

# OK What Are Aliobama And Friends Up To Now

Ron Edwards

It was horrible that Americans were stupid enough to elect Barack Husein Obama president of the United States of America. Even with the improved economic conditions and the partial rebuilding of our military under the trump administration our republic still sits near the brink of collapse, destruction, implosion, you name it. That is a slight improvement over being directly on the point of destruction by the end of Obama's second term. But we must not fool ourselves into believing our republic has been completely spared as of yet, from the evil plots, plans, tricks and snares devised in the wicked minds of Obama and his friends.

From the outset of his administration, Berry Obama as he was known in Hawaii literally embarked upon a mission to encapsulate the United States in a bubble of an irreversible globalist nightmare. At the very least, if Aliobama had his way, would have become a cheap imitation of the democratic/socialist nations of Europe. For example, the meager seventy miles of new and repaired wall on our southern border would be non existent if Obama had his way. I will never forget how he, on behalf of the United Nations used the office of the presidency with backing from the United Nations fought to prevent former Arizona governor Jan Brewer from protecting her state's southern border.

Unfortunately, governor Brewer was forced to try and bolster the Arizona southern border on her own. Because the federal government globalists under former president Obama refused to carry out their mandated duty to protect our republic. Most Americans do not know it, but because of the despicable Mr. Obama maltreatment of the military, our nation could have easily been successfully invaded and overrun by enemies like China, Russia and North Korea who some say were plotting to do just that. I cannot tell you how many small and medium size business owners had to shutter their doors during the anti American AliObama regime. It was heartbreaking to witness the despair of business owners who's family enterprises that had been thriving for several decades and reduced to nothing because of Barry Obama's anti American business policies and regulations.

Obama purposefully hampered our nation's ability to be energy independent, by blocking new oil pipelines and by putting overly zealous restrictions on drilling for crude oil and fracking. He was hell bent on restricting our energy capacity by sticking us with so-called green energy sources like giant windmills, solar power and battery operated automobiles. Speaking of battery operated automobiles, did you know that one Tesla auto creates more polluting emissions than you might believe. According to Devonshire Research Group, an investment firm that specializes in valuing tech companies, dug into the data and concluded that Tesla's environmental benefits may be more hyped than warranted. The Devonshire Research Group explains how in their study published by unlimited WIRED access. What AliObama and friends are up to now.

Recently Barry Obama conducted a very underhanded meeting at the United Nations. The "former" commander in chief held a

meeting with the heads of numerous countries at the United Nations. The main focus of that unauthorized gathering was how to neutralize president Trump politically if he is reelected in 2020, all at the behest of Obama. Among the nations represented were Canada, Mexico, Lebanon, China Nicaragua, El Salvador, Puerto Rico, Columbia, France, Ecuador, Iran, San Salvador, Haiti, Honduras, Syria, Guam and Guatemala. The last time I checked, exactly before I sat down to write this column, Obama's famous gathering of Trump hating nations is a violation of the Logan Act. The Logan Act is a United States federal law that criminalizes negotiation by unauthorized persons with foreign governments having disputes with the United States. The intent behind the Act I to prevent unauthorized negotiations from undermining the government's position. The Act was passed following George Logan's unauthorized negotiations with France in 1788 and was signed into law on January 30, 1799.

Former Secretary of State John Kerry in my opinion also broke the Logan Act law. Because Kerry counseled Iran against the Trump administration after president Trump correctly pulled the United States out of the foolish nuclear arms deal that he had orchestrated for his boss president Obama. In fact, Kerry told Iranian dictators that Trump would be gone in a year. Hopefully they and all leftist under miners will be corralled by justice. We the People of this great republic must not sit by and allow former elected officials to try to undo our ballot box choices. They literally want to turn our republic into a socialist/globalist crap hole.
