trump's reelection. Timing is everything. Gabbard plays “tough girl” when it suits her. Yes, she is a military veteran and thank you for your service.

Gabbard was selected as a WEF Young Leader in 2015.[1] Council on Foreign Relations Briefing Hosted by Rep. Tulsi Gabbard – “Congresswoman Tulsi Gabbard is also a member of the Council on Foreign Relations, which is a nonpartisan membership

organization, publisher, and the premiere foreign policy think tank in the country.” [2] Gabbard member of the CFR

However, if you watched her testimony, and I did [3] regarding the alleged “war plans” phone chat that recently dominated the Internet and cable networks, I’m sorry, but all I saw was someone in over her head. Perhaps she was just nervous.

Sorry, getting side tracked here but there’s only a few of Trump’s picks I have faith in getting the job done: Kash Patel, Dan Bongino, Ratcliffe and a few others; very few. It’s unfortunate former Congressman Devin Nunes isn’t part of the intelligence agencies.

I began writing about election fraud – machines and scanners – back in the early 1990’s. In 1998, I wrote my second little booklet (44-pgs) titled Blind Loyalty and sold 700,000 copies at cost. Page after page of provable vote fraud using electronic voting machines; experts warning about how easy it is to program and rig them. Explaining in great detail just how easy it was and why they should not be used in our elections.

Few seemed interested and the prostitute media, of course, labeled anyone questioning the outcome of an election as conspiracy nuts. If it was a Democrat favorite, the election was rigged. If a Republican candidate/incumbent questioned the outcome of an election, the rabid whores on the propaganda box (TV) news channels (and eventually cable networks), repeated ad nauseum candidates were sore losers or “election deniers”. Our elections are safe, honest, blah, blah, blah.

I’ve written so many columns on this over the decades. Many have written detailed books on the issue. We all saw what happened in 2020. So, Tulsi, you’re just now getting around to telling us electronic voting machines can be rigged?

Well, I guess you could call that being “transparent”. Let’s have another committee investigation that will end up

collecting dust, OUR dead forgotten – except by their loved ones and friends. Like Extortion 17 and Benghazi. It sickens me right to my soul how both of those “incidents” were covered up and remain so today. Those responsible suffered no accountability, lost their job or held legally responsible.

Many, many Americans are asking the same question:

[Gen. Mike Flynn Joins Chorus of Trump Allies Demanding Answers from Pam Bondi and Kash Patel on When Are We Going to See Arrests](#), April 12, 2025

“Retired Lt. Gen. Michael Flynn, President Trump’s former National Security Advisor and a central figure in the Obama-era *Crossfire Hurricane* scandal, is once again turning up the heat on key players in the conservative movement, publicly demanding answers from Trump allies Pam Bondi and Kash Patel about long-promised justice.

“In a post on X Thursday, Flynn shared a clip from his must-watch documentary movie *FLYNN–Deliver the Truth, Whatever the Cost*, calling on the American public to watch the film and understand the depth of corruption he endured at the hands of a “rigged system.”

Oh yes, he did as well as his family. What was done to Gen. Flynn, a truly great American should NEVER have happened in these united States of America. Some of these cabinet members were only confirmed a short time ago. Kash Patel, Feb. 2025. A great addition as Deputy, Dan Bongino, March 17, 2025. The incredible mess and fraud some of these cabinet members inherited have only been on the job a couple of months. It’s almost beyond words and we can thank Musk and DOGE for exposing a ton of it, not to mention trillions in wasted taxpayer’s earnings; the tax man a’coming. Not to mention disloyal federal employees who hate Trump.

I fully understand the frustration as someone whose been writing about cover-ups, lies and fraud for decades *with no*

one ever held accountable. Sub-committee and full committee hearings that are never ending and, in the end, Hillary Clinton, illegitimate president Hussein Obama and so many more *are still free and living the high life.* Luxury lifestyles while the victims of political coverups – especially whistleblowers – their lives and livelihoods ruined. Reputations destroyed.

