

Psycho Joe Turns on Dementia Joe

By Cliff Kincaid

July 4, 2024

President Trump called him “Psycho Joe.” Joe Scarborough, a former “conservative” Republican congressman from Florida plagued by personal problems, is a sad case indeed. Eating crow with egg all over his face, this Comcast/NBC/MSNBC media personality is a laughing stock for having insulted anybody in his audience who thought Joe Biden wasn’t up to the job of being president.

But there is more to the story – the fate of Joe Biden remains in the hands of the American politburo, led by Barack Hussein Obama. This is the real story most of the media won’t touch. They want you to believe Jill Biden is calling the shots.

To understand the precarious fate of the current Oval Office occupant, consider a fascinating [story](#) about the “official” end of the Soviet Union that claimed that old men helped cause the Soviet Union’s collapse and it is “a warning sign for the United States.”

Tragically, the end of the United States under Joe Biden could very well come to pass, as he hangs on to power and our enemies on the global stage plot their next moves. That would complete Obama’s “fundamental transformation” of the United States.

With two wars underway, another in the Middle East being feared, and a World War III with communist China and Russia

increasingly the subject of discussion, who knows?

What we do know is that the American people have been lied to by influential media personalities such as Joe Scarborough of MSNBC about Joe Biden's health problems. Interestingly, Scarborough is a former conservative Republican Representative who suffered a major scandal when one of his employees was found dead in one of his congressional offices.

The Alex Jones of MSNBC

Consider the difference between Alex Jones, who is going bankrupt because of his lies about Sandy Hook, and Joe Scarborough, still on the air after spouting lies about Joe Biden being in great health. Scarborough's MSNBC show is part of the Comcast media empire and cable monopoly. His job is safe, although his credibility is shot to hell.

In March, Joe Scarborough of MSNBC [declared](#), "Start your tape right now because I'm about to tell you the truth. And f-you if you can't handle the truth. This version of Biden, intellectually, analytically, is the best Biden ever. Not a close second. And I've known him for years. ... If it weren't the truth, I wouldn't say it."

I quote this statement, which has been noted by many conservative commentators, because I know something about Scarborough, a reported favorite of Joe Biden who was dubbed a "psycho" by President Trump. The publication Axios [said](#) Biden was "obsessed" with Scarborough's program and follows his lead. They talk regularly, the publication said.

How a character like Scarborough made it in the media world, and then used his perch to lie to his audience about a momentous issue of public importance like the president's health, says a lot about the condition of the media today. These people are as sick as Biden, but in different ways.

In contrast to the old Soviet Union, where the Communist Party

could pick and choose leaders, American presidents are limited to two terms. However, with many thinking Biden's term has really been Obama's third term, one can't resist concluding that Obama is orchestrating the political campaign of the Democratic Party behind the scenes. In effect, Obama runs the politburo of the Democratic Party.

Obama, not Jill Biden, is the real power behind Biden and he has decided Joe simply had a "bad debate night."

We have four months left in the Biden presidency and many ominous things could happen. Obama must know this.

The American Politburo

Let's examine the Biden presidency in the context of what communists did in the old Soviet Union.

The article about gerontocracy in the USSR was dated January of 2023 and declared, "The United States' leadership has more parallels with the latter days of the USSR than those leaders might care to admit. President Joe Biden is 80. His predecessor, Donald Trump, entered office at 70 and six years later is considered a frontrunner for the 2024 GOP presidential nomination."

Since the article by John Haltiwanger appeared, many things have changed, such as Trump becoming the GOP nominee and facing Biden in a debate showing signs of dementia. Trump, by contrast, seemed in very good health and was sharp on his feet.

In America, of course, there is no age limit on presidents. However, the "warning sign" that the author wrote about has come to pass, as millions of Americans saw Biden's sad and even pathetic performance. Still, he remains in office. That's Obama's doing, with an assist from sycophants like Joe Scarborough.

Anyone who paid any attention to Biden saw this coming, especially after the Special Counsel report found Biden to be a doddering old man not worthy of even being prosecuted for stealing and disclosing classified documents.

Scarborough's defense of Biden's health seemed defensive, based on his use of profanity against those who doubted him. Now he looks like a complete fool. But it's worse than that. E had to have known that Joe was a basket case.

Dr. Jekyll and Mr. Hyde

I remember Scarborough from his days as a "conservative" Republican Representative from Florida, when he introduced the United Nations Withdrawal Act of 1995 and I met with his staff to discuss it. He had a very conservative record. Indeed, he received a 95 percent lifetime rating from the American Conservative Union. He got a 96 percent rating from the National Right to Life Committee and a zero rating from Planned Parenthood.

What happened to Scarborough over the years? The easy answer is Trump Derangement Syndrome. But something else snapped during a time of significant personal problems.

We know that President Donald Trump in 2017 raised the issue of an "unsolved mystery" years ago in Florida that had the potential to hurt Scarborough's journalistic career. He was referring to the death of Lori Klausutis, who worked in Scarborough's Fort Walton Beach congressional office, in 2001.

Scarborough served in Congress from 1995-2001.

Trump [declared](#), "When will they open a Cold Case on the Psycho Joe Scarborough matter in Florida. Did he get away with murder? Some people think so. Why did he leave Congress so quietly and quickly? Isn't it obvious? What's happening now? A total nut job!"

Anybody can read the [medical examiner's report](#) and draw their own conclusions.

A reporter named Jon Webb investigated and [declared](#) that conspiracy theories gained currency because “of the complicated nature of Lori’s death” and the “long time” it took to release an autopsy report, “allowing speculation to flourish.” She had an “undiagnosed heart disorder” and fell in an empty office with no witnesses present, the reporter said.

Scarborough attacked Trump as “a politician so obsessed with a morning cable news show that he has sought retribution by repeatedly defaming a dead woman’s memory.”

Scarborough’s Obsession With Trump

According to Axios, it was Biden who had an “obsession” with Scarborough.

It appears that some kinds of “obsession” are perfectly acceptable. Axios found nothing wrong with Biden’s obsession. I find it weird.

Equally significant, Scarborough’s [personal life](#) has not been without controversy. He was divorced two times and married his MSNBC co-host, Mika Brzezinski, in 2018. She divorced her own husband in 2016.

I am not “obsessed” with Joe Scarborough. But I am curious about his change of heart, the death of his former staffer, and his demonstrable lies about Biden’s health. This is a person with contempt for his audience and a desire to deceive them for political purposes. He went from one end of the political spectrum to the other.

After the debate, Scarborough reversed himself again, wondering “whether this man we’ve known and loved for a very long time is up to the task of running for president of the United States.” Scarborough did not say if he wept. Perhaps he

has resorted to screaming f-you in front of the mirror.
