

Not Aliens, Demons

By Rob Pue

February 26, 2023

Recently, I had a lady call me from the East Coast. She's one of the readers of our *Wisconsin Christian News* newspaper. She was alarmed at having seen a triangular UFO the night before. Prior to calling me, she called another alternative media researcher, who told her that these things have been in US airspace for weeks; that they're "spy planes" from China and that we may well be in the midst of a nuclear war with China and/or Russia within 72 hours.

This comes as UFOs have been heavily in the news recently. We all heard about the Chinese surveillance balloon that was shot down over the Atlantic on February 7th, after crossing the entire US – including over some major military installations. Biden stated that he waited to bring the balloon down until it reached the ocean, so debris would not harm anyone on the ground. But military insiders have said that could have easily been done with no harm to civilians if the administration had wanted to.

On February 14, officials announced the US has now retrieved key electronics, including sensors from the balloon, in an underwater search of the area off the South Carolina shore. For their part, the Chinese have stated the balloon was just monitoring weather patterns. But since when has China been concerned about the weather, pollution – or "climate change?"

Meanwhile, similar balloons have been seen traveling across countries in Latin America, including Columbia and Venezuela.

And Japan has said China has been sending surveillance balloons over that country, at least three times in the past year.

And so far, three other Unidentified Flying Objects have been shot down by US forces as well... one over Alaska on Friday, one over the Yukon on Saturday and one over Lake Huron on Sunday, February 12th. Officials have said the Lake Huron object was definitely NOT a balloon, but an octagonal, metallic object about the size of a small car. Officials believe this is the same object that was tracked by radar over Montana the day before, so it, too, crossed nearly our entire country before any action was taken.

Now, we're getting conflicting reports from our government as to what the objects were. Air Force officials have stated the latest three objects in US airspace are different from the Chinese balloon. Air Force General Glen VanHerck told reporters, "We're calling them 'objects,' not balloons, for a reason," he said. But the White House continues to call them "balloons," and assured reporters there's "no indication" the objects are "extra-terrestrial," apparently to "calm the nerves" of concerned citizens regarding a possible alien invasion.

That seems to me to be the press secretary planting the seeds of doubt, and attempting to fear-monger people into thinking aliens ARE about to strike. I don't know anyone currently living in fear of an alien invasion. But that could certainly change, if the powers-that-be want it to. Like an invisible so-called "virus," an "alien invasion" could be the perfect cover for another world-wide lockdown. For our protection, of course.

The theater performance continues, friends. This is just the next "act" in their production. Please remember, whenever something like this is covered this heavily in the news, there's about a 100% likelihood that it's being done to

distract our attention away from what is really going on – or about to happen.

Just as “COVID” was a beta-test to experiment on the ignorance of the people and their willingness to submit and comply with the daily-changing arbitrary orders of the Globalist agenda; and although the war in Ukraine *is* really happening, the REAL reason it’s happening is because it’s the perfect scenario for trillions of dollars in money laundering for the so-called “elites;” now we have UFOs and Chinese spy balloons.

Are there any out there who think this is the first time foreign spy balloons have surveilled our military and public infrastructure? Are there any out there who believe they can’t just watch us from an orbiting satellite? Military satellites can read the dial on your wrist watch if they want to. And don’t get me started on the surveillance of American – and world – citizens, by their own governments. We are all being watched, listened to, monitored, tracked, rated and graded every day. I dare say China knows more about our US military capabilities than Sleepy Joe does.

Not to mention – is there anyone out there who believes our US military aircraft could destroy an alien spacecraft, capable of traveling faster than the speed of light? Come on, man!

If I were you, I’d be more concerned about our non-existent southern border – and our highly compromised northern border – when it comes to any threat from China. Because we know Chinese military troops have been training in Canada, as well as Mexico and Latin American countries for several years now. And a report just released by US Customs and Border Protection shows a more than 700% increase in Chinese nationals sneaking over the US southern border just since last year. According to the report, by this time last year, only 366 Chinese nationals were apprehended trying to cross into the US illegally. This year, there have been 2,999 so far. That’s a

719% increase, just since October. Why are they “sneaking” in? Certainly, good old Joe would welcome them if they just asked.

There are also rumors about a looming Chinese or Russian nuclear attack on the US. Yes, for the globalist’s agenda to be complete, the United States must be destroyed. But we’re already destroying our own country ourselves – and at break-neck speed – point-by-point as we follow the Communist agenda. China may want the US, but face it, friends, they already OWN US... physical acreage of US land, but more importantly, a financial debt we can never possibly hope to repay. They won without firing a shot. When they decide to officially take us as their new territory, the last thing they’re going to want is a nuclear wasteland.

You don’t think they put up all those 5G cell towers and spent all the trillions of dollars in the infrastructure to support all that, under the cover of the “COVID” lockdowns, just to blow it all up, do you? No – America need not fear nuclear war from China. But we will, very likely, be taken over quietly and easily by them. And many Americans will cooperate with their new masters willingly.

