

Our American Ecological Footprint Is Three Times Larger Than Our Country

By Frosty Wooldridge

February 13, 2023

While we watched Superbowl LVII, and the commensurate celebration of our national pastime, other more serious consequences continued grinding down our ability to sustain our civilization.

As you know, Biden and Congress have invited over 6.6 million refugees into our country within the past 25 months. The next 24 months with Biden's push to leave our borders open to anyone and everybody will result in another 6.6 million people. That's over 13.2 million added people and another 4.0 million of their babies. We're talking something to the tune of 17.2 million more people who need water, food, housing, medical, schooling, energy and LAND. All in just four years!

Biden suffers from Alzheimer's; thus, he has NO idea of what he is forcing onto America's future. He cannot comprehend the consequences of his actions. Our 535 Congressional members are just about as brain-dead as Biden.

What's coming as to our ability to sustain America?

It's called unsustainable "ecological footprint" or what it takes to sustain all 340,000,000 (million) of us...now and into the future. We're running out of water, energy, food and resources to sustain our population. But we're about to add

100 million more within 27 years. I can't say this fact enough!

Roy Beck of www.NumbersUSA.com said, "The "migrant busing" story has taken a new turn. New York City – a self-proclaimed "sanctuary city" – has "no more room" according to its Mayor. Same with Denver, Chicago, LA, New Orleans and NYC!

Exceeding worldly limits can quickly become a cruel kind of compassion. There are 160 million adults worldwide who want to permanently relocate to the United States today. Hundreds of millions more would resettle here today if they could.

New York City is buckling under 30,000 migrants. Mayor Adams believes he needs \$4.2 billion to cover the costs of the crisis in 2023 and 2024, and he doesn't have the budget. That's the cold reality.

Beck said, "The welcoming instinct may be limitless in the human heart, but there are only so many people a city can house, feed, and otherwise provide for. Even in a rich megacity like New York, the promise of infinite vacant housing and empty beds eventually runs up against spatial limits and proves to be unsustainable.

"In addition to housing, people need new/expanded municipal infrastructure such as water supply lines, roads, schools, police/fire, and even sewage treatment capacity. Increased density can mitigate the impact this development has on nature and open space, but it cannot offset the losses. This 90 second graph will show you what ecological footprint means to you and your children."

This is a 90 second explanation and graph about ecological footprint:

Beck said, "Now that illegal immigration has numerically

overtaken legal immigration, Congress must act. The Border Safety and Security Act, H.R. 29 would require the Department of Homeland Security to turn illegal migrants away if they cannot be detained or put into a program like the Migrant Protection Protocols. By requiring DHS to stop releasing migrants into America, this bill would remove the incentives and expectations for coming to America without authorization, and would be the first step towards stabilizing the border.”

In the end, we must ask ourselves as mother and fathers if we want the kind of future that is exploding into our faces. Yes, the rest of the world suffers from 83 million new babies, net gain, annually. But, are we supposed to take all of them into our country? And where will that lead our civilization?

“Most Western elites continue urging the wealthy West not to stem the migrant tide [that adds 80 million net gain annually to the planet], but to absorb our global brothers and sisters until their horrid ordeal has been endured and shared by all—ten billion humans packed onto an ecologically devastated planet.” Dr. Otis Graham, Unguarded Gates

What can you do? You need to write, call and visit your House member, your two senators. You need to write your governor, mayor, newspaper, and more. You need to get on FB, and the rest of social media and demand that talking heads address what’s coming. Speak on your local radio talk shows. Contact 60 Minutes, Terry Gross of NPR, Scott Simon of NPR, your local radio stations, David Muir, Norah O’Donnell, Lester Holt, Anderson Cooper, Tucker Carlson. Do it repeatedly by the week. You are the energy that will drive a national movement to save our civilization from certain collapse.

“Unlimited population growth cannot be sustained; you cannot sustain growth in the rates of consumption of resources. No species can overrun the carrying capacity of a finite land mass. This Law cannot be repealed and is not negotiable.” Dr. Albert Bartlett, www.albartlett.org , University of Colorado,

USA.

And the last question: why isn't anyone in Washington DC addressing this horrific future?

This video graphically and dramatically illustrates America's immigration-population crisis as well as the world's. I wrote it and narrated it. Tim Walters of Cleveland, Ohio directed and produced. Please forward it to all your friends, networks and beyond. Place it on FB, Twitter, LinkedIn, Parler and more. Just click the link below to see the video.