Yes, it does take time to put together a criminal indictment case but **here we're talking about cover-ups where more than sufficient evidence already exists to empanel a federal grand jury which I can't imagine them not coming back with indictments – unless the cases are held in DC.** Then trials. Serving all the defendants, response time. High-paid law firms drowning the courts in motions to get cases dismissed. We've seen it all with the "lawfare" against President Trump purely for political reasons for nearly a decade.

Personally, I want to see a very long list of players rot at Super Max Federal Penitentiary in Colorado if convicted by a jury. Locked down 23 hours a day until carted out in a pine box. Likely, career criminal Joe Biden will get away with his crimes because I believe he's in the first stage of Alzheimer's.

Which brings me to a man named Bill Binney. Not a household name like Einstein who was considered a genius. Nikola Tesla is also better known and without doubt a true genius way ahead of his time. But what was done by the NSA and CIA against Bill Binney, his family and other whistleblower colleagues of his **MUST** become a major investigation. The guilty and we already know some of their names, need to be indicted.

Bill Binney is a genius. [This is from the Government Accountability Project](#) and whistleblowers:

"William Binney and J. Kirk Wiebe are clients of GAP and National Security Agency (NSA) whistleblowers who worked at

the agency in excess of 36 years. As Technical Director, Binney developed a revolutionary information processing system called ThinThread that, arguably, could have detected and prevented the 9/11 terrorist attacks, but NSA officials ignored the program in favor of Trailblazer, a program that not only ended in total failure, but cost taxpayers billions of dollars.”

Please do take the time to read the rest. Not long but will give you an accurate over view of just how serious this is and MUST be shut down. We know who the guilty are, now it’s just a matter of the Dept. of Justice to deliver on all the promises about transparency. Don’t let the clock run out on statutes, Ms. Bondi.

Trump has already taken a big first step: [President Trump Fires NSA US Cyber Command and NSA Top Boss Timothy Haugh and His Deputy Director](#), April 4, 2025. (That’s very good, but he really should put Bill Binney in charge, alto’ even if Binney agreed, I doubt he could get confirmed by the Senate. He knows too much.) In the video interview below hosted by Bill Still, Binney briefly covers his current effort to bring all of this to President Trump. We shall see.

Elon Musk: This is where you can also make a huge contribution not only for transparency, but exposing the rot and corruption inside the NSA. You are an American who values free speech and freedom and I guarantee you, the documentary I’m going to mention below will sicken you. 9/11 could very likely been stopped. Think the spying has stopped? Don’t bet the farm.

Elon: Think the NSA isn’t spying on *you* with their toys? *Your* phone conversations? Discussions about your future plans, investments and more? If I were you, I would arrange a meeting with Bill Binney. You are considered a genius and all that high tech stuff is a common factor with you and Bill Binney.

Which brings me to one of the most important documentaries Americans must watch and share until millions see it: [A Good American](#). It's 1hr 40 minutes. Take the time to watch it when it's quiet so you get the full impact and what it means:

"A Good American" is a gripping docu-thriller about a groundbreaking surveillance program, the brilliant mastermind behind it and how a perfect alternative to mass surveillance was killed by NSA-management for money – three weeks prior to 9/11.

"Bill Binney was a brilliant cryptologist and long-time National Security Agency (NSA) analyst, since 1997 serving as Technical Director. Binney developed a sophisticated program named ThinThread for gathering data capable of providing clues, in real-time, of potential terrorist threats. Built-in safeguards would have prevented the massive surveillance methods later exposed by Edward Snowden. Why was this program killed off? And who was behind that? Friedrich Moser's eye-opening and deeply disturbing documentary tells the complete story of Bill Binney and those, both inside the NSA and out, who backed ThinThread."

His house was raided, his son shoved aside by federals with guns, his wife terrorized; Binney was confronted in the shower with guns pointed at him. His colleagues have fared no better regarding their careers. Binney had the brain power to do what he did for the safety of our country. YOUR safety and YOUR family. Is this America or China or No. Korea?

[A Good American](#). Watch it with friends, send the link to X, to your email lists, all social media. It's that important. We the People have been used, lied to and deceived long enough. The evil must be crushed and the only way that's going to happen is enough Americans demand justice and the full truth.
