

Republicans Must Denounce Climate Change Scam

By: Devvy

February 13, 2023

The so-called climate change catastrophe just lurking from one decade to another is not only a scam, but a carefully crafted plan to destroy capitalism in America. Jeri Lynn Ball, a prolific writer and researcher addressed this 23 years ago in her book, [Masters of Seduction: Beguiling Americans Into Slavery and Self-destruction.](#)

“At the Sixth Party Congress held in Moscow in 1928, Communists wrote and approved “The Program” to bring in the New World Order. What most Americans don’t know is the real nature of this diabolical criminal scheme. The Program of the Third International called for a global environmental program and for the transformation of all human beings on earth to accept the New World Order.

“These and other facts are brought to light by General Benton Partin in his videotape, Globalism: The Program. The Communists planned to use the global environmental program as a means of eradicating national sovereignty and creating a world dictatorship.”

[Demand Congress Stop Funding This Manufactured Hoax](#) (Mine)
Feb. 25, 2019. A MUST read:

“At the Earth Summit in Rio De Janeiro, June 3-14, 1992, the Secretariat for World Order distributed a nonpublic document titled, “The Initiative for Eco-92 Earth’s Charter.” It reads,

in part, under policies that must be implemented as follows:

"The Security Council of the U.N. will inform all nations that outmoded notions of national sovereignty will be discarded and that the Security Council has complete legal, military and economic jurisdiction in any region of the world ... The Security Council of the U.N. will take possession of all natural resources, including the watersheds and great forests, to be used and preserved for the good of the Major Nations of the Security Council."

In the late Dixie Lee Ray's book, *Environmental Overkill – Whatever Happened to Common Sense*, one gets a full accounting of what really went on with Al Gore and his loony friends at the Rio Summit. On page 10 of her book, it states:

"The objective, clearly enunciated by the leaders of the United Nations Conference on Environment and Development (UNCED), is to bring about a change in the present system of independent nations. The future is to be world government, with central planning by the UN. Fear of environmental crises, whether real or not, is expected to lead to compliance. If force is needed, it will be provided by a UN green-helmeted police force, already authorized by the Security Council."

"The EPA is the flagship in America to carry out this environmental terrorism against our people. In the ensuing years, the EPA has become more destructive than a cat five hurricane." Another unconstitutional agency bleeding us dry.

Dixie Lee Ray was a former governor of Washington State, Chairman of the Atomic Energy Commission and Asst. Secretary of State in the U.S. Bureau of Oceans. She passed away in 1994 and was a Democrat.

Rush Limbaugh was right on point. (1993):

"A way must be found to get this book into the hands of as many Americans as possible. The myths promulgated by militant

environmentalists are now accepted as fact by far too many who are ripe for a cure for this so-called crisis – a ‘cure’ which will actually rob them of much of their economic and political freedom. Dixie Lee Ray challenges the environmental prophets of doom and gloom with penetrating searing truth.

Environmental Overkill is a right light that exposes the fraud and deceit being perpetrated against an unknowing public.”

We’ve all read and seen the antics of teenager, Greta Thunberg. Another global warming (oops, that didn’t sell after decades of BS), I mean climate change zealot. Of course, globalists used Thunberg to be the know all of science because of her age. Here’s this child with Asperger’s syndrome on the autism spectrum begging world leaders to stop burning up the planet! And, scolding governments, “How dare you” during summits.

The so-called green industry is a disaster. Our governor, Greg Abbott, is just as big a fool as the rest of them – or not [as he has attended the evil, diabolical WEF \(World Economic Forum\) conferences](#). Greg Abbott is a slippery, slimy, lying professional politician. 1:22 video: [Texas Governor Greg Abbott Refuses to Denounce WEF Klaus Schwab UN Agenda 2030 // Scientists Sound Alarm as Gates, WEF Promote Gene-Editing Technology For Everything From Fake Meat To Designer Babies](#), Oct. 14, 2022

Abbott and our long-time Republican controlled legislature have fallen for the massive lies vomited up daily about climate change, the end of the earth as we know it, blah, blah, blah. Well, it came back to bite all of them with more than 100 dead Texans when the Polar Vortex hit our state two years ago this month.

Al Gore(bechev) all but spewed spittle last month having a temper tantrum. But, rest assured, he’s comfy and pampered as he flies around in a private luxury jet like the rest of the

climate change hypocrites.

[Al Gore at DAVOS 2023: “We Have the Tech to Slow Climate Change – So Where’s Political Will”](#), January 24, 2023

“The International Energy Agency says that, for a 50% reduction [in CO2 emissions], we have all the technologies we need with proven deployment models already available to us. The next 50%, after 2030, we have the technologies that are in development. We see the pathway to improve them. We know how to get there.” said Al

Gore at DAVOS 2023.” [Junk Scientist Al Gore Goes on Unhinged Rant on Climate Change at WEF – Claims “Oceans are Boiling “Creating Atmospheric Rivers and the Rain Bombs”](#) (VIDEO), Jan. 23, 2023

Well, big Al, in this country it's the will of the people and we know the truth about this manufactured hoax sold to sincere Americans who have zero understanding on the issue. We are also going to move heaven and earth to stop maniacs like you from destroying our country. You and the Gavin Newsom's are an enemy of the American people and our constitutional republic with your bald-faced lies.

