

# NewsNation's Chris Cuomo: Illegal Immigration Is An Artificial Issue

By Frosty Wooldridge

June 2, 2025

Last week, NewsNation talking head Chris Cuomo said, "Illegal immigration is an artificial issue." In other words, it's not THAT big a deal here in America.

After watching Biden's illegal alien invasion of our country for the past four years and all the pain and destruction he caused, I about fell out of my chair. How could someone with an IQ over 100 make such an absurd, obscene and horrifically stupid and callous statement?

Would such a declaration of "Artificial Issue" fit Laken Riley? An illegal alien named Ibarra, brought into America by Biden, and let out of prison after sexually assaulting a girl in New York City, by Mayor Nick Adams (sanctuary city)--Ibarra struck her down as she jogged on a path on the campus at the University of Georgia. He beat her into submission, raped her and mutilated her body beyond recognition. Do you feel her parents think illegal immigration is an "Artificial Issue?" What about her promising life cut short by a beast of an illegal alien? What about the pain, physical torture, and inhumanity toward that young woman? How could Chris Cuomo, safely tucked into his New York City office, know anything about the meaning of "Artificial Issue?"

How about Kate Steinle, in 2015, in San Francisco, killed by an illegal alien? As a student, as a woman, as an American citizen with promise, she died with a bullet aimed at her by an illegal alien killer. Do you think her parents feel that their daughter's death is an "Artificial Issue?" What about her life not lived? Do you have any other excuses for the illegal alien who killed her, Mr. Cuomo?

This past week, two illegal aliens ran over and killed Air Force cadet Ava Moore on a lake in Texas. She was kayaking. They ran her over with a jet ski and fled the scene. Thankfully, an onlooker chased them down and notified authorities. They will sit in jail for years, but Ava Moore's parents and friends will suffer her loss for the rest of their lives. She won't get to enjoy her life or serving her country. How do you, Chris Cuomo, brush that off with such an asinine and heartless statement that her death was/is an "Artificial Issue?"

CNN's Jake Tapper may be one of the most duplicitous journalists on TV, but, Mr. Cuomo, your "Artificial Issue" statement should take the "Dumbest Statement of the Year Award" by a country mile. It proves you heartless, obscene, stupid, corrupt, unfeeling, uncaring and just plain pathetic. It's a good thing you won't get a chance to interview me...because I would verbally chop you up and spit you out like a fish burp!

Why? Cuomo's "Artificial Issue" balderdash doesn't take in the fact that we've got over 25 million illegal aliens in our country that are screwing our country financially, linguistically, scholastically, medically, gangs, drugs, shoplifters, drunk drivers, and another dozen consequences. Thousands of American men and women have suffered incredible tragedies because of illegal aliens. And just wait: we're going to get hit by a major terror attack by those Islamic illegal aliens who have breached our borders under Biden.

As Speaker Johnson noted over the weekend, we American taxpayers pay for Medicaid for 1.4 million illegal aliens. We pay for 400,000 “anchor babies” annually. That’s our money into the trillions of dollars over the past 30 years of that fraudulent nightmare. Worse, it’s enabled by our own elected 535 scoundrels in Congress. Now, it’s being enabled by some moronic Federal judges stopping Trump’s Executive Order to stop all anchor babies from instant citizenship. The 14th Amendment was meant for children of former slaves...NOT illegal alien mothers.

What about the 270,000 drug overdose deaths in the past four years of the Biden administration brought to us by MS-13 drug distribution gangs working all over America to kill our kids? How much “Artificial Issue” do you think that nightmare is, Chris Cuomo? Do you possess any understanding of the level of pain and loss life that constitutes? What about the loss of a loved one?

The latest report showed that we American taxpayers shelled out \$150,000,000,000.00 (billion), annually for four years under Biden, of our money to house, feed, and educate over 12 million illegal aliens Biden engineered into our country. That’s on top of the 12 million already here before Biden’s stupendously corrupt four years in the White House.

What about our car insurance rates? What kind of insurance do illegals pay when they get into an accident? Or drunkenly kill another American while operating a vehicle? Answer: they flee the scene. Is that an “Artificial Issue”, too, Chris Cuomo?

When I hear such stupid remarks by TV personalities such as Chris Cuomo, or Joy Behar on “The View” or a Jake Tapper or Kristen Welker at NBC—I intellectually feel like retching my guts out.

Same with some of the outspoken Congressional critters like Ilhan Omar, AOC, Rashida Talaib, or the “one splash wonder”

named Jasmine Crockett (D-TX).

U.S. Senator John Kennedy (R-LA), at a Congressional hearing stated, "Omar, AOC, Talaib and Jasmine Crockett are the reason manufacturers must put directions on a bottle of shampoo." That's how intellectually vacant those ladies prove themselves every time they open their mouths. In fact, the latest polls say that AOC and Crockett could be the front runners for the president and vice-president in the 2028 election.

As a former teacher, I wonder how in the hell did they graduate from the 8th grade? Those two set a whole new benchmark for the words, "STUPID BEYOND BELIEF."

So what can we ask of Chris Cuomo? First of all, please send this column to Chris Cuomo: [programming@newsnation.com](mailto:programming@newsnation.com)

Invite him and his staff to interview me. I guarantee you a lively conversation. He won't be allowed to over-talk me!

You can also write into "60 Minutes" over Scott Pelley's ridiculous commencement speech at Wake Forest University. ([60M@cbsnews.com](mailto:60M@cbsnews.com)) Pelley spoke about our freedom of speech disappearing. He said our country was under attack by Trump. Notice Pelley said NOTHING while Biden blatantly opened our borders to the greatest invasion in all of history. Notice that all of "60 Minutes" won't touch the fact that America faces an added 100 million people by mid-century, give or take a decade, because of mass immigration. They won't explain the consequences of our \$36 trillion national debt.

As an American citizen, I'm sick and tired of our mainstream media feeding us a bunch of crap, daily. That means Lester Holt, now Tom Llamas, David Muir, John Dickerson and the rest of them at the big networks. Same with NPR and PBS. They keep all of us in the dark.

The same thing is going on in Europe with mass immigration out of the third world. Western Culture is being brutally

marginalized and vanquished by the insanity of Islam and the entire illiterate continent of Africa. They can't solve their own problems, so they invade Europe, Canada and the United States.

What can you do? Answer: you need to write your two Senators and House member. If they work for America and your best interests, thank them. Give them more ideas that need to become laws. If they are like that stupid Senator Van Hollen (D-MD) going down to El Salvador to try to return that MS-13 gang member into our society-- you need to vote them out of office. You need to speak up to your governor who supports men in women's sports--and tell that governor what you think of him or her. You need to support the men and women of DOGE. The fact remains: we American taxpayers are getting screwed: up, down, left, right, forwards, backwards and around and around.

You need to help bring common sense and integrity back into the American mainstream. After all, it's still your country!
