

Probabilities and Brutal Reality, Based upon Experience and History

Andrew Wallace

July 8, 2023

People with a modicum of education and knowledge would agree that our present situation is similar to the fall of Rome.

The similarities are frightening: currency was debased, military was weakened, people were on the dole, corruption was rampant, crime was uncontrolled, citizenship had no value, enemies were at the gates, and people abandoned the cities.

Our founders learned from Rome that a Democracy always fails; it is mob rule. As a result, we are believed to be living in a Republic, where democracy only means the right to vote in fair elections, with the benefits and protection of our Constitution.

We don't live in a Democracy (MOB RULE) and never did!

We know, from our own revolutionary war and history in general, that it is always a small group of agitators that instigate initial confrontations that provoke the rulers to retaliate, which in turn unites the larger group to action.

Our population is divided into two basic groups. One group believes in our Constitution and the Rule of Law, while the other is brainwashed and ignorant of its contents, and lives off the government dole or crime. But 50% of the population,

comprising both groups, are supported by government, one way or another.

Among other things, Communism requires an ignorant, dependent population without religion, education, or families. This is an apt description of our inner-city populations in Democrat-controlled cities, is it not?

Our founders left Europe to escape their cities; now our Democrat cities are worse than historic European cities ever were, and a mass exodus is now in progress.

The United States is a land of dichotomies, the most important being that half the population wants to be free, and the other half is content to be dependent, ignorant slaves molded by propaganda.

It is difficult to get a dependent population to demand its rights from the rulers, the Parasitic Super-Rich Ruling Class (PSRRC), but if for any reason the government can no longer support them, these people WILL revolt.

This is a real and dangerous reality predicted for the near future.

Our Constitution is the ONLY lawful justification for all government, but a majority of our federal government has no legal authority or support in our Constitution, the Supreme Law of the Land.

In other words, a majority of government is fake and a criminal enterprise!

If you need proof, simply compare the present structure, actions, and expenditures of the federal government to the lawful "Enumerated Powers" in the Constitution in Article 1 Section 8.

In simple terms, the Parasitic Super-Rich Ruling Class (PSRRC) are wealthy billionaire families who control the directors of

'woke' corporations to create cultural conflicts and bribe every member of government in both parties in all three branches.

Their objective is simple: the destruction of the United States to make way for their New World Order and Great Reset.

Most of us pray for a fair election that will turn things around, but we know that is IMPOSSIBLE unless we elect representatives that are NOT DEPENDENT on the PSRRC for campaign money and bribes.

President Trump is the only man who fits the bill with proven ability, and is certainly not dependent; in fact he is HATED by the PSRRC because he will expose and destroy their criminal enterprises!

Some people don't like him because his language is plain spoken and of the common people. The PSRRC and their wholly-owned media have smeared and framed Trump longer and more aggressively than any other man in history, causing the ignorant, dependent Democrats to hate him.

I have been a Patriot writer for 15 years and I have never been able to convert even one brainwashed Democrat...not even family members!

Mostly, these deceived minions won't even talk to you. They will only be receptive to the truth when they are starving, and experts forecast that, too, in the near term.

In the meantime, it is total stupidity to give them resources to destroy you!

Don't invest in or buy from 'woke' corporations that advocate BS such as the 'Trans' garbage, white racism, DEI (Diversity-Equity-Inclusion), and ESG (Environmental, Social, and Governance). These corporations don't support you or the Republic, and do not deserve your patronage!

The PSRRC and its Communist minions in 'woke' corporations are doing everything to impoverish the people and to destroy everything...and I do mean everything! Think food production, monetary system, Social Security, Medicare, Medicaid, criminal justice system, police protection, city-state-federal services, and etc, etc.

Illegal invaders who speak no English, have no skills or education and bring only diseases, crimes, and dependence, represent a dangerous element to our society. Citizens already resent them for their superior claim on scarce resources and government largess. I can imagine blood in the streets when invaders are fighting citizens over almost non-existent food supplies. Can't you?

Your only option is to pray for the election of an INDEPENDENT President and become as independent of the system as possible with defensive weapons and ammunition (shotguns and AR-15s), food, medications, and emergency supplies.

Many people maintain that God is our only salvation, if we do our part, and I agree with them.

GOD Bless You and Our Republic