Of course, all of them are given maximum media coverage while censoring true scientists who are trying to warn the world, not just this country. Just like those COVID injections.

[Net Zero Will Lead To The End Of Modern Civilisation, Says Top Scientist](#), Jan. 10, 2023

“In a recently published science paper, Dr. Wallace Manheimer said it would be the end of modern civilisation. Writing about wind and solar power he argued **it would be especially tragic “when not only will this new infrastructure fail, but will cost trillions, trash large portions of the environment, and be entirely unnecessary”**. The stakes, he added, “are enormous”.

“Dr. Manheimer holds a physics PhD from MIT and has had a 50-year career in nuclear research, including work at the Plasma Physics Division at the U.S. Naval Research Laboratory. He has published over 150 science papers. In his view, there is “certainly no scientific basis” for expecting a climate crisis from too much carbon dioxide in the atmosphere in the next century or so. **He argues that there is no reason why civilisation cannot advance using both fossil fuel power and nuclear power, gradually shifting to more nuclear power.**

“There is of course a growing body of opinion that points out that the Emperor has no clothes when it comes to all the fashionable green technologies. Electric cars, wind and solar power, hydrogen, battery storage, heat pumps – all have massive disadvantages, and are incapable of replacing existing systems without devastating consequences.”

The much touted “New Green Deal” is based on junk science. The same packaged lies the globalist cabals have been trying to shove down our throats since the 1970’s. Americans need to understand how all this green hysteria is destroying our way of life, will kill countless millions over time, regulate businesses out of business. Destroy our precious family-owned farms and ranches so all agriculture will be controlled by big corporations. **Control the food supply (feeding us bugs and fake meat) and you WILL control the masses.**

[Climate Theories Crumble as Data and Experts Suggest Global Cooling](#), August 21, 2013 “According to experts, the most recent revelations continue to make a mockery of alarmist claims – debunking United Nations theories about human-caused global warming and the wildly inaccurate supposed “climate models” used to forecast doom and gloom by forces seeking carbon taxes and more centralized government.”

[GLOBAL FREEZING: 15-year ICE AGE to hit in just 4 years as the sun prepares to ‘HIBERNATE’](#), Nov. 8, 2016 – “A team of experts have warned that huge seismic events, including volcanic eruptions, plunging global temperatures and destabilisation of the Earth’s crust will become more common after worrying changes to the surface of the Sun were recorded.

“It could take up to 15 years for solar activity to return to normal with extreme weather and freezing temperatures continuing until 2035. The warning will infuriate environmental campaigners who argue by 2030 the world faces increased sea levels and flooding due to glacial melt at the poles. Solar activity, measured by the appearance of sun spots, has been declining at a greater rate than at any other time in history, it has emerged.”

[British Astrophysicists: “Mini Ice Age is Accelerating – New ‘Maunder Minimum’ Has Begun” + the Beaufort Gyre](#), Sept. 23, 2020 – “For the next 20 years it’s going to get colder and colder, on average, says Corbyn who holds a B.Sc. in Physics and an M.Sc. in Astrophysics. The jet stream will be wilder: there will be more wild temperature changes, more hail events, more earthquakes, more extreme volcano events, more snow in winters, lousy summers, late springs, short autumns, and more and more crop failures.

“The fact is the sun rules the sea temperature, and the sea temperature rules the climate,” explains Corbyn. “What we have happening now is the start of the mini ice age ... it began around 2013. It’s a slow start, and now the rate of moving

into the mini ice age is accelerating. "The best thing to do now is to tell your politicians to stop believing nonsense," concludes Corbyn.

[Delingpole: Climate Alarmists Finally Admit 'We Were Wrong About Global Warming'](#)

[Climate Change is a Malicious, Dangerous Myth](#), Nov. 9, 2022 – "It is the global warming hoax which is going to destroy us. It's the mad green, fake environmentalists, sanctimonious and self-important, who are going to kill us by forcing us to cold turkey off fossil fuels and live in a cold, cruel world where the poorest will starve or freeze to death and where the chosen few, the self-appointed elite, will ignore reality, worship electricity (made from the diminishing fossil fuels) and create a pseudoscientific crisis out of thin air in order to oppress, suppress and banish humanity, decency, dignity and respect from our lives.

"The Intergovernmental Panel on Climate Change (IPCC) predicts that a global warming of 2.5 degrees centigrade to 4.0 degrees centigrade would reduce global GDP by 2% to 5% by the year 2100 but that the global economy will, by 2100, be between 300% and 500% larger than it is at the moment. This destroys the argument that climate change will have a noticeable impact on the global economy.