Yes, we have millions of citizens with guns and we have millions of skilled hunters and lots of patriots. There will be a resistance, just as there is a remnant in America who still believe in, and honor God, willing to push back against the forces of darkness and evil and speak up against the lies we’re constantly fed. But China’s coming. They’re already here. Just look at the first object you pick up near you. Chances are, it will say “made in China” on it somewhere. Practically everything we own or use here has been made in China. See, we USED to be the most innovative industrial country in the world. We made cars, ships, trains, rockets, computers, tractors and more. What do we make now? Chicken wings at the local sports pub. That’s what we make now. IF the sports pub can find anyone willing to work.

But I digress. What I'm saying here is, don't worry about the UFOs. Be more concerned with what the UFO stories are a cover for. Something's brewing. I don't claim to know what it is. But I do know, from experience, just how quickly things can change. They changed overnight for the whole world in March of 2020. One day was life as usual; the next day was "lockdowns," "non-essential workers," "essential businesses," "mandatory masks," "six-feet-apart," along with unconstitutional arrests for non-compliance, children having masks duct-taped to their faces by virtue-signaling teachers, and of course, the "clot-shot" jab... also mandatory for most. Yeah, things can change overnight and you never see it coming.

And so much has happened since then. A stolen election. Citizen patriots going to DC to present a redress of grievances – something we've done for over 200 years in this country, but this time, hundreds – if not thousands – of American citizens attacked, arrested by SWAT teams, thrown into the DC J6 Gulag without charges and without bail. Our children overwhelmed by the "transgender" pedophile movement. Pornography handed out legally in the schools, while if the same images are shown across the street or at a school board meeting, they'd be prosecuted to the fullest extent of the law and labeled a "sex offender" for life. The deliberate destruction of our economy. The killing of millions with the mandatory jabs. Roe v Wade overturned, but states making laws allowing the killing of even BORN children "legal."

Not to mention the sheer coincidence of more than 120 food processing plants going up in flames over the past year or so, in the midst of a supply chain crisis and food shortage. You mean to tell me that of those 120 massive food processing plants, not ONE had any working sprinkler system? Yes, that's what "they" want us to believe. Just coincidence. Nothing to see here.

Now, in Palestine, Ohio, 50 railroad cars hauling dangerous, caustic chemicals derailed. Officials conducted what they

called a “controlled release” of the chemicals by causing an explosion. Vinyl Chloride, Hydrogen Chloride and other chemicals were not just released into the atmosphere, but detonated – set ablaze on purpose, releasing highly toxic gases. Residents of the surrounding area were evacuated for three days and then told it was safe to return... but it’s not safe. Dead fish, birds and animals are everywhere. There are chemicals in the water supply now that will make it incredibly unsafe for decades. Cattle as far as 100 miles away from the incident are suddenly dying. Cars, 70 miles away are having their paint destroyed and plastic parts “melted.”

So rather than carefully drain the hazardous chemicals from these tanker cars, officials decided to do a “controlled explosion,” sending deadly fumes high into the atmosphere, causing catastrophic consequences in at least a 100-mile radius. And not a peep from the “climate change” cops.

Then, when a conservative American journalist at a press conference asked some hard questions of officials there – questions that didn’t fit the official narrative – he was immediately arrested. Since the Ohio wreck on February 3rd, there have been two more train derailments – one in South Carolina and one in Texas.

Meanwhile, let’s not forget about the millions of people worldwide who are “dying suddenly” after taking the COVID shots. I read the obituaries in my local news every day. There are now about a half dozen younger people every week who are “dying suddenly” or “unexpectedly.” These are people in their 50s, 40s, 30s, 20s and teens. No pre-existing conditions, no sign of anything wrong with their health. But they’re dying suddenly and unexpectedly.

It’s almost as if someone – or some THING – is deliberately out to kill people and destroy our country. It’s not aliens from another planet. But I do believe it’s demons, from another kingdom. Satan and his demons have infiltrated the

hearts, minds and souls of human beings in a way we've never experienced before. It's almost as if every thought of everyone is only evil, all the time. And most of the others live in fear.

But we need not fear, friends. Almighty God is still in control of all that happens on this earth. The enemy will lie to you, confuse you, try to instill fear into you, coerce you into submitting to an evil, wicked agenda, and intimidate you into keeping your mouth shut. But do not be silent... and don't buy into the fear and rhetoric of the "official narratives." Know Who your Creator is. Know God – and snatch as many others as you can from the claws of the devil, while you can. We're not fighting flesh and blood. We're not fighting aliens. We're fighting demons, and they have us surrounded. So be strong in the Lord and the power of His might. Put on the whole armor of God, that you may be able to stand against the wiles of the devil.
