

# Part 2: Open the Borders to One and All: What's Coming

By Frosty Wooldridge

August 28, 2023

Part 2: Massive consequences coming, let's bring them on now so we get a taste of the future in the present.

Usually, a dozen emails from you readers, respond to my columns each week. After last week's call for wide-open borders to accelerate our oncoming crisis to our civilization, you flooded me with emails. It appears we're already in the midst of seeing our country trampled into the dustbin of history. Therefore, I'm going to address a few more nightmares awaiting us as those migrants, both legal and illegal, pour into our country at 5 or 10 or 20 or 100 million in the months and/or years ahead.

From a writer in Minnesota:

He said, referring to my references to Australia's limited water, oil and resources being too limited to expand their population, "Australia is a larger example of the inevitable environmental, social and economic implosion due to open borders, and overpopulation.

"My own city, Brooklyn Center, MN, just north of Minneapolis is a perfect at home example. The U.S. Government imported 125,000 Somalians who could not read, write, use a toilet, or understand what it means to become educated and actually work in America. (Average IQ of a person born in Somalia stands at

68. That's an IQ that cannot pass any math, science, biology or other subjects beyond 6<sup>th</sup> grade.) That's why they will remain on American welfare programs generation after generation. (Source: [www.brainstats.com](http://www.brainstats.com) , Jan 31, 2022. What is the average **IQ** in **Somalia**? Avg. **IQ**: 68. World ranking: #38.)

"It has gone from a jewel in Minnesota to THE cesspool ghetto of Minnesota.

"The City just completed a survey. Mostly the results said practically everyone loves it. They love it because 9,000 White's have left, replaced by 3rd worlder's. A U.S. ghetto is better than a 3rd world overpopulated dysfunctional mess. They control the polling. Indeed, the survey appears to have been designed with a result in mind.

"Our local schools mirror the consequences; they are among the worst in the state, probably the nation. Our high school reflects the change: passing tests in Science 8%, Reading 27%, Math 4%. ACT college readiness rate 3%.

"When our children went to Brooklyn Center High, it was ranked among the best schools in the state when Minnesota had great schools! Now it's a remedial education dump."

Little known fact: Somalia's population stands at 18,000,000 in 2023. By 2050, United Nation projections show them doubling to 36,000,000 (million). When you deal with illiterate populations, they simply cannot comprehend birth control, family planning, climate change brought about by resource consumption, or the fact that they will overpopulate themselves into starvation. That's what's happening in all of Africa as they jump from 1.4 billion to 2.0 billion within the next 27 years by 2050.

Therefore, it's imperative that we save them in 2023 by bringing another 10 to 20 million Somalians into our country.

If all Americans cried out in mass that we desperately need to save the rest of the world by importing the “rest of the world” into America in 2023, we could really bring their crisis into our country to become “our crisis.”

How about another example? How about Egypt? They stand at 118,000,000 in 2023. United Nations population projections show them reaching 190,000,000 (million) by 2050...just 27 years from now. As it is, their form of birth control mandated by the Quran is to add another canal ditch off the Nile, birth four kids each, from their four wives, and keep living in abject misery. Please note, 80 percent of their population lives off grains and other foods from Canada, America and Australia. If not for our ability to produce food, they would suffer incredible famine.

So, let's save them, too. Let's bring another 10 to 20 millions of them into the USA in the next five to ten years.

One responder said that there's no way Americans can kill 1,000,000 vertebrate animals via roadkill 24/7. That shows you that the majority of Americans do not possess a clue as to what's coming when we add another 100 million immigrants and their children. Source: [www.hillsforeveryone.org](http://www.hillsforeveryone.org) “August 8, 2019 Did you know that roads—across the United States—kill more than one **million** animals PER DAY? That's 11.4 every second. This only includes animals found immediately adjacent to the road—not the ones that manage to crawl off the side of the **road** and die elsewhere.” A better estimate is over 400,000,000 animals die annually at the hands of motorists, wind turbines, propeller blades, speed boat blades, etc.

Source: [www.culturechange.org](http://www.culturechange.org) “Every year our nation's experimenters **kill 100 million** lab animals, hunters **kill 200 million** “game” animals, and motorists **kill** nearly 400 **million** roadkill animals. Only America's meat-eaters take a larger toll than its motorists. For every dead animal counted, three or four more die

unnoticed.”

Can you imagine those statistics with another 100 million immigrants? If we import 200 million or 300 million immigrants to give them a better life, we could easily bring our roadkill’s stats ever higher while we wreak havoc on the Natural World.

What will our airports and skies look like with another 100 million immigrants? Have you been to any of our airports lately? I can tell you that Denver’s DIA stands as one of the nightmares of the modern world. If we can just jam in another 3.0 million people into the Denver area, which we are doing with all those illegal piling up in our city, well, you can imagine the outcome not only on the ground, but the enormous number of planes in the air. Have you heard of Denver’s Brown Cloud? It’s dirty, brown, filthy air, loaded with chemicals and everyone living in Denver breathes those poisons 24/7. Let’s make more of poison air as soon as possible.

Wouldn’t it be great if Joe Biden would import at least 5,000,000 additional illegal aliens annually, on top of the 1,000,000 legal immigrants annually? I’m certain all those “sanctuary cities” would love to host millions more in their hotels like in New York, Chicago, Denver, Atlanta and beyond. We could see those 70,000 homeless in Los Angeles jump to 170,000 homeless. Wouldn’t that be ducky! Don’t you just love being a taxpayer in a sanctuary city? Annual costs for illegals: \$150,000,000,000.00. (Source: [www.fairus.org](http://www.fairus.org) “Costs to US taxpayers for illegal aliens.”)

Heck, Biden could really rev-up our national immigration crisis in 2023, which would finally, show all Americans their God-awful futures that would match present-day Somalia, India, China and any other overpopulated third world country.

Note: they did it to themselves. And, so are we doing it to ourselves by voting such pathetically inept and incompetent

men or women, Biden/Harris, into the White House or leaders of sanctuary cities/states! So yes, let's bring on our national immigration crisis nightmare much faster so we can taste a slice of the future right here in 2023. Are you excited about the outcome? Especially for your children?
