

# Our Current Situation and Pending Mostly Catastrophic Issues

By Andrew Wallace

June 3, 2025

Make no mistake. We were on the brink of Guerilla Warfare and a Dystopian future if Trump had not been elected. But this is only a brief respite unless Trump can navigate through the following realities:

1. We remain on the brink of Economic and Financial ruin if Trump's Heroic, Bold and Go-for-Broke Policies are not successful . We really have no choice. These policies were designed to, among other things, return manufacturing jobs to the United States, reduce inflation, and reduce our foreign exchange trade deficits.

The resulting increase in middle class employment is expected to revitalize the American Dream, reduce inflation, strengthen the dollar, and rebuild the Rust Belt.

2. The use of tariffs is the essential component to revitalize our economy, as it did prior to the Coup of 1913 when tariffs financed the government and protected industries and jobs.

3. But it must be noted in the strongest possible words that our Constitutional Republic was not designed to be financed by federal income taxes. In fact, it is impossible to have a Constitutional Republic supported by federal income taxes. The Federal Establishment (it is not a government) must be

financed with tariffs alone, with contributions from the states if necessary. Federal income taxes finance wars, Communism, and put all power in the Federal Establishment and the Parasitic Super-Rich Ruling Class (PSRRC), contrary to the Constitution. The PSRRC are the super-rich who control corporations which direct and bribe politicians.

4. Our 36 Trillion-dollar deficit is like a sword over our heads, ready to destroy us economically at any time. Interest on this debt is over one Trillion dollars a year and growing rapidly. It is equal to 20% of government income. It is an impossible burden that can only be corrected by terminating all unconstitutional functions (a majority) and limiting Federal Establishment to functions authorized by the Enumerated Powers in the Constitution. Most of the Federal Establishment is now a Criminal Enterprise with no legal support whatsoever. President Trump has the power to correct this because it is not legal.

5. The Privately-Owned Federal Reserve Bank is Unconstitutional and manipulates our currency for the benefit of the PSRRC (such as for wars for profit). The currency must be returned to gold and silver backing to reduce inflation and maintain value. They can't print gold to finance wars.

6. We have a major barrier to a functioning Constitutional Republic, and it is the established Communist Governments. In big cities and Blue states, the able-bodied Communists who don't work are unconstitutionally funded by the Federal Establishment from taxes collected from working people. Remember Communism only works until it runs out of other people's money. One of three things will occur: unlawful money will be cut off, those who work will demand a cutoff, and Communists will revolt when funds are cut. It is important to note that funds paid to those who do not produce goods or services are highly inflationary.

7. Our political leaders since at least the Coup of 1913 have

ignored the admonition of our founding fathers to stay out of foreign wars. We had no business being in WW one or two or any conflict in the last 80 years. None of the antagonists could invade us and only the Military-Industrial Complex of the PSRRC profited. Our oceans protect us from invasion. We are only vulnerable to nuclear war and the Communists within.

**8.** As a bankrupt country, we have no business in wars with or without a Declaration of War, or unlawfully spending money on foreign aid and stationing our troops in 150 countries.

**9.** The greatest single threat to our Constitutional Republic, our standard of living, and our security are the tens of millions of illegal invaders. They destroyed Europe. All financial assistance to illegals must be terminated and they must be deported as quickly as possible, regardless of cost. May the politicians of both parties who allowed open borders go straight to hell.

**10.** We have a severe shortage of English-speaking high-school graduates in the labor force because the federal establishment gives them more benefits of all kinds to encourage them not to work. In many cases these government benefits exceed what they could earn working (and are Unconstitutional)!

**11.** We have a serious problem because we support Israel in its Genocide in Gaza. A good part of the world hates Israel, and hates us for supporting them. The foreign aid we give Israel and any country is unconstitutional. I lack firsthand knowledge that the Jewish lobby controls our government but the preponderance of evidence supports that opinion. It further states that we have been in almost constant war in the Middle East in support of Israel and our Military Industrial Complex.

The difficulties facing our country are complex but the solutions are simple and well-known (obey the Enumerated Powers). When you have a Constitution and mostly ignore its

provisions, you end up with a mostly Criminal Enterprise and the “Royal Order of the Purple Shaft with Barbed Wire Clusters.”

God Bless You and the Republic