"The International Energy Agency has stated that by the year 2040 our planet will still obtain only around 5% of its energy needs from renewable sources (including burning trees or 'biomass'). If the mad greens have their way and stop us from using fossil fuels there is just one certainty: billions will die of cold and starvation.

"Of course, the majority of the preening, self-satisfied, ignorant global warming cultists actually believe that the world is coming to an end. These middle-class cultists are too stupid to realise that they are working for conspirators

determined to take away our freedom and our humanity and to control us with social credit and digital money.”

[Delingpole: Thirty Years On](#) – How Dirty Tricks in Congress Launched the Great Global Warming Scare

[Delingpole: The Five Best Arguments Against Climate Alarmism](#)

“In my view the last argument is the clincher. It’s the one that ought to unite all of us, sceptics and true believers alike. After all, even those who fully subscribe to the theory that climate change is dangerous, unprecedented and man-made ought surely to agree that there’s no point chucking money at the problem if it’s going to do more harm than good.

“Yet this is exactly what is happening. Taxpayer-subsidised wind and solar are doing huge damage to the environment, to wildlife, and to the economy. Biofuels are destroying rainforest and agricultural land, driving up food prices, needlessly hurting nature.

“Rent-seekers in crony capitalist Potemkin industries like renewables are being subsidised to produce inefficient, intermittent, unnecessarily costly power, misallocating scarce resources and driving the indigent deeper into fuel poverty. Science in universities and schools is being corrupted by a Climate Industrial Complex which rewards science, however flawed, which promotes the alarmist narrative and which punishes science that defies the so-called “Consensus”.

“Vast sums of public money – in excess of \$1.5 trillion per year – are being squandered on the chimaera of “climate change.” Yet despite all this spending, using the alarmists’ own calculations, it will offset “global warming” by the end of the century by 0.048°C (0.086°F). That’s 1/20th of one degree Celsius. The activists, shyster politicians, rent-seekers, dodgy scientists, media second-raters and other useful idiots who are pushing for more climate action are demanding the impossible. If ever they achieved their

ambitions, western industrial civilisation would collapse.”

Here are the facts:

“The average global temperature is not climbing to dangerous levels. The Earth's temps have increased according to the NOAA by less than 1°C in the past century. There is no evidence that this kind of temperature increase represents a threat to the environment or human health. In fact, the Earth's temps have been much higher than they are today multiple times in the Earth's history long before man-made carbon emissions were a thing. The official temperature record used by climate scientists only goes back to the 1880s – That is a TINY sliver of time in comparison to the epic lifespan of the Earth's atmosphere.”

And **gutless Republicans** – even when they controlled Congress under Bush, Jr and Donald Trump – have caved to the lies and propaganda for votes. The same with our state legislatures

bleeding us dry in taxes to pay for our own destruction.

[Climate scam and cowardly Republicans helped kill red wave](#), Nov. 14, 2022 – “Imagine if Republicans had picked up another 8% of votes, what the Republican “red wave” would have looked like in the Nov. 8 election. Exit polling showed that roughly 8% of voters ranked non-existent “climate change” as their No. 1 issue when going to vote last Tuesday in the midterm elections.

“Since 1974, Republican and business leaders have been too afraid to address the clearly false superstition that humans are changing or ever could change the temperature or climate of gigantic planet Earth. Because they thought it would just go away if they ignored it, we now have actual, real votes for Congress changed based upon a myth.

“But now we see that real votes for real House members and U.S. senators are being affected by the climate cult. This is not just something we can shake our head at and go back to real things. This myth is actually harming our nation ... and the world.”

Much of the evil is being done through county commissioners and unelected private organizations while Americans are trying to pay the mortgage/rent and put food on the table. The same with our state legislatures and YOU had better let your state rep and senator know (no threats) climate change is a hoax, a scam and by God, you had better come out and denounce it and stop raping us in taxes for pay subsidies “green” companies, solar panels (creating an environmental wasteland which I covered before) and all the rest. Remind he/she the primaries coming up next year will be how we throw you out of office as we are fed up with being scammed and taxed to death for global elites who hate us.

I know, many state legislatures are majority ruled by the

Democrat/Communist Party USA but once you present he/she with enough ammunition (relax FBI) to back up your argument, perhaps some will actually realize the damage being done by this climate change hysteria. Likely there are some who don't believe it but tow the party line to make sure they get moola to get re-elected.

Republicans must denounce climate change as a scam, it's all a big lie and explain how it's destroying businesses, Americans, the environment. That's it's a global movement to take away your rights, your property, **force you into 'smart cities' like sardines in a can.** [Here, go take a look](#) and [here](#) and if you don't think it's not in the planning for the next decade, *think again* because they are being built in Communist China, here in the U.S. and other countries You think I want to live in one of those boxes?

We'll all be forced to drive those disasters called electric vehicles. **Yes, auto makers are pledging to do away with all gas powered cars, SUV's and trucks. I have a ton of disasters regarding EV's and buyer's remorse.** Mark my words: Republicans WILL get massive support not only from Republican voters but independents who know the truth.
