

Odds and Ends: Things You May Want To Follow-Up On

By Frosty Wooldridge

March 23, 2023

On Wednesday, March 22, 2023, CRN's Talk radio show out of California, hosted by veteran radio personality Chuck Wilder, interviewed yours truly on my latest column: **This Tangled Mess We're In: America's Drastically Dangerous Future**. Mr. Wilder commands a national/international audience. He wondered why I thought America faces a dangerous future.

But before that, he asked about my wife Sandi's Alzheimer's Disease, how it was progressing, how she was doing, and was there any chance for her recovery? He got into a few "odds and ends" about what's happening in America. He wanted to know how we got our country into such a mess. What's that mess? Answer: men competing in women's sports as if it's sane, rational and fair! Men beating the heck out of women in women's sports...and standing on the podium with a woman's trophy while wearing a women's bathing suit...but in reality, it's a guy. It's beyond idiotic, but we're tolerating it. Why?

How about men being given trophies for "Lady of the Year" at the International Women's Festival held at the White House? What a complete insult to all the women of the world! First Lady Jill Biden is as nutty as her husband!

Mr. Wilder wondered how a country facing daily racial conflict could allow high schools, colleges, our military services and corporations...to teach Critical Race Theory—that makes one race

the oppressor and another race the oppressed? Why make one race the victim and the other race the demon? How do you think that's going to end up? Answer: one race hates the other race, and the other race must constantly defend itself from a "theory" that simply doesn't hold water in 21st century America.

If multiculturalism and diversity stand as our greatest "strength", why do many colleges offer Black, Asian, Native American and LGBTQ+ separate graduation ceremonies...such as Grand Valley State University in Allendale, Michigan. I'm partial to that school because I earned a post graduate degree and teaching certificate from GVSU. But I noticed that there are no Straight, White ceremonies for Caucasian graduates. If there were, there would be hell to pay with riots and Joy Reid, Joy Behar, Whoopi Goldberg, and Don Lemon...talking your ear off at how evil and racist America is for black people. If a white TV host had said anything like Lemon, Reid or Goldberg have said, they would have been banned from hosting anything more than a toilet-bowl cleaning party.

Why is it that we have All Black TV, Black Entertainment Television, all Black Movies like Black Panther, all black advertisements on TV, Miss Black America, Congressional Black Caucus, National Association for the Advancement of Colored People, and another 100 all-black organizations...but if one single organization ever tried to produce White Entertainment Television, there would be a march on Washington DC by Black Lives Matter and the NAACP that would burn down the city?!

Why is it that "woke" professionals want to mandate "Inclusion, Equity, Diversity" into every aspect of American life, but not individual effort, excellence or successful results? How is that such woke entities want to put an unqualified minority into the cockpit of a 747, but not take responsibility for the deaths when that pilot...and there was one glaring incident recently...kills a lot of people? Do you want to be flying on an airplane piloted by someone because of

“Inclusion, Equity, Diversity?”

How about a new mantra: “Personal responsibility, personal accountability, top grades, hard earned achievement, ethics, excellence in education, and meritocracy for jobs?”

Another “odds and ends” aspect of what we’re seeing in America today is: **corruption of standards**. In my world travels, I discovered that “corruption is a mechanism by which a third world country operates.” It’s endemic to their culture. That’s why they never become educated. They never improve. They never advance. They never change toward a better life for their citizens. That’s why 25 percent of the world population cannot access clean water. An added 45 percent do not have access to water treatment plants. (Source: Reported by NPR)

If you look at the corruption of the Norfolk Southern train rails in East Palestine, Ohio, you’re seeing third world corruption. Bearings not checked on rail car wheels, rails not secured onto ties, hazardous loads that should have had serious safety rules in place, and double-walled container cars! None of those safety rules were in place or enforced. Who was the moron in charge that lit up the entire load of chemicals? Answer: someone grossly incompetent. Was it “Inclusion, Equity, Diversity?”

Do you remember that’s the same formula for “I.E.D.s” in Iraq and Afghanistan that blew up our soldiers for 20 years and caused thousands to lose their legs? Maybe this new “I.E.D.” is meant to blow up our country culturally, linguistically, and racially? Who wants that? Apparently, every “Woke” imbecile who pushes such insane agendas! If they keep pushing for CRT, we’re going to see generations of angry blacks, Asians, and other immigrants killing, looting, burning, rioting and worse because that’s all they’ve been taught.

As to my wife Sandi’s Alzheimer’s Disease, thank you for your prayers. Thank you for praying for all the people suffering

from diseases in this country. Sandi follows a specific exercise, nutritional, supplement, study program second to none. I am with her 24/7 with love, support and encouragement. As of 10 weeks ago, we have "fasted" for 40 hours once a week to accelerate "Lysosome Process" that carries the "trash" out of her mind. She's actually able to read a clock this month. She couldn't do that six months ago. Here is the video that will give you information if you have a loved one who suffers from Alzheimer's Disease:

THIS 11- minute video is INCREDIBLE! It totally steps ahead and beyond the "amyloid plaque" theory of Alzheimer's. This may be the BEST protocol to prevent and recover from Alzheimer's.

Solving Alzheimer's

At the end of our hour together, Mr. Wilder asked me what concerned me most as to America's "Dangerous Future."

I repeated this quote over the air: "The next few decades will be the end of the kind of civilization we're used to. Humanity is consuming 175 percent of what the earth can regenerate. Our current way of life is unsustainable." Dr. Paul, population expert

Having seen what humans are doing to this planet from my travels all over the world...as well as under the waves of all the oceans of the world...I am terrified for the future of our children.

If you were driving your car into the mountains and were told that an avalanche had just killed 10 people on the road, would you keep driving toward that avalanche? Would you dare another avalanche to hit you and kill your family? Would you drive your family into the funnel of a tornado?

Would you want your family to face another 100,000,000 more

immigrants added to America by 2050?

“The U.S. Census Bureau projects America’s population will grow by another 75-100 million in the next 40 years, with roughly 90% of that caused by immigration.”

Is that what you want for your kids? All of our kids? If not, what are you doing about it? Are you going to watch the current president and/or his handles to add another 10 million people by 2024? Why? What in the daylights are we doing to America’s future? Do we want to be another Mexico, India, China, et al.?

What can you do? How about getting on social media. Ask, demand, encourage the TV producers to address what we face: 60M@cbsnews.com ; watters@fox.com ; Anderson Cooper at CNN, tuckercarlsonatnight@fox.com ; thestory@foxnews.com , danaperino@foxnews.com , FB Meet the Press, Face the Nation, Terry Gross of NPR, Scott Simon of NPR, PBS . Send your letter to your U.S. Senators, House member, Governor and more. I can speak on any of those programs with sobering facts, figures and what we face. I have another 20 colleagues who can speak to our water, energy, resources and climate conditions facing all of our children. Americans need to be educated as to what our civilization faces. We need to change course toward a viable civilization.

If we don’t stop endless and mass immigration, your kids won’t have a civilization that’s livable.
